Textbook Annex offers new rental program

About 35 percent of texts will be available in first semester

By Michelle Williams
Collegian Staff

Posted to the entrance and taped to walls and shelves throughout the University Textbook Annex are red and white For Rent signs. Is the building up for lease? No, but textbooks are.

For the first time, the University bookstore is offering students the option of renting textbooks.

"Textbook prices are so high, students are always trying to find a good deal, and we're offering it," said University of Massachusetts Bookstore Director Ken Kahler. "We're hoping to keep students buying books on campus and offer one-stop shopping."

Through Rent-A-Text, a new program sponsored by the Follett Higher Education Group, the company that runs the University bookstore, students will be able to rent textbooks for a semester.

Last fall, Follett tested the rental program at seven universities and found students saved, on average, 50 percent or more compared to the cost of new books. They have expanded the program to more than 600 university bookstores this semester.

The Rent-A-Text program offers over 650 textbooks this semester, or about 35 percent of all books on students' syllabi, Kahler said. He expects the program to offer more titles for rent each semester.

With the rented texts, students are allowed to highlight and write in the books, just as if they bought them.

"We expect the normal wear and tear in books. Obviously students can't return books with water damage or a torn-off cover, but writing in the books and highlighting is perfectly fine," said Kahler.

As of late August, Kahler said approximately 300 students had signed up for the textbook rental program, and he expects many more as the school year continues.

Hoping to cut costs, Erwin Apaza, a nutrition major, signed up for the rental program on the University website.

"I need textbooks for class, and if I can rent them and save a few bucks, why wouldn't I?" he said.

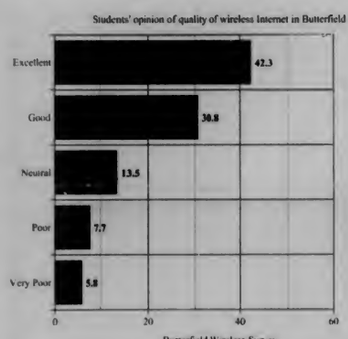
Of his textbooks, the bookstore offered a rental for one book, for a physics class. Priced new at $40, Apaza saved $24 renting.

This program is one change among many to bookstores across the country. The federal

See TEXTS on page 4

The Textbook Annex has started a new textbook rental program. Through the rental option, students can expect to save compared to buying. This psychology text was priced at $140.75 new, while for rent it was just $63.34.

OIT pulls plug on wired Web



SAM BUTTERFIELD/COLLEGIAN

OIT has converted large areas of campus Internet to wireless only, after a pilot program in Butterfield Hall last year was generally considered a success.

By Tim Jones
Collegian Staff

After a successful test pilot of wireless internet in Butterfield Hall in the Central residential area last year, the Office of Information Technologies (OIT) has installed additional wireless Internet routers in various dorms throughout the campus as part of an expansion.

Northeast, Orchard Hill, Central and Sylvan residential areas have all gone wireless, and students will no longer be able to access Internet through wall outlets but must instead connect over wireless signals.

Most recent laptops come installed with a wireless adapter, which is necessary to access the wireless Internet, known as WiFi, but those without such a feature will need to purchase one to plug into their computer.

The current and now useless outlets in dorm walls, which had previously provided access to the Internet, have been plugged up to prevent students from attempting to use an Ethernet cable to gain access to the Internet.

In order to install wireless connections throughout campus, wiring from all of the buildings, installed in the 90s, had to be stripped from all of the walls, a process that took all summer. OIT began work in May, when students left the dormitories for the summer.

Students will have the option of choosing between two servers, "UMass" and "UmassSecure1x." The UMass server will require students to log in with their OIT username and password every time they access the Internet. The latter will require students to download an application to their computer that allows them permanent access, without the requirement of a log-in.

OIT Help Desk Manager Andrew Vernon explained that there was a basic need to make a transition to wireless.

"A few of the biggest points

Well educated: UM produces 29 Teach for America grads

By Cameron Ford
Collegian Staff

Recently, the non-profit organization Teach for America declared the University of Massachusetts a top resource for applicants for its controversial program.

From last year's graduating class, Teach for America selected 29 applicants to join its teaching corps. The chosen students spent the summer training for their positions and were then sent to their teaching jurisdictions in low-income urban and rural areas around the country.

One of those 29 graduates was Kamellia Keo, who graduated from UMass with a bachelor's degree in biology, is currently teaching an eighth-grade science class in Washington, D.C.

"I love [Teach for America]," she said during a telephone interview. "It's a very hectic schedule; however it's great to actually be in a classroom. It was a great commitment."

"It's hard to picture what it's like to be in a classroom," continued Keo, "but once you're actually in one, you can actually see why people are so passionate about Teach for America."

Figures released by Teach for America show 46,000 applicants vyed-vied for 4,500 positions this past year, making the acceptance rate a mere 9.7 percent. The 29 of these selectees who attended UMass make the campus Teach for America's number 20 most prolific source for applicants from universities with enrollments greater than 10,000. UMass was also the only public university in New England to rank in this top tier.

"That's absolutely flattering," Keo said when informed of these statistics. "It's a great feeling because I came from a state school, and it's intimidating to realize how difficult it really is to get into Teach for America."

Keo also praised the quality of her education at UMass as one of the factors behind the success of her application.

"Being accepted in a highly competitive program with Ivy League graduates is a true testament to the quality of state schools," she said.

Teach for America itself is also heartened by these statistics, according to

UMass scientists develop app to aid wildlife injured in Gulf

By Michelle Williams
Collegian Staff

A new smart phone application developed by four University of Massachusetts researchers allows users working on relief projects in the Gulf of Mexico to submit photos and the location of endangered animals and wildlife to rescue workers.

The application, titled MoGo, or Mobile Gulf Observatory, is a free program and can be easily downloaded on iPhones or iPod Touches.

One researcher, Charlie Schweik, an associate professor in the Department of Environmental Conservation, felt a profound urge to help after the BP-owned Deepwater Horizon drilling rig exploded off Louisiana last April. All four researchers live in Western Mass.

"While I was listening to a news story on NPR about the spill, I suddenly realized we could use a program we were already working on and put it towards helping the clean up," said Schweik.

Schweik's idea was to create an application, which could be downloaded onto smart phones, allowing users to send photos and the location of endangered animals and wildlife to rescue workers along the 14,000 miles of Gulf coastline.

In need of help turning this idea into real-

A team of University of Massachusetts researchers has created a smart phone application which lets users pinpoint and track the location of injured wildlife affected by the oil spill in the Gulf of Mexico.

Du Bois goes digital: archives to go online

By Cameron Ford
Collegian Staff

Many University of Massachusetts students who frequent the W.E.B. Du Bois Library are unaware of one of the library's special collections.

The Department of Special Collections and University Archives (SCUA) is this hidden gem, residing on the library's twenty-fifth floor.

Despite holding "approximately 35,000 rare books, nationally significant manuscript collections, historic maps and the official records of the University of Massachusetts Amherst," according to the Library's website, research within this department is often difficult, owing to the fact that until now, research and data-gathering processes have been conducted only by hand.

That may be changing soon, however, thanks to a set of nine digitization principles recently endorsed by the Association of Research Libraries (ARL) in Washington, D.C.

To make research easier, colleges and universities have been turning to digitizing their special collections and archives, converting them to electronic databases where information can be sorted and retrieved by using a search engine.

However, the digitization process comes with added responsibilities for both the university and its vendor, which is usually a private company

See ARCHIVES on page 3

MICHELLE WILLIAMS/COLLEGIAN

W.E.B. Du Bois Library's archives will be scanned and uploaded to a database to enhance accessibility.

UM researchers craft smart phone app to aid injured animals

MoGo from page 1

ity, Schweik contacted computer scientist Deepak Ganesan, who specializes in mobile phones and sensor systems. Schweik also turned to wildlife biologist Curt Griffin and Andy Danylchuk, a fisheries ecologist, for help with the program.

For months prior to the spill, Ganesan and Schweik were working to develop a program to help identify invasive plants and insects. Together, the four UMass researchers adapted the program to allow residents of the Gulf to become what they call "citizen scientists." MoGo was available for download by late June.

"MoGo offers a method by which citizens can participate in reseue and recovery efforts of wildlife and restoration of the Gulf's habitats," states the program creators on their website, www.savegulfwildlife.org. "The MoGo app allows you to take and submit photos of oiled, injured and dead marine and coastal wildlife; tar balls on beaches; oil slicks on water; and oiled coastal habitats."

"Say you see an oiled bird along the side of the beach," said Griffin, explaining how the application works, "through the app you take a picture, and the program will upload the photo to a database with GPS coordinates attached. Then, it will give you the option to be put into direct contact with the wildlife hotline. The hotline will then deploy rescue workers to the location."

Griffin said fewer than 100 users have downloaded the application since it became available, a figure he attributes to the limited publicity he feels the program has received.

Though MoGo's users may be limited in numbers, the program has been graciously welcomed On Apple's webpage for the application, users gave an average rating of five stars to the program and wrote several positive reviews.

"Great app for areas affected by the spill! Finally a way for us to get involved! My reports start tomorrow," wrote one user.

The technology is also inspiring other environmental groups to craft new ways to help wildlife and animals.

"We've been contacted by a biologist from the Alaska Marine Mammal Stranding Network to adapt the program to help allow iPhone users to locate animals in need," said Griffin. "They're going to use a similar program to locate sea otters and other animals stranded on the shore."

Schweik and Ganesan are working to help the program facilitate environmental aid in Massachusetts, as well. Together they are altering the program to identify invasive species harmful to wildlife, such as the Asian Longhorned Beetle. Using the same concept as MoGo, the program will allow users to send photos of the insects and their location to the Massachusetts Department of Agriculture.

Through "citizen scientists," the researchers hope to enhance the efficiency of response efforts from the Gulf of Mexico to the trees of Amherst.

Toxic PCBs detected throughout Southwest

Sam Butterfield
Collegian Staff

Toxic polychlorinated biphenyls (PCBs) were found this summer in areas throughout the Southwest concourse while crews performed renovation work on the residential area, according to a University release.

After the compounds were discovered in caulk between patio blocks, lining retaining walls, between granite steps, on expansion joints of concrete curbs, expansion joints in the tunnel and caulking where concrete meets buildings, administrators put into place "remediation steps" to protect public health, while continuing renovations under a revised plan to isolate areas where the toxins were found.

Director of Environmental Health and Safety Donald Robinson said in the release that the University is working with state and federal agencies to develop a permanent remediation plan for Southwest.

"We are coordinating with the state Department of Environmental Protection and the U.S. Environmental Protection Agency to address the issue and create a permanent remediation plan," he said.

Robinson also said the University has sought the help of two environmental consulting firms, Woodward & Curran, an integrated engineering, science and operations company, and Triumvirate Environmental, a Somerville-based hazardous waste consulting organization, to aid with the remediation plan and other clean-up work.

"As a result, we expect to reopen Southwest, as planned, for the fall semester," Robinson added.

Southwest was erected in a time when PCBs were found in many building materials. When the complex went up in 1966, PCBs were often used as an additive to enhance the elasticity of building materials. The compound was banned in 1979 by the U.S. Congress and under the terms of the Stockholm Convention on Persistent Organic Pollutants.

PCBs have been known to have harmful and even carcinogenic effects on humans and animals since at least the 1970s. A 1996 EPA study found PCBs to be "probable human carcinogens," while the International Agency on Research on Cancer also labeled PCBs probably carcinogenic to humans. In addition, PCBs are known to weaken the ability of humans' immune system to fight disease. Studies have shown reductions in the size of the thymus gland, according to the EPA website, as well as a general weakening of the immune system's ability to respond to foreign antibodies and develop immunity.

Further research has indicated that PCBs reduce birth weight and gestation period in children born to exposed mothers, as well as learning deficits in exposed children, according to the EPA's "Health Effects: Polychlorinated Biphenyls (PCBs)" page.

Other University facilities were also constructed when PCB use was commonplace. The University has previously completed remediation plans on the Lederle Graduate Research Center and the W.E.B. Du Bois Library, according to the release.

Removal work was finished around Southwest before the beginning of the semester, so the area should by now be clear of the compounds.

The Collegian will have more on this issue early in the semester.

Sam Butterfield can be reached at sbutterfield@dailycollegian.com

Library begins process of digitizing archives

ARCHIVES from page 1

hired to assist in the process, as special precautions must be taken to minimize the risk of damage to pieces in the archives. The nine ARL adopted principles help to improve relations between vendors and universities throughout the digitization process.

According to Karla Strieb, the ARL's Assistant Executive Director, the digitization of any university's special collections gives schools a huge advantage in terms of ready access to reserves of information.

"Basically, the idea is to make [this information] more easily discoverable," Strieb said. "Simply to find out they exist is much easier when they're in digital form because ... they can be accessed in a wider variety of ways than going and visiting the special collections room and having the curator bring you the information while you look at it supervised."

"The number of ways you can use things for teaching and learning is quite different when they're in digital form," she continued. "You can make them more widely available to people at the campus, people beyond the campus, and people around the world."

The ARL describes itself on its website as "a nonprofit organization of 125 research libraries at comprehensive, research-extensive institutions in the U.S. and Canada that share similar research missions, aspirations, and achievements."

The library is a member, finding itself in company with many other top-notch university libraries, such as those at Cornell, Harvard, Princeton and Yale.

The library is currently in the process of digitizing its special collection and archives, according to SCUA head Robert Cox.

"The project we've got going right now to digitize the archives of the W.E.B. Du Bois is about a four-year project from start to finish," Cox said. "We think we're going to get the entire collection done within those four years."

The benefits of a digitized 35,000-piece archive go without saying. Students will be able to digitally search for specific data, rather than sorting through cartons of rare, fragile artifacts when the work is complete.

For the time being, Cox explained, UMass has chosen not to work with outside vendors, instead relying on "three full-time staff members."

"Our work has been to [digitize] in-house so that we can be more flexible, and so that we can also do it more inexpensively," he added.

However, Cox did not rule out the possibility of utilizing vendors in the future.

"It is probably the case that for selected projects at selected times we might wish to go ahead and use outside vendors," he said. "If we did so, we would want to make sure that vendors are producing ... them to the best possible standards."

This expectation could certainly be helped by the ARL's endorsement. The nine principles all deal with prevalent issues in digitalization projects, including security of artifacts, archive-donor rights, user confidentiality and limits on access restrictions.

Cameron Ford can be reached at cjford@student.umass.edu.

Say hi to WiFi! Dorm Internet goes wireless

WIRELESS from page 1

for the project were time and technology changes," he said.

"Students were also contacting the Chancellor's Office asking for wireless."

Vernon explained that wireless access had not yet reached Southwest based on time constraints and accessibility.

"The Southwest concourse design left that part of the campus inaccessible, so we will get all of Southwest next summer." Sophomore Mike Cowell, who was among those who used the new wireless setup in Butterfield last year, had mixed feelings about the expansion.

"My biggest issue with wireless in Butterfield is that 20 percent of the time, 'UMassSecurelx' simply did not work," said Cowell.

"If UMass can make their wireless Internet more reliable and faster, then I would welcome this expansion into other Residential Areas, but if this is just going to be the same thing in more places, then I say keep the cords," he added.

Keshia Maxwell, a sophomore who also was part of the Butterfield test pilot, said the shift was sorely needed.

"I'm glad they took the initiative to start up the pilot in Butterfield, and while they had some issues, they were to be expected," she said.

At the conclusion of the yearlong test of the wireless Internet in Butterfield Hall, OIT conducted a survey to determine the overall satisfaction and results of the project, with a total of 52 students responding.

Among the students who took the survey, 15 found that connecting to the Internet was "very easy," while five found it "very difficult." Of the students, 22 found the quality of the Internet to be "very good," while a total of 14 found the range to be between "neutral" and "very poor."

Of the students, 41, or 80 percent of the group, would recommend a "wireless only" residence hall to their friends.

Vernon added that he believes the benefits of going wireless far outweigh the drawbacks.

"Wired ports limited students with one Ethernet port in a certain geography within their residence halls," he said. "Wireless is a shared medium, [a] modern method of network connectivity and better enables someone to seamlessly move about."

Tim Jones can be reached at timothyj@student.umass.edu.

Annex launches new textbook rental option

TEXTS from page 1

Higher Education Opportunity Act, which took effect July 1, now requires universities to provide lists of course material for students during registration.

"With advance notice, students can plan ahead for the full cost of their next term, and they have time to shop around for the best deals on their books," said Nicole Allen, a textbook advocate for the Student Public Interest Research Groups, in a press release regarding the legislation. According to Allen, the average student spends $900 per year on textbooks, and prices are on the rise.

"The next step is to make sure textbooks are affordable in the first place," wrote Allen.

As an alternative to the University store, some students have used other sellers, such as Chegg.com to rent textbooks, or Amazon.com to buy used books, and save on costs. Kahler hopes the rental program will inspire more students to buy from the Textbook Annex.

"I'd like to see more students buying from the bookstore. It's local, it's convenient and hopefully more affordable."

Graduate student Sharon Horenstein said she spends hundreds of dollars on books each semester at the Textbook Annex because she feels it's risky to buy online.

"I could probably save some money if I were to buy books on Amazon, but I've heard so many stories from friends getting their books weeks into the semester or never getting them at all, and I don't want to risk it," said Horenstein.

Although she hadn't looked into the new rental program, she said she'd be willing to try it.

For more information on the rental program and an exclusive Collegian video detailing the new option, log onto DailyCollegian.com.

Michelle Williams can be reached at mnwillia@student.umass.edu.

Campus among top producers of Teach for America picks

TEACH from page 1

spokeswoman Kaitlin Gastrock.

"We're really excited about seeing such a strong interest in becoming a part of the movement to eliminate educational inequity," said Gastrock. "It allows us to be highly selective, so that we can really identify our candidates who have shown to have the most potential."

Gastrock was also quick to point out large universities like UMass are not the only ones in Teach for America's top tier of contributing schools.

"We have core members that come from a very wide variety of schools," she said. "We recruit actively at over 300 colleges and universities across the country. That includes Ivy League institutions, state schools, liberal art schools; you name it."

UMass seems to share the same enthusiasm as Teach for America over the great number of candidates coming from its campus.

"We're always pleased as an institution when our students are contributing to the betterment of society," said University spokesman Daniel Fitzgibbons. "It's an important way for our alumni to help improve education across the country."

Teach for America describes itself as a "national corps of outstanding recent college graduates of all academic majors and career interests who commit two years to teach in urban and rural public schools and become leaders in the effort to expand educational opportunity." Its current active teaching corps numbers approximately 8,200.

THE MASSACHUSETTS DAILY COLLEGIAN

EDITORIAL OPINION

TUESDAY, SEPTEMBER 7, 2010

"If we don't believe in free expression for people we despise, we don't believe in it at all." -Noam Chomsky

EDITORIAL@DAILYCOLLEGIAN.COM

Eight months of non-stop action

Ben Rudnick

It has been eight months since my last Collegian column and it has been an almost absurdly eventful period.

As I write this back-to-school piece, the sheer volume of topics on which I could expound shock me as I think back over all the happenings since last December.

For instance, the two-thousand-plus-page health care bill, which, despite being declared dead on arrival, passed through Congress and was signed by President Obama. More recently, the two-thousand-plus-page financial reform bill also passed. The sheer size and complexity of these two pieces of legislation, whether one believes in their efficacy or not, is enough to provide a political junkie or policy wonk like myself with material to fill dozens of columns.

I feel afflicted by the apocryphal Chinese curse, "May you live in interesting times."

Add in some of the other big events of 2010, all of which have been politicized to some extent, and the challenge of selecting what to comment on in this first column increases how daunting this task is. I feel afflicted by the apocryphal Chinese curse, "May you live in interesting times."

At the very end of 2009 came the failed Christmas Day Bomber, which in concert with the aftermath of the attack at Fort Hood prompted doubts regarding the administration's effectiveness in responding to terrorism.

Next, there was the earthquake in Haiti, which resulted in another demonstration of the overwhelming generosity of the American people, yet raised troubling questions of the ability of governmental and non-governmental organizations alike to deliver that aid to those who needed it most.

Then came the explosion and sinking of a BP drilling rig far out in the Gulf of Mexico leading to perhaps the largest marine oil spill in history, which prompted critics of every stripe to weigh in with opinions and assessments of blame on every aspect of the disaster and its causes.

The environmental repercussions of the spill may take years to quantify, possibly even decades, but will perhaps only pale in comparison to its legal and political ramifications.

Throughout all the turmoil, we have experienced the roller coaster ride of the spotty-at-best recovery of the United States economy, the status of which became even more questionable with the European debt crisis that began in Greece at the end of April. Economists, politicians, pundits and prognosticators have registered their myriad views, but the mass of ideas have only added to the amount of contradictory information that fills the newspapers, airwaves and blogosphere.

However, editors encourage Op/Ed writers to make their commentaries topical and to take on the issues that are foremost in people's minds, be they local, national or international in scope. It is not enough for me to whine about the difficulty of deciding what subject to tackle by summarizing how many there are to choose from, although I will return to some of them in the coming months, so I feel compelled to register an opinion on at least one current controversy.

I just hope a few of you have stuck around long enough to read it.

I refer to the so-called "Ground Zero mosque," the latest kerfuffle to capture Americans' attentions. My own feelings on the matter are very mixed, but there is one aspect of the debate on which I am certain.

The spot where the World Trade Center towers once stood is a place of pain … not only to the families of those who were killed in the attacks, but to millions of others who watched as the horrors of Sept. 11, 2001 played out on television.

Like all places marked by collective memories of overwhelming sadness, a higher level of sensitivity is proper when making decisions about structures that are built in their vicinity.

It is not a matter of infringing on our freedom to build nearby. Rather, it is the far more difficult proposition of being aware of the emotions one's actions can arouse in those closest to that pain.

I recognize that some portion of those who oppose the building of a mosque in that place do so from an Islamophobic position. We could argue back and forth as to the relative numbers of protesters motivated by these negative feelings, but I contend that the majority of protesters are motivated by a completely understandable sensitivity to its proximity to Ground Zero.

To be sure, it would be unconstitutional for anyone to forbid the Park 51 project from going forward, assuming the developers adhere to all other legal and regulatory requirements. Further, anyone who lobbies to hold the Park 51 developers to a different standard than other religious institutions elsewhere in New York City advocates the denial of the builders' Constitutional rights.

However, most of the commentary I have seen advocates no such thing. I submit that opponents are not demanding, but are in fact begging the developers not to build so close to Ground Zero. In disregarding the fringe elements on either side, the rest of us should strive to puzzle out a solution somewhere in the middle.

Imam Feisal Abdul Rauf and other representatives of the group behind the project have repeatedly stated that the purpose of building the mosque is to foster understanding and tolerance of Islam, improve relations between the Muslim community and area residents and begin to heal the wounds of 9/11.

Taking them at their word, a reasonable person must wonder why they seem so reticent to even consider a different location now that they have heard the outcry of so many.

To characterize anyone who questions the location of this mosque so close to Ground Zero as an extremist is, in reality, the most extremist view of all.

Better than the 'elites' think

Nick O'Malley

An article in Sunday's Boston Globe, detailing the struggles of the University of Massachusetts Amherst, has put the school's national standing into focus. The verdict? UMass is a second-rate public university.

Since the hiring of Chancellor Robert Holub, the University has shifted gears in terms of national standing. Where there was once a sense of complacency about its national standing there is now a drive to put the school in the upper echelon of public universities in the country.

From construction projects to admissions strategies, the administration has made a staunch effort to commit as many resources as possible to raise the school's standing on the national stage.

The foundation of the story is that today's prototypical, well-off, academically successful, Bay State high-schooler – let's call him Tucker, because I hate that name – isn't even considering his home state school, instead looking at the likes of the University of Michigan or the University of North Carolina.

Despite being twice the cost of UMass, plus airfare and countless other financial difficulties that come with going to school across the country, Tucker won't even sniff the Amherst campus.

Why? We're not prestigious enough. As a student quoted in the Globe said, "It's a pride thing."

It's not an uncommon feeling, students thinking that they could've gotten into a "better" school, one that they've visited for a couple hours, read about in a brochure and was ranked higher on some chart somewhere.

It's true, some students feel uncomfortable with the name on the box. It's a feeling of regret or a missed opportunity, felt when students come to UMass, that they settled for the safety school.

But, if a student is really entitled to an Ivy League school, they'll get more from the education than a line on a resume and bumper sticker on the rear window of their car, which in Tucker's case is a BMW that his parents bought so he can drive to his $10,000-per semester dorm at Boston College. It's okay, though. The family is making an investment.

Yet, the Globe brings up the notion that some people find the "predicament" of UMass "infuriating, even embarrassing." What could possibly keep UMass from being a top-tier school?

It could be, as the article states, the school's athletic programs aren't up to par. "My goodness, the football team is in the Football Championship Subdivision just like William & Mary, Georgetown, Holy Cross, Villanova, University of California Davis, Delaware and, oh, the entire Ivy League. How could they possibly succeed?"

The Globe brings up the notion that some people find the "predicament" of UMass "infuriating, even embarrassing." What could possibly keep UMass from being a top-tier school?

By the way, how are the Boston University and Northeastern football teams doing nowadays?

It could be that UMass isn't catching on in the college capital of the United States. "I mean, how could a public school competing with Harvard, the Massachusetts Institute of Technology, Amherst College, Williams College, Boston College, Worcester Polytechnic Institute, BU, Tufts and Smith have trouble attracting in-state students. It's as if the school has specifically declared its intent to focus on admitting out-of-state students."

But it's most likely that it's because the school is stuck in a state that is spinning its wheels on public college spending, has one of the lowest endowments in the country, gets little funding from alumni, "deteriorating concrete buildings" and a party school reputation.

These are all things that the article mentions.

But, at the same time, every time UMass took a shot, there was upside. There's a budget crisis, but the administration is looking to get on track and restore faculty. The football team is not in the best division, but the hockey home-crowds are some of the largest in the country. The Integrated Sciences Building, nursing building and Recreation Center are state-of-the-art.

However, if Deval Patrick would like UMass to have the same fancy facilities and dorms as those in California state schools, maybe this state should have the same funding for public higher education.

The article is a gut-punch for every student and faculty member- past, present and future- from another privileged institution trying to look down from its overpriced, overrated ivory tower at what they'll always assume is still ZooMass, despite dropping out of the national party school ranking years ago.

Meanwhile, the nation's premiere public universities would never be disgraced by such a label. Except for the fact that half of The Princeton Review top 12 party schools this year are ranked in the top 20 public universities by U.S. News & World Report.

So yes, UMass is a second-tier school in Massachusetts. But compared to Harvard and MIT, you know what would be? Michigan, North Carolina and Texas. In arguably the most prestigious academic environment in the world, it's a little hard for the public school on the other side of the state to stick out.

But UMass does. It lives and continually improves in this environment, constantly building a reputation that could someday challenge the old guard.

Am I saying that the Globe article is part of a concerted effort from the prestigious Boston intellectual institutions to put down UMass in the fear that an affordable, quality education could challenge the academic monopoly established out east? No. But the Globe's comment section is.

Still, UMass is going to be the rising underdog in this state for the foreseeable future, and Tucker will still thumb his nose at us because the name on his hoodie isn't good enough for his parents' money. He doesn't want the "safety school." But, you know what?

We don't want him.

Nick O'Malley is a Collegian columnist. He can be reached at nomalley@student.umass.edu.

Five reasons why it's great to be back to school

1) New freshmen to corrupt.

2) The move in day traffic will make exams feel less stressful.

3) Construction means more of Holub's enemies can "disappear."

4) Idle hands are the Devil's workshop.

5) Two words: epic sushi.

ED/OP

A rose by any other name is still a rose

Amanda Joinson

Driver's licenses, mailing addresses, voter registrations, bank accounts and credit cards are only the beginning of what would have to be adjusted if you decided to legally change your name. However, a name change is the only clear way to escape the details of one's past that have been recorded online, according to Eric Schmidt, CEO of Google.

There is no denying that everyone has made mistakes, but a free pass to forget is not the way to go. Owning up to your past is the appropriate option.

Although almost everyone has their regrets, abandoning the name given to you by your parents seems unnecessary and frankly, not exactly a viable option, but Schmidt, looking into the future of Google, stated that young people should be entitled to change their name upon adulthood to escape the past that lingers on social networking sites.

Essentially, changing your name would clear you of all your unattractive pictures posted on Facebook and objectionable Tweets.

Every person that has information about them online makes the decision to participate on social networking sites.

When signing up for the, service they are presented with the rules and regulations — of course few actually sit down and read them – but the site operators technically own the information posted to their service.

In all honesty, if you go through the steps to legally change your name you have to be hiding something so massive that it would eventually be recovered anyways.

Changing your name because of information that you have willingly posted online seems contradictory. You post things online ultimately to be seen or heard. Denying claim to these words or pictures of your past would be abandoning who you are, which will only get you in trouble in the long term.

In all honesty, if you go through the steps to legally change your name you have to be hiding something so massive that it would eventually be recovered anyways. Not to mention, family and friends will know of this change. What if they point it out to someone else?

One slip of the tongue and the past will be unveiled again, after all the effort of changing one's name. Technology, as it stands now, is already amazing. Down the road, it could only get better, leaving you just as exposed as before.

Facial recognition software is already readily available. For example, Face.com is a service that can pick your facial features out of pictures posted on Facebook, for an easier way to tag photos. If name changes become the norm, facial recognition software will only become more popular among employers that really want to know who you are.

So face it: There is no way to run and hide from your past.

Instead of taking the drastic measure of changing your name, think about how your experiences may give you guidance for how to carry yourself in the future. The people that own up to the way they chose to live their life when they were young will ultimately prevail. These people are not lying about anything. The facts are out in the open for all to see.

The transparency of the Internet can be used to amaze future employers rather than deter them. Being honest is a noble characteristic that employers should recognize.

Even our aging Baby Boomer elders acknowledge that they have their own regrets from when they were growing up, however there is no evidence floating around cyberspace waiting to be found through a search engine.

For the older generations, events took place and will only be able to be stored in the memories of those that were present, or at the very worst, events that were cause for reprimanding were documented, possibly, in the infamous and dreaded "permanent record."

Elders must think of what could have happened if they lived with the technology that exists today. They must look back and determine if they would be in the same position today if the events of their life had been remembered and posted for all to see.

Peers must also come to terms with the actions of others. Not everyone chooses the most pristine lifestyle, but they must grow up and live among the rest of us working regular jobs and hoping to succeed.

Mind you, I am not stating that employers should lower their expectations and everyone should go crazy. I am saying, though, who hasn't had a drink out of a red Solo cup?

Although the voices and images of young generations flood the Internet, changing your name, as suggested by Schmidt, is out of the question. People cannot hold full-grown adults responsible for what they did as a teenager. It is simply unreasonable to draw the conclusion that people have not grown-up throughout the years. Rather than being penalized for the learning experiences of your youth, people should embrace the development of careless teenagers into mature, productive adult members of society.

Summer fashion 2010: not so hot

By Ellie Rulon-Miller
Collegian Staff

Awful fashions are everywhere, and they exist at all times of year. They thrive in malls, amusement parks, in parking lots before concerts and at music festivals. They send chills down your spine and draw tears from your eyes. Some are so bad that you may even feel personally offended. It doesn't matter where you live. People dress badly everywhere. They just dress worse during the summer months.

The common factor in every disturbing summertime look is exposure. It seems that every other person is letting even more hang out as soon as the temperature reaches 75 degrees. It doesn't matter what size a person is. Whether they're larger than life or a could-be supermodel, too much skin is just that – too much. Going out of the way to display as much skin as possible is always unattractive. It's as if neither men nor women care to leave any piece of their body to the imaginations of onlookers.

People choose to display themselves in myriad ways. Among the tackiest of these ways is through the use of fishnet clothing. Anything made from the material, such as dresses, shirts, and leggings, are wholly impractical – they are not covering anything, and they are not insulating. If a person was looking for such extreme "air conditioning" in their clothing, they may as well go nude.

The most common fashion faux pas among teenage girls has been made all the more common by Katy Perry. The look, "Daisy Dukes with a bikini on top," can be taken to absurd lengths. Girls go the extra mile in order to expose even more skin by leaving their button and fly undone, showing a small fraction of their bikini bottom. There is no other discernible reason for leaving their shorts unbuttoned. They just want you to look.

The "California Girls" look can be made more ridiculous with one small variation: the length of the denim shorts. Oftentimes, Daisy Dukes will be so short that the white fabric that makes up the inside pockets sticks out from beneath the denim. The worst part of this look is when the pockets are full, leading to a lumpy bulge protruding from a girl's hidden thighs.

ELLIE RULON-MILLER/COLLEGIAN

One half of the "California Girls" look – the classic Daisy Dukes – is typically fine on its own unless they are so short that the interior pockets hang out the bottom or if they are unbuttoned and unzipped.

But that isn't the only thing that can make "California Girls" across the country look awful. Many a fashion moron will wear their Ugg boots to finish off the look, making the boot even more impractical than they were to begin with. Just as they are useless during the winter months when it snows (they may be warm, but they are not waterproof), they are just so during the summertime, when it is just too hot for any kind of thick boot.

Regardless of a person's size, it is guaranteed that they will look awful in a cutout one-piece bathing suit. No matter what, there are pieces of body sticking out in unattractive ways. Even stick-thin girls have their pelvic bones sticking out, threatening to cut the limbs of anyone in their path. Most of the time, the chest portion of the swimsuit is ill-fitting. On smaller women, the top is too lose; on larger women, too tight, leading one to wonder who the original cut-out bathing suit was designed for, and what her dimensions were.

Among the trashiest looks out there is one so odd and so unattractive, and yet so common. Platform sandals have probably reached such heights in popularity due to their price. The footwear is dirt cheap, and often comes with a plastic flower attached, forcing its way out from between toes. No doubt it is growing from the fungus formed when Ugg boots locked in every ounce of moisture the day before. The purpose of platform shoes is to be subtle, an idea which can be achieved in a shoe. The added height is hidden amidst the sole of the shoe and the fabric comprising the rest of it. In sandals, there is no way to hide such a trick.

Finally, there is one style faux pas that is not indigenous to the summer months, but which is accentuated by the amount of skin shown: bad tattoos. Whether the tattoo was cheap, poorly drawn, poorly thought out, or etched onto the skin during a 21st birthday gone horribly awry, it comes way out of hiding in the summer heat. The male "tramp stamp," the majestic and shoddily-drawn lion's head on a middle-aged man's left pectoral, the "tah-tah tat" of a woman's ex-boyfriend over her breast. The problem with this look is that there's no way to correct it without expensive medical treatment.

We can rest easy, though, for summer is coming to a rapid end. Soon it will be the season of covering up with multiple layers, a season of fewer offensive fashion mistakes. Until the temperatures begin to drop, though, stay strong.

Ellie Rulon-Miller can be reached at erulonmi@student.umass.edu.

Southern Tier Brewery's IPA tops at Beer Fest

Andrew Sheridan
Collegian Staff

Since the end of Prohibition in 1933, the brewing industry in the United States has been ruled by a few select companies. In an effort to flood the nation once again with beer, the brewers quickly consolidated into corporate giants such as Anheuser-Busch, Miller and Coors. While the long reach of these behemoths succeeded in speedily getting beer back into the hands of the people, it came at a steep cost: boring, generic beer.

The tastes and wallets of the American people, however, did not stand for this mediocrity of taste for long. Since its humble beginnings in New England and the Northwest, the craft brewing movement has been gaining both speed and support for more than 20 years running. Centering on small-batch size and high quality, these dedicated brewers have completely revitalized domestic beers in the U.S, and this June, the best of the best gathered in Boston for the American Craft Beer Fest.

The event, sponsored by Harpoon Brewing Co. and Beeradvocate.com, is a two-day celebration of all things good in the world of American beer. This year it featured over 80 different brewers from around the country and filled the Seaport World Trade Center for two full days.

Popular styles at the festival included pale ales, German Bock beers and Belgian blondes; although in terms of volume, the most popular style of beer was far and away the India pale ale, or IPA.

Originally brewed for export by the East India Trading Company, these medium-bodied beers tend to be heavy on the hops and intense in flavor, making the India pale ale popular with the die-hard beer crowd that assembled for the expo.

Massachusetts was well represented as one of the hallmark regions of craft brewing, and although giants such as Harpoon and Sam Adams were in attendance, it was the smaller brewers that drew more attention.

Pretty Things Co. from Cambridge, a craft brewer that deals primarily in 22 oz. bottles, drew a serious crowd and did not disappoint. Their signature beer was the Jack D'or, a saison-style Belgian with a twist. Although it follows along with the style's light body and summery feel, the Jack uses American hops and spices to create a citrusy and refreshing character that fits the season perfectly.

Haverhill Brewery is a name that has been quickly working its way across Massachusetts, and for good reason. While their signature HaverAle cream ale is an interesting but mediocre beer, Haverhill had on display an impressive line of quality beers including a smooth German style and a smoky imperial stout.

Wormtown Brewery of Worcester was a surprise hit for many of the attendees, with cleverly named beers such as the Be Hoppy IPA and the Blonde Cougar summer ale. The names were not the only good thing about their offerings, as Wormtown's beers proved to be light and flavorful across the board.

Western Massachusetts in particular put up a good showing at the festival, including several breweries within the five-college area. Among them, Paper City Brewers of Holyoke stood tall with the seriously potent Hop Monster and tasty German Radler Brau. Local favorite Berkshire Brewing Co. also drew crowds with their well-crafted pales and India pales on draft, as well as a variety of quirkier beers in bottles.

Perhaps the most under-appreciated brewer at the event was a recently established company known as Peak Organic. Based in Portland, Maine, Peak's offering was not only 100 percent organic but, more importantly, quite good. From their caffeine-infused Espresso Amber and surprisingly good Pomegranate Wheat, this environmentally conscious beer is both creative, tasty and definitely warrants a look.

Apart from New England, the Northwestern states brought in the biggest volume of malted joy. The region contains the largest number of craft brewers in the country, and some of the biggest names made the trek to Boston for the show.

The Boulder Brewing Co. was one booth that drew lots of attention, but it proved to be a mixed bag. While their brown IPA was a creative and delicious hybrid, other offerings, such as their over-the-top dry-hopped beer, were decidedly less praise-worthy.

Sierra Nevada is a name that is recognized across the country. Their signature Pale Ale is one of the best on their market, and while it was certainly available to taste, Sierra also came armed with their biggest guns: the Sierra Nevada 30th Anniversary Bock. Available only in 750 ml bottles, this German-style beer is smooth and delicious, and it easily rated as one of the most refined beers at the festival.

While there was no official polling and no awards were out, the Massachusetts Daily Collegian's top pick of the festival goes to the Southern Tier Brewery's Oak-Aged IPA. This N.Y.-based brewer had several quality beers available, but it quickly became evident that this particular brew was their pride and joy.

Much like fine liquor, it is aged for several months in Bourbon whisky barrels to deepen the flavors. The result is an earthy beer far mellower than a standard IPA, with a complex and incredibly well rounded flavor.

These, of course, are only a small fraction of the craft brews available at the festival. And while the American Craft Beer Fest is the largest beer event on the east coast, its offerings only scratched the surface of beer culture in the U.S. Add to the equation brewpubs, microbrewers and amateur home-crafted beer, and there is virtually no end to the possibilities. So keep your eyes peeled and your taste buds ready, and until next time,, bottom's up.

Andrew Sheridan can be reached at asher1@student.umass.edu.

(MCT)

The American Craft Beer Fest, held in Boston this past summer, had a variety of different beers for fanatics to sample. The Southern Tier Brewery's Oak-Aged IPA proved to be the best of the bunch, however, with it's deep earthy taste.

Freshmen, break out of your comfort zone

Kaitlyn Bigica
Collegian Staff

Out of the 20,539 undergraduate students at the University of Massachusetts, 4,144 are embarking on their first year of college.

Although the freshman class size is large, many first-year students will find it tough to meet new people as nerves and other normal emotions set in on those beginning days.

Here's the truth: Almost everyone is scared.

Leaving behind family and high school friends to start a new chapter in life can be a daunting task and can fill a student with anxiety. On top of that, now it's time to make new friends – especially for the 3,800 out-of-state students who may not know anyone. Luckily there are three easy steps to meeting people on campus. If followed, you will find in a few weeks your new life is even more exciting and fun then you had thought possible.

Step 1: Get out of your dorm room!

Sitting in your dorm on Facebook or phoning friends and family from home all day will lead you to a college life of little friends and regret when people begin to make groups that you're left out of.

It may be more comfortable to hold on to home life, but you will need to go through a week or so out of your comfort zone before you begin to feel comfortable in your new home.

A great tip is to leave your door open while you're in your room. People are more likely to stop in and say hello or invite you along for lunch that way. Walk around your floor and stop in to talk to your floor mates.

You will find throughout the year that your floor becomes a family. This step is important because you want to have a healthy relationship with the people you are living with and feel comfortable going back to your dorm.

Step 2: Join a club (or two, or three)

Clubs are not only important to join for your resume, but they are also a fun way to develop lasting friendships. With over 200 Registered Student Organizations at UMass there are a numerous clus for each student to test out. With such a wide range of clubs there is sure to be one that will spark an interest in something you wanted to continue from high school or something you have never considered, but want to try. There are political, religious, theatrical, charitable, athletic, journalistic, scientific and poetic clubs thatyou can join. Sit in on a group meeting to see if it is something that interests you, and if its not, move on to the next one.

Clubs are not only good for meeting new people, they can also add a sense of purpose to your week and even help you pick a major if it's something you become increasingly interested in. When applying for a job, companies look for someone who was involved in extracurricular activities throughout their college career - usually groups that apply leadership skills and teamwork. You can usually find a group that both applies these factors and is most importantly, enjoyable.

Don't wait around until junior or senior year to join these groups because by then you will already be applying for internships or jobs. For a full list of the 200 clubs on campus go to http://www.umass.edu/csd/rso/ and click on the "browse the full list" link to find a full description of each club.

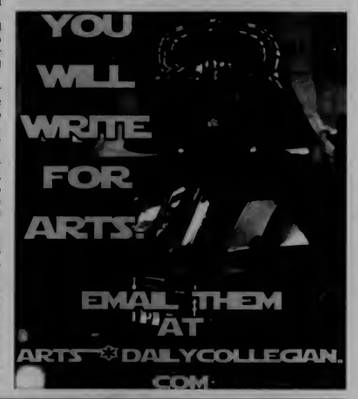
Step 3: Throw away all preconceived notions of what your typical friend looks like

When you leave your hometown, which may have had a majority of one culture, race or crowd, you tend to look for the same type of people that you use topreviously ahung out with when you get to college.

College is a time to experience new things, and meet new and different peoplea. Forget any stereotypes, and don't judge people immediately by the way they dress or look. Go up to people and talk to them before you write them off. The eclectic group of people you meet and the things you learn from them may surprise, entertain and suit you.

You have four years of college, which have been described by many as the quickest and best years of their lives. Don't waste any of the time you have sitting around convincing yourself you have plenty of time to meet people or get involved. The most important advice you can follow is to face any fears you've felt preparing for college the moment you step foot on campus. Simply say "hello" to a fellow freshman classmate, you will be surprised where a greeting can lead you in making new friends and meeting new people.

Kaitlyn Bigica can be reached at kbigica@student.umass.edu.



URGENT NEED for BLOOD DONORS
GIVE NOW

American Red Cross redcrossblood.org | 1-800-RED CROSS (1-800-733-2767)

UMASS Police Department
Blood Drive
In the Campus Center Auditorium
(North Pleasant Street, Amherst)
Wednesday September 8th
12 PM – 6 PM

SOMEONE IS COUNTING ON YOU RIGHT NOW

Why?
- There is a critical need for blood donors *now*.
- All types are needed – Please help!
- Remember those lost on September 11th by making a donation to give the gift of life.
- It's a pint of blood for you, but to another it's a life saved.

Please give blood as soon as possible.
- Make an appointment to donate now.
- Call 1-800-RED CROSS (1-800-733-2767).
- Or visit redcrossblood.org – Positive ID Required
- Walk-ins Welcome but Appointments will have priority

All presenting donors will receive a FREE T-Shirt with a chance to win raffle items and a coupon for a discount on a Six Flags Fright Fest Ticket!

Fall film line-up should put students in seats

By Nick Coviello
Collegian Correspondent

With the dawning of September, gone are the days of vacation, long nights doing nothing and summer blockbusters. In their place come football, the return to school and the highly-anticipated fall film releases. Maybe it's just the people's need of something to look forward to in the face of classes beginning once more but the diversity of fall releases seems to one-up the other seasons. From the always popular horror movie to the franchise hijacks to the most recent raunchy comedy, here are ten movies that'll draw college student's interest.

"The Social Network"
Oct. 1

What is sure to be one of the highlights of October. "The Social Network" packs double the punch. Not only does it tell the story behind the early days of the originally college-based (now everything-based) social networking site Facebook, but it stars Jessie Eisenberg, a rising star who is beginning to build somewhat of a name for himself amongst the college crowd. Noted for his striking similarities to Michael Cera, Eisenberg has burst onto the scene in young adult box office hits such as 2009's "Adventureland" and "Zombieland." For college students, Eisenberg playing Facebook creator Mark Zuckerberg is sure to be a hit.

"The American"
Sept. 1

Within the league of big-name franchises – the slapstick comedy, the horror movie – fits the spy/assassin movie. Enter George Clooney, who has the benefit of coming off a year in which he was nominated for an Oscar and voiced the main character of another Oscar-nominated film. Though it's bound to include fresh twists to the story, the film appears to be headed in the traditional direction of drawing an audience: filling the screen with a big name actor, an attractive actress, suspense, violence and sex. "The American" will have America buzzing, especially collegiate America.

"Harry Potter and the Deathly Hallows: Part 1"
Nov. 19

Romance. Suspense. Emotional instability. Fear. Love. Togetherness. Death. These are only a couple of the mature themes that will be covered in the first part of the final installment of the Harry Potter series – not exactly the children's book it started out as. The series has morphed from an average children's story to a national phenomenon. "Harry Potter and the Deathly Hallows" will not only pull in the fans who have been counting down the days before the breathtaking final chapter is brought to life on the big screen – the mature themes and constant action, direct and indirect, will more than fill the seats.

"Unstoppable"
Nov. 12

"Unstoppable" may be appropriately titled in more ways than one. This thrill ride is set to star Denzel Washington in a role very similar to that of his previous in "The Taking of Pelham 123." While Denzel Washington is, for the most part, unstoppable himself, at the box office, Tony Scott's "Unstoppable" is sure to pull in audiences with its usual dosage of extravagant adrenaline and downright excitement. When one factors in the story, which centers on hero Denzel trying to stop a runaway, combustible freight train from destroying a city, "Unstoppable" seems just that.

"The Town"
Sept. 17

It seems as though Ben Affleck's directorial debut, "Gone Baby Gone," a gritty and challenging story about a Boston detective, came out of nowhere. Affleck's second film, "The Town," features the same setup: corruption in the grime of Boston. Its apparent love story, between thief Affleck and the manager of the bank he robs, gives the story a lot of space to spread its wings. Also starring are Jon Hamm, Blake Lively and Jeremy Renner, three actors very much on the rise and familiar to young eyes. Though Lively may end up being the standout draw as a young mother, a role out of her norm.

"Jackass 3D"
Oct. 15

It's been 10 years since "Jackass" premiered, yet the TV series turned now trilogy has managed to consistently draw an audience, produce laughs and influence its viewers. What may be hard to believe for others is easily acceptable by college students: it's not difficult to relate to the "Jackass" boys' daring stupidity. Without a doubt, there will be those who, upon viewing, will turn to their buddy and proclaim they did something just like that. It's for reasons like that, for entertainment value and for sheer curiosity at what's left for these daredevils to do, that will make "Jackass 3D" a success.

"Paranormal Activity 2"
Oct. 22

Built strictly upon Internet hype, "Paranormal Activity" was

Top 10 summer flicks you may have missed

By Tappan Parker
Collegian Staff

To commemorate the end of all the great - and not so great - summer blockbusters, here's a list of 10 movies you should have seen instead of lounging around on the beach. Here's what you missed.

"Get Him to the Greek"
Remember Russell Brand's eccentric rock star character, Aldous Snow, from "Forgetting Sarah Marshall?" Well, he's back in "Get Him to the Greek," a wild and raunchy adventure where music intern Aaron Green, played by Jonah Hill, must attempt to get Snow to Los Angeles's Greek Theater for a concert in order to save Snow's dying career. The comedy even includes P. Diddy in a not so minor role, and surprisingly, he is actually pretty funny. If you liked any of the big budget comedies of the last few years you will love "Get Him to the Greek."

"Toy Story 3"
"Toy Story 3" may have been one of the most emotionally moving movies of the summer. Andy, the young kid from the first two "Toy Story" films, has grown up and is preparing to leave for college and must decide what to do with his old toys. The movie marks the return of Woody and Buzz and the introduction of some brand new characters, each more engaging than the last. Never before has so much emotion been brought to life by toys. This is definitely one of Pixar's finest films to date.

"The Expendables"
The Expendables is noteworthy, purely because it stars almost every big name action star with a beating pulse: Sylvester Stalone, Jason Statham, Jet Li, and Mickey Rourke just to name a few. The movie itself is about a group of mercenaries hired to overthrow a South American dictator - a pretty basic action plot that ends up leading to, you guessed it, a ton of mindless violence. If you are an action movie fan you should have already seen this movie.

"The Karate Kid"
No, not "The Karate Kid" from the 1980's, the remake. Dre Parker, played by Jaden Smith (Will Smith's son), is a young kid who moves to China from America where he faces language barriers, cultural divide, and a ton of bullies who know kung fu. Mr. Han, played by Jackie Chan, ends up teaching young Parker martial arts to fight back against the bullies. While not as good as the original, this is a great modernization of the film and contains some truly inspiring scenes. Smith also gives a good performance, and shows promise as an actor.

"Scott Pilgrim Versus the World"
"Scott Pilgrim Versus the World" is the cult classic of the summer. The plot goes something like this: boy (Michael Cera) meets girl (Mary Elizabeth Winstead), boy falls in love with girl, and finally, boy must defeat girl's seven evil ex-boyfriends in order to date said girl. Boasting an incredibly unique visual style and some absolutely fantastic fight scenes, this is a fast paced joy ride through the creative mind of director Edgar Wright ("Shaun of the Dead," "Hot Fuzz"). The movie is filled with pop culture references and a ton of alternative music. This one is definitely worth seeing on the big screen.

"Despicable Me"
The other great animated comedy of the summer, "Despicable Me" stars the voice of Steve Carrell as evil mastermind Gru, who plans to steal the moon. However, upon adopting three orphaned girls in order to fulfill an evil goal, Gru slowly begins to learn the values of love and parenting, despite his wicked ways. Sure it may be a movie meant for kids, but when has that ever stopped an animated film from being incredibly entertaining? Do yourself a favor and check this movie out; you will be glad you did.

"Get Low"
"Get Low" is based on equal parts true story, folk tale and legend. The plot follows the tale of a Tennessee hermit who throws his own funeral - while he's still alive. Robert Duvall and Bill Murray star in this quirky movie, which had been featured at numerous film festivals before its summer release. With a compelling story and some fantastic acting, this one may have gone under the radar but is well worth a movie lovers' attention.

"The Kids Are All Right"
Another movie that may have slipped under the radar, "The Kids Are All Right" has also been featured at many of this year's film festivals. The plot is simple: two children who were conceived by artificial insemination decide they want to meet their biological father and bring him into their lives. Annette Bening and Julianne Moore star as the mothers in this heartwarming film about the family dynamic. This one will definitely be seen on the Oscar list this year.

"Iron Man 2"
"Iron Man 2" was one of the few superhero movies this year. Starring Robert Downey Jr. as Tony Stark, "Iron Man 2" follows Stark as he contends with the difficulties of sharing his secret identity with the world as he confronts the military, new rivals, and his own personal demons. With more action, more technology, and the film series first actual super villain, "Iron Man 2" is definitely a worthy sequel to the first.

"Inception"
If there is one movie you should have seen this summer it is "Inception." In the world of Christopher Nolan's "Inception," technology exists that allows people to enter the minds of others through dream invasion. However, rather than creating a plot to just steal some idea, the plot of "Inception" is much more complex: planting an idea in someone's mind without them knowing it. Starring Leonardo DiCaprio, this film is one of the most original heist movies of all time and is sure to keep you on the edge of your seat until the credits roll. With strong performances from every actor and amazing visual style, this movie is nothing short of a masterpiece.

What films to look out during the fall semester

FALL FILMS from page 8

one of the biggest surprises of 2009 as it drew large numbers at the box office. While it's been heavily argued whether or not it fit the bill of being as frightening as advertised, "Paranormal Activity" certainly created discussion amongst its audience. Being released less than a year after its counterpart, the sequel is sure to draw similar totals eager to see what else the story has to offer. Certainly a good amount of this crowd will include the college student, who is always anticipating the next best horror movie.

"Due Date"
Nov. 5

Almost a guaranteed success at the box office, "Due Date" is sure to draw in the younger crowd after director Todd Philips' 2009 summer smash "The Hangover." "Due Date," like its counterpart from summer 2009, will hold a few basic keys to its success. Focusing on the adventure of two bickering men forced to take a cross country trip together, "Due Date" is sure to produce the same crude and disturbingly hilarious antics as "The Hangover." Plus, it won't hurt that Zack Galifianakis and Robert Downey Jr., presently two of Hollywood's "coolest" actors, have starring roles.

"Saw 3D"
Oct. 29

As one of the biggest tossups, "Saw 3D" is the final installment of the "Saw" franchise. While it is true that "Saw 6" produced the lowest box office numbers of the series to date, the conclusion of the bizarre and disturbing tale will turn some heads. Naturally, "Saw's" gore and terror help its name among college students as no movies produces quite as much entertainment as one in which multiple people die in grotesque and gruesome ways. Not to mention that the diehards of the series will certainly make their presence felt. "Saw 3D" is bound to extinguish the franchise on a good note.

"Life As We Know It"
Oct. 8

Its story is destined to be a predictable one; however, its draw may be just as predictable. For every guy who drags his girlfriend to an action movie, there's a girl dragging her boyfriend to a chick flick. "Life As We Know It" offers an interesting, yet serious, twist to the genre as it involves the tragedy of two adults having to play caregivers to their mutual friend's daughter following that friend's death. This dark spin on the usual romance film is sure to be an attraction, as is Katherine Heigl, who has mastered starring in a chick flick.

Boston's own delivers

By Ashley Berger
Collegian Correspondent

As a senior in college, most 21 year olds are frantically searching for a job, already working full time or trying to move out of their parents' home. Sam Adams, however, has taken on a rather unique extracurricular activity: rapping.

On March 4, Adams released his first album "Boston's Boy," and because of its popularity on the iTunes charts, a deluxe edition was released on July 13. The deluxe edition features 15 original songs as opposed to 11 on the first. He has already sold out venues such as the House of Blues in Boston with a mostly female audience.

While he may not be an average 20-something, his interests are similar to other collegiate boys; girls, school, getting intoxicated, and making it big. But mostly girls.

Laced with thick drumbeats and a heavily engineered sound, the debut album's themes are somewhat repetitive, but nonetheless promising for a new rapper. While his looks are more comparable to Justin Bieber, his sound is much heavier and deeper than just another pop one hit wonder. His lyrics are light and upbeat, and the music compliments them nicely. Most tracks on the album are catchy and will most likely end up being played in clubs.

The album begins with "Comin' Up," a tune about going from Boston to Los Angeles, making a record, touring and trying to making it as a rapper. Similarly, in "Coast 2 Coast," Adams raps about his journey. "I used to be at the bottom with the other lobsters. Now I'm in the sky like birds and helicopters," he says in the song.

At times, Adams' lyrics take on a cocky edge. Though somewhat arrogant, the lyrics work well with Adams' image. His "I Hate College" track is a spin-off of Asher Roth's "I Love College" and is inspired by his time spent at Hobart and William Smith College and Trinity College.

The last track on the album, "Better Than You," has an in-your-face vibe. Adams' egotistical lyrics and "screw you" attitude might work in his favor to make male fans wish they had his confidence, and girls pray to meet him.

This leads into the next major theme of the album: girls. Adams' single "Driving Me Crazy" is about Adams' newfound fame, and basically how now he can get any girl with ease. However, the track shows some humility when he is asking the girl if she'll be his lady. It is obvious that Adams' has the maturity level of the average college student when it comes to girls; nervous and semi-perverted. The tune also features Adams on piano and a hook inspired by Annie Lenox's 1992 hit "Walking On Broken Glass."

"You Girl" is a slower, more intimate track that may easily be skipped over, but also shows Adams' softer side. It is an ode to a girl who has obviously stolen his heart and is a blend of compliments directed her way. This song should definitely have girls swooning over Adams cooing lyrics.

Arguably, some of the best tracks of the album are about partying. In "I'm So High," Adams takes on a jazzy feel incorporated with a trumpet, yet still produces a laid-back vibe. It's a relatively slow jam, but a classic on the album, because of its smoky melody that is so unique from other mainstream rappers. "Tab Open" and "Swang" are two instant club hits, with heavier sounds and a fast rhythm.

Adams also gives a shout out to his fans saying, "for all my fans, I love ya'll the truest," in his song, "Just Sayin."

Adams' raps contain lyrics that the average collegiate kid can relate to; passing class, hooking up with girls and achieving big dreams. While there is still room to develop as an artist, Adams proves that "Boston's Boy" will be the first of many successful albums.

GET A 5% REBATE ON TEXTBOOKS

It's easy to get your 5% rebate on textbook purchases from the
UMass Textbook Annex

Here's how it works:

Step 1: Purchase your books from the UMass Textbook Annex.

Step 2: Bring your receipt and UMass I.D. to the UMass University Store in the Campus Center between the fourth week and last day of classes.

Step 3: Get a 5% rebate credit to use on anything at the UMass University Store.

UMASS AMHERST UNIVERSITY STORE AND TEXTBOOK ANNEX
Amherst Campus Center | umass.bkstr.com

Rebate offer is good only on textbook purchases. Valid ID required. Returned books not eligible for rebate. Textbook receipts must be presented during the semester purchases where made. Store rebate credits expire at the end of the semester they where received. Rebate not to exceed $50.00 per semester. See store for details. Restrictions apply.

Minutemen looking to rebound from '09

Koch looks for strong season from Arikian

By Herb Scribner
Collegian Staff

(This article was originally published Aug. 20 on Dailycollegian.com).

It's a common maxim for a team to learn from its mistakes.

The Massachusetts men's soccer team, however, will be taking a different approach when it opens its season on Sept. 1 against Boston University.

"It's a new season, so there's no obstacles from last season," UMass coach Sam Koch said. "It's a completely different team. The main thing is bringing everybody together in the preseason and getting them ready for the season that's ahead. We don't look at last year, we look at this year."

Even though the Minutemen only lose one senior in Mark DeSantis, Koch sees the upcoming season as a completely different year for the Maroon and White.

"Everybody's a year older, but we have a new group coming in as well," Koch said. "We were young last year, and now we're a year older. The main thing is, can we score goals? Obviously, last year we didn't, we didn't score as many as we needed to."

Returning to the team is senior midfielder Ben Arikian, who is a 2010 Hermann Trophy Watch List candidate, the accolade awarded to the best Division 1 collegiate soccer player in the country.

Arikian's role will certainly be increased this year, without DeSantis there to put goals into the back of the net. Arikian has nine goals in 63 games as a Minuteman.

Last season, UMass' defense ranked first in the Atlantic 10 for goals allowed, holding other teams to .82 goals per game, and a .060 shot percentage. The defense played carefully within the box, as it allowed no penalty kicks over the course of the season.

The defensive side of the Minutemen were ranked 22nd overall in the nation in goals against.

The accolade-winning defense returns this year, with Michael Doherty, Chris Gilbert, Andrew Henshaw, David Kev and Dominic Skrajewski all in the backline. Aiding the defense will be midfielder Mark Dangleis, who doubles as a defender.

Arguably one of the top defenders for the Minutemen is Henshaw, who earned national awards and praise for his season last year. The junior earned NSCAA Mid-Atlantic All-Region Third Team honors, as well as the A-10 All-Conference Second Team for his defensive efforts.

Henshaw does more than just defend, also scoring a pair of goals and earning an assist in the 17 games he started for UMass last season.

Skrajewski produced offensively over the year as well, scoring a game-winning goal in a 3-0 rout against Colgate last season.

Key and Doherty will be equally important to the backline this season. While Key contributed to six of the shutouts earned by the Minutemen last season, Doherty played in 16 games with only one start.

Over the course of last season, the Minutemen went 7-7-3 under Koch. The early part of its season was brighter than the latter half, as UMass started the season with one loss in its first seven games.

Midfielder Ben Arikian dribbles past a Colgate defender during a 3-0 victory Sept. 29 last season. The Minutemen are looking to improve from last year's 4-5 Atlantic 10 record, with the team remaining mostly the same from 2009.

Atlantic 10 play was a different story. Within the conference, the Minutemen went 4-5-0.

UMass also produced better results on the road (4-3-1) than at home (3-4-1), but fell short during extra time, earning one victory in its six overtime matches.

One of the key issues last season for the Minutemen came in their inability to score. They averaged less than a goal per game and a .080 shot percentage. DeSantis was the highest goal-scorer for the Minutemen with four on the season.

As far as formation goes, Koch stated he'd likely go with the traditional 4-4-2. Koch, however, stressed that there isn't a sole formation he likes better than the other and that he truly wants players rotating around and helping each other out.

Even though last season the Minutemen did one game better when competing on the road, this fall they'll have a chance to change that, as they play 10 of their 16 games at Rudd Field, where Koch and Co. are historically difficult to beat.

UMass will host eight straight games, with a significant chunk of those matches being against non-A-10 opponents. The Minutemen will have some similar opponents as last preseason, including Vermont, New Hampshire, Boston University and Siena. UMass didn't lose to any of those teams last year, drawing to the Mountaineers, the Wildcats and the Terriers, while downing Siena, 3-0.

After finishing the non-conference schedule, the Minutemen will kick off their A-10 slate at home against Xavier and Dayton. Following the home stretch, UMass will compete on the road for three consecutive matches before returning home for another pair of contests. It will then close out the season with two away matches.

Two of the more interesting affairs for the Minutemen come on Oct. 16 and Nov. 5, when UMass takes on Rhode Island and Charlotte on Nov. 7. Both URI and the 49ers ended the Minutemen's playoff hopes last year with victories late in the season.

The same day that the Minutemen watched their playoff hopes crumble last year, the Maroon and White finished Richmond off 2-1 in a thrilling match, which featured a golden goal by Chris Roswess in extra time.

This coming season does not feature a rematch between the two sides, but it does offer UMass a match against Saint Louis to close out the season. The last time the Minutemen faced the Billikens, they won 2-1 in the second period of extra time, defeating a then-ranked No. 10 SLU.

UMass shuts out Vermont, loses to Washington at home

By Michael Counos
Collegian Staff

The Massachusetts women's soccer team improved its record to 1-1-0 against Vermont on Sept. 3 at Rudd Field. UMass coach Ed Matz not only locked up his first win with his new team, but also marked the 100th victory in his women's coaching career.

The 4-0 shutout for the Minutewomen began with a goal from junior Meghan Collins in the 22nd minute, who struck the ball into the lower-left hand corner of the net for her first career score. Deannna Colarossi increased the lead to 2-0 with a redirection from sophomore Jenna Goodwin at 38:24.

The second half was just as eventful for the Minutewomen as they tallied two more scores in front of the home crowd. Freshman Kayla Austin bent in a shot under the crossbar at 53:17 for her first collegiate goal. In the 64th minute senior Kelsey Anderson lofted a 25-yard strike into the top left corner of the net.

UMass	4
Vermont	0
UW	2
UMass	0

UMass outshot Vermont, 22-15, however the Catamounts had a 9-2 advantage on corner kicks, but could not capitalize on any of the opportunities. Sophomore goalkeeper Emily Cota had eight saves in net for the Minutewomen, while Sarah Leiby recorded four saves for the Catamounts.

"I was very impressed with the defense and how well they played. Our defense is going to be an essential part in our success this season," Matz said.

In the season opener against Washington, the Minutewomen were victims of a shutout themselves. Washington took the early lead in the 12th minute off the foot of McKenna Wailley. Wailley was assisted by Jane Mitchell.

The deficit grew to 2-0 as Lindsey Elston crossed a pass through the air to Kellye Joswick who headed it in. Before the end of the first half freshman Lauren Skesavage fired a long-range shot but missed just wide of the right post. Washington added their final goal in the 49th minute of the contest with a goal off of the foot of Kelsea Brajkovich in traffic.

Cota recorded 3 saves in the losing effort while her counterpart Jorde Lafontaine-Kussman stopped five. UMass was outshot,15-9, and the Huskies held the edge in corner kicks, 7-3.

"We need to take advantage of some of the opportunities we are getting and the offense will continue to get better throughout the season," Matz said.

The women will travel to play Albany on Monday for their first road game of the season.

Michael Counos can be reached at mcounos@student.umass.edu.

Senior Kelsey Anderson kicks the ball upfield during a game last season. UMass started the year with a 1-1 split at home by losing to Washington, 2-0, and shutting out Vermont, 4-0.

Three Minutewomen line up to stop a penalty kick during a game last season. With a new coach in Ed Matz, UMass looks to build off of last season's Atlantic 10 tournament bid.

MESSAGES FROM THE BURSAR'S OFFICE

Payment Information for Fall 2010

QuikPAY for Students

The Umass Amherst campus no longer sends paper bills. QuikPAY is our system for all students to view and/or pay their bills on-line and it is the preferred method of payment. To access QuikPAY students should go to their Student Center in SPIRE and then click on "View/Pay Bill" in the Finances section. Students can set up parents and other individuals as QuikPAY Authorized Payers through SPIRE. Go to www.umass.edu/bursar for more details. Please be advised that QuikPAY and FERPA have their own separate authorizations/access codes.

FERPA

The Family Educational Rights and Privacy Act is a federal law protecting the confidentiality of student records. In compliance with FERPA, UMass Amherst must have the student's written permission to release information about their records. You can provide permission by filling out a FERPA privacy waiver online. The FERPA privacy waiver is limited to two categories of information: finances and housing. It does not allow your designees access to your academic information (such as your grades).
Fill out the FERPA Privacy Waiver through SPIRE; navigate to the Student Home ⇨ Holds & To Do's⇨ FERPA Privacy Waiver.

Excess Express

If you are expecting a refund in Fall 2010, you must sign up for Excess Express through your SPIRE access to expedite your future student refunds. Automatic student refunds will ONLY be distributed to students who are enrolled in the University's Excess Express (direct deposit) service.

Students who do not have an active Excess Express enrollment in SPIRE will not be refunded and their credit balances will be applied against future charges.

Students who choose not to enroll in Excess Express will need to fill out a paper check request form for each refund. Requests are made on line in SPIRE under the Finances section. Processing time can be up to 30 days from the date of form submission. Students will receive an email once refund checks are available.

Waiving Student Health Insurance

The Student Health Insurance waiver deadline is 09/20/10.

If you do not waive the student health insurance for fall 2010 you may not waive it for spring 2011 semester unless spring 2011 is your first semester. The student mandatory health fee cannot be waived. If you are eligible to waive the Student Health Insurance Plan, visit http://spire.umass.edu for a link to the online waiver process.

Eligible Graduate Student Employees (Those in the GEO bargaining unit who qualify for SHIP Fee Exemptions) who do not waive SHIP are entitled to a 95% reduction of the SHIP Health Fee for an individual. Send the Bursar's Office an email at bursar @admin.umass.edu. to inform

How to Contact Us

The Bursar Teller hours are Monday through Friday from 9:00am-4:00pm and the Customer Service hours are 9:00am-5:00pm. The Bursar telephone number is (413) 545-2368 or you can contact us by email at bursar@admin.umass.edu

Newcomers hope to contribute in 2010

UM looks to return to A-10 championships

By Michael Wood
Collegian Staff

Every fall, students flock to campuses across the world for the start of another challenging academic year. As if freshman year isn't daunting enough for incoming students, the Massachusetts field hockey team will depend on a select few of those first-years to lead their team to another Atlantic 10 conference tournament.

Justine Sowry returns to the helm for her fourth consecutive year as head coach, and this season she will try to return the team to its 2008 form when it won the A-10 title.

In three seasons at UMass, she is 43-23 and 15-4 in A-10 play. Sowry has also recorded two conference championships and two NCAA tournament appearances as well as a 17-3 record in 2008.

The Minutewomen got off to a hot start in 2009, jumping out to a 7-2 record and beating top-ranked squads like Providence, James Madison and Iowa in the process. The team peaked midway through the year and earned a No. 9 national ranking before hitting a few speed bumpsgoing into a downward spiral.

The Minutewomen collapsed in the second half of their season, succumbing to injuries and inconsistent play from just about everyone on the field. The team went 2-5 over its next seven games before rallying to win three of its last four contests.

The Minutewomen finished with a 12-9 overall record and a 3-3 mark in conference play, which was good enough to squeak into the A-10 tournament. However, they subsequently fell to Richmond in a 2-1 overtime loss to end the season.

In 2010, things should be different. In spite of adding 10 new freshmen to the roster, the Minutewomen are the preseason favorite to win the A-10 conference title. With a sea of new faces and a lot of work yet to be done, Sowry remains confident in her team's chances.

"The girls have done terrific so far," Sowry said. "We've added athleticism, speed, strength and energy and we have tremendous depth this year. There's a lot of exciting young talent on display."

Yet, when this year's squad was selected as the favorite to win the conference championship, it came as a bit of a shock to Sowry and her staff.

"I'm not a fan of [being picked] at all," Sowry said. "We don't deserve that right now. Last year our performance in the A-10 tournament wasn't good at all."

However, Sowry was quick to point out that preseason and practices have gone well and she expects her team to compete with the best.

"Right now we're trying to stay focused and stay enthusiastic," Sowry said. "We're building towards A-10s and hopefully we'll be firing on all cylinders. It's no walk in the park, but we have tremendous leaders this year and some talented newcomers who we expect to get a lot of things done for us."

The make-up of the field hockey schedule is an annual debate of sorts. Like always, less than half of UMass' opponents are conference teams, and of those teams, only a handful will be a true test for the Minutewomen.

While seven games are against A-10 opponents, the other 13 are against juggernaut programs that will test the will and might of the Minutewomen squad early and often.

UMass faces seven of the 16 NCAA tournament teams from 2009 including Maryland, which has won three of the last five national championships. Also on tap this season are perennial powerhouses Boston College, Indiana, Connecticut, American, Syracuse and Richmond. Boston University and Lock Haven make nine teams who have made the NCAA tournament recently and round out what Sowry calls the toughest schedule she's had at UMass.

"It will be interesting to see how it plays out," Sowry said. "We want to get into a position where we can get an at-large bid in the future. It's my priority to have a competitive schedule so I try to schedule top-10 opponents. It makes the girls better. It's going to be tough but we're going to give it everything we've got."

UMass lost three players from last season to graduation, but returns nine of 11 starters, including seniors on each of the lines. Defender Jamie Bourazeris anchors the defensive line while All-American midfielder Makaela Potts directs the action in the center of the field. Forward Katie Kelly is the only player guaranteed to start on the front line, and All-Conference and U.S. junior national team goalkeeper Alesha Widdal will attempt to turn away anything that gets behind her defense.

The seniors will be joined by 10 new freshmen and international transfer students Melanie Sutherland and Thando Zono. Sutherland will be a freshman despite having played two seasons at Seaford College in England, and Zono comes to UMass as a junior from Grahamstown, South Africa and the junior national team.

Sowry expects her new players to make an immediate impact and get the team off to another hot start.

"[Thando] and Melanie have played a lot more overseas," Sowry said. "They will bring a lot of instinct to our team that we lacked last year. And our freshman look great so far and we expect them to get right in there against the best and come up with some great play for us. It's going to be a fun year."

Michael Wood can be reached at mcwood@student.umass.edu.

Redshirt sophomore defender Callie Sweigart looks to pass against an opponent last season. The Minutewomen fell to BU this weekend but defeated Northeastern, falling to 1-3 so far this season. UMass takes on Conn. this Saturday, Sept. 11.

MATTHEW HARRISON/COLLEGIAN

UMass splits weekend

Minutewomen defeat Huskies Friday, fall to BU Sunday as Kelly tallies lone-goal against NU

By Pete Vasquez
Collegian Staff

The Massachusetts field hockey team completed its trip to Boston, Mass., by taking a game against Northeastern on Friday before falling to Boston University on Sunday.

The Minutewomen (1-3) fell behind, 1-0, to the Terriers (4-0) just 50 seconds into the game, and had to overcome a 2-0 deficit within the first 15 minutes.

"It's really tough," UMass coach Justine Sowry said. "One of our goals was to come out strong and control the tempo and that completely backfired. In the last couple of games, our opponents have scored first and scored pretty early so it definitely doesn't help our cause."

UMass controlled the second half, scoring once on Katie Kelly's redirect in the 42nd minute. UMass outshot BU, 6-4, in the second half while drawing six penalty corners and holding to the Terriers to none.

"They're competitors, they don't like to lose and they work really hard," Sowry said of her players. "Unfortunately we would rather do that on the front end and put the pressure on our opponents rather than the other way around."

The Minutewomen also went behind, 1-0, in the first half of their game against Northeastern before Kelly tied the score five minutes later. Jaime Bourazeris put UMass ahead with 15 minutes left, scoring off of a penalty corner.

The Minutewomen's 2-1 win over Northeastern, coupled with their 2-1 loss to BU resulted in the type of tight games UMass has grown accustomed to seeing early on this season. Each of its first four games has been decided by one goal, something that Sowry sees as a reoccurring theme.

"It's not going to get any easier by any means," Sowry said. "Our next opponent is [Connecticut] and they're probably in the top five in the country right now. They're tough opponents, they don't give you much room to work in and you have to build upon a really, really solid defense and take the opportunities when you get them. It's not easy, but we're still trying to remain focused with the A-10s in sight, and just keep improving and learn from the games that we've played."

A bright spot of the young season has been the play of Kelly, a senior captain of the Minutewomen. Kelley's goal against the Terriers was her third goal in four games.

"[Kelly] has been a fantastic leader and she's one of the most competitive, hard-working individuals that I've ever had the pleasure of coaching," Sowry said. "She's leading by example and she gives 100 percent every minute that she's on the field. Certainly when she's on the field that's when we get our most attacking opportunities, we look very dangerous and threatening."

UMass has one goal in each of its last four games, three of those courtesy of Kelly. Sowry attributes the inconsistent play of the forward and midfield lines to the youth at those positions.

"We're definitely getting opportunities," Sowry said. "Between our forward line and midfield line, there's a lack of connection so we want to get more of our attackers involved in the play so it's not individual."

"We have five or six freshmen on our midfield and forward lines," added Sowry. "So it's young and [the team's] going to take some time to connect better."

With such improvements, UMass can take their spurts of strong play and better stretch them over a full 70-minute game.

"It's every individual taking responsibility for their own performance and matchup with their direct opponent and staying focused and defending as an entire team," Sowry said. "If you go solo, a lot of gaps can open up and that's what happened today. BU controlled the tempo and we weren't stepping up defensively as an entire unit."

****IMPORTANT ANNOUNCEMENT****
REGISTRATION FOR FALL 2010

The Writing Program Placement Test
will be offered on:

Tuesday, September 7 @ 6:00pm in Bartlett 109

You must take this exam to qualify for enrollment in EnglWrit 112 (College Writing).

This test may be taken only once.

Students do not need to register for the test.

Eight starters return from last year's team

Junior linebacker Tyler Holmes reacts as Tribe quarterback Mike Callahan drops back for a pass. Holmes had seven tackles for UMass and led the comeback on defense over William & Mary in the fourth quarter.

SAMANTHA WEBER/COLLEGIAN

ROSTER from page 18

Overall, UMass returns nine starters from last season, including four on offense and defense and one on special teams. In the locker room, the Minutemen will be led by junior captains Tyler Holmes and Emil Igwenagu.

Holmes is the most decorated player from this summer, earning five different preseason honors including Sports Network Second Team All-American and Phil Steele Preseason Third Team. He leads a defense which finished seventh in the Colonial Athletic Association in points allowed.

Running backs

Running duties are projected to alternate between Griffin and Hernandez during the opening game against William & Mary. Hernandez showed plenty of promise last season starting in place of an injured Tony Nelson.

They lead a backfield which is young and inexperienced. Other than the two starters, no one has seen a single carry in a college game.

Red-shirt sophomore tailback Alan Williams is the only other back returning from last year's roster, while Mike Delaney from Foxborough, Mass., and Jamar Smith from Binghamton, N.Y., can step in as freshmen.

Quarterbacks

Havens returns to the Minuteman huddle as the incumbent starter, unlike last season, when he was vying for a starting role amidst a four-player quarterback competition. The second-year starter has had a year to acclimate to Morris' system and adjust to the game-speed of Division 1-AA and looks to play more consistently this season.

Havens showed flashes of greatness in his junior year, most notably against Rhode Island in Week 3 when he threw for 329 yards on 22-of-30 passing with two touchdowns and was awarded CAA Offensive Player of the Week honors. But Havens, however, also saw his production dip during the second half of the season.

He finished with an efficiency rating of 115.9, throwing for 1,908 yards and nine touchdowns over 10 games, while completing 55 percent of his passes.

Ian Shultis from Thousand Oaks, Calif., appears to be the clear backup. Like Havens, he is a junior college transfer student. In his freshman season at Moorpark College, he completed 212 passes for 2,285 yards and 22 touchdowns, earning All-Conference honors in the Southern California Football Association.

Behind them are freshman Brandon Hill and redshirt freshman Jesse Hunt who will need to prove themselves.

Morris expressed that he would be open to running a dual-quarterback system, but said that he does not prefer it and that it likely won't happen.

Offensive line

The Minutemen finished the 2009 season ranked first in the CAA in sacks allowed (17, 130 yards), due primarily to their play up front.

Aside from the loss of All-American guard Vladimir Ducasse, who the New York Jets selected in the second round of the National Football League draft, their offensive line remains largely intact.

Third-year starter Josh Samuda is a Phil Steele Preseason Second-Team All-CAA lineman, leading the front-five from the left guard position. He blocks alongside redshirt senior John Ilne, a versatile center and guard, and Brian Ostaszewski, a fourth-year starter at right tackle.

Stephane Milhim is the Minutemen's third returning starter up front and the addition of Niland, who helped block for Griffin en route to a 1,000 yard season as a Huskie last season for just the fifth time in school history, bolsters an already sizable set of starters.

With a starting unit projected to be an average of six-feet, five inches and over 300 pounds, UMass will face few teams that can match its offensive line in size.

Receivers

Former Minutemen standout wide receivers Victor Cruz and Jeremy Horne graduated in 2009 and are currently fighting for their places on NFL rosters. They took with them a combined 82 catches and 1,170 yards receiving, leaving a group of new players that Havens will have to get used to throwing to.

Overall, Morris will need to find replacements for their No. 1 and No. 3 wide receivers in a passing offense that accounted for over 2,500 yards in the air.

Talley returns to the lineup for his second season as a starter and is likely to be Havens' number one target. The redshirt junior finished second in 2009 in catches (28) and receiving yards (350).

Nelson joins him in the flats after catching 40 passes for 520 yards and four touchdowns last season with Northeastern.

Redshirt freshman tight end Rob Blanchflower has shown promise during training camp and junior tight end Andrew Krevis will see an increased role after playing in all 11 games last season as a back-up.

Defensive line

Defensive coordinator Keith Dudzinski and defensive line coach Steve Tirrell have some holes to fill up front with the departure of the entire UMass starting line.

Brandon Collier, Michael Hanson, Kyle Harrington, and Anthony Minette accounted for 149 tackles and seven and a half sacks and have all graduated,

Aside from redshirt sophomore Charles Thompson, who played in nine games and registered 14 tackles, the Minutemen lack any kind of experience in the trenches.

Redshirt senior Brandon Flanagan sat out the 2008 season after transferring from Buffalo. He played in two games as an offensive lineman and now competes for a position on the other side of the ball with eight freshmen.

Linebackers

Holmes enters the season as the face of the linebacker core, touting more preseason accolades than any player on the team. The captain's play during the 2009 season certainly warranted attention, as he finished second in the CAA in tackles with 101 (11.2 per game) and fourth in interceptions per game.

Perry McIntyre returns as a sophomore after registering 64 tackles in his first year, good for third on the team.

Mike Mele, Scott Duggan and Chris Chamberlain will all see increased roles this year after limited play last season.

Secondary

The UMass defense ranked second-to-last in the CAA in turnover margin and ninth overall in the conference in pass defense (198.2 yards allowed per game).

The Minutemen moved redshirt senior Ke'Mon Bailey to cornerback last season from wide receiver and now rely on him to anchor a secondary that lost its leader, Jeromy Miles. Bailey played in all 11 games last season and finished with 38 tackles, including four and a half for a loss.

Redshirt sophomores Darren Thellen and Kumar Davis return to the secondary. The two combined for 65 tackles and three interceptions.

Redshirt junior Shane Viveros starts at strong safety as the Minutemen are more experienced in the secondary than last year.

Special teams

In the battle for field position, the Minutemen will have a reliable asset in Caleb Violette as punter. As a redshirt freshman, he ranked in the top two in the CAA in punting average for the first eight weeks of the season and finished in fourth place (39 yards per punt).

Violette competes for place-kicking duties as well after UMass lost its starting place kicker in Armando Cuko from last season. He attempted two field goals (1-of-2) and made both of his two extra points in 2009.

Freshmen Igor Garcia and Brendon Levengood were recruited to help take the place of Cuko.

The Minutemen managed one touchdown on returns last season on a 26-yard scamper by Adeoba. They averaged six yards per punt return and 18.5 per kick return and will rely on Talley to be their playmaker in that facet.

Dan Gigglioti can be reached at dgigglioti@student.umass.edu.

Nelson leads air game

MINUTEMEN from page 18

transfer who figures to be a weapon this year, caught five of Havens' 15 completions and racked up 78 yards, including 36 on a touchdown reception for UMass' first score this season.

"I'm comfortable with Anthony," Havens said. "He's my roommate and I actually live with the kid. You can ask coach Morris, he makes us leave the field after practice because [Nelson] will want to throw extra routes to get timing down. He's a real workhorse, he'll do anything to get things right and I'm right there to do it with him."

William & Mary took a 16-14 lead into halftime on the strength of a Jimmy Hobson five-yard touchdown reception and 28-yard scramble for a score by Callahan. After throwing for 130 yards in the first half, Callahan was held to 92 yards in the second half as the UMass defense clamped down.

The Tribe, however, had a 23-14 lead early in the fourth quarter after Callahan connected with wide receiver Cameron Dohse on a 34-yard touchdown pass.

Though turnovers were even at one apiece for the game, the Minutemen were fortunate to only lose one of the five fumbles they put on the ground.

UMass returns to McGuirk next Saturday when the Minutemen take on in-state rival Holy Cross at 6 p.m.

Jay Asser can be reached at jasser@student.umass.edu.

Matz heads into first year with UMass with 10 new freshmen

By David Martin
Collegian Staff

With a new coaching administration, an offensively-stocked game plan and 10 new players added to the squad, the Massachusetts women's soccer team has a fresh start for the 2010 campaign.

"We are looking to be as competitive as possible this year," UMass coach Ed Matz said. "It's going to be a learning year for us. The girls are going to adapt to the new season, the new roles on this team, and we are looking to finish out amongst the top six teams in the A-10."

Matz is bringing his coaching experience and technique to Amherst for the first time in his already successful career. He previously led the Northeastern women's team to two of its most successful seasons in school history, seasons that saw it win the Colonial Athletic Association championship in 2008 and its first ever CAA regular season title with a commanding 12-4-3 record in 2009.

Last year was also the year in which Matz earned the CAA Coach of the Year award for the first time in his career.

One of the keys to the Minutewomen's rise in the standings is going to be a change in pace from a heavily defensive game to an offensive one.

"Last year, the [players] played a 4-5-1 formation that heavily favored defense," Matz said. "This year, we are going with a 4-3-3 formation that will not only bring about more offense, but will also bring a more exciting brand of soccer."

The 4-5-1 formation features a pocket in the midfield that leaves little room for any offensive rushes. The Minutewomen struggled with this type of play last year, letting 33 goals enter their net while scoring less than half of that (15) by their own accord.

The 4-3-3 formation that Matz is pushing into motion is a heavily favored setup at the collegiate level, not just for its goal production increase, but also due to the fact that it does not sacrifice as much defense as would be expected from a spectator's prospective, especially considering UMass' defense is already at impressive levels.

"By far, our greatest strength is in our defense," Matz said. "It's our best skill as a team and is outstandingly led by our two senior defenders and our goalkeeper."

The aforementioned seniors, defenders Alyssa Visconti and Kelsey Anderson, both bring impressive numbers to complement their already impressive leadership on the field.

Visconti has earned several honors over the years including the Outstanding Newcomer award following her freshman year. Visconti was also a part of a Minutewomen defense that only allowed 20 goals in 17 games during her freshman year. She started in all 35 games of her first two years at UMass and was a part of 10 shutouts in those two years.

Anderson, a perennial key player, has started an impressive 52 of the 53 games that she has played in. Anderson also has 34 shots, four assists, two goals and eight points to her credit, and has proved to be an essential player with her versatility as both a defender and a midfielder.

As critical components to an impressive defense, they also find one of their biggest strengths in team goaltender Emily Cota.

Cota has shown impressive ability and talent along with her leadership, traits that are helping her to solidify her position as the team's starting goalkeeper. While only posting a 4-7-2 record during her freshman year, she showed great promise with a .784 save percentage and a 1.71 goals against average. Cota started in seven of the 16 games she played in, posting 76 saves throughout, with one shutout in her career.

Matz could not be happier with the leadership and work ethic he has seen come out of his returning seniors.

"They worked extremely hard over the summer, came back to camp very fit, and are very excited for the season ahead," Matz said. "They set the tone on and off the field and play great roles in the building of this team."

Their roles could not be greater this season, as they have 10 new players to lead as the season begins to progress.

UMass has made great efforts to entice fresh, promising talent to come to Amherst to wear the Maroon and White. Of these 10 freshmen, nine of them have earned spots on the opening day roster. Among them are four attackers, four defenders and one goalkeeper, making-it a promising immediate and coming future for the team.

"We have a great balance of experienced veterans and eager newcomers that will definitely make us a strong team for any opponent to face," Matz said.

Such talent will be invaluable to the Minutewomen, as they look to prove themselves against the likes of Washington, Vermont and Brown, as well as against inter-conference rivals Xavier, Rhode Island and Temple.

"The competition is going to be tough on us during a learning year, but it is going to benefit us in the long run," Matz said. "They will help us to become a team that can really go the distance during the season and into the playoffs."

UM opens with draw

By Steve Levine
Collegian Staff

Had it not been for a broken play in the defensive end, the Massachusetts men's soccer team could have started its season with a victory instead of a tie Saturday, 1-1.

UMass	1
BU	1

Boston University scored the first goal of the contest early in the first half when a UMass defender botched a clearing attempt in its defensive zone. Scrambling to recover, the Minutemen received a tripping foul in the box, which led to a successful penalty kick for the Terriers.

"We gave up that penalty which put us in a bad position that we had to weasel out of," UMass coach Sam Koch said. "But we came back in the second half and I give [our players] a lot of credit for that."

After halftime, the Minutemen wasted no time in leveling the score as midfielder Bryan Craft scored on a chip shot over Terrier goalie Brandon Briggs just 64 seconds into the half. Craft's goal represented an effort that Koch wants repeated throughout the season as he looks for more of his players to contribute offensively.

"Craft on the flank is dangerous going forward," Koch said prior to the season's start. "He's worked hard all summer from what he's told us and he can have a huge impact scoring goals for us. We need him to help us score goals."

Craft's shot was one of the 13 taken by the Minutemen, three of which were on goal. BU registered 23 shots, with seven on goal.

"BU is a big, strong and hard-working team," Koch said. "This team is also probably better than last year's so they were tougher today."

Koch praised his team for its passing and defense, but chastised it for its mistakes.

"As far as passing goes, I think we knocked the ball around pretty good," Koch said. "We were able to switch fields well and we were successful in getting ourselves into good positions to create scoring chances. We were [also] able to defend well enough to cover our mistakes."

A major player in the UMass defense was goalie Chris Pickos, who made two critical saves to preserve the tie late in the game. Pickos is coming off a stellar year where he posted four shutouts and was in the top 15 nationally for goals-against average (.68) and save percentage (.868).

Koch figures Piekos to be an anchor in net for the Minutemen while the rest of the starting roster takes shape.

"It's going to take time [to set the starting lineup]," Koch said. "There are some guys who have potential to have a big impact for the team and there are others who have some things to learn. We need to play a few more games to really be sure on where we're going as far as who's developing the fastest and who's learning our system the fastest."

The Minutemen return to action on Sept. 6, when they host Harvard for a 3 p.m. match at Rudd Field in Amherst.

Steve Levine can be reached at slevine@student.umass.edu.

MAYBELLE SPARK/COLLEGIAN

Senior midfielder Ben Arikian looks to make his move against a Colgate defender last season. The Minutemen tied their season opener with the Terriers, 1-1.

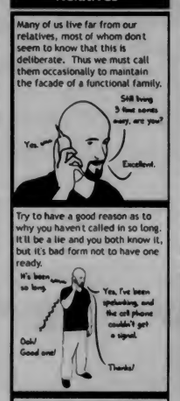
Basic Instructions

By Scott Meyer

"How to Call Your Relatives"



Many of us live far from our relatives, most of whom don't seem to know that this is deliberate. Thus we must call them occasionally to maintain the facade of a functional family.
Still living 5 time zones away, are you?
Yes, what?
Excellent.
Try to have a good reason as to why you haven't called in so long. It'll be a lie and you both know it, but it's bad form not to have one ready.
It's been so long
Yes, I've been globetrotting, and the cell phone couldn't get a signal.
Ooh! Good one!
Thanks!
Keep asking questions. It gives the impression that you care, and keeps you from being drawn into a real conversation.
How have you been?
Who wants to know?
Don't you know who you called?
Don't you know who I called?
You're not making any sense.
Does that surprise you?
Just to cover yourself, always call when you have a built in reason that you have to hang up in 10 minutes. You don't want to have to make something up.
Then why did you call me?
I gotta go... I have food poisoning.
Because... food poisoning reminds me of you... I guess.

Veterans bolster developing roster

Morris and Co. mix experienced transfers with young talent

By Jay Asser
Collegian Staff

If some of the names on the Massachusetts football roster look unfamiliar this season, don't be surprised. Entering the second year of the Kevin Morris era, the Minutemen consist of a young mix of talent and veteran transfers from discontinued programs.

UMass returns just eight starters from 2009, four on each side of the football. Despite the inexperience, Morris isn't going into the season with low expectations.

"We're very optimistic," the UMass coach said at media day. "If you're not optimistic right now, then it's going to be a long, long year and we're not looking forward to that at all. We're looking for these young guys to really get on the map."

Two fairly young players the Minutemen will rely on heavily this season are captains Tyler Holmes and Emil Igwenagu. Holmes is a true junior who will essentially quarterback the defense from the MIKE (middle linebacker) position. He's received a lot of attention from media outlets this summer and has been named a preseason All-American. Igwenagu, meanwhile, will be used all around the field offensively and is a rising redshirt junior himself.

Both players will attempt to lead UMass to a strong start to begin the season, something Morris is emphasizing in training camp.

"We've made some great gains and we're a very young team overall that's looking to mature by week 1," Morris said. "There's no time to waste this year coming out. We've got to be ready to go from the get-go and that's our plan and that's what we're working towards right now."

Last season, Morris got the Minutemen off to a quick start in his inaugural year with four wins in the first six games. The most significant victory came against then-No. 4 New Hampshire on Oct. 17 before UMass tailed off and dropped three of the last four contests.

While 2009 served as a learning curve for Morris, this season brings higher expectations for the coaching staff.

"Again, you go through the role, you know what to expect but you haven't done it," Morris said of his first year. "I've been there and done it and now I can set my own plan in motion, what I'm trying to get accomplished with better vision and better goal-oriented in terms of not only the daily agendas and practices but also for the kids and overall goals. I think we're much more comfortable overall, the kids understand the plan and the process, and we're obviously trying to excel and meet those demands."

Fortunately for Morris, his job will be made easier by the influx of veteran talent from discontinued programs. These transfers include John Griffin, Greg Niland and Anthony Nelson.

Griffin is a tailback who makes the move from Northeastern after three seasons with the Huskies. In his junior year, the Westminster native ran for 1,009 yards on 207 carries with five touchdowns and grabbed 25 passes for 178 yards. For his efforts, he was named First Team All-CAA as well as Northeastern's Most Valuable Player and Most Improved Player.

Niland, meanwhile, also arrives with Griffin from Northeastern as an offensive tackle. The redshirt senior blocked for a Huskies team that averaged 130.8 rushing yards per game in 2009. The two NU transfers figure to bolster the ground game and allow the Minutemen to pound the rock.

In the passing game, Nelson will look to bring his contributions from Hofstra and help fill the production that former wide receiver Victor Cruz took to the NFL. The senior caught 40 passes for 520 yards and four touchdowns in 2009, including five catches and 71 yards against UMass on Nov. 21.

All three players, along with the other transfers, round out the roster and bring some comfort to Morris, who knows they'll be important in guiding the young talent.

"With those guys coming in, those are the guys we targeted in the recruiting class when those programs fell through," Morris said. "We wanted to try to bring in some older guys that have senior leadership qualities that can come in and help our team along and help them in a hurry."

A big focus for UMass this year will be forcing more turnovers on defense and, more importantly, holding on to the ball on offense. The Minutemen fumbled nine times in 2009 but also threw an inordinate amount of interceptions with 22. Their 31 total giveaways and negative 11 turnover margin ranked second to last behind Towson in the Colonial Athletic Conference.

"Turnovers were huge for us last year," Morris said. "We were 5-6 for a reason and we gave games away. In the CAA, you turn the ball over, you're going to lose. From the minute the season was over, we've been all about the ball. That's been our slogan through the winter and through the spring and again in the fall."

The 2010 schedule for UMass includes noteworthy opponents and venues such as Michigan at Ann Arbor and conference rival New Hampshire at Gillette Stadium. Though fans may be looking ahead, Morris and the team are taking it one day and one game at a time. First on the list will be CAA foe William & Mary in the season opener at McGuirk Stadium on Sept. 4.

Despite possibly being in a transitional year, the Minutemen could attract more eyes and attention than seasons past. If they're up to the task, that attention could be more than well warranted.

Jay Asser can be reached at jasser@student.umass.edu.

Hernandez and Griffin impress for Minutemen

By Jay Asser
Collegian Staff

Having a more balanced offense and pounding the rock on the ground was one of Kevin Morris' keys to this season for the Massachusetts football team.

In the opening game at McGuirk Stadium on Saturday afternoon against William & Mary, the Minutemen (1-0) did just that with their dynamic combination of tailbacks in Jonathan Hernandez and John Griffin.

UMass	27
W&M	23

En route to defeating the No. 4-ranked Tribe, 27-23, the duo combined for 216 yards on the ground and three of UMass' four touchdowns for the day. Hernandez led the way with 132 yards on 25 carries while Griffin, a noteworthy transfer from Northeastern in the offseason, amassed 84 yards on 21 chances.

"It's great to have Jonathan Hernandez here for relief for me and also myself for relief for Jonathan," Griffin said after the game. "If one of us has a bad game, it's kind of a one-two punch so we never miss a beat, regardless of who's in the game, who's starting and who's coming in. I feel like with me and Hernandez in the backfield, it's a really potent threat here and it's a one-two punch, you're not losing a step regardless of who's in the backfield."

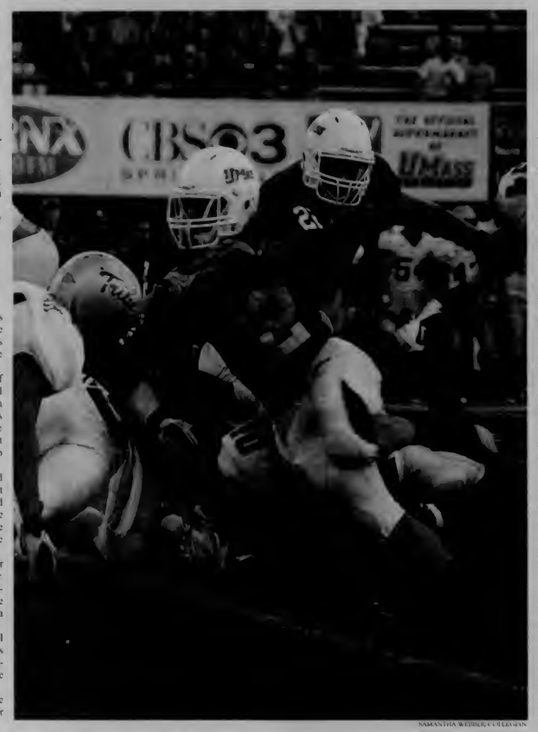
"I don't think it could have been better script-wise and how you use both those guys," Morris said. "Just looking at the stats, one guy carried it 25, one guys carried it 21. Instead of one guy carrying it 46, we're able to split that up and be very efficient at the end of the game with fresh legs. They're both premier backs in the league at the same time, it's not like they're two average Joe's. These are high-level John's."

Hernandez set up the five-yard go-ahead touchdown for Griffin with a 64-yard catch and run late in the fourth quarter. After failing to convert the two-point conversion, junior All-American Tyler Holmes sealed the victory on defense. The linebacker picked off Tribe quarterback Mike Callahan on a deflected pass to tailback Jonathan Grimes.

After getting the possession back, the Minutemen still had to run out the clock. On a critical fourth down, UMass relied on its strength as Hernandez ran for seven yards, leaving William & Mary (0-1) with no timeouts to extend the game.

In the air, quarterback Kyle Havens found a favorite target in newcomer Anthony Nelson. Nelson, another senior

See MINUTEMEN on page 13



Senior tailback Jonathan Hernandez paved the way for the Minutemen Saturday, amassing over 200 total yards en route to a 27-23 victory over No. 4 William & Mary.

Cut programs paying off for new-look UM

By Dan Giglotti
Collegian Staff

The cancellation of the Northeastern and Hofstra football programs after over 70 years of tradition left a slew of talented and experienced college players suddenly looking for a place to play.

The Massachusetts football team welcomed five of those players to bolster a squad that has gotten very young in the offseason.

Losing 15 starters to graduation, UMass coach Kevin Morris recruited veteran players to provide guidance to his team.

"Part of our recruiting process was that we have a small senior class, and we are a young team., So those are the guys we targeted in our recruiting process," Morris said.

"[We tried] to bring in some older guys who had some senior leadership qualities who could help our team in a hurry."

Amongst them are former Huskies and College Athletic Association Preseason All-Conference tailback John Griffin, senior lineman Greg Niland and sophomore linebacker Chad Hunte.

Former Pride wide receiver Anthony Nelson joins a depleted receiving unit that lost four players who accounted for 75 percent of UMass receptions and 61 percent of its receiving yards.

Along with Nelson comes redshirt freshman lineman Anthony Dima to round out a group of talented transfer students brought in by an advantageous recruiting team led by recruiting coordinator Guido Falbo.

Transfer students have been a valuable asset for Morris, now in his second year as head coach of the Minutemen. Senior Kyle Havens transferred last year from Diablo Valley Junior College and assumed the starting role under center.

Havens looks to build on his experience as last season's starting quarterback, but does not have the luxury of throwing to a familiar receiving core. One starting receiver returns this season, with Jonathan Hernandez as the lone returning option out of the backfield.

"We lost a lot of guys, but we also have a lot of guys who will step up," Havens said. "Nelson is going to be amazing at the X [position] for us. He reminds me of [Victor Cruz], quick and shifty. Julian Talley was making big plays for us last year, , and I can give it to any one of our backs and they can take it 80 yards downfield."

McMahon takes over for departed Venechanos to lead UMass

Former coach heads to OSU after successful tenure at UM

By Herb Scribner
Collegian Staff

(This article was originally published July 5 on Dailycollegian.com).

It's been a summer of change for the Massachusetts women's lacrosse team.

Eight days removed from Alexis Venechanos' departure from UMass, former Connecticut coach Angela McMahon accepted a position to lead the Atlantic 10 champion Minutewomen.

"I am thrilled and honored to return to the University of Massachusetts," McMahon said. "I would like to thank Athletic Director John McCutcheon and Associate Athletic Director Dan Markowski for giving me this amazing opportunity to lead the women's lacrosse program. I would also like to thank UConn Athletic Director Jeff Hathaway for my wonderful experience at Connecticut."

Venechanos' decision to leave UMass came on July 1 when Buckeyes' Athletic Director Gene Smith who created a national coaching search, which led to McCutcheon deciding on McMahon to coach the Minutewomen.

"The Ohio State University has a phenomenal reputation both academically and athletically and I am honored to be named its next women's lacrosse coach," Venechanos said to UMass media relations following her departure. "I look forward to aiding in the tradition of success for these student-athletes on and off the field and taking this next step in my professional career with the Buckeye family."

The four-year coach for the Maroon and White will go out on a high note, as her Pat squad successfully retained the A-10 championship back in late April.

Venechanos will be the second head coach in program history for the Buckeyes, replacing Sue Stimmel who resigned from her position in May. She will enter into a program that went 9-7 during the 2010 spring season and faltered in the ALC tournament in with a first round loss to Penn State.

Despite being a new coach, McMahon is no stranger to UMass, as she served as an associate coach coach under Venechanos in 2007 and 2008.

"We are excited to have Angela rejoin the UMass women's lacrosse program as our new head coach," UMass Athletic Director John McCutcheon told UMass Athletics. "She was an important piece in building the UMass program during her time here setting the stage for the last two Atlantic 10 titles and NCAA tournament berth."

Despite serving UMass as an associate coach in the past, McMahon led two other squads as head coach. Her first head coaching position was at Bentley in 2006.

McMahon didn't bring the Falcons any championships, but did lead them to a 7-8 record and a fourth place finish in the Northeast 10 conference. Furthermore, McMahon served as a member of the Division II North Regional Lacrosse Committee.

After working as an associate coach for the Minutewomen, McMahon accepted the head coaching position for the Huskies.

She improved the UConn program by a considerable margin. Before she joined pnor to the 2009 season, the Huskies had a 1-15 record. McMahon followed her first season (3-13) with an improved 9-8 record. It was UConn's first winning season since 2007.

UMass' new coach finished her tenure with the Huskies going 12-21 overall and 4-11 in the Big East.

McMahon also succeeded as a player. While she began her career as a Minutewoman, she transferred to Northwestern in 2001 and in three years, recorded 44 goals and 23 assists.

Her skills as a Wildcat helped push the squad to the NCAA Quarterfinals, a feat previously recorded before NU reclaimed varsity status in 2002. The Western Mass., native attacker helped lay the foundation for the Wildcats' four consecutive national championships.

Similar to McMahon, Venechanos also had the responsibility of reversing a team's losing ways.

When Venechanos first joined the Minutewomen program in 2006, she inherited a team that wasn't used to winning. Before her arrival, UMass had not been a part of the NCAA tournament for nearly a quarter century. Her leadership changed this as she brought the Minutewomen two consecutive NCAA tournament berths.

During her tenure as head coach, Venechanos led UMass to a pair of A-10 championships (2009, 2010), in three final appearances, and an A-10 regular season title (2009). Her total record for the Minutewomen concluded at 36-38, with an 18-10 A-10 regular season record and a 5-1 record in the A-10 tournament.

As a player, she also contributed to a winning team.

Venechanos started her collegiate lacrosse work at Maryland, where she played goalkeeper for the Terrapins. Not only did she earn All-American honors and national accolades, but Venechanos earned two consecutive national championships with a team that went 83-15 during her tenure in net.

The Yorktown native went on to be the first assistant coach and recruiting coordinator for Northwestern. From 2004-06, Venechanos helped lead the Wildcats to two of their five consecutive national championships.

While at NU, Venechanos focused primarily on assisting the defenders and goalkeepers. Her help proved its worth in 2005, when Wildcat goalkeeper Ashley Gersuk earned national awards including American Lacrosse Conferenee Goalie of the Year.

UMass starts the year wrapping and rolling

University rolls world's largest California roll

By Michelle Williams
Collegian Staff

The school year at University of Massachusetts started with a roll - specifically, a 422-foot California roll.

On Monday, UMass broke the world record for the largest California roll ever.

The event featured the Food Network's Jet Tila, who kicked off the construction of the sushi roll alongside Chancellor Robert C. Holub, Wally the Green Monster, the official mascot of the Boston Red Sox and UMass' own mascot, Sam the Minuteman.

The record was formerly held by the University of California-Berkeley after they created a 330-foot California roll last November.

"I understand that UC-Berkeley holds the record currently. We are out to take every record from them, starting with a sushi roll," said Chancellor Holub, prior to the event. Before beginning his post as chancellor at UMass two years ago, Holub worked several positions at the California state school.

Executive Director of Auxiliary Services Ken Toong said the activity was a bonding activity for the University.

"This event shows how we can work together to create great, world record-breaking things," he said.

During the late afternoon, more than 300 volunteers and UMass dining staff donned matching t-shirts and caps, and gathered at the Haigis Mall. After watching a short how-to video on sushi preparation, the group formed a line along dozens of tables. The tables were marked every 20 feet with markers, and adorned with signs reading, "UMass Amherst Presents the World's Longest California Roll. Now that's how we roll." As 4 p.m. approached, rollers began laying out ingredients, as a crowd gathered to watch.

The volunteers crammed together, often grazing elbows as they laid 650 sheets of nori seaweed, covered in 200 pounds of rice and sesame seeds, and filled with 200 pounds of Alaskan surimi- imitation crab- 100 pounds of cucumber, and 100 pounds of avocado.

"The key is that it has to be rolled in steps, the volunteers can't just roll the entire California roll together, but from one side to the other," said Christopher Howland, an organizer of the event. The roll was started by Tila, as Chancellor Holub looked on, and his daughters then joined in on the rolling. The entire process took about 90 minutes.

The idea for the event, which served as a welcome to new students, came about last spring.

At the Taste of UMass in April of last semester, a 40-foot sushi roll was featured along with many other events. After successfully creating that sushi roll, many people at dining services began thinking bigger.

"We rolled the 40-foot sushi roll at the Taste of UMass and afterwards Ken [Toong] and others started to think about claiming the world record," said Howland.

Celebrity Chef Tila was

UMass set a world record Monday for largest California roll ever. The super-sized sushi stretched some 422 feet, as a large crowd of volunteers gathered at Haigis Mall to help wrap and roll.

College presses perform well: sales for University Press up

By Cameron Ford
Collegian Staff

The American Association of Publishers (AAP) recently reported exceptionally strong June 2010 book sales for university presses.

The study, compiled by AAP Vice President Tina Jordan, shows that hardcover book sales increased 7.7 percent to $3.4 million, which resulted in a year-to-date increase of 1.9 percent. Paperback sales were identical, with $3.4 million, along with a monthly increase of 8.6 percent and a 1.3 percent year-to-date increase. In the professional book category, June sales were up 2.2 percent, to $59.5 million, which made the year-to-date sales gain 11.4 percent. Voicemails left for Jordan went unanswered.

Despite these phenomenal statistics, University of Massachusetts Press director Bruce Wilcox cautioned this information could be misleading.

"I'm slightly skeptical about those figures," he said during a telephone interview. "I get a separate set of statistics for the Association of American University Presses (AAUP), and those statistics track just the sales at university presses and not beyond. Most of the AAP sales deal with trade sales and then they have a category."

The AAP's website describes the organization as "the principal trade association of the U.S. book trading industry" and that it "represents publishers of all sizes and types throughout the country." In this sense, the AAP's statistics could be less significant for UMass as they are broader in scope and include data from smaller college presses.

However, Wilcox noted that the AAUP statistics that he utilizes still show some growth in sales.

"For Fiscal Year '10, which ended June 30, overall university presses saw an increase in net sales for the year of 2.3 percent, which is a lot smaller than the [AAP figures]," he added.

A voicemail left with the AAUP press office was returned by an unidentified spokeswoman who said that it

Want to skip class? New site determines if it's a good idea

By Tim Jones
Collegian Staff

The alarm clock's maddening siren wails: it's still hazy and grey in the wee hours, and the biology homework that's due today still hasn't even been taken out of its folder for a first examination. Today, you just want to skip class.

This feeling is not a rare one amongst college students, and so Web entrepreneur and recent college graduate Jim Filbert recognized this and has given students a new tool: the "Should I Skip Class Today? Calculator" (skipclasscalculator.com), which predicts whether skipping class is in a student's best interest.

After answering several questions related to the context of the class in question, such as inputting the number of times the class has been skipped already, whether or not the professor has an attendance policy and the days of the week on which the class is held, the site tells its users whether or not skipping the class they already want out of is a good or terrible idea.

"The key is that it has to be rolled in steps, the volunteers can't just roll the entire California roll together, but from one side to the other," said Christopher Howland, an organizer of the event. The roll was started by Tila, as Chancellor Holub looked on, and his daughters then joined in on the rolling. The entire process took about 90 minutes.

The idea for the event, which served as a welcome to new students, came about last spring.

At the Taste of UMass in April of last semester, a 40-foot sushi roll was featured along with many other events. After successfully creating that sushi roll, many people at dining services began thinking bigger.

"We rolled the 40-foot sushi roll at the Taste of UMass and afterwards Ken [Toong] and others started to think about claiming the world record," said Howland.

Study analyzes why students commit suicide

Maryland researchers point to lack of social life, depression

By Tim Jones
Collegian Staff

A recent study in the Journal of Affective Disorders has shown that a lack of positive social life and symptoms of depression have spurred suicidal thoughts in some college students.

The study, which included research from the Johns Hopkins Children's Center, was conducted at the University of Maryland College Park, where over 1,000 students were interviewed throughout their college lives, and were engaged in face-to-face evaluations regarding their thoughts, specifically, suicidal feelings.

Within a total of 1,085 students evaluated, 151 students, or 12 percent of the sample, said they had at some point contemplated suicide, while two of those students had actually attempted suicide.

Holly Wilcox, the study's lead investigator and a psychiatric epidemiologist, reported that persons with depressed mothers were most likely to show signs of suicidal thoughts, as eight out of the 10 students in the study group who said they had planned to attempt suicide reported having depressed mothers.

Risk factors in the study included, but were not limited to, exposure to domestic violence, feelings of being unloved, depression and prolonged separation from family and friends, triggering anxiety.

The findings also showed that it is problematic for researchers to assume there is a correlation between an individual's tendency to have suicidal thoughts and the act of attempting suicide. Research showed that students who thought about suicide frequently are no more likely to attempt it than others.

The research was funded by the National Institutes of Health and the American Foundation for Suicide Prevention.

Suicide is the second-leading cause of death among college-aged students. According to save.org, the Suicide Awareness Voices of Education, suicide takes the lives of over 30,000 every year, and the strongest cause is depression.

Christopher Overtree, a University of Massachusetts Amherst professor of clinical psychology, suggested that students should immediately seek help if they experience suicidal feelings.

"If someone is feeling suicidal, they need to be in treatment, because suicidal tendencies are, quite frankly, very dangerous," he said.

"Students can overcome depression and anxiety through a combination of anti-depressant medication and cognitive-behavioral therapy," he added.

Overtree explained that the combination of medication, which helps users cope with stress and depression, and therapy, which helps root out underlying causes of depression, will likely help anyone experiencing thoughts of suicide.

Mental Health Services, located in University Health Services in the Central area of campus is composed of professional staff members who offer services and care for a variety of psychological issues, providing therapy and psychiatric assistance.

Students may seek counseling at MHS to assist with any emotional difficulty they are experiencing.

Overtree recommended that students reach out to anyone they know, such as friends, family, or even staff members like a Residential Assistant or professor. He also said students should not feel alone in their problems.

"We can forget that what we are experiencing is very common," he added.

Dr. Harry Rockland-Miller, MHS Director, said just being in college can be a preventative step towards suicidal tendencies.

"It's also true that the suicide rate is half that of aged-matched peers who are not in college," he said.

He added that students who had gotten treatment through counseling were less likely to attempt suicide.

"On university campuses nationally, of all completed suicide attempts, only 20 percent of those students had ever been to their college counseling center," he added.

The Student Health Fee, which is paid by all students taking at least five credits a semester, will cover initial psychotherapy visits for students who wish to seek counseling, and the student's insurance will be billed from there on.

Sophomore Tony Gattuso said he likely would not consult the help of MHS, even if he was going through a rough period.

"From personal experience, I would not go to MHS," he said.

See STUDY on page 4

University Health Services offers an array of mental health resources. A recent study at the University of Maryland examined why students commit suicide.

University presses do better in last quarter of year than first

PRESSES from page 1

was "too early" in the new fiscal year to comment on previous or current changes in sales.

On a final, positive note, Wilcox said the new fiscal year is starting off strong.

"We're encouraged by the strong sales we've experienced in July and August; the fiscal year is off to a very good start," he said.

According to several new technology updates, those sales just might get stronger. Wilcox mentioned that the UMass press plans to add e-books to the lineup of texts it produces. This feature will start sometime this month.

"We're going to be part of the Google Editions program," he said. "We expect to have more than 800 books available through Google Editions."

"Those books will exist 'in the cloud', as they say," he went on. "And you can either buy them from Google or from an intermediate bookseller such as Barnes & Noble. The idea is that books are available wherever you need them, wherever you need them."

Add that to the Textbook Annex's new book-rental policy and students will have two new options for getting their textbooks by the end of this month. And with the average college student spending $900 per year on books, according to Wilcox, this news may well be welcomed warmly by the UMass student body.

The positive numbers come on the heels of a weak start to 2010 for the publishing industry. In March, the AAP released figures which showed that book sales decreased by 0.7 percent early in the year, with University press hardcover sales down 8.6 percent and University-printed paperbacks down 9.4 percent.

Cameron Ford can be reached at cford@dailycollegian.com.

Thinking of skipping class? New website 'calculates' if bailing on class is a bad idea

SKIP CLASS? from page 1

actually works as a functioning calculator to determine several statistics about a class, such as the percentage of classes already skipped and how many days away the next test or quiz will be held.

Of course, the ultimate decision rests with the student, as the site only predicts what it claims is the percentage of how safe it is to carry through with skipping class.

To take the website seriously and use it as an actual factor in deciding whether or not to skip class may prove to be a risky move. The disclaimer on the site also warns students that the calculator is strictly for entertainment purposes only and should not be taken seriously.

According to the website, "We do not condone skipping class and cannot be held responsible for a poor decision on your part."

However, the website does claim the accuracy of its answers have been ensured by multiple testers, all of whom have run through all of the possible situations many times.

There is very little indication on the site to suggest that the testing of these situations is scientific.

"The calculator has been run through dozens of scenarios by multiple testers to ensure the most logical and accurate outcome," according to the site's FAQ page, which, in the view of many students, is a way in which the site feeds students common sense solutions to the timeless question: to play hookie, or not to play hookie?.

Filbert, the site's developer, claims the project is a tool which students can use to organize their priorities for a given class.

He added that the his site's calculator "is not designed to be used by a student every time they are about to go to class."

University of Massachusetts senior Lioi Luo likes the concept, but wouldn't take the advice seriously. "I think it's a good idea, but I don't think I would actually follow the percentage of how safe it is to skip class too closely," he said.

The site launched on Aug. 13, though it underwent several developmental changes since Feb. 10. Since its release, it has been gaining steady popularity. A Facebook group for the site currently has over 7,000 members and continues to grow daily. The site is still under development for additional features, which have not yet been revealed by its creators.

Reviews on the site consist of a few choice words from several students, identified only by their first name and college.

Filbert added that several professors and universities have expressed antipathy toward the site, with the general consensus that students shouldn't be looking for an excuse and should go to class.

"The calculator has been met with some hostility by professors, retired professors, administrators, parents, and even students," said Filbert.

Sensational sushi: UM builds largest CA roll

ROLLED UP from page 1

invited to the event because of his expertise with Asian food, and his experience creating large-scale food dishes. In 2005, Tila broke the world record for the largest stir-fry created in one wok, weighing in at 1,085 pounds. The next step was gathering ingredients. According to Toong, most ingredients, including the surimi, cucumber and avocado, was paid for by sponsors of the event, such as Coca-Cola and the Alaskan Seafood Marketing Institute, a company that provides dining services with seafood. Though exact numbers weren't available, Toong said the cost of the event was "minimal," though he estimated it was at least several thousand dollars. Items included in the cost were accommodations and expenses for Tila, purchasing ingredients not donated, and paying dining service workers rolling the California roll.

The event also served as publicity for the University.

Tila joked about the notoriety of the event.

"You Twitter it, you Facebook it, you say 'UMass has crushed the world record!'" Immediately after, Tila announced he had uploaded a photo to Facebook while the sushi was being rolled.

One of more than 300 volunteers, Jennifer Ludwig, a sophomore, learned about the event after friends saw it on Facebook.

"My friend told me about it and I thought it was a cool idea," She added, "I think they need to have cultural events like this on campus. It brings people together," freshman Lynda Kry agreed.

"I heard about the event while I was at home in Quincy," she said, smiling. "It sets the school apart, makes it an exciting place for new students."

Despite the vast amount of food used, the sushi roll was unable to be served due to food safety rules. Responding to a participant who wished to have a piece, Tila said, "Trust me, you don't want to eat rice that has been sitting out for five hours." He added, "We will have sushi for you later."

Michelle Williams can be reached at mwilliam@student.umass.edu.

On Monday, the University of Massachusetts broke the world record for largest California roll, drawing a large crowd of volunteers to Haigis Mall to help out with this sensational sushi.

Study considers reasons why students contemplate suicide

STUDY from page 1

"I don't know if there are psych majors as therapists there, and personally I don't like therapists."

Sophomore Hopo Hammouda said he would rather deal with his problems himself.

"If you have a problem, you work it out, let it boil under the surface until it passes or talk to someone you trust, you don't admit defeat and see a shrink," he said.

Sophomore Kirsten Lindsmith would rather use the resources at her disposal.

"Of course [I would see MHS]," she said. "I'm already paying for it anyway, so I might as well get my money's worth."

In 2009, MHS was awarded a three-year grant of $300,000 that is being used primarily to fund programs aimed at suicide prevention. UMass was one of 22 schools to receive the grant, funded by the U.S. Substance Abuse and Mental Health Services Administration.

Funding was used to reinforce a "gatekeeper" model, established in 2006, which trains staff and faculty on campus to become more aware of students exhibiting signs of suicide and administer proper support.

Dr. Rockland-Miller added, "If any group on campus would like to have the 'gatekeeper' training, we will provide it free of charge, because of the grant we received."

According to the MHS website, "UMass Amherst surveys have shown that over 80 percent of those who sought mental health care said services helped them stay in school and improve academic performance."

Students experiencing suicidal feelings, or any other emotional trouble, may contact MHS at 413-545-2337 or the Suicide Prevention Lifeline at 1-800-273-8255.

Tim Jones can be reached at timothyj@student.umass.edu.

Researcher Holly Wilcox authored the study.

Hate and lies in Manhattan

Eli Gottlieb

Recently, the American far-right raised controversy over the building of the so-called "Ground Zero Mosque," the Cordoba House to be built several blocks north of Ground Zero in Manhattan, currently occupied by an old Burlington Coat Factory. They have several things wrong: they believe that the Cordoba House would be a mosque, they believe it would constitute a "victory mosque" built by Islamists and they believe that Islam has no place in the United States of America.

Let's clear this matter up.

The proposed building is not a mosque or at least not a mosque alone. The proposal is for an Islamic Community Center. If I may quote from the Park51 website, the proposed facilities include: a swimming pool, gym, basketball court, auditorium, restaurant and culinary school, library, 9/11 memorial, art studios and "a mosque, intended to be run separately from Park51 but open to and accessible to all members, visitors and our New York community."

They also propose to have cultural exhibitions and childcare services. This does not limit itself to serving as a mosque or as an exclusive preserve of New York's Muslim community.

Instead, this building takes the solid, proven concepts from YMCA's and JCC's everywhere and adds even more, opening all of it to any and all New Yorkers who want to come.

If some fundamentalist Christian can't bear to set foot in a building consecrated to Allah (despite the fact that "Allah" is the same deity worshipped in Judaism and Christianity, and in fact the same name used by Arabic-speaking Jews and Christians), they don't have to.

The rest of us can enjoy the fact that in the middle of horrific economic conditions, somebody has proposed to build with their own money, a building this awesome for public use.

To continue, Park51 would in no way, shape or form constitute a "victory mosque." This term refers to a mosque built atop the demolished site of a non-Islamic shrine in territory taken by Muslims in a holy war of conquest. For everyone outside New York City who doesn't know or hasn't noticed, the September 11th attacks did not even begin to conquer New York City for an Islamist state. A disused department store, no matter the objections of people who don't even live in New York, does not constitute holy ground, and the Park51 building will not be built over any kind of religious site.

To address those who claim that the imam involved, Feisal Abdul Rauf, comes from an Islamist ideology, I will simply quote the man. The text following here comes from Rauf's words in a 2003 memorial service for Daniel Pearl, the American journalist beheaded by Islamists in Pakistan:

"We are here to assert the Islamic conviction of the moral equivalency of our Abrahamic faiths. If to be a Jew means to say with all one's heart, mind and soul .. Hear O' Israel, the Lord our God, the Lord is One, not only today I am a Jew, I have always been one, Mr. Pearl. ... If to be a Christian is to love the Lord our God with all of my heart, mind and soul, and to love for my fellow human being what I love for myself, then not only am I a Christian, but I have always been one Mr. Pearl."

Hearing that, I don't care if this man displayed a mild version of the leftist political reservation, long heard in far more despicable formulations from the mouths of so-called "anti-war" demonstrators, against calling out terrorism by going so incredibly far as to disclaim comment.

Islamists simply do not declare themselves so allied with Jews and Christians. They proclaim that, to quote the Hamas charter, "The Day of Judgment will not come until Muslims fight the Jews, when the Jew will hide behind stones and trees. The stones and trees will say, 'O Muslims, 'O Abdullah, there is a Jew behind me, come and kill him."

Islamists follow Hassan al-Banna, Sayyid Qutb, Tariq Ramadan and Yusuf al-Qaradawi.

If you honestly think that this utterly final law of the land does not apply to Muslims, I can only urge you to throw yourself into a volcano, because you are a fascist thug on par with the Islamists you claim to oppose.

Feisal Rauf follows Sufism, has served the government of the United States under the Bush administration and proclaims full and entire solidarity with Jews and Christians. We see here a black-and-white difference.

The final matter is the easiest to refute. Some have claimed that the Cordoba House building must not be built because it constitutes a part of an Islamic or Islamist (they don't differentiate the two) invasion of the United States, an invasion by an essentially foreign religion. Those people ought to shut up and go away, because in aiming to restrict the free practice of religion via the government, they are un-American.

To quote that supreme primary source on American-ness, the United States Constitution: "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof."

If you honestly think that this utterly final law of the land does not apply to Muslims, I can only urge you to throw yourself into a volcano, because you are a fascist thug on par with the Islamists you claim to oppose. Wearing a different color doesn't make you any different if you do the same things using the same tactics: legal suppression of "enemy" religions and a resort to terrorism when that fails.

In conclusion, if the brown shirts come, I will keep American Muslims safe myself, in faith that they would do the same for me and have done exactly that in the past. Until then, the Park51 developers have every legal right to put up their damn fine building already and I wish them peace and security in doing it.

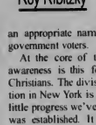
The crazy times are here to stay



Roy Ribitzky

This talk of President Obama being Muslim or Christian is driving me nuts.

I was again disappointed by the massive fail of 20 percent of Americans who think that Obama is Muslim. These must be the same people who believe the lunar landing was a hoax and "tea baggers" is an appropriate name for a movement of anti-government voters.

At the core of this intolerance and lack of awareness is this fear of non-whites and non-Christians. The divisiveness of the mosque situation in New York is a prime example of just how little progress we've made since the Constitution was established. It is interesting to note how the number of Americans who think Obama is Muslim grew since the passing of the Health Care Bill and Arizona Law SB 1070, the approval of two new Justices and Obama's big vacation in Mass. It is as though the angrier Americans get with this administration the more likely they are to tie his policies to his identity.

We all know that if his presidential opponent was named, say, John Adolf McCain, the "tea baggers" would be just as hostile towards McCain. They would be demanding his birth certificate. They would question his economic beliefs in fear he could be fascist. They would hold picket signs of McCain dressed in Nazi attire.

Give me a break. This would never happen to McCain, or even Clinton for that matter. Do we really need to be reminded that the Pilgrims came over here because of religious persecution? And we are going to give other religious followers that treatment? Well, we did wipe out the Native Americans, a fact that is usually omitted in history class. We did enslave an entire race before and after the Constitution was passed. We did cheat women into thinking they were not as important as men. We did have a problem with John F. Kennedy,, a Catholic, being president. Shamefully, intolerance has shaped our country. Are we really in the 21st century?

Media director of the Republican National Committee, Todd Herman, tweeted: "Watch Is @BarackObama amongst the 20 percent who think he's Muslim?" The White House responds with a statement explaining how Obama prays every day and that the Christian faith is a part of his identity.

Of course, the RNC already knew this. They tried to distance themselves from Todd Herman by saying that "the President's Christianity is both crystal clear and a non-issue.. what is an issue

These must be the same people who believe the lunar landing was a hoax and that "Tea Baggers" is an appropriate name for a movement of anti-government voters.

[are]...the failed efforts of Barak Obama, Nancy Pelosi and Harry Reid to grow jobs."

Oh I get it! The RNC is just trying to deflect attention from the "Muslim question" by showing that Obama's failure to gain back all those jobs lost in less than half a term in office may have something to do with his religion. Maybe he is a Muslim and wants America to fail! I guess that makes Rush Limbaugh Al Qaeda's second in command.

So, what exactly does one's religion have to with growing jobs? Absolutely nothing. That is unless you're a Republican congressman, who thinks money gets distributed by God – also known as "the invisible hand." The sad thing is that politicians are scoring a lot of victories by fueling Americans' doubts. Coming up to a decade since the terrorist attacks on September 11th,, people are growing wearier of the Islamic terrorist threat. At least that's what the "tea baggers" think it is. Islam took down the World Trade Center no more than Christianity tried to wipe out the Jewish community. In other words, every religion has its extremists. Don't forget which religion sent Europe into the Dark Ages.

I don't have a problem with the Muslim community center. I do, however, have a problem with the disgraceful and vile Westboro Baptist Church being allowed to picket against our troops at their very graves. What was that court thinking? So it's okay for an extremist and un-American church to spit on our soldiers' graves, but it is wrong for moderate Muslims to create a center built upon the idea of uniting people? Are Christians the only ones who can create peace? Let's end our two wars first and I'll come back to that question. Islam did not kill those people on 9/11 – Al Qaeda did. We didn't elect a foreigner to the Oval Office, we elected an American-born son.

It is a disgrace to the Founding Fathers that religion is taking such a strangle-hold on our government. I could care less what religion somebody follows, so it angers me even more when it is all that's on the news. It drives me crazy when millions of Americans honestly believe our president is a Muslim – because going to the same controversial reverend for over 20 years was all just for show.

If those people actually believe Obama is Muslim, they should go back to kindergarten. If those people actually believe Obama was born in Kenya, I give up. I'll just wait for reports to come out on how awesome Halo: Reach is.

Are video games art or cheap thrills?

Nick O'Malley

In the face of cinema, television and other art media, video games are developing into a formidable rival.

So it's strange to see how the current industry is almost operating at two different levels. First, there are the romantic comedies of the video game industry; this year's version of Madden NFL, for example, was a commercial success.

It isn't an outstanding drama with Oscar worthy performances, but it is entertaining. A game like Metroid: Other M, however, tells a story, and boasts superb visual and sound content found in more established forms of media. Unfortunately, because it is a video game, it does not garner the same recognition and respect.

Therefore, the big question is: Are video games an art form? Will critics ever look upon game of the year as they do best picture?

Back in April of this year, the online debate ignited in an infamous blog post – currently at 4,696 comments – by Roger Ebert, the long-time movie critic and, to detractors, prehistoric media curmudgeon. Ebert, effectively digging his own grave in a debate against the collective internet population, argued that "in principle, video games can never be art."

A few months later Ebert responded to the ensuing frenzy conceding that he should not have judged the medium without experience. Ebert, admittedly, never played a video game.

Subsequently, he "had to be prepared to agree that gamers can have an experience that, for them, is Art."

Now, the debate over whether or not a certain medium can be classified as art is largely based on one's personal beliefs. Is Piranha 3D art? What about Cats? The orchestral soundtrack to Family Guy? Lego sculptures of Morgan Freeman fighting a shark? That's all up to the individual viewer to decide.

In the 21st century, the guidelines for what qualifies as art are expanding. Although the likes of Shakespeare, Mozart and Curtiz will not be pushed out of the limelight, they no longer hold the monopoly.

In the 21st century, the guidelines for what qualifies as art are expanding. Although the likes of Shakespeare, Mozart and Curtiz will not be pushed out of the limelight, they no longer hold the monopoly.

It will certainly be difficult for interactive software enthusiasts to counter games like Mother 3 or Legend of Zelda with the theatrical, cinematic, and musical greats of eras past. Despite their cult followings, most people have never played them.

Most people have at least heard of, if not seen, the best movies and know about the best books. Yet, most people haven't heard of Shadow of the Colossus or Silent Hill; games that could pass as movies, if only they were under two hours and didn't involve playing. Most people have never seen a video game with in-depth dialogue, atmosphere, setting, character development, beloved soundtracks or deep, engrossing story lines.

Most people know the classic character Mario jumps, and that you can kill people in Grand Theft Auto.

They are simply discarded by the experts and parents as a waste of time for kids.

It's understandable that many people haven't been exposed to video games, but a lack of familiarity should not be cause to exclude them from merit. At the same time, how many people have gone to an opera in the past week? My guess is far fewer then the number of people who currently subscribe to World of Warcraft (over 11.5 million).

Interestingly, video games have caught the attention of some colleges and universities. Take, for example, Wabash College in Indiana. The game Portal is part of the incoming freshman class required "reading" at the school. It's currently listed as a supplement to Presentation of Self in Everyday Life by Erving Goffman.

Furthermore, entire classes are now based around the education effects of video games. The University of Florida is currently offering a brand new online course this semester: 21st Century Skills in Starcraft. The course is focused around the strategy game's resource management system. In addition, the University of California at Berkley once offered a class on teaching students how to play the game competitively.

Should the average video game skeptic give them the chance that academia has? Is Zelda as interesting a protagonist as Scout? I'm convinced there is a game out there for everyone. But is the typical mother or grandparent as willing to sit down and play Okami as they would be willing to read Of Mice and Men? Is the cultural divide too vast?

Simultaneously, am I all the worse off for preferring the aesthetics of Final Fantasy VI than the eloquent prose of To Kill a Mockingbird? The debate may long continue, but I shall remain the indelible advocate for this often pilloried medium.

Nick O'Malley is a Collegian columnist. He can be reached at nomalley@student.umass.edu

UMass history long and storied with many noteworthy events

It seems like only yesterday that the class of 2010 threw their caps in the air and abandoned the University of Massachusetts. The valley became deserted. After three months of viewing an empty campus, move-in time now brings life, noise and traffic into the area.

Yevgeniya Lomakina

The Pioneer Valley Transportation Authority buses zoom at frequent intervals, students run from class to class, an array of social events are planned that leave no one behind or uninvolved – everything gives the impression that Amherst has always been that way. The university came a long way since its humble beginnings, yet only a small number of people are familiar with its history.

The college website provides some dates and numbers, but searching in the university archives reveals a deeper picture of the thorny beginnings of this institution.

Difficulties started with the mere idea of its establishment. Faced with the changes in American society during the late 1830s, Massachusetts legislators sought to abandon the conventional standards of classical studies and reform the educational system by building a new college. It would instruct the practical sciences: agriculture, chemistry, mechanics, botany, geology and mineralogy. The ideal students were assumed to be farmers. The latter opposed the idea, unwilling to send their children to college, viewing education as an activity for those with leisure time. Nevertheless, the search for funding and support for the new institution continued.

After an extensive search and heated debate the Massachusetts Agricultural College was finally established in 1863. In order to include the natural sciences into its curriculum, the college was positioned in an ideal location: the valley near the Connecticut River. The area consisted of vast fields for the practice of farming as well as forests. Amherst College, an already reputable institution, existed nearby.

The newfound school occupied only four buildings. South College, a four-story brick building, contained a dormitory and some classrooms. In the place of modern Machmer Hall stood College Hall, a wooden structure doubling as a chemistry laboratory and an auditorium. To the north stood a dining hall and to the east – a botanical museum.

Student accommodations were few, but spacious; for $15 a year, they could share two bedrooms and a common room, with no furniture except for a stove. The board, a source for controversy and complaints, cost $3.50 per week per person.

The campus consisted of orchards filled with broken apple trees, rail fences and fields with weeds.

The curriculum covered a variety of subjects, including mathematics, civil engineering, zoology, English grammar as well as French and German. Textbooks were few and in complement of studying, students were required to have six hours of field labor per week.

The MAC opened its doors on Oct. 2 of 1867 to an entering class of 56 exclusively male students. Upon arrival, they were greeted by four faculty members (including the president), rundown farm buildings, piles of bricks and unfinished college halls. The campus consisted of orchards filled with broken apple trees, rail fences and fields with weeds.

The practical student day started with the morning bell at 6:30 a.m., continued with three lectures and an afternoon of labor in the fields. Removal of weeds, digging, harvesting crops and carrying building materials often conflicted with the more "academic" parts of the curriculum. Saturday afternoons were used for recreation and Sundays – for church and Bible class. Students could also enjoy various other activities and sports, played against Amherst High School or Amherst.

Yet their education was not fully rural and students were actively engaged in academic endeavors, to the extent that after the first class graduated, MAC was accused of being more academic than agricultural. By 1876, the college's efforts were finally recognized; one of the faculty members was invited to Japan to help establish a similar institution.

It was not until 1892, however, that the first female student enrolled. Inauguration of women was slow and was completed only in 1917, when a woman's college was introduced on campus.

Over the beginning of the 20th century, the school grew and became Massachusetts State College. Faced with the changing student body, as the world was devastated with war and other conflicts, the institution learned to adapt. Although the college became a university in 1947, achieving that status required much effort. A restructured curriculum, new classrooms as well as additional dormitories, often named after distinguished faculty and presidents, were only a few of the changes. In 1954, there were 4,000 students, and by 1964, the enrollment increased to 10,500. In 1973, the W.E.B. Du Bois library was completed and later, the Lederle Graduate Tower.

The University continues to expand and overcome new challenges. As another academic year approaches, UMass opens its doors to another "outstanding class," whose grade point averages and SAT scores are even better than last year's "best-ever" incoming class. With freshmen's academic records on the rise, UMass is headed for new beginnings and commencing yet another part of its long history.

Yevgeniya Lomakina is a Collegian columnist. She can be reached at ylomakina@student.umass.edu.

UMass sisters march to different drum

By Samantha Webber
Collegian Correspondent

For the average student, summer is a season to sit out by the pool, soak up the sun and hang out with friends. However, for a select few, this is far from a typical summer. While their peers spend their days sleeping in and laying on sandy beaches, more than 5,000 college and high school musicians participate in the competitive Drum Corps International summer programs.

These students spend their summers traveling throughout the country, devoting up to 16 hours a day rehearsing and performing marching shows and living on tour buses and gymnasium floors. Many members of the UMass community may not realize it, but two of their fellow Minutemen spent their summers traveling from state to state while performing with DCI's oldest active corps.

Sisters Iris and Sheila Heady, of South Hadley, Mass. chose to give up everything typically associated with summer to make music. Iris, 20, and Sheila, 22, are both currently students at UMass. This past summer, the sisters packed up and went on tour with the Cadets Drum and Bugle Corps.

Founded in Garfield, N.J. in 1934, the Cadets are the oldest drum corps in the country and have won nine DCI World Championships. The corps has consistently placed within the Top 5 since 1992, and placed fifth at this year's World Championships with their show, "Toy Soldier." The show tells the story of a young boy named Jeffrey whose toy soldiers magically come to life, allowing him to play the role of the drum major, or band leader.

The drum corps season starts long before the school year has even ended. Weekend audition camps begin in November and are followed by monthly rehearsals until spring training begins in mid-May. The spring training camps last about a month and are mostly spent learning the music and the formations for the show before the tour begins in mid-June. From that point onward, the Cadets, along with the 22 other world-class level DCI corps, tour until August.

The Heady sisters both play in the front ensemble as well as for the Cadets. Front ensembles for most marching bands and drum corps are typically comprised of larger, non-marching instruments, such as xylophones, pianos, drum sets, gongs and electric guitars. While a less traditional aspect of the style of music, the front ensemble allows new opportunities for the participating musicians. "One of the best opportunities [that] drum corps has opened up for me is I've learned how to operate and program a synthesizer and sampler, which ones up a lot of sounds that traditional instruments don't offer," Sheila said.

While Sheila has performed in front ensembles, also known as pit bands, since high school, the experience was a new one for her sister, who normally plays the bass drum for the marching band at UMass. "It's definitely a lot different from what I do here on campus," Iris said. "But it was an incredible experience and I'm so glad that I had the opportunity."

The opportunities and experiences come with a cost, however. Tuition and fees for the Cadets typically cost around $3,000, with the money covering gas, transportation, housing, food and uniforms.

A large percentage of the staff that works with the corps are volunteers, who act as cooks, bus drivers, cleaners, medical personnel and other necessary workers

See DRUM CORPS on page 7

SAMANTHA WEBBER/COLLEGIAN

Iris Heady stands proudly, bass drum in hand, with the UMass Marching Band. Heady and her sister Sheila spent their summer marching with the Cadets Drum and Bugle Corps on their summer tour.

Sisters tour with drum cadets

DRUM CORPS from page 6

required to keep everything running smoothly. Because of the high number of parents, alumni and community members who volunteer with the drum corps, tuition costs have the ability to be reduced, allowing many more students to participate in the programs.

Like sports or dance, there are physical costs associated with drum corps. While serious injuries are not common, they do happen. During the World Championship finals, a horn player for another corps suffered a broken tibia while performing. Though injuries are rare, minor ones such as joint problems, sprains and pulled muscles occur frequently. When injuries do happen, the corps' medical personnel are always there to help.

"I had pretty bad back problems for almost all of July," Iris said. "Luckily with the help of one our physical trainers, I was able to recover."

While touring in Texas, a coach bus for the Boston Crusaders was shot at. Meanwhile the Blue Devils learned during their spring training that the 36 eight-foot tall mirrors they incorporated into their show were reflecting the sun and burning the grass on the practice field, requiring the Blue Devils to make a set of mock mirrors to practice with so they wouldn't ruin the field.

Despite any of the costs or problems, the Heady sisters both agree that the drum corps experience is a worthwhile one. Those who perform with the Cadets and other drum corps, it's about more than just the music. "During the off-season, I don't go around thinking about how cool the parts I played were," Sheila said. "I think about the amazing friends I made and the crazy memories we have together."

Samantha Webber can be reached at swebber@student.umass.edu.

SAMANTHA WEBBER/COLLEGIAN

Sheila Heady intently plays her marimba, as the UMass Marching Band parades on. Her experiences with the drum corp have also given her the opportunity to play and program synthesizers.

Winners of Pitchfork's 2009 award for Best New Music, Real Estate played a surprise show at Hampshire College's freshmen orientation on Monday night.

Real Estate brings rock to Hampshire College

Sam Butterfield
Collegian Staff

The New Jersey-raised, Brooklyn-based surf rock band Real Estate paid a visit to rhythm guitarist and back-up singer Matthew Mondanile's alma mater, Hampshire College on Monday, putting the finishing touches on Hampshire's freshmen orientation in a more than rocking fashion.

Channeling 1960s psychedelia while ripping through their eponymous debut album and some covers, the four-piece group, composed of front man Martin Courtney, Mondanile, Alex Bleeker on bass and Etienne Duguay on drums gave Hampshire a roaring performance. They took their brand of swooning, nostalgic rock even further than on their album, turning four-minute songs into epic eight-minute jams replete with long, frantic breakdowns and swift transitions from frenetic and unleashed to tight and controlled.

The group opened with what has been their biggest hit to date, "Beach Comber," the first track on their debut album. With a mellow initial guitar line which evokes a bygone era in music, calling to memory the Beach Boys or lo-fi music you've heard on a soundtrack but can't quite place, "Beach Comber" transitions into a ballad about detaching from the mundane nature of day-to-day life and letting time slip away by the sea.

Real Estate gave Hampshire more than just what earned them 2009's Best New Music label from indie establishment Pitchfork, as they turned their reverbed, faded, waving tunes into garage rock anthems, and "Beach Comber" set a rousing tone.

After their opening jam had green-faced students swaying, they transitioned to the second song on their album, "Pool Swimmers," which slowly coos over a light, hazy guitar line with a faint, light drum beat.

From there, the group brought the tempo back up, cutting into the muddle of their album with the track "Green River." With another light, airy opening, "Green River" kicked into a throbbing jam, as Real Estate drew out their breakdowns into minute-long rock-outs, as students bounced elatedly to the Garden State blend of nostalgic surf rock.

Between songs, Mondanile gave students light-hearted advice about Hampshire and the Valley, encouraging freshmen to make their own music and take advantage of the rich arts and culture scene Amherst provides.

As they progressed through their collection, the band worked in a few covers, paying homage to formative lo-fi band The Clean with a rousing, manic cover of "Point That Thing Somewhere Else," as well as going back a ways in their own artistic progression, playing several tunes from Courtney and Mondanile's earlier band, Ducktails.

Other standout songs included "Suburban Beverage," which swooned over a reverbed, twangy guitar line with a fast-paced steady drum beat and long, extended breakdowns which had students jiving.

It certainly took the banality of growing up in sleepy Ridgewood, N.J. to breed a band with Real Estate's cynicism and understatement. This band, however, is not just another indie phenomenon with an ironic name. They have a limitless ceiling and will certainly continue to refine their fuzzy, beach rock aesthetic modeled on the likes of Pavement and Weezer. While Real Estate's opening album evokes summery days spent letting time bleed by the sea and cool nights of drinking and leisure, their finished product is much richer and more complex. Real Estate will continue to sell.

O.A.R. puts on high energy Boston show

By Ashley Berger
Collegian Correspondent

Pop-rock band Of a Revolution returned to Boston for a stop on their annual summer tour in the first of a two night series on July 29. The tour marks the band's unofficial 11-year anniversary.

Marc Roberge, lead singer of O.A.R., introduced opening act Citizen Cope. Though putting on a less than spectacular set, Citizen Cope played for no more than 45 minutes. The band incorporated all of their well-known songs including "Sideways," "If There's Love," "Hurricane Waters" and "Bullet and a Target," yet did not illicit a positive fan response.

Most of the attendees were found in the concourse or getting draft beers during Cope's set. The band did nothing to interact with the fans, but the music quality was stellar and by the time the band played their most popular song "Son's Gonna Rise," many fans found their way to their seats to sing along.

After a brief pause between sets, the headlining band took the stage. Opening with "Untitled," the band breathed instant life into the crowd after Citizen Cope's unentertaining set. Fans were immediately enthused by the energy of all the band members. Because of the Bank of America Pavilion's relatively small size, the sound quality was phenomenal and any seat in the house provided a with a great view of the show.

"This Town" had every fan singing along as well as enjoying the band's shout-outs to the city of Boston. There was also an extremely positive fan response to "52-50," a song dedicated to the American soldiers deployed overseas.

O.A.R. incorporated some lesser known songs into their set such as "Dareh Meyod," "Gotta Live" and "Patiently." The songs were unexpected and though often not played live, still had fans singing along to every word.

However, the band had fans out of their seats for favorites such as "Hey Girl" (during which the house lights illuminated the whole audience), "That was a Crazy Game of Poker" and "Shattered." One highlight of the show was during "Night Shift," which featured a segment of Bob Marley's "Stir It Up." Fans also enjoyed "Conquering Fools," from the bands first album.

The band's encore included "Lay Down"-an intimate, yet beautiful performance accompanied by a great light display. The encore also featured an acoustic "Over and Over," a solo by Roberge. Picking things up again to close out the show, the band began "Delicate Few," which was instantly recognized by the Boston crowd, who sung the opening lines. To end the night, O.A.R. played a seven minute long version of "City on Down." The entire show featured solos from each band member and included a drum duet from drummer Chris Culos and saxophonist Jerry DePizzo. During "City on Down," DePizzo jumped into the audience, running around the entire arena. O.A.R. finished the show with one last "thank you" to the crowd and invited everyone back to the second night.

The Maryland-based band played for over two hours, which did not disappoint the crowd. Only some fan favorites were not included in the set such as "I Feel Home," "Love and Memories" and "Heard the World," all of which were played during the second show. Both sets featured a classic and equal mix of old and new songs.

Roberge's interactions with the crowd truly made the show memorable. He repeatedly thanked the audience for coming and gave numerous shout-outs to fans with signs, and those in the first few rows.

Fans seemed to thoroughly enjoy the high energy show that O.A.R. put on. The Pavilion, located on Boston's waterfront was the perfect location for O.A.R.'s intimate, yet powerful set.

Ashley Berger can be reached at aberger@student.umass.edu.

Late effort by UM falls short at Rudd Field

SOCCER from page 12

time break, Harvard tied the game up right at the conclusion of the half as the ball found its way to the back of the net off of Scott Prozeller's header. The clock ran out and the teams entered into the break even.

It didn't take long for Harvard to score again as four seconds into the second half, Brian Rogers scored off a defensive lapse by the Minutemen. Rogers gained possession of the ball inches near the net, fooled the goalkeeper and banged it off the far post for the score.

Less than 15 minutes into the second half, more odious theatrics unfolded on Rudd Field. UMass earned possession near the opposing goal, with Hen Arikian's initial shot getting blocked by the Crimson defense. Stuart Amick trapped the rebound and took a shot that banged off the top bar and down towards the goal-line, bouncing high off the grass just off the line. Roswess attempted to score on the rebound, but ended up colliding into Harms in a dangerous play. Roswess received a yellow card for his efforts.

After more battle for possession, the 20th minute unveiled the next goal between the two sides when the Crimson earned another free-kick outside the box. The ball was crossed in and headed down by Ross Friedman for the goal, giving the Crimson a commanding 3-1 lead.

Despite the two-goal deficit, UMass pushed the ball forward several times in the closing minutes of the game. While the team fell short on several occasions, Arikian was instrumental in the second score for the Maroon and White. After carrying the ball down the field, he slid the ball to the far side where Amick nailed the ball towards the back of the net.

The final goal came too late, however, as the Minutemen were unable to score another before the end of the period.

UMass will have its chance to keep the fight going when it faces off against Fairfield on Saturday.

Herb Scribner can be reached at hscribne@student.umass.edu

Arikian controlled the ball several times in the match against Harvard, but failed to score against the Crimson. Despite a late surge towards the end of the match, UMass failed to capitalize on its chances, resulting in a 3-2 loss.

Johnson is true defintion of student athlete

Senior runner holds 4.0 GPA in classroom, earns A-10 Academic All-Conference Team

By Eric Mansfield
Collegian Staff

When it comes to receiving athletic and scholastic praise, senior Kevin Johnson of the Massachusetts cross-country team is no stranger to accepting them.

A food science and nutrition major, Kevin currently holds a 4.0 GPA and earned an Atlantic 10 Academic All-Conference Team selection three times. Most recently, Johnson received the 2009-10 ESPN The Magazine Academic All-America Men's Track and Field and Cross Country Third Team honor.

For Johnson, being a successful student athlete has been more rewarding than difficult.

"I don't consider [classes to be] too much work," Johnson said. "I see it more as I'm doing what I want to do and what I enjoy doing."

When it comes to dealing with big tests in season, Johnson said it all comes with the territory.

"High school was the same, it has been that way for about seven years," Johnson said.

A key element of Johnson's success has been the support of his coach and teammates.

UMass coach Ken O'Brien has been a strong influence for Johnson, teaching him valuable lessons about running and life.

"Coach O'Brien is great with athlete development," Johnson said. "His style of coaching develops you as a person as well."

Keeping a strong focus, working hard and maintaining a balance between work and play are some of the lessons Johnson has learned from O'Brien.

Johnson's twin brother David, also a member of the cross-country team, has been there to help push Kevin along. The friendly competition between twin brothers exists in running as well as the classroom. Johnson admitted that it's nice to have a person around to always compete with and compare himself to, and the competition between them keeps Kevin motivated throughout his college career.

While recognition and admiration for Johnson comes from many different outlets, he believes the most important recognition comes from the people who go through the same experiences as Johnson.

Senior teammate Sean Duncan is still impressed by Johnson after playing together at UMass for the past four years. Duncan said that Johnson does a great job leading by example and he is a great influence on the team.

While the team operates as one big cohesive unit, his teammates are willing to listen to what he has to say and respect his self-discipline.

"When it comes to academics, he puts in a lot of work and takes a lot of pride in it," Duncan said.

Duncan also said that Johnson's performance and accolades are as much a factor in UMass' recruiting as any other.

David said not only does Kevin lead by example, but also keeps tabs on the younger runners. He's been known to remind his teammates to stay on top of their studies.

For now, Johnson says he plans on sharing everything he has learned at UMass with all of the newcomers. With a team consisting of mostly seniors and freshmen, Johnson said "it is a pivotal year as far as the program is concerned." The younger guys will have to become leaders much sooner, he added.

On top of everything else, part of his job will be to make sure that happens successfully.

Eric Mansfield can be reached at emansfie@student.umass.edu

Johnson boasts a 4.0 GPA inside the classroom along with several national accolades. One of Johnson's main influences in the athletic circle has been UMass coach Ken O'Brien.

Minutemen look to build from last season while Minutewomen retool with freshmen

Johnson, Gordon return for men after second place finish

By Ben Lambert
Collegian Staff

JEFF BERNSTEIN/COLLEGIAN

The Minutemen look to use experienced veterans to help train the new faces, while the women's side competes with no seniors.

After strong showings to cap last season, the Massachusetts cross-country teams have bright prospects for the upcoming season. Both teams boast returning veterans and some bright new talent that should shine this fall.

On the men's side, the Minutemen are looking to build on last year's second place finish in the Atlantic 10 Championship.

"We have a sandwich team," UMass men's coach Ken O'Brien said. "We have a bunch of older guys and a lot of younger ones too. It's a very good group."

Kevin Johnson, Andrew McCann and Zachary Gordon finished in the top 15, and therefore were named to the All-Conference team for their efforts.

David Johnson finished just two seconds out of 15th place. Other than McCann, these runners will be back in Amherst for the upcoming season, while the Minutemen also return 13 other runners.

In addition to the veterans returning, there are five freshmen being added to the team this year. These young competitors add a fresh element to what otherwise is a team entirely made up of upperclassmen.

O'Brien said he is expecting his freshmen to step up for the team immediately.

"The younger guys can contribute," O'Brian said. "By the time they hit the second half of the season, they'll have adjusted to the longer distance [in collegiate cross-country] and will combine with the older runners to give us a formidable team."

As the Minutemen enter the season, they look forward to competing in a strong conference. Last year's conference champion, Saint Joseph's, returns four of its top five finishers from the A-10 Championship meet last year. Dayton returns the individual winners from the A-10 Championships in Chris Lemon and his brother Matt, who also finished in the top nine of that race.

The Minutewomen are a young squad looking to make their name while building on last year's strong third place finish at the A-10 Championships.

UMass has no seniors this year. In fact, 11 of the 20 members of the team are freshmen and sophomores. This season, A-10 Rookie of the Year Courtney Baldwin and redshirt senior Shiyi Zan return to the Minutewomen in hopes of mentoring their younger teammates.

The A-10 women's coaches have predicted a sixth-place finish for UMass this season, behind Richmond and La Salle, two teams that the Minutewomen beat in the A-10 Championships last season. Dayton and Charlotte, the champion and runner-up respectively from last year, are favored once again to lead the conference.

Both teams will have seven events in the upcoming season. The women start first with a meet against Boston College. Then, both teams have smaller meets at home and will compete in the Paul Short Invitational. The women then go to Warwick, R.I. for the Rothenberg race, while the men head to the Chili Pepper Festival in Fayetteville, Ariz. Both teams will compete in the A-10 Championships and the NCAA Regional Championships after that. The men will finally finish up the season at the IC4A Championships in the Bronx.

Ben Lambert can be reached at wlambert@student.umass.edu.

UM strengthens team with young additions

By Herb Scribner
Collegian Staff

The Massachusetts men's soccer team may have built a strong enough roster to bypass speculated struggles this season.

"We're looking forward to the season, we want to be back to the Atlantic 10 tournament, to the NCAA tournament," UMass coach Sam Koch said.

"I feel strongly that we're going to be a team that's better than we were last year," continued Koch. "We're going to do everything we can to make sure we're back in the postseason. But I can't predict it; I don't have a crystal ball."

While this year's team is relatively similar to the team that narrowly missed the 2009 postseason, fresh faces, including an international striker, may be the change Koch and the rest of the UMass lineup need to thrive in the upcoming season.

Forwards

If any position of the pitch took a hit this offseason, it was the forward spot, as last year's top goal scorer, Mark DeSantis, graduated.

Brodie Steigerwald and Chris Roswess top the Minutemen's returners list.

Roswess and DeNormandie look to lead the offense, coming from positions with heavy experience from the previous year. Roswess started in all 31 of his games last season, totaling four assists, while DeNormandie scored two goals of five shots taken.

Despite losing a key scorer, UMass adds an out-and-out striker in Hellah Sidibe. The freshman, who hails from Mali, will dawn the Maroon and White jersey for this upcoming season after failing to meet academic requirements last year.

"He hasn't stepped on the practice field yet," Koch said. "We really feel he's going to be a nice addition and he hasn't played against the competition that we've played against. He's a good athlete, good soccer player. We feel like he's going to be a great asset to the team."

Sidibe, however, is not the only new comer for the forwards. Three additional incoming UMass students, Brett Canepa, Conor DeVivo and Mike Matlock, will hit the pitch for the Minutemen.

With a push to add more depth at the top, Koch was not shy on his intentions for the upcoming season.

"The main thing is to score goals. Can we score more goals than we did last year?" said Koch.

With an increase in forwards, Koch may find the answer to his question to be affirmative.

Midfielders

The midfield is one of the most essential pieces of a soccer team, controlling both the pace of the game as well as, offensive and defensive dynamics. Luckily for the Minutemen, the midfield hosts their most essential player in Ben Arikian.

Arikian is back for the Minutemen this year, having already been named to the A-10 Men's Soccer Preseason All-Conference Team. The senior was instrumental in the success UMass had last year, totaling seven of the Maroon and White's 15 goals. Arikian did more than just score for the Minutemen he also led the team in assists (four).

Arikian's display of skill isn't limited to the previous year either. In 2008, the young sophomore garnered the A-10 Midfielder of the Year award.

The supporting midfielders around Arikian are not to be forgotten either. The Minutemen will bring back a very familiar midfield with Stuart Amick, Morgan Brandso, Bryant Craft, Patrick Holmes, Chris Stoker and Chris Vaccaro. Holmes is the only returning midfielder yet to see any game action.

The lone freshman for the center of the pitch will be Josh Gossellin, who played high school soccer in Reading, Mass., where he was named to the All-Middlesex League. Gossellin also played against DeSantis in the Mass Premier Soccer League.

Also, expect to see Mark Dangleis creep into the midfield, as he doubles as a midfielder and a defender. Dangleis' movement falls perfectly into Koch's plan to have players intersect and not stay true to one position.

"Midfield will be in the attack, the outside backs will be in the attack, and our front runners will need to drop into the midfield to defend," Koch said. "There's no real formation that we [play] except that everyone plays multiple positions."

Koch hopes the versatility he receives from Dangleis will be seen in Stoker, his newest transfer.

The junior transferred from Providence after sitting out part of his sophomore season with an injury. However, he's shown plenty of upside to perform on a big stage, scoring the game-winning goal for his team as a freshman.

Similar to Dangleis, he also plays midfield, but is more offensive-minded than his new teammate.

Defenders

Under Koch, UMass typically plays a more defensive style of soccer.

This year will be no different as Koch has confidence in his back line..

"Defensively, we're pretty sound, and we feel we should be able to maintain that," Koch said.

The defense won't be seeing too much change this year. Michael Doherty, Chris Gilbert, Andrew Henshaw, David Key and Dominic Skrajewski will hold up the back again.

Henshaw and Skrajewski each scored goals last season, so expect to see them push forward as a part of Koch's interweaving formation plan.

New to the defensive lineup will be Tyler Cleverdon.

Goalkeepers

Chris Piekos and Shane Curran-Hays return to stand in the net for the Minutemen, along with sophomore Brian Frame.

"Piekos and Curran-Hays are certainly the top two keepers," Koch said.

Although Piekos and Curran-Hays will lead the goalkeeping area of the field, Koch believes Frame still has the ability to make an impact.

"It depends how he does in preseason," Koch said. "We'll find out when he comes in."

Piekos and Curran-Hays started all games for UMass last season, with Curran-Hays starting in eight matches and Piekos starting in nine. Last season, Frame's freshman year did not grant him any game action.

Piekos totaled 46 saves and mustered four shutouts for the Maroon and White, allowing seven goals in 925 minutes of game time. While Curran-Hays also allowed seven goals, he did so in 705 minutes and had a season with two shutouts.

Koch will look into setting his lineup in the coming weeks, despite not having a specific formation in mind.

"We'll see how that goes in preseason," Koch said. "Traditionally, [we use] a traditional 4-4-2. Will we play a 4-5-1, a 3-5-2, how the game goes will determine what our formation is."

Herb Scribner can be reached hscribne@student.umass.edu.

Matz at helm for UMass to replace Napoli

Last season, the Massachusetts women's soccer team advanced to its first postseason since 2004, playing its way into the Atlantic 10 tournament before losing to Fordham in the opening round.

David Brinch

At the helm for the Minutewomen was Angela Napoli, a former standout goalkeeper and an assistant coach who paid her dues for four seasons under Jim Rudy, her former coach was arguably one of the best coaches in UMass history.

Rudy retired in 2009 after 21 seasons as the head coach for the Minutewomen.

This season, Napoli was looking to bring the Maroon and White back to the postseason in her second season consecutive season at the helm.

The university went in another direction this offseason, hiring Northeastern coach Ed Matz in January, while Napoli became an assistant coach at Michigan.

Matz's pedigree is impressive: he was named the 2009 Colonial Athletic Association's Coach of the Year, leading the Huskies to the conference championship and the school's first ever regular season title. The year before, Matz led the team to victory in the CAA championship as the team advanced to the second round of the NCAA tournament.

Matz coached both men's and women's teams while at NU, coaching the women for 11 seasons while spending nine with the men's team. While at the school, he compiled an overall record of 182-165-41.

Named the director of the soccer program in 1999, Matz took both teams from the basement of the America East and turned it into a legitimate program.

While the Minutewomen are hardly in the cellar of the A-10, there is no question that Matz is a successful coach that has the ability to bring teams to the next level, especially UMass, a roster that features nine freshmen and just three seniors.

Matz has won everywhere he has gone, both on and off the field. For six-straight seasons (2004-09), Matz's teams earned All-Academic honors.

The Minutewomen lost their first game of the season to Washington, 3-0 on Aug. 27. But with Matz taking over a young UMass squad, look for more wins and another A-10 tournament birth in 2010.

UM STILL A-10's BEST

The Massachusetts men's soccer team might have dropped seven games last season, but its only real loss coming into the 2010 season is that of senior Mark DeSantis.

DeSantis scored four goals and was second in points behind senior midfielder Ben Arikian, who had 10.

UMass returns 10 of 11 starters and almost its entire team from a year ago, including eight freshmen.

That being said, with the same roster, UMass coach Sam Koch and the Maroon and White are looking for different results.

The team finished with a 7-7-3 overall record and was below .500 in conference standings, holding them out of the A-10 tournament.

All of this means that UMass will have the ability to work with a young team centered on four seniors who have had a lot of experience in the Maroon and White.

Arikian, named to the Herman Trophy Watch, has nine goals and 17 assists in 63 career games. Koch will rely on him heavily in order for the Minutemen to get back to where they were two seasons ago, when Arikian was a sophomore playing on a team that made it all the way to the NCAA Championship game.

The Minutemen were picked to finish in sixth place in the A-10 preseason poll, but only the top four teams make it to the A-10 tournament. Losing seasons don't sit well with Koch, so he won't settle for anything less than a spot in the A-10 tournament.

And once Koch can get his team that far, his endless coaching knowledge is going to make UMass a tactical nightmare to coach against.

Only one of those four teams will get out of the tournament 2-0 and continue its season against the best of the NCAA.

That team will be Koch's Minutemen.

David Brinch is a Collegian columnist. He can be reached at dbrinch@student.umass.edu.

Sydney Stoll will be an essential part of the Minutewomen lineup this season under Matz.

Minutemen suffer first loss of '10

By Herb Scribner
Collegian Staff

Even though the Massachusetts men's soccer team fell to Harvard, 3-2, it can at least hold its head up high knowing it went down fighting.

"We talk a lot about how we decide who wins or who loses," UMass coach Sam Koch said. "I think for about 75 percent of the game we played well and had our shape. Yeah, they put pressure on us, but we were under control. We're okay with that because we're a counter-attack team. There are times when we break down. We let them beat us. If we had stayed more composed, had kept the shape of the team, we would have been better off. I give them credit; they took it to us."

The Minutemen (0-1-1) battled the Crimson (2-0-0) in a game of mixed possession and heavy fouling, as both teams combined for 48 fouls and four yellow cards.

"I wouldn't want to be a referee," Koch said of the referee's decisions throughout the game. "I think there were some shaky calls but you know he's doing the best he can, credit to him. If we made as many mistakes as he did, we would have won the game."

The first 10 minutes of the match featured a back-and-forth battle for possession with no victor. UMass pushed up the field on two separate occasions, but failed to convert due to poor passes towards the inside. Harvard's lone chance at goal came off of a corner kick which resulted in a missed shot opportunity.

Nearly 20 minutes into the game, UMass had a free-kick outside the box which turned into a goal-scoring opportunity. After a cluttered mess inside the box, including a takedown from a Harvard defender, Bryant Craft earned a penalty kick. He banged it into the right corner and the ball ricocheted off of goalkeeper Austin Harms' hands for the first goal of the contest.

The early goal must have heightened Koch's confidence, as he pulled two high-profile players in the returning Chris Roswess, who missed the first match of the season due to a red card earned last year, and the goal-scoring Craft. Both Roswess and Craft would make returns later in the match.

Drama unfolded in the 37th minute after the ball was cleared toward the backline. Hellah Sidibe, who made his home debut for the Minutemen, brought the ball up the field. He dribbled past two defenders, including Jaren LaGreca, who he elbowed in the nose along the way. Sidibe was tackled from the side by Jamie Rees and tripped down to the ground.

The game stopped to deal with the injured LaGreca and the foul situation with Sidibe. Sidibe received a yellow for his hard foul on LaGreca and Rees also garnered a yellow for his tripping of Sidibe.

Despite the controversy surrounding his plays, Sidibe earned high praise from his coach regarding the Malian striker's debut.

"He's picking some of the turf up and bringing it back to the room," Koch said. "He's going to be a good player; he still has things to learn. He's got to know the players around him, but each week he's getting better and better. We're seeing a lot from him, so we feel he has a good future here."

During the pause, fans, coaches and players complained continuously about the initially-missed call for LaGreca's injury.

"One side is always going to say you're wrong, and one side is always going to say you're right, but maybe not all the time," Koch said.

UMass continued to lead the first half, despite the mutual possession held by both teams. Going into the half-

JEFF BERNSTEIN/COLLEGIAN

Bryant Craft sends the ball in from 20–yards out during UMass' 3-2 loss to Harvard on Sept. 6th. Among the heavy goal–scoring, the Minutemen dished out a heavy amount of fouls (48) on their opponents and recieved four yellow cards. UMass travels to Fairfield this Saturday.

Craft making big impact early on

Junior forward scores twice in two contests

By Steve Levine
Collegian Staff

Bryant Craft is making good on a promise he made earlier this summer when he said he was going to elevate his game.

The junior forward from Worcester, Mass. has two goals in the Minutemen's first two games. His first came in the season opener against Boston University, which resulted in a 1-1 tie. His second goal came Monday in a tense, 3-2 loss against Harvard. Craft's quick scores ended the mild trepidation on how he would adapt to his new position as a forward instead of a midfielder, the position he played primarily during his first two seasons.

"Coach [Koch] switched me from outside midfielder to forward which was a big change," Craft said. "But I think he had the confidence [in me] and knew I could adjust – I guess it's paying off."

Koch has confidence in his veteran forward, citing his speed and desire to attack the goal as the two strongest parts of Kraft's game.

"He is so good at going forward," Koch said. "He wants to score a lot of goals and he's great at going straight for the goal."

Craft is well on his way to having a career-year, already eclipsing his one goal, one assist campaigns in his freshman and sophomore years, respectively. He credits his early success to the hard work he did over the summer when he played alongside teammate Ben Arikian and even some former Major League Soccer players on Long Island, N.Y.

"This summer was a good experience for me," Craft said. "I just went down there with the mentality to try and get better and improve."

Improve he did.

Even with one goal per game average on the young season, Craft remains humble and knows he's not the only offensive threat the Minutemen have. Arikian carries much of the offensive workload along with junior forward Chris Roswess, who Koch believes is a more dangerous player when he plays alongside Craft.

"I just work hard," Craft said. "I go out there and give everything I have every game. I'm not going to say I'm the fastest guy or the most skillful guy – my goal is just to outwork you every game."

Craft's tenacious play has drawn rave reviews from the UMass coaches, who struggled to come up with weaknesses in the talented forward's game.

"He's not really that funny," Koch joked. "His jokes are really bad."

Craft, on a more serious note, understands there are parts of his game that actually need improvement.

"My left foot is definitely one area I need to improve," Craft said. "I'd also say the [mental aspect] like being able to stay tuned and being effective for the full 90 minutes."

Koch wants Craft to continue his hot start so that UMass can find more balanced scoring after netting just 15 goals in 17 games last season on its way to a 7-7-3 record.

UMass looks for its first victory on the year when they travel to Connecticut for a 1 p.m. game against Fairfield University.

Record class comes to UMass

Largest number of freshmen in history, 4,500, enroll at UM

By Ashley Berger
Collegian Staff

As another school year opens, the University of Massachusetts welcomes another freshman class to its campus. This year, those freshmen happen to be the largest number of incoming students in school history.

A record 31,000 students applied to UMass last year, a six percent increase compared to the year before, which also saw record enrollment. The Class of 2013 had 29,469 applicants and enrolled approximately 4,100 students. Of the 31,000 applicants this year, 4,500 declared to attend UMass, making the Class of 2014 the largest entering freshmen class in University history.

A large factor in the increase in enrollment can be attributed to out-of-state students. Within the past year, out-of-state enrolment has soared from 800 to 1,150 students, making up roughly one-fourth of the entering class. This rising trend of those from outside the Bay State choosing UMass as opposed to their native states' colleges or universities will likely help the university's financial state, as out-of-state students pay about $12,000 more in tuition than residents.

Admissions made a significant attempt to try and attract more and more out-of-state students this year. UMass spokesperson Ed Blaguszewski said this shift in where students call home will continue to be beneficial for the campus in years to come.

"This number reflects a growing interest for UMass as a university for in-state students as well as out-of-state students," he said. "And as the number of Massachusetts students increases, so does the number of out-of-state students.

"This will create an increase in revenue, and that money principally benefits the Massachusetts residents, because they pay a significant amount more to attend the University. It is a great help to all the students."

Though UMass has made an effort to attract students from different parts of the nation, it still remains an attractive option to some Massachusetts residents because of its proximity to home.

HANNAH CHENEY/COLLEGIAN

Piles of possessions littered campus into this week, as UMass' 4,500 incoming freshmen and other returning students moved back.

Students flocked back to campus last weekend, as UMass' incoming class saw record enrollment levels.

Freshman Annemarie Ellsworth said her decision to head to Amherst was influenced by her ability to go back home.

"I chose UMass not only because it has many great programs, but because it was so close to my home in central Massachusetts," she said. "I knew that I would be able to go home if I ever got homesick."

Fellow freshman Reagan Eckler said she chose UMass over other schools which intrigued her because of her familiarity with the area and the school's diversity in classes.

"I felt the most at home here and had fun when I visited on weekends, so I knew I would have fun going here," she said. "Also, it had so many options for majors and I really liked how I potentially have the ability to create my own, which, coming in as undecided, I thought would be a great opportunity."

While the number of applicants has grown, the demographic make-up of the pool is generally the same. Women continue to contribute , accounting for half of the class, while ALANA (African, Latino, Asian Pacific Islander and Native American) students make up about 21 percent of the class.

The academic profile of the incoming class is comparable to last year, with an average SAT score of 1167 and a high school GPA of 3.61.

Due to the increased class size, the overall enrollment of UMass will grow to about 20,140, up by 500 from last year.

Blaguszewski said he has high hopes for the class.

"The freshmen this year are very bright and very accomplished. They have shown outstanding test scores and grade point averages from their high schools," he said. "We're very excited to have them on campus and very happy to welcome back all of our returning students."

University researcher explores new ways to create green energy

By Matthew M. Robare
Collegian Staff

A chemical engineer at the University of Massachusetts has developed an improved method of converting wood into synthetic fuels.

"We're focused on lignocellulosic biomass," said Assistant Professor Paul Dauenhauer. "What I mean by that is trees and grasses – ways we can take those trees and grasses and turn them into synthetic fuels and chemicals."

Dauenhauer said there are three ways wood can be converted to fuel. One way is biologically and another involves a process called gasification, where wood is heated very rapidly in a reactor with no oxygen to a temperature where it glows a bright orange color and vaporizes into synthesis gas, which can then be converted into fuels.

The third way, the method Dauenhauer has been working with, is called partial oxidation and is similar to the other conversion methods, but involves heating the wood quickly in the presence of low amounts of oxygen and then cooling it just as quickly.

"It breaks up, but not completely," Dauenhauer said. "You end up with a liquid called bio-oil, which looks kind of like petroleum, but chemically is very different. You can then take that brown, goopy material and process it to make fuels and chemicals."

He said the bio-oil can be made into methanol, aromatic compounds – like styrene, linear alkanes, which are similar to diesel fuel and polyethylene, or as it's more commonly known, plastic.

"All these kinds of products are the same things as if you were using petroleum, so we're looking to replace petroleum in the process," Dauenhauer said.

"It sounds far out there, but if you can take wood and convert into something that can be used in a refinery, most of the infrastructure is already there."

Dauenhauer said that the properties in the plant cells in the wood are so different, that it is possible to turn the wood into liquid for a short period of time.

"For one-tenth of a second it goes from solid to a liquid droplet to gas. During that time it's liquid. It does what's called wetting. The droplet is absorbed into the surface," he said. "Discovering that trees turn into liquid is very exciting for us, because we've been studying how trees break down over 30 years."

According to Dauenhauer, "We now know that this is the key intermediate step in the breakdown process."

Dauenhauer said this discovery led to a breakthrough.

"If you take this process and go through to a gas, you can actually get all the carbon to end up as a precursor to biofuels," he said.

He added, "In the past, only about 50 percent of the carbon ended up going towards biofuels. In essence it's doubling you're production of biofuels."

Dauenhauer also said it is even possible to go beyond 100 percent of carbon conversion, resulting in creating the product necessary for biofuels.

"It sounds weird, but what we did was, if you co-heat carbon dioxide, so you have a piece of biomass and carbon dioxide, under the right conditions you use the carbon dioxide to force the chemistry backwards, using a special reaction called water-gas shift," he said.

"You can end up converting all the biomass carbon and some of carbon dioxide into carbon monoxide, which is what we use to

New study predicts job surplus

By Max Calloway
Collegian Staff

Despite recent economic woes, a new Georgetown University study suggests greener employment pastures if the nation can meet President Barack Obama's goals for higher education.

President Obama, at an Aug. 9 appearance at the University of Texas, outlined his education agenda for the coming decade, hoping to add an additional 8.2 million college graduates by 2020, placing the U.S. at the top of global higher-education standards.

The President's speech was delivered a month after the Georgetown University Center on Education and the Workforce's (GUCEW) Jun. 2010 study, "Help Wanted: Projections of Jobs and Education Requirements through 2018." The study predicts a shortage of qualified workers in a shifting economic landscape.

The study projects the creation of 46.3 million new jobs by the end of 2018, with 63 percent requiring a post-secondary degree or certificate.

The "Information Services, Private Education Services, Government and Public Education Services, Financial Services, Professional and Business Services and Healthcare Services" industries will account for a majority of this new growth. According to the study, "75-90 percent of [these] jobs... will require post-secondary education or training." This translates to roughly 30 million new jobs for those with a post-secondary education.

While these figures sound great for students currently enrolled in degree and certificate programs, the report, along with the date from the Bureau of Labor Statistics (BLS), forecasts increasing trouble for high school graduates not planning on attending a post-secondary program, and a looming education deficit if the nation cannot increase overall post-secondary graduation rates.

According to BLS data, the unemployment rate among young adults with a bachelor's degree or higher is 4.7 percent. That figure doubles and triples respectively for those with a high-school diploma and those without. With over 600,000 manufacturing and natural resource jobs forecast by the study to never return, fixing the national higher education system is a vital factor for America's continuing economic recovery.

According to a Jun. 15 press release from the GUCEW, "Employers will need 22 million new workers with A.A.'s, B.A.'s or better – and we will fall 3 million short." Employers will also need 4.7 million workers with post-secondary certificates.

Report: grads get jobs

JOBS from page 1

For Anthony P. Carnevale, director of the GUCEW, the only way to bridge the education-employment gap is for the country to change its views and expectations of higher education. In a Jun. 15 report from the college news website Inside Higher Ed, Carnevale concludes, "[t]he key psychological change that is needed ... is to move away from 'the old model, where you go to college and then go out and find a job' to one in which the college years are explicitly 'preparing for an occupation.'"

Laura Meyer, Program Coordinator for GUCEW, echoed Carnevale's sentiment, believing that career oriented programs at the state level are essential to closing the education-employment gap. She and the rest of GUCEW see community colleges and smaller state universities as future well-springs for a qualified workforce of graduates holding "applied baccalaureates."

The report has also drawn attention from the United States Student Association (USSA).

In a phone interview, current USSA president and recent University of Massachusetts alum, Linsdey McClusky praised the study, saying that it, "actually supports work the USSA is doing."

McClusky and the USSA have known that the "move has been gradual to a higher-educated workforce" for some time but are frustrated that national and federal funding for higher-education has been systematically cut while enrollment steadily increases.

McClusky hopes the Georgetown data will help put education back "in the spotlight," but acknowledged that it would take a "huge investment" in order to reach President Obama's goals.

That "huge investment" would add up to $158 billion in additional funding for higher education, said former USSA president Gregory Cendana in a Jun. 21 Huffington Post report. And while the recently enacted Health Care and Education Reconciliation Act invested about $40 billion into federal aid programs over the next 10 years, that still leaves a $100 billion gap in the laps of state governments, "not the most friendly of places for college spending," Cendana said.

In his own article from the Huffington Post, Carnevale sums up the dilemma, saying, "Instead of asking whether everyone needs to go to college, we should be asking if we can produce enough workers with degrees that meet the demands of the 21st century economy."

Max Calloway can be reached at mcalloway@student.umass.edu.

Anthony Carnevale, director of Georgetown's Center on Education and the Workforce, believes workers will soon need to be better educated to get hired.

Researcher looks to plants to make power

BIOFUELS from page 1

make biofuels."

The carbon monoxide can be reacted with hydrogen gas to make fuel. To get around petroleum shortages during World War II, the Germans worked on a similar method with coal to manufacture synthetic fuels.

In the United States, research is focused on wood and grasses because they can grow in places food crops don't and the species of trees they've been conducting research on, hybrid poplars, are fast growing and outcompete other sources of biomass. Dauenhauer added that the ecology of the trees has been studied and the hybrid poplars are also the most environmentally friendly because they use less nitrogen and phosphorous from the soil.

Dauenhauer said that there are all sorts of new projects being planned to study the behavior of the wood liquid while using the discovery to produce synthetic diesel, gasoline and ethanol as an engineering issue.

"We want to break down the process and study each individual reaction," Dauenhauer said. "The other thing, which is more on the engineering side, is finding reactor designs that would allow us to build this up into a large system." "This is an extremely important issue," Dauenhauer said. "People have an image of using petroleum or clear-cutting forests, but those aren't the options we're looking at here. We're looking at controlled agriculture, similar to what the paper industry does."

Taking a dive: Skydiving chronicles

This past summer, Collegian music editor Angela Stasiowski went skydiving for the first time in Ellington, Conn. The affair with the air was a nerve-wracking experience, but one that she doesn't regret and will always remember. To see a video of her jump, go to DailyCollegian.com.

By: Angela Stasiowski
Collegian Staff

As a college student, I'm used to everything being up in the air.

From my future, to the reliability of my 12-year-old Chevy, everything is a risk these days. But, I never thought I would risk it all by jumping from 13,000 feet in the air to the open fields of Connecticut.

At Connecticut Parachutists Inc. in Ellington, Conn. I was graciously given the opportunity to test the boundaries of my comfort level with my very first skydiving experience—and what an experience that was.

Mind you, I would not classify myself as a daredevil by any stretch of the imagination. This just goes to prove that anyone can skydive; it just takes the right mindset and willingness to try.

The adventure started with a phone call from my mother. "I know you've always been one to try anything," she said. "So, I was wondering if you'd be up for skydiving."

When your mother asks you to skydive, it is very difficult to refuse. The next day we were booked for a 7:30 a.m. jump on Aug. 15.

"Be sure to come early," the email confirmation said – as if it were possible to wake a college student up before 7:30 a.m. on summer break.

Sure enough, when the day finally came, I was up and at 'em by 5:30 a.m. wondering what I should wear to jump out of a plane. I again consulted the e-mail, which suggested sneakers and anything comfortable. After the crucial wardrobe decision, it was off to Ellington.

The staff at Connecticut Parachutists Inc. was thrilled to see new faces, and did everything in their power to put new jumpers at ease, mostly by making jokes about parachuting accidents. Oddly enough, the technique worked wonders.

One of the airborne funnymen was a trained videographer whose job was to record everything from our pre-jump nerves to the jump itself. Not just anyone, not even any professional parachutist can fill this role, however. One must be trained with specialized classes and have thousands of jumps under his or her belt to become an in-air videographer.

As a novice, the only way I could hurl myself from a plane safely was with the help of a trained jumper.

Tandem skydiving involves strapping a highly-trained parachutist to your back and letting them take over the important responsibilities, such as deploying the chute and landing with all limbs intact. In other words, the basics.

After a lesson on how to properly fall out of a plane - legs up and arms out - it was time to board our aircraft.

See SKYDIVING on page 5

Roach's "Schmucks" a cocktail full of laughs

Starring Paul Rudd and Steve Carell, "Dinner for Schmucks" was released on July 30. The comedy sports a cast of big names, but doesn't pack the humorous punch moviegoers were anticipating.

By Dan Gigliotti
Collegian Staff

"Dinner for Schmucks" offers a light fare of laughs, with tasteful jokes in modest proportions. For someone with a full appetite for gut-wrenching humor, this film leaves room for dessert.

When a coveted job promotion requires Tim to compromise his integrity, his disapproving girlfriend walks out on him. Forced to decide between a promising career and his significant other, a fateful encounter with Barry only complicates things from there on out.

Tim (Paul Rudd) and Barry (Steve Carell) are a genuine fit on screen. Barry's naiveté brings truth to the saying "ignorance is bliss," counteracting Tim's anxiousness. As Tim struggles to appease his boss, potential client and girlfriend while maintaining his self-control, Barry constantly tests his patience, resulting in back-and-forth dialogue with the frustration of an Abbot and Costello routine.

Carried by a veteran group of supporting actors, the movie culminates with a scene that takes place at a formal dinner. The zany characters and wacky behavior have the audience laughing at the guests and feeling embarrassed for them at the same time – similar to a family reunion where everyone has too much to drink.

Rudd ("Anchorman," "I Love You, Man," "Role Models") plays a mid-level financial executive whose boyish charm gains him esteem with his colleagues, but whose down-to-earth values may keep him from getting ahead. In what is no easy task playing alongside Carell, his performance is graceful, as usual, cuing tactfully off of his awkward counterpart.

Carell ("Anchorman," "The 40 Year Old Virgin") performs in yet another role which requires him to be outlandish and quirky as he plays a taxidermist with a unique talent. One can only hope that in the future his novelty as the unabashedly goofy and oblivious guy doesn't wear off, as so many comedic actors in recent history have had their stars burnout because of type-casting. See: Jim Carey and Adam Sandler.

Yet, it is hard to dislike Carell's silly and harmless role in this film. But in the same breath, it's even tougher to not empathize with his castmates, who must deal with his painful honesty that could make Casanova feel awkward.

The stunning Stephanie Szostak ("The Devil Wears Prada," "Law & Order: Criminal Intent") is impeccable as Tim's girlfriend and a curator of an art gallery. Her sincerity provided a bit of normalcy amongst the riotous shenanigans following Tim and Barry.

Zach Galifianakis ("Out Cold," "The Hangover") may not have had the benefit of a superbly-written part, but did little to keep his supporting role as Therman the mind control expert magnetic.

On the other hand, the wildly funny Jemaine Clement ("The Flight of the Concords") was a pleasant surprise, in his most recent foray into film as the incendiary artist Kieran, Tim's appointed rival.

"Dinner for Schmucks" offers a lesson in humility that gives its viewers an appreciation for some of life's simpler pleasures. If you have a big appetite for laughs, "Schmucks" may just be enough to tickle your fancy, but don't watch it on an empty stomach.

Dan Gigliotti can be reached at dgigliot@student.umass.edu.

Tao Lin's latest novel, about two fictional characters named Haley Joel Osment and Dakota Fanning, hit the racks on Sept. 7.

"Richard Yates" proves to be impressive and moving novel

By Mark Schiffer
Collegian Staff

Author Tao Lin's world is one in which the enemy has already won. The hopes and dreams of previous generations have been cleaned out for the sake of convenience. Joy is only something that can be found in art and, occasionally, other people. Furthering this issue is the unreliability of others – the very need for others is something which in itself can rarely be filled.

While people are willing to share time, the emotional commitment requested, and sometimes needed, is something that others aren't always able to deliver. People are people and, while intentions can quite often be good, consequences can be quite awful.

With Lin's latest novel, "Richard Yates," this world has been conjured up with startling vividness and vitality. While his trademark spare style hasn't exactly shifted, it has become more focused in a way that simultaneously disturbs and exhilarates on a level not previously reached by this author.

The Gmail conversations that he littered his previous book, "Shoplifting from American Apparel," with have practically taken over in his latest book. It certainly works, but it is unsettling to read.

The book follows the romantic and abusive entanglements of fictional characters 22-year-old Haley Joel Osment and 16-year-old Dakota Fanning. They go to suburban carnivals, walk around New York City, watch "Chungking Express," and have both their most fulfilling and least healthy interactions on the internet. She develops an eating disorder, and it seems like his emotional abuse of her is the cause. But in this world, cause is a tricky thing.

Osment's thoughts and actions, while certainly not wonderful, do not necessarily go too far off the beaten path of acceptable behavior. His less than desirable actions mainly consist of being in a rclationship with a younger person and shoplifting. And yet, as readers, we view each one of his actions as further compounding the emotional crippling of young Fanning.

At times, it is quite difficult to read. We are trapped with these two characters who have very few meaningful interactions with people besides each other. It is a terrifying, truthful thing. They feed off each others' disillusionment.

"Richard Yates" reads like a fresh work from Hemingway. If you allow yourself to believe that he has distanced himself from his characters, then Lin has lifted his admittedly quite off-putting writing to the level of high-art.

An accusation that has been leveled against many of the so-called "alt" writers, like Miranda July and Lin, is that they depend on truisms and sweeping statements spoken by their characters, which act as vessels for the ideas of the authors. While this isn't necessarily an inherently bad thing, one could easily come to view this kind of writing as smug.

But "Richard Yates" isn't smug at all. It moves with a pulsing vitality. Reading it gives one the feeling one gets when discovering something wonderful and new. It happened last year, when the movie "Moon" came out. People who left that theater were stunned at its amalgamation of science-fiction tropes and meditations on humanity. It has happened again here. Lin has used literary techniques made famous by people like Raymond Carver and Ernest Hemingway, to say something original and fascinating.

Mark Schiffer can be reached at mschiffer@dailycollegian.com.

UMass student takes her first leap of faith

SKYDIVING from page 4

The plane was small with benches lining each side for the jumpers. There were about three other tandem groups jumping, as well as some more advanced, individual jumpers.

The climb to 13,000 feet took about 15 minutes, but felt like an instant. While this sounds like a long way to fall, it is actually safer to jump from a higher altitude.

Suddenly, the door was open, the seatbelt was off and I was sliding down the bench. I remember very little fear after the initial shock of leaving the plane. Mostly, I remember wondering what the clouds below us would feel like.

Never have I felt closer to the feeling of flying. There was about a minute of freefall followed by five minutes of parachuting, during which I was handed the reins and told to steer us to our destination.

Since it is difficult for two people to land gracefully on their feet, tandem jumpers are often told to put their feet up for the landing.

When I finally got my feet on the ground, I was already thinking about jumping again. The whole experience was over too soon. I was handed a nifty certificate for taking my first jump and walked away feeling like I could take on the world.

Interested in taking the plunge? Connecticut Parachutists has student discounts for those with a student ID. There are several other jumping bases throughout New England, including several in the Boston area and in Rhode Island.

In the past, the University of Massachusetts Amherst has even hosted their own skydiving club for interested students.

Prices for parachuting vary from place to place, but the impact of such an adventure lasts a lifetime.

The moral of my experience can be summed up in a few words: An eagerness to try new things can lead to some of the best experiences of one's life. And if one decides to take such a risk, make sure there is someone there to record it.

Angela Stasiowski can be reached at astasiow@student.umass.edu.

Stasiowski boards the plane she will soon plummet from towards a field in Ellington, Conn. Attached to her instructor from Connecticut Parachutists, she fell 13,000 feet from the open sky.

Thursday, Sept. 9 · 9 pm – Midnight

Take the Director's Challenge

...For a Lifetime of Great Health

Win an iPad*

Sign-up, Partcipate & Follow Through

Sign up for the Director's Challenge **Sept. 7th– 9th, from 5:30 PM -8:30 PM** at our registration tables in each of the Dining Commons.

Participate by using the chart we have provided for you in the *Directory of Services* handbook to track your consumption of fruits, vegetables & whole grains.

Follow through by adding more fruits, vegetables & whole grains to your diet every week. Submit the completed chart as your entry form at the end of the semester for your chance to win 1 of 4 iPads!

*Must be a UMass student on a meal plan to be eligible to win.

For more information, contact our Dietitian, Dianne Sutherland at: dsutherland@mail.aux.umass.edu

Take part in the Director's Challenge. Track your consumption of fruits, vegetables, and grains for the week of September 13th - 17th and then, **DOUBLE THAT AMOUNT** by the week of December 13th - 17th. Then, carry this lifestyle forward for a **Lifetime of Great Health!** Completed charts should be delivered to the office of Dianne Sutherland located on the third floor of Worcester Dining Commons.

"If we don't believe in free expression for people we despise, we don't believe in it at all."-Noam Chomsky

EDITORIAL@DAILYCOLLEGIAN.COM

Funding cliff looming

Three years after the start of the "great recession," economic recovery – both in Massachusetts and nationally – continues at a slow pace. In the rush to address dismally low state revenues, layoffs and consumer apprehension, funding for the University of Massachusetts currently sits on a precarious ledge.

As The Massachusetts Daily Collegian has reported, over the past two years, University funding suffered massive cuts: a 4.6 percent decrease in its endowment and a $1,500 student fee hike in attempts to close a state budget deficit of over $600 million.

The 4.6 percent decrease in the university endowment from $372,648 to $390, 774 has pushed UMass to No. 146 on The Chronicle of Higher Education's College and University Endowments list, placing it well behind the likes of the University of Tennessee (87), the University of Kentucky (81) and the University of Alabama system (73).

This new year brings with it the possibility of false hopes. Currently, $600 million dollars in federal Medicaid stimulus funds (FMAP) is waiting on legislation before it can be forwarded to the Commonwealth.

In a June 18, 2009 memo, Chancellor Holub was optimistic that the FMAP funds could be appropriated by the state and allocated for university funding. A year later, it seems doubtful the University will see any of the federal funds.

In a June 28, 2010 memo, Holub regretfully informed the campus community that Beacon Hill will likely allocate $193.5 million in university funding for fiscal year 2011, $46 million less than was received last year.

State and federal officials cannot allow UMass' impending "funding cliff" to doom the positive momentum the school has made in academic quality in recent years.

Just to add insult to injury, stimulus funding is anticipated to end in fiscal year 2012, leaving Massachusetts to deal with structural deficits and dismal state revenues.

"Michael Widmer of the Massachusetts Taxpayers Foundation predicts a decline of over 10 percent in funding for higher education in fiscal year 2012," said Holub.

Fiscal year 2012 will also bring with it $10 million in commitments in order to satisfy preexisting union contracts. This perfect storm of fiscal setbacks is likely to push UMass closer than ever to the "funding cliff" he has alluded to in the past.

Despite stacked odds, he warned against the pitfalls of finger pointing and urged the University to forge ahead with a renewed sense of cooperation.

Holub pointed to the 40 percent upswing in non-residential enrollment as proof that the University could endure these dire economic times. In all, the figures for the class of 2014 will result in over $4 million for UMass.

The University has also secured over $40 million in research grants from stimulus funding thanks to "cooperation among faculty, staff and administration," Holub said.

The memo also brings into question the fate of various long term projects dependant on state funding. According to the University website, the Amherst 250 plan to bolster UMass' faculty by an additional 250 professors would require an extra $30 million that it is painfully obvious will not come from the state or federal government.

With a growing student body, it is hard to see how the university will succeed in "maintaining and improving its position as a major public research university" when $10 million in contract obligations needs to be conservatively budgeted for.

While Holub's attempt to bolster campus morale by promoting cooperation and talking up a handful of small victories is laudable, the university needs concrete plans for addressing Beacon Hill's disregard for funding in higher education.

With the planned merge of the College of Humanities and Fine Arts and the College of Social and Behavioral Sciences into the "College of Humanities, Arts and Social Sciences," and the College of Natural Sciences and Mathematics and College of Natural

Resources and the Environment into the "College of Natural Sciences" happening later this year, he has a chance to show that the University can still thrive, despite dwindling funds.

The worst case scenario is that the massive reorganization is used as an opportunity to slash critical academic programs, rather than promote interdisciplinary exchange in a sleeker academic environment.

State and federal officials cannot allow UMass' impending "funding cliff" to doom the positive momentum the school has made in academic quality in recent years.

While The Daily Collegian editorial board understands the necessity of addressing unemployment and reassuring investors in this time of economic turbulence, there is no doubt that the quality, affordable education offered here is important for the future of the state and regional economies. Instead of allocating funds to bailout institutions responsible for the mishandling of the national economy, why not reinvest those funds with the intent of providing a valuable education to those attending the Commonwealth's flagship state university?

Too many past generations of UMass administrators and Massachusetts state legislators have grappled with fiscal deficits and then resorted to taking sharp knives to the budget without a second thought. But history has clearly shown that you can't cut your way into being a top tier-public university.

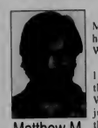
Now that Holub has had time to establish himself as chancellor, we will see if his vision for UMass has the creativity to prevent cuts from crippling our campus.

No one is suggesting the way forward is easy, but Holub's tenure will ultimately be judged by his response to this economic environment.

At the moment, he is juggling many balls in the air at once; if the administration can find new sources of revenue, lobby more effectively for state funding and streamline the university's bureaucracy all while continuing to raise our academic profile, UMass' future will be brighter than most are willing to admit.

Unsigned editorials represent the majority opinion of The Massachusetts Daily Collegian editorial board

Turning 21 in the District of Columbia



Matthew M. Robare

Wednesday. My birthday had to be on a Wednesday.

It's not that I have anything against Wednesday, it's just that it's not the best day of the week. Right smack-dab in the middle, two days to go until the sweet weekend, you get Zeno's Paradox, where distance is continuously halved to infinity.

The Sunday before my birthday we had a huge storm that knocked out almost all the power in Prince George's County for three days, In July.

In Maryland. The temperature never got below 80 degrees and the humidity never got less than 90 percent. It wasn't pretty. I was ready to jump into any pool I could find, moose and all.

On top of that, my room was under siege all summer from a variety of insects, especially drugstore beetles. They wormed their way through windows and even the air conditioner and buzzed around, getting everywhere. On my clothes, in my bed, beneath my computer.

It was an invasion. I let two spiders stay with me, whom I named Jose and Clark. It was a beautiful thing to see such a tiny spider take on and beat an insect so much greater in size.

Thankfully, when my birthday arrived, power had been restored and I was in no danger of melting. I don't care if it is killing the planet – the person who invented air conditioning was a saint.

It was a pretty normal day and I was lulled into a false sense of security. Friends wrote birthday messages on my Facebook page.

I did my work pretty quickly and efficiently and was able to devote a lot of thought to what I would buy at the liquor store.

I had a very particular place in mind, too. Journalists are often stereotyped as being heavy drinkers and while I can neither confirm nor deny this assertion, it is a fact that there is a liquor store in the National Press Club building, so I decided to get my first (legal) alcohol there.

That's when the trouble started.

"No!" I screamed with the last of my strength and called down curses on the Washington Metropolitan Area Transit Authority (motto: "If you had a car you'd be home by now").

Getting to downtown D.C. from suburban Maryland required a short bus trip and changing trains just inside the city and constant stops to Metro Center, about three blocks from the White House. I reasoned that if I got off work at my usual time – 5 p.m. – I could get to the liquor store and back with time to spare.

Naturally, with about 20 minutes to go until quitting-time, my supervisor asked me to write a post for the blog I wrote a decent draft pretty quickly, but two hours of editing later, my boss decided the post didn't work and scrapped the whole thing. It was out like lightning.

According to the schedule I had already missed my usual bus, so I ran across the street to catch one going the opposite direction and watched the bus I thought I missed rush by blissfully unaware.

"No!" I screamed with the last of my strength and called down curses on the Washington Metropolitan Area Transit Authority (motto: "If you had a car, you'd be home by now").

An eternity later, I was finally on my way downtown.

By the time I got to the liquor store it was too late: When I got back to Maryland I would have to walk the three miles home. In the dark, with a dying phone, 90 degree heat and 90 percent humidity.

I got Kahlua and vodka for White Russians, ate some dinner in the only affordable restaurant I could find and had my first legal drink: a pint of Magic Hat.

The train ride back was brutal. They do weird things to the schedule because of baseball games, which meant that it was eleven o'clock by the time the train got to a station I could walk home from.

Sometimes I think back on that walk, the heat and the dark and winding streets of College Park; how much my legs hurt, so thirsty but needing to pee at the same time; how everything about that day had gone to Hell in a handbasket.

I wonder if it was worth it, if our culture attaches so much importance to the addictive, poisonous substance alcohol that young people like myself feel almost compelled to go through experiences like this to attain legal drunkenness.

I wonder why I didn't adjust my plans to fit the changed circumstances, why I didn't just take a deep breath and think. I realize that the truly horrible thing, which made the whole experience completely worthless and humiliating, was that there was no milk in downtown D.C. for a White Russian.

HARD WORK SHOULD BE REWARDED

Dear Editor,

The Green Street Café hired a young guy to work a few days a week carrying their sandwich board in Northampton. Bryan was eager to do a good job – his first after graduating. He took it seriously, enjoying interacting with people he met.

By greeting a lady who looked stressed getting out of her car, he made her smile, relax a bit and take a 10 percent off coupon.

This is the kind of person Bryan is – with a real interest in people, in helping those who need lifting up – and thinking how to help the people who hired him to advertise. Unfortunately, their attitudes changed, telling him they "might only be using him once in a while." They said they wanted "somebody better – who dressed better."

The next day, a businesswoman overheard him saying he'd nearly lost his job. She asked how to contact them. Bryan gave her a coupon, wondering if he'd done something wrong.

But at the end of his shift, they told him a business person had called to compliment him – plus a customer who said he was doing a great promotion job.

Not believing Bryan had nothing to do with either, they wondered if he'd "put them up to it."

Bryan worked only one more day – telling him they'd call "if they needed him anymore." It looks like they won't be any time soon. They've put another ad on Craigslist.

Presumably looking this time for someone who dresses better. They had little concern for supporting a young guy's effort and enthusiasm. Yes, the Green Street Café (and owners Jim and John) have made a mistake – in more ways than one.

Larry and Serena Newman, Northampton

LIBRARY KUDOS

Kudos and thanks should be bestowed on the Du Bois Library's computer staff, located in the basement.

My gratitude goes out to Dan and his staff who've helped me with a variety of computer-related problems and questions. When I wrote for the Collegian ('84 and '85') we were still using typewriters.

Now, somewhat behind the curve, I still go to the campus to use the library and the computer assist staff has always solved the unsolvable for me and the multitude of daily computer users there.

Money well spent.

Jack Bresnahan '85'

COPS SHOULD CRACK DOWN ON ZOO

Dear Editor,

When people think of the University of Massachusetts Amherst, they think of a party school. It is commonly referred to as "ZooMass" or "UMass Slamherst."

This is exactly what Amherst officials are trying to change. Even though UMass isn't on the top of the college party list, there is still plenty of drinking and parties.

A few weeks ago at the town's Select Board meeting they discussed strategies that they would use to help control the partying. This year police won't be as slack with all of the noise and partying that goes on. There will be fines handed out and harsher punishments, including arrests.

Some of the other things the Amherst police will be doing to help combat the partying are patrolling more for noise violations, looking for liquor and dispatching more bicycle cops to keep an eye out for parties.

When police respond to a noise violation they, don't go there with the intention to make an arrest. They would rather just have cooperation, so they can get on their way.

They lean towards issuing tickets and fines, and arrest people as a last resort. Arrests are a nuisance because it requires filling out lots of paperwork and it takes away from other things the police officer could be doing. With the new laws in place officials are hoping that partying and excess noise will be a little lower this year.

Carl Johnsen

WRONG ON MOSQUE

Dear Editor:

Eli Gottlieb's September 8, 2010 column, "Hate and Lies in Manhattan," makes such a mockery of sound opinion writing that one wonders if the author is bankrolled by the emergent "Sarah Palin Literacy Project."

Among myriad other intellectual monstrosities, Mr. Gottlieb hysterically compares "far-right" conservatives who oppose the building of a mosque at Ground Zero to Nazis: "brownshirts," according to the author; childishly urges those with whom he disagrees to "shut up and go away," and crudely fails to distinguish between the governmental repression of religion prohibited by the 1st Amendment and the private social and political efforts that are vigorously – and legally – opposing the mosque at Ground Zero.

Conservatives, including this writer, who oppose the construction of a ,mosque at Ground Zero do so because we question the motives of "developers" who publicly express a willingness to better-integrate Muslims into American society by building the mosque, yet ignore the fact that – according to a CNN opinion poll taken in mid-August – nearly 70 percent of Americans and 54 percent of Democrats oppose its construction at the site where Islamic murderers acting in the name of their religion killed nearly 3,000 Americans 9 years ago.

We oppose the mosque not out of a contempt for the First Amendment when it doesn't suit our political purposes – serious people are not urging government intervention to prohibit construction – but because Feisal Abdul Rauf, the Imam over whom Mr. Gottlieb slavishly fawns and takes at his word that he is in league with Christians and Jews, repeatedly refuses to condemn, and has apologized for, Hamas, a virulently anti-Semitic terrorist organization operating in Gaza, whose charter calls for the destruction of Israel by force.

As National Review writer and frequent Amherst College lecturer Andrew C. McCarthy has meticulously documented over the past three months, the "moderate Imam" and public face of "Park51" also has longstanding financial connections to the Muslim Brotherhood, which the Anti-Defamation League notes for its "extensive terrorist operations."

We oppose the Ground Zero mosque because it represents a needlessly intentional provocation, whose divisiveness has already overcome the reasons for which its supporters want it built in the first place. That is, the twin goals of improved Islamic integration into American society and increased Islamic community outreach would clearly be better-served by building a mosque and adjoining Islamic community center at a less-controversial, and less-revered, location.

In short, nearly 7 out of 10 Americans oppose a mosque – swimming pool or not – at Ground Zero because it is a haltingly bad idea.

Like most bad ideas, this one is supported by a name-calling, straw-man-conquering segment of liberals. But with the likes of Mr. Gottlieb inarticulately doing the name-calling, I have little concern that public opinion will change any time soon. Let's hope, however, that the quality of Mr. Gottlieb's writing does.

Brad S. DeFlumeri Jr 10'

Teams to fight under the lights in CAA clash

UMASS from page 10

more scores in the fourth with a 10-yard run by sophomore tailback Sam Auffant and an 85-yard punt return by senior wide receiver Freddie Santana.

Taggart is taking over for former signal-caller Dominic Randolph, who broke the all-time Holy Cross and Patriot League records for career passing yards. The Amelia, Ohio native became the first quarterback in conference history with over 10,000 passing yards, completing 857 of 1,357 passes for 10,093 yards and 85 touchdowns in his career.

"He looked very good, he looked like he's been playing for years," Morris said of Taggart. "Similar to [William & Mary's Mike Callahan], he doesn't have a lot of reps, but a kid that understands the system. They haven't changed the offense that [Randolph] had a great career with so it's not like, 'Hey, this kid can't do what Randolph did.' The Taggart kid came in and did a great job in game one and looked like he's ready to take up where Randolph left off."

In the 48 meetings between Holy Cross and UMass, the Minutemen lead the all-time series, 22-21-5. UMass, however, has won the last seven contests with the most recent victory for the Crusaders coming on Sept. 14, 1991.

The last matchup between the two programs came two years ago and resulted in a shootout in Worcester. UMass edged out Holy Cross, 45-42, in a 14-point comeback win on the strength of an Arinando Cuko 42-yard field goal as time expired. Quarterback Liam Coen led the Minutemen attack, throwing for 395 yards on 25-for-36 passing and three touchdowns, while tailback Tony Nelson scored twice on the ground.

Morris isn't predicting another high-scoring affair but said that the game pace would dictate the offensive play calling. Last week, UMass leaned on the running game as tailbacks Jonathan Hernandez and John Griffin combined for over 200 rushing yards and three touchdowns.

Holy Cross marks the only game for the Minutemen this season in which they play under the lights at home.

"I think it's kind of nasty," Morris said. "That's why we got the turf, we've got the lights and we play at night. This is our one 6 p.m. start so hopefully the fans will come out and support the guys after a great game one. The night game against an in-state rival, it should be a great atmosphere."

Jay Asser can be reached at jasser@student.umass.edu.

The Minutemen have benfitted from senior Kyle Havens second year in the UMass system. The team has rallied around him as their leader, even with the departures of Victor Cruz and Jermey Horne to the NFL.

Redshirt freshman Mike Lee looks to make a play against the Tribe offense Saturday. The Minutemen host Holy Cross on Saturday for a 6 p.m. start time at McGuirk Stadium.

In second season under center, Havens focused on being leader

HAVENS from page 10

to graduation and saw its head coach, Don Brown, leave to become the defensive coordinator at Maryland. Don Brown left the Minutemen after coaching them to a 43-19 record from 2004-08, the most successful five-year stint in school history.

Meanwhile, Havens threw for over 300 yards a game with Diablo Valley in Pleasant Hill, Calif., where he earned national recognition.

Havens finished his two-year career with 3,017 yards and 27 touchdowns at DV. He earned NorCal All-Conference Second Team honors and Gridwire Academic All American honors while being rated the 18th-best junior college quarterback in the nation by Scout.com, attracting interest of then-Minutemen offensive coordinator Kevin Morris.

Morris, who worked on Brown's staff since 2000 as the offensive coordinator and quarterbacks coach at Northeastern, took over as his successor. In his first test as head coach, he recruited Havens to battle for the elusive starting quarterback position.

Thrust into a competition with three other players, Havens chose to wear the same-numbered jersey as his predecessor, No. 12.

The current signal-caller beat out Spencer Whipple and Octavius Hawkins, both of whom have now transferred, and Woodward to earn his place under center.

After a shaky game in his first start, Havens played well in his next four games, completing 64 percent of his passes for 1,147 yards and six touchdowns. He had a breakout performance on Sept. 19 against Rhode Island, when he threw for 329 yards on 22-for-30 passing with two touchdowns. That performance earned him Colonial Athletic Association Offensive Player of the Week and New England Golden Helmet honors.

After a full offseason to get acclimated to the offense, Havens hopes to experience improved results on the field in 2010.

"This is the first time since high school that I have two consecutive years in one offense and it's just night and day," Havens said. "The whole game slows down for me. I understand what I'm doing and what everyone else is doing.

"It's not so much the level of play. My understanding of defensive concepts, knowing where everyone is supposed to be or wants to be on the field, being able to watch film and work with the coaches."

Key departures at wide receiver make way for a fresh group of receivers whom Havens will look to throw to: Victor Cruz and Jeremy Horne, his No. 1 and No. 2 options from a year ago have graduated as well as starting tailback Tony Nelson.

The Minutemen are much younger this season and will look to veterans for guidance and leadership in the coming year.

Free from any distraction as a new quarterback in a new system, Morris already sees improvement in Havens.

"Kyle is our quarterback. It's his team," Morris said. "He's got to mature and grow. He's a different kid coming in this fall, when he was in the shadow of Liam Coen and a new team. Now it's his squad and the players are performing well around him."

Minutemen, Minutewomen compete in BC Invitational

BEN LAMBERT
COLLEGIAN STAFF

The Massachusetts cross-country team will be back in action this week when it travels to the Boston College Invitational in Chestnut Hill, Mass. There, the team will face off against BC, Rhode Island, Albany, Boston University and New Hampshire. This will be the first year that the Minutewomen will also compete in the invitational.

Sophomore Jillian King leads the Eagles, and had a seventh-place finish at the NCAA Regional Championships. King consistently paced BC last year, finishing as their top runner in four of their eight competitions. She is joined by her sister, senior Caroline King, who was the lead runner in two events, including last year's UMass Invitational. Fellow sophomores Allison Stasiuk and Elizabeth Hynes both finished in first place for BC in one event apiece.

The Rams finished in 12th place at the A-10 Championships last season and return their best competitors from last season. The star performer for Rhode Island is sophomore Niamh Ryan. Ryan was a two-time A-10 Rookie of the Week selection last season. Other notable runners for the Rams include senior Mary Najarian and Caitrin Demchko, who both finished respectively in several races last year.

Albany was the fifth-ranked team in the America East conference last year and was ranked sixth in the preseason poll released last month by the America East coaches. They are paced by Ada Lauterbach, who finished first for Albany in all but one race last season. At the Monmouth XC Kick-Off held on Sept. 4, she finished fourth. Albany's top finisher in that race was Kathryn Fanning who finished second overall.

Boston University was picked fourth in the America East preseason poll this year. They received one first-place vote in the poll. Last year, the team finished 21st in the NCAA Regional Championships. Katie Matthews is the top runner for the Terriers, finishing eighth in the American East Championships and 34th at the regional championships.

New Hampshire is the most decorated of the teams in this competition. They are ranked 10th overall by the U.S. Track & Field and Cross Country Coaches Association in the Northeast region. They were also picked second in the America East preseason poll, finishing 11th at the NCAA Northeast Regionals last year.

This is stiff competition for the Minutewomen, but redshirt senior Shiyi Zan will lead UMass into competition. She was named to both Academic All-District and Academic All-Conference teams before this upcoming season. She placed in each of the five races that UMass competed in last year and was the team's second-place finisher four times. She is also co-captain of the team.

The men's team begins its season on Sept. 18, with a meet in Amherst, at which the Minutewomen will also compete.

MAWILL SPARK/COLLEGIAN

In his second season, Terrell Vinson will be a vital part for the Minutemen against teams like UCF and BC.

2009-'10 schedule released, UMass to play 21 games within 90 mile radius

By Adam Miller
Collegian Staff

Last season, the Massachusetts men's basketball team gained the experience of playing a competitive schedule against some of the nation's top teams. If there's anything UMass coach Derek Kellogg learned from those games, it's that his team still has some work to do before it can compete with some of the teams from last year's schedule. The Minutemen labored through their rigorous non-conference slate through most of last year, with the exception of their buzzer-beating one-point win against Memphis at TD Garden.

This season, the focus for UMass' schedule is more about exposing itself to fans around the area than getting national attention. It will play 21 games within 90 miles of Amherst and will play teams from across the state.

However, this year should feature some familiar teams during the Hall of Fame Tip-Off Tournament in Springfield, Mass.

Kellogg and Co. will begin the tournament at home with games against Rider on Nov. 12 and Sacred Heart on Nov. 17.

On Nov. 20, the Minutemen will then square off against New Mexico State, who nearly defeated Michigan State in the NCAA tournament while Southern California will play Bradley. The winners will play in the championship game while the losers will play a consolation game on Nov. 21.

UMass will play another game at the Garden against cross-state rival Boston College on Dec. 4. The Battle of the Commonwealth previously alternated between the Mullins Center and the Conte Forum.

The Minutemen will be the beneficiary of two home-and-home deals with Seton Hall (Dec. 11) and Central Florida (Dec. 22).

UMass' last game of 2010 is going to be at home against Boston University. The Minutemen faced the Terriers last year during a closed-door scrimmage at the beginning of last season.

UMass' Atlantic 10 play kicks off on Jan. 9 at home against Dayton. After a road game against Xavier on Jan. 12, the Maroon and White play at the MassMutual Center in Springfield against La Salle.

The Minutemen get a rematch against Richmond, who beat them in the A-10 quarterfinals at home, on Jan. 22.

From there, UMass will hit the road to New York to face St. Bonaventure before returning home for a rematch of the last regular season game against Rhode Island on Jan. 30. The last time the two teams met, former standout guard Ricky Harris hit a last-second shot to put the Minutemen in the A-10 tournament.

The team eventually heads to URI three weeks later after a four-game stretch, which features Rick Majerus's Saint Louis squad (Feb. 2), which was nearly good enough to make the NCAA tournament had inexperience not gotten in their way.

SLU will look to be more of a serious threat this season, with a year of additional experience.

The final game at the Mullins Center will be against Temple (March 2), who should once again contend for the A-10 title. The regular season will conclude March 5 when UMass takes a trip to the Bronx to face Fordham.

The Rams went 0-16 in A-10 play, but now have a new coach in Tom Pecora.

The A-10 tournament starts March 8, where the Minutemen hope to build on their performance from last year. The First Round winners will qualify to play in Atlantic City, N.J.

Adam Miller can be reached at amiller@dailycollegian.com.

MAWILL SPARK/COLLEGIAN

With the departure of senior guard Ricky Harris (right), guard Gary Correia will look to be a veteran presence this season. The Minutemen play 21 games within a 90 mile radius, including matchups against BC at TD Garden and La Salle at the MassMutual Center in Springfield.

Crusaders cruise into Amherst

After big win, No.18 UM hosts HC Sat.

By Jay Asser
Collegian Staff

Coming off an impressive come-from-behind victory in its opening game, the Massachusetts football team hosts Holy Cross at McGuirk Stadium on Saturday night before its ballyhooed trip to Ann Arbor to face storied Michigan.

Though fans may be looking ahead to next week, UMass coach Kevin Morris hasn't had any difficulty keeping his players' attention on the Crusaders.

"These guys are totally focused on Holy Cross," Morris said. "There's no one in our locker room talking about Michigan yet or anything like that. Everybody was certainly interested in the Michigan-UConn score, maybe because it's a local team in UConn so I would have been interested in that score anyways. We know [Michigan] is on our schedule, we're not talking about Michigan at all but it was interesting to look at the score."

In its first game, the Crusaders (1-0) routed Howard, 38-7, behind seniors Ryan Taggart and Bill Edger. Taggart made the first start of his collegiate career and completed 17 of 29 passes for 186 yards and three touchdowns, while Edger caught seven of those passes for 124 yards and two touchdowns. After leading 24-0 in the third quarter, the Crusaders tacked on two

SAMANTHA WEBBER/COLLEGIAN

Quarterback Kyle Havens gets a call from the sidelines during Saturday's game. Havens feels he has a better grasp on the offense.

Havens feeling more confident this season

By Dan Gigliotti
Collegian Staff

Kyle Havens left the comfortable weather of the Golden State to play football in a new climate. As a junior quarterback, he transferred to play for the Massachusetts football team and battled for a starting role amidst a team seeing its complexion change with a new season.

A full year later, Havens has gained the trust of his teammates and feels a renewed confidence in his ability to run the offense and lead the Minutemen to victory.

"I feel a lot more confident in [my play]," Havens said. "I know the guys are more confident in me. We're ready to go out and show everybody what we've got this season."

The junior college transfer from Concord, Calif. challenged then-senior quarterback Scott Woodward for the starting role while attempting to replace one of the most productive quarterbacks to ever put on a Maroon and White uniform.

UMass quarterback Liam Coen broke almost every career passing record in the Minutemen history book in 2008. Coen was an All-American and graduated amongst the top 15 in yards and completions in Football Championship Subdivision history.

A year later, UMass lost Coen

See HAVENS on page 7

Restructuring of conferences might affect teams' CAA future

Adam Miller

If you've been following the conference shifts in college football this offseason, you might be a little confused by the names of the conferences, which once upon a time meant something other than being part of a money-making machine.

In 2011, the Big Ten will have 12 teams. Same goes for the Pacific-10. Meanwhile, the Big 12 will have 10 teams. Raise your hand if any of this makes sense.

Then, Texas negotiated the rights to its own TV network in exchange for staying in the Big 12, which will certainly be an interesting recruiting tool in the near future. While the Big 12 has a new sense of prosperity, the Colonial Athletic Association is just one example of Football Championship Subdivision conferences struggling with the economic recession.

Northeastern and Hofstra dropped their football programs while Rhode Island almost pulled its football-only membership from the CAA.

The move would have hurt Massachusetts significantly, as its only options for New England opponents would have been Maine and New Hampshire.

Under that possibility, UMass would've certainly had to entertain the idea of moving conferences, likely to a less competitive Northeast Conference.

During media day, UMass coach Kevin Morris wasn't concerned about the changes within the CAA, and for now he doesn't have to.

Rhode Island is staying for another year while the CAA added Georgia State's football program this year and will also add Old Dominion next year. Although neither of those schools are in the Northeast, the additions at least ensures that the CAA isn't going to collapse, or at least fall below 10 teams.

If the drama did anything to help the Minutemen, it gave them more leadership and a stronger incoming class.

The most obvious benefit is the addition of running back John Griffin. The senior was an All-CAA First Team selection and rushed for 1,009 yards on 207 carries for the Huskies. If he's not the starter, he will likely split time with redshirt junior Jonathan Hernandez, who is already proven as a solid option.

As talented as Hernandez is, he will have a hard time making a case as to why he should play more than Griffin, who is already receiving praise for what he brings to UMass.

"How often are you able to get a senior to come into the program, who is a first team all-league back in your own league? He brings all that experience, that leadership and he's very professional about how he goes about his business," Morris said.

Griffin wasn't the only senior to join the team. Redshirt senior Greg Niland will join his fellow Husky on the team and will have the duty of replacing former left tackle Vladimir Ducasse, a second-round pick by the New York Jets, on the offensive line.

Morris, looking for more experience to add to his relatively young receiving corps, plucked wide receiver Anthony Nelson, who should be used as a target often this season, away from the Pride.

Facing a shortage of seniors, the Minutemen needed all the upperclassmen they could get and Morris used that dilemma to entice the older players with playing time and a leadership role.

"Part of our recruiting pitch was just that," Morris said of his efforts to bring in experienced transfers. "We have a very small senior class and like I mentioned, we're going to be a young team. So with [Griffin, Niland and Nelson] coming in, those are the guys we targeted in the recruiting process when those programs fell through."

Morris isn't one known for being outspoken in his short tenure as a head coach, and would never publicly admit anything but disappointment about losing Northeastern and Hofstra.

Privately, however, he has every reason to feel that the misfortune of two schools might be the best thing to happen to his program in the past year.

While UMass will have to get used to longer bus rides than it needed in the past, it can at least take comfort in the fact that the CAA isn't going anywhere and neither is the program.

Morris also gets the satisfaction in knowing that he can count on some of his newcomers to contribute right away because of their previous experience.

And in case any other teams plan on folding anytime soon, former UMass receiver Victor Cruz did plenty in his first exhibition game with the New York Giants to put his school on the map, so Morris will be ready to take calls if the opportunity comes again.

The Minutemen did more than survive a financial bullet; they became winners of an economic situation that was meant to cripple the CAA. No, UMass does not get its own television station by staying in the conference. It just promises itself the right to play against the best in the FCS every year.

Adam Miller is a Collegian columnist. He can be reached at amiller@dailycollegian.com.

HANNAH COHEN/COLLEGIAN

The Minutemen run onto the field during Saturday's season opener against William & Mary. With the restructuring of many football conferences, UMass could potentially depart the CAA.

MAXWELL STARR/COLLEGIAN

Senior Makaela Potts looks to score against an opponent last season. Coach Justine Sowry will rely on Potts to lead a young Minutewomen squad down the stretch of the season this year.

Finishing 2010 schedule strong vital for Sowry, Minutewomen

By Adam Miller
Collegian Staff

(This article was originally published Sept. 5 on Dailycollegian.com).

The Massachuseits field hockey team can start the 2010 season knowing that how it finishes will be much more important than how it starts. That sentiment holds much truth, and in great part thanks to the structure of this season's field hockey schedule.

UMass will play 12 of its 19 games against non-conference opponents in 2010. If it seems like the non-conference schedule is a little heavy, it doesn't compare to last year's slateagenda,, when 15 out of 21 teams the Minutewomen played were not in the Atlantic 10.

The schedule's imbalance sets up an odd situation where UMass can mathematically reach the NCAA tournament with a losing record, something unheard of in any other sport besides field hockey.

In a disastrous scenario for the NCAA, the Minutewomen could go winless during the first part of the regular season, still finish the A-10 schedule with a 4-3 record, win the conference championship and earn a tournament berth with a 6-15 season.

"We're trying to keep [our tough non-conference schedule] in perspective, and our focus is on the A-10 ... If the players get too wrapped up with the wins and losses, then we have to get in touch with what we're here for and what we're trying to build towards," UMass coach Justine Sowry said.

The conference schedule is much more important in field hockey than it is in bigger sports because only 16 teams qualify for the NCAA tournament and the A-10 isn't strong enough to have any at-large bids.

The Maroon and White will play six NCAA tournament teams during its non-conference schedule. Besides being good preparation for the A-10 schedule, the out of conference matches don't affect UMass' chances of advancing in the postseason through the conference, win or lose.

So, why even keep score?

Even a better question, why so many non-conference games?

The NCAA schedule allows for teams to play everyone in their conference once.

The only problem is that since there are only 79 field hockey teams in the nation, the conferences are very small. The biggest conference is the Colonial Athletic Association with nine teams while the rest go as low as six teams.

"It's just the way it's been and a lot of conferences are like that," Sowry said of the current format. "It is what it is, and we deal with that."

The way the schedule is set up now, the bigger conferences are the only ones benefiting. The Atlantic Coast Conference has been sending five of its six teams to the NCAA tournament over the last few years.

Boston College is one school that can thank the current system for allowing it to advance past the ACC tournament as its 1-4 conference record is overshadowed by a No. 14 RPI and a 12-3 non-conference record.

And yet BC gets to make the 16-team field just because of the conference it plays in.

The NCAA schedules every sport so that at least half the games are against conference opponents, and there's no reason why the same shouldn't be true for field hockey.

There are three ways to fix the problem. The NCAA can either shorten the regular season, allow conferences to have a certain number of home-and-home games against opponents in the same league or make the conferences bigger.

The most practical solution is to switch out two or three non-conference games for more A-10 games so it fills about half the schedule. One of the ways it can happen is to make those extra games part of a home-and-home series.

Having to play teams like Richmond or La Salle twice seems to be more meaningful than a game against American, a team UMass probably won't play unless they get paired up in the NCAA tournament.

Teams in other sports go into a non-conference schedule with one of two goals in mind: either to beat up on smaller schools and inflate their winning percentage, or play the toughest teams possible in hopes of raising their RPIs.

The Minutewomen are trying to do their part in making the A-10 worthy of being a two-bid conference by playing a tough national schedule and consistently earning itself a high RPI. However, the rest of their league doesn't have the coaching pedigree of Sowry or the ability to build an elite program.

The A-10 simply is not a powerhouse when it comes to field hockey at the moment, and it will have to live with only one bid to the NCAA tournament for the time being.

While Sowry believes that having so many non-conference opponents in her team's schedule allows adequate preparation for the A-10 schedule, you know there's something wrong with a sport when more than half the games carry the same meaning as friendlies in World Cup soccer or four exhibition games in football.

New hires, duties added for administrative staff

By Cameron Ford
Collegian Staff

In the wake of the departure of former Executive Vice Chancellor Tom Milligan, the University of Massachusetts is restructuring its administration to focus more on external relations and information technology.

According to Chancellor Robert Holub, Milligan had been an instrumental figure in the external relations department.

"When I came here, I hired somebody named Tom Milligan to do University Relations for the campus," said Holub during an interview. "And he put together a staff and put together an office of University Relations in which [they] focused on the kinds of messages we wanted to get out and the kind of marketing we wanted to do and the kind of branding that we wanted to do. And I think that was very successful."

External relations is key to many important functions for U Mass, such as drawing in out-of-state students, building a better and broader reputation, and developing partnerships with high schools and other institutes of higher learning.

However, Milligan left U Mass over the summer to take up a position as vice president for external relations at Colorado State University. Holub attributes Milligan's departure to family matters.

"This was due to personal family things," said Holub. "He actually came from Colorado, and his wife's family is from Colorado and it was basically a move back to family he has out there."

Now, with Milligan gone, a shifting of duties and positions is taking place in the U Mass administration to fill the gaps left by Milligan.

For one, Chief Information Officer (CIO) John Dubach, who served as Holub's CIO and special assistant in addition to covering several administrative duties, will now focus on his lead information role.

Dubach said of the administrative restructuring that he was glad to be focusing more on his work with the Office of Information Technologies (OIT).

"I have felt for some time concern that I was not able to give the IT side sufficient attention; though I have to say that the excellent performance of the Associate CIO and the Directors in OIT and of CESD have allowed me to ease that concern, so I am looking forward to devoting more time to that mix of my duties," said Dubach.

"I also look forward to continuing to serve the Chancellor's Office in what I will continue to do there," he added.

Dubach's current duties as CIO include overseeing OIT and the Center for Educational Software Development (CESD), as well as providing further oversight for IT policies and security, coordinating other IT operations, and, according to Holub, will also be handling the budget for his office.

Dubach also said he had some objectives for OIT he would like to see achieved now that he can devote more time to these duties.

"There are many infrastructure, policy, security, etc. activities and needs that are ongoing issues for a CIO," he said. "But if I were to identify one initiative that I would hope to concentrate on in the coming year, it would be in the area of academic infrastructure [and] instructional technology."

"Specifically, we have hopes to build a modern academic classroom building sometime soon; planning for the technology to be included in that building will be critical to its success," continued Dubach. "More generally, working on increasing the availability of IT for faculty to use in instruction."

To replace Milligan's position, Chancellor Holub has hired former colleague Todd Diacon, an administrator and historian at the University of Tennessee Knoxville.

"[Diacon] is someone who knows a lot about academic administration, he's someone who will investigate the best practices in the country and try to figure out how that fits in at this institution," said Holub.

According to Holub, he and Diacon became acquainted during Holub's time serving as provost at Tennessee, when he hired Diacon to serve as his vice provost.

During a Thursday morning interview, Diacon said he is enjoying his time at UMass so far.

"I just think it's a great place," he said. "There's just such a vibrant energy at the University. It seems on the cutting edge of so many things, both in terms of student success and in terms of research. I'm just very impressed by the vibrancy of the university."

"As deputy chancellor, one of my jobs is to guide university relations with the town of Amherst and the region," he went on. "And to some extent that also involves relations at the University of Massachusetts Amherst and the state as a whole. I'm in charge of a community college initiative that we're launching to increase the transfer of community college graduates to UMass Amherst."

Diacon certainly didn't take up this position empty-handed. When asked about objectives or goals he has in mind, he said that he would like to boost the University's academic reputation.

"Outside of New England, the University of Massachusetts has a terrific reputation," he said. "So if you're in the South, if you're in the state of Tennessee as I was, UMass Amherst has a fantastic reputation. And I want that reputation that's out there nationally to be recognized regionally."

DAILYCOLLEGIAN.COM HAS A NEW MULTIMEDIA SECTION!

Already we have produced:
- a video feature on the marching band
- a campus perspectives survey about construction during the school year
- a look at the textbook annex rental program
- and a highlight reel of UMass football's victory against William & Mary.

We are excited to produce web-only content every week for our site in the form of:

- **breaking news updates**
- **videos**
- **podcasts**
- **blogs**
- **photo slideshows**
- **maps**
- **useful links**
- **and news round-ups**

If you are interested in working for us, please email multimedia@dailycollegian.com.

We are looking for videographers, photographers, bloggers, and web-based reporters who are seeking to becoming involved with a growing news website.

Campus Center Red Cross drive draws blood, donors of all ages

By Caroline Bagby
Collegian Correspondent

Chairs are lined up and people are scattered, waiting their turn in the basement hallway of the Campus Center at the University of Massachusetts. Inside one of the conference rooms, seven medical beds are arranged in a rectangle, each occupied by a person with blood flowing from the needle injected in their arm to the bag placed below them. The American Red Cross is at UMass and blood donations are in progress.

A bag of blood, equivalent to one pint, can save three people, according to medical director of the American Red Cross Massachusetts division, Dr. Jorge Rios. Because science has found no artificial blood source, people depend on donated blood for transfusions, the process by which blood is transported from one body to another. Blood transfusions are most commonly performed for people in traumatic car accidents, undergoing surgery, and chemotherapy patients, according to Rios. Hospitals have blood banks, where donated blood is stored according to blood type. Three components, red cells, platelets, and plasma, are extracted from one bag of blood and are stored in the blood banks. The highest demand is for red cells, stored between 34-43 degrees Fahrenheit for up to 42 days, which are usually transfused at the same time as plasma, stored frozen at zero degrees Fahrenheit for up to one year. Platelets have the shortest lifeline stored at room temperature for up to five days. After the blood has passed its usable time, the blood is thrown out because, "like milk in the refrigerator, sometimes it gets stale," said Rios.

Approximately one-third of blood donations come from students, according to Red Cross registered nurse Ann Duncan. Prior to a blood donation, a screening process takes place, where donors are asked a series of questions about travel, weight and history of illness.

Marta Maietta, a junior, has been giving blood every 56 days since she was 17, she said. Twice she has been unable to donate because of her blood's low level of hemoglobin, the oxygen-carrying component of red blood cells.

"My mom and sister are anemic and my iron usually runs a little low, but by taking iron the night before and day of, I usually manage to stay above 12.5," she said.

People below a 12.5 reading of hemoglobin, commonly called iron, are not permitted to donate blood because the Red Cross seeks to avoid causing patients to become anemic.

To test hemoglobin levels, donors are given a finger prick during the screening session, said Rios. Once the blood sample is collected, it is put into a small machine called the HemoCue. In about a minute, the HemoCue delivers the hemoglobin levels.

Another instance where one couldn't give blood is if the donor weighs less than 110 pounds, or if they do not meet a certain weight criteria when they are 18 or younger, said Rios.

Sophomore Elaine Borenstein, 19, was not able to donate at the April 12th blood drive because she was 18 and did not meet specific weight requirements, she said. Each time a person donates, 15 percent of their blood is taken from them, and with a person under a certain weight, the blood donation runs the risk of taking too much blood from that person, said Rios.

Aides take blood pressure readings during screenings to determine if there is enough "energy from the heart" to accompany the blood flow, said Rios. With a normal blood pressure, donating takes between four and 14 minutes, whether it's someone's first or tenth time. After giving the blood, the donor goes to the recuperation table to hydrate and eat something to keep them from feeling faint. About six to eight weeks later, the donor's body will have replaced all of the blood donated, said Rios.

Symptoms from giving blood vary person to person.

Junior Nathalie Fadel fainted after her first time donating, but every time since has been a "positive experience," she said.

Dan Burke, a junior, received a seven-inch bruise when he was donating his freshman year of college, after the blood stopped flowing in his arm and the needle had to be adjusted, he said. Sergeant Dave Black of the UMPD donates blood four to five times per year, and said has been doing so since high school.

45 percent of the United States population has the universal donor blood type O, according to Rios. In case of emergencies, type O blood is given to patients until their specific blood type can be determined. In many cases, two blood bags are needed to replace the blood a patient has lost. A typical transfusion is ordered by a doctor and administered by a nurse, with the procedure lasting from two to four hours, said Rios. The Red Cross does not have an upper age limit on giving blood. A donor must be 17 years old without parental consent to give blood, and may donate at 16 years old with parental consent. "Blood is always needed," Rios said. "You never know what disaster may happen next."

A Constitutional brouhaha over privacy

Catherine Whelan

If you're a college student and you lived with your parents for the summer, you're probably intimately familiar with the concept of privacy.

Whether your mother joined Facebook to troll through your photos, or she dropped off some laundry in your room and uncovered your stash of (shall we say) Girl Scout cookies, you have a sense of both the unfettered freedom of dorm life, and the somewhat more complicated judicial process of home.

For example, upon finding compromising photos, what course of action is she allowed to take? Must she appeal to your father before grounding you? Or are they by simple right of point and shoot, your's to post and distribute as you like? The answer to this question is usually complicated by a list of factors, the least of which includes the mood of the mother in question.

Although our justice system employs a slightly more consistent and potentially more organized process, many of the same questions get raised and what constitutes a search is continually evolving to address new technological and social frontiers.

It's the Courts' challenge to reconcile Constitutional language with the modern world in all of its tweeted glory. As we willingly (nay, gleefully) post tidbits, snippets and the occasional complete sentence to Facebook, we shed privacy in favor of notoriety perceived or otherwise. Facebook has just added a locator application that allows users and their "friends" to post information about their locations online.

After 24 hours, I changed my privacy settings. Too far is too far.

In that vein, The DC Circuit Court of Appeals has just changed everyone's privacy settings. On August 6, the Court held that the long-term use of a Global Positioning System device to track the location of a car on public road qualifies as a search under the terms of the Fourth Amendment.

Not flashy, but significant. For those of you who don't carry a pocket sized copy of the Constitution or haven't met the business end of a search warrant, the Fourth Amendment requires the government to have "probable cause" before they can search your person, house, papers, or effects. The courts are left with the interpretive duty of both consulting to determine what constitutes probably cause, and throwing out evidence they believe was obtained without it.

It likely means another appeal and more hearings about what privacy means. Each generation seems to grapple with a new Constitutional issue – the role of government, civil rights or the draft. For us, it's privacy.

According to court documents, in a bid to nail Antoine Jones, a part time nightclub owner and allegedly full time drug dealer, the Federal Bureau of Investigation planted a GPS device on a car while it was on private property, and then used the system to track the position of the automobile every ten seconds for a month. While it's likely they were acting on more than a whim, the FBI never got a warrant to do so. A whole platoon of lawyers was called into the fray.

Having climbed the ladder of appeals, the case reached the DC Circuit, which ruled that the information obtained from the device be thrown out because the act constituted a search without cause.

The ruling is potentially revolutionary because it introduces a new interpretive theory of the Fourth Amendment. It essentially allows individual law enforcement practices, which are not in themselves searches, to collectively amount to a search.

Libertarians, "Nineteen Eighty-four" fans and potential criminals alike are rejoicing and their rationale is compelling. For one, systematic use of GPS tracking opens the door for the government to continuously track anyone's location without ever having to prove the surveillance is justified. But in law, like in parental disputes, we look to precedent (sibling or otherwise).

In the 1983 Supreme Court case US v. Knotts, the court held that "a person traveling in an automobile on public thoroughfares has no reasonable expectation of privacy in his movements from one place to another." By traveling on public streets, the court decided, a person is voluntarily conveying his or her location.

While the premise is shoddy (would I still be willing to "convey my location" if I knew it was being monitored?), the legal argument is solid. In fact in the last 10 years, three other Federal courts have allowed this kind of GPS monitoring, so the DC Court ruling is a significant break from tradition.

It likely means another appeal and more hearings about what privacy means. Each generation seems to grapple with a new Constitutional issue - the role of government, civil rights or the draft. For us, it's privacy.

Be it internet use (Google has pulled out of China rather than fork over search information), medical records and genetic tests (the federal health record privacy act, HIPAA, has serious loopholes), wiretapping potential terrorists, or gay marriage, we're in for a lot of complicated questions. We face the indelible challenge of enjoying a small world after all, without losing our rights in the process.

And what are our rights? The Constitution does not explicitly guarantee a right to privacy.

The Third Amendment says the government can't force soldiers into our homes. The Fifth allows us protection against self-incrimination and the Fourth provides us protection against unreasonable searches, but a right to privacy isn't inherent.

Countless legal scholars and judges note that surely (surely!) the right to privacy lives in those amendments and in the American way of life. But it's still complicated.

For every inane status update, there is an anonymous blogger. For every drug dealer being tracked, there is a Facebook user posting hourly updates on their location.

Are we as open and voyeuristic as our Facebook pages would suggest or as masked as our avatars and blog comments seem to indicate? Who are we? And do we care if Big Brother is watching? Or did we invite him over in the first place?

Please send in your thoughts on privacy, search warrants, and Facebook.

THE S.P. SULLIVAN MEMORIAL PRIZE FOR HAIKU WRITING

E-mail us your haikus!

The winner each week will be published and receive a prize.

A haiku is an old form of poetry from Japan, originating from around the 17th century.

In English, haikus have usually been 17 syllables on three lines – five, seven and five.

S.P. Sullivan, former Collegian Managing Editor, was a major proponent of the haiku ... So in his honor Ed/Op presents a

Point-Counter-Point

I disapprove of what you say, but I will defend to the death your right to say it." – Evelyn Beatrice Hall

Is it worth the price of admission?

College can be a waste

Shane Cronin

Despite gains made by the Dow Jones and other indices over the last year, the economy is in the dumps, leaving today's college graduates without living-wage jobs and barring them from America's once vibrant middle-class. Demand for college grads is low and even lower for the skills in which they concentrated (i.e. the dithering humanities). Let's face it folks; it's no secret that a BA is BS these days.

Traditional undergraduate degrees are obsolete. Journalism majors have no place to go. Print media, which used to provide lucrative careers, is walking the tightrope above extinction.

Newspapers and magazines can't furlough, pay-cut, buyout, and layoff staff fast enough to keep up with declining circulation and revenue. The way in which information is delivered and received has moved from ink to the internet, leaving scores of personnel at every outlet.

Even the formerly august New York Times isn't hiring any fresh fedoras out of America's socialist journalism departments - no matter how bright and shiny the "Obama 2012" pins sticking out of them are.

It is the plumber and other skilled tradespeople who are doing very well in certain areas of the country. (Yuppies, hipsters, and urbanites, take note) A 2008 Time article reported that in large cities such as New York, Los Angeles, and Boston, self-employed plumbers can earn up to $250,000 annually.

In Cincinnati, the article continues, master plumbers with several years of experience can make upward of $100,000 per year. Interestingly, Ohio was one of the recession's most critically wounded victims. Apprentices earn considerably less (roughly $45,000). However, at $23 an hour, that still bests your recently graduated local barista with an expensive haircut and not even a whisper of a career prospect on the horizon.

Today, college is a buyer's market.

Prospective students are lured by how much there is to do on campus rather than how much there is to learn,by how many bars, clubs, cafes and social events are planned during the academic year. A July study released by the Delta Cost Project reports undergrads spend thirteen hours less per week in class and studying than their counterparts in the early 1960s. Universities today allocate much more of their budgets to recreational activities and administration rather than instruction. To be fair, what university can't use another deputy-assistant-vice-chancellor at 150 grand?

In addition to waning classroom time, according to a 2006 Associated Press report more than half of students enrolled in four year colleges in the U.S. lack "complex" reading comprehension skills. These include having difficulty analyzing editorial content in newspapers (are you following me?), understanding credit card offers, and calculating the tip at restaurants. Fortunately, the AP notes, most students are able to identify locations on maps. Imagine paying the $50,000 per year price tag at Boston University, Boston College, or Babson (none of which are top tier) without a guarantee of being a proficient reader upon graduation?

Furthermore, endowments have withered in recent years. Consequently, in order to maintain profitability, colleges are changing their business models. For example, the University of Massachusetts campus "revamped" most general education courses by making them four instead of three credits. Beginning this semester incoming classes will be required to complete only ten as opposed to thirteen gen-eds. In an effort to justify the change, the university says these classes will be more rigorous. I'll let you know after a few weeks in my science class, which has been affected by the new system. According to the professor, additional quizzes and readings will be assigned. However, there will be no supplemental "face time" or class time.

In reality, the move is a shrewd cost-cutting, revenue-generating maneuver. It will allow the University to accept more freshman (the most profitable class from a business perspective) without hiring more professors. Average class size will not decrease, which means attending lectures will still feel like being at a small concert. Furthermore, in order to execute the plan, the University of Massachusetts Faculty Senate created two bureaucracies: The General Education Task Force and the General Education Revision and Implementation Committee. How much of a stipend did it take those paper pushers to sign on to that scam? The bottom line: your college degree has suffered another blow.

Support for our current administration is generally high on most college campuses.

Ironically, President Obama's inability to affect a positive change in our economy is having a devastating effect on most universities: their budgets, their faculty, and particularly their graduates. So would we all be better off scheduling a mass noon walk out? Put down the Macbook, and pick up a wrench, or a blow torch, or a wire stripper?

Try not to think about our peers who went to community colleges. We branded them as losers, but remember them now as economic geniuses who predicted the fallow job market to the letter and insulated themselves from the smother of educational debt.

Shane Cronin is a Collegian columnist. He can be reached at scronin@student.umass.edu.

The appeal of a diploma

Sean Canty

The current outlook for a college graduate is understandably bleak given the economic state of affairs in our country. Yet, if the ultimate desire of any individual is to work immediately rather than acquire a degree, I have a simple solution: Get a job.

Easier said than done, predominantly due to the fact that outside of the trade-skills professions a college degree is required for even the most mundane pencil-pushing position.

Regardless of how one feels about that specific situation the fact remains that the current professional landscape of corporate America requires it. Indeed, the new trend among most professions is the requirement of even further education after a bachelor's degree, but fear not: Many employers are ponying up the dough to cover these mostly superfluous obligations.

The truth is that higher education is most specifically an environment to promote the evolution of a higher development of the mind and to serve as an impetus to individuals searching for a purpose in life and potentially their occupation.

The college experience has been more skewed in the direction of socializing, networking and acquiring life experiences in recent times but I have to say that those too sound appealing and only add to the grandeur of what is the incalculable benefits of acquiring a degree from a college or university. First and foremost the university should be an environment in which the propagation of a distinct philosophy, ideology, and methodology flourish.

The tools which will assist in guiding you throughout the course of your professional and adult life are forged in the smithy of the mind and utilized in innumerable ways throughout the course of ones life. The triumph of an educated and rational decision are most often the result of the completion of a mental concept attained from rigorous experiences in scholastic work.

Beyond the overlooked benefits of shaping the mental models of an individual's comprehensive analytical process, the scholastic college experience is shared with countless peers, which offers even further benefits.

Beyond the obvious fact that deep ties and strong relationships are furnished while attending most higher learning institutions, that often times stand the test of time throughout one's life there is the more direct professional and self-serving benefit of networking.

Networking in the contemporary professional world is not necessary for a successful career by any means, but most would argue that it helps navigate the vast scale of the job landscape that new graduated college students are thrust upon.

Many argue that the cost of higher learning institutes are now spiraling out of control and a substantial obstacle to the potential benefits of cost returns for acquiring a degree. Yet, according to the College Board there are over 7,000 higher learning institutes, surely within the expansive selection choices available an option exists that is capable of fitting the monetary specificities of varying applicants.

Loans too have been a reoccurring nightmare for most students within the contemporary collegiate congregation that leave many members contemplating the true value of higher education. I would argue that a rational examination of the overall expenses of any institute made by a potential applicant would furnish results favorable to most individuals seeking the benefits of higher education.

That is to say that affordable education at a collegiate level exists to most who seek it as long as they take into account the total cost and balance the allure of larger or more prominent universities for lower costs with equally enticing benefits, particularly those of preferential positions while vying in the job market.

Acquiring a degree from an institute of higher learning does not necessarily transform an individual into a Brobdingnagian of potential business applicants but it will allow for an individual to compete, whereas the lack of an accredited degree will not. Unless you want to go into a trade-skills profession such as carpentry or plumbing then unfortunately or not you will need a degree for most contemporaneous professions.

The allure of a college education in the pretext of the modern era revolves around the potential prospects of professional life and garnering the highest possible salary. I would argue that the value of the higher education experience is not quite as simple as that and even if those desires are the preferential aspirations of those of you in college then you may feel like the cost is not equivocal to the end results.

The auxiliary vindications in my view are just as potent an incentive to attend a college. The long lasting friendships and consequential networking are considerably corny but in the end a real benefit of a college experience, and a potentially helpful link to the next step in life. Yet, I would still argue that despite arguments proposing decreasing education benefits of higher schooling that the learning environment still permeates campuses nationwide and that what we learn here is truly incalculable to measure it's worth throughout the course of our lives.

Sean Canty is a UMass student. He can be reached at student.umass.edu.

Ending First Week with Grace

By Acacia DiCiaccio
Collegian Correspondent

The University of Massachusetts' First Week is always an exciting experience for students. It provides students a chance to get back into the groove of the exciting part of college. To a lot of freshmen, this week can be a crucial time to make friendships and overcome nervousness.

This year, UMass has bumped up its Fall musical standards and is throwing a concert only for UMass students, featuring We the Kings. As seen by the Spring Concerts of years past, our student body knows how to have a good time, and this year it should be no different.

Grace Potter and the Nocturnals will be the opening act. The band, which released its first album in 2005, is up-and-coming on the indie scene and has been featured in "Grey's Anatomy" and even performed a cover of "White Rabbit" on the Alice in Wonderland soundtrack. You may also recognize them if you saw Dave Matthews Band in 2008; they opened for three shows in Massachusetts and New York.

At this show, they will be promoting their latest self-titled album, which was released in this past June. Grace Potter's talent is impossible to overlook. Her incredibly soulful voice is reminiscent of the likes of Janis Joplin and Tina Turner, but is still relevant to today's sound. The band, referred to as "The Nocturnals," also contributes a variety of sounds – a mixture of rock, soul and blues. The songs on the album range from upbeat rocking guitar solos to exhibits of Grace's pure, smooth, sexiness. This unique band should be a crowd pleaser even for those who have never heard of them before.

Headlining the show is power-pop band We the Kings, who found their fame via the Warped Tour scene. Their sound is similar to bands such as All Time Low and Boys Like Girls, and are well known for their hit single, "Check Yes Juliet." We the Kings is currently promoting their latest release, "Smile Kid."

Their romantic new single, "We'll Be a Dream," features Disney star Demi Lovato and promises to have the audience gushing. Most of their music is upbeat and encourages sing-a-longs, so attendees are sure to be spending ample time on their feet.

The concert takes place at 8 p.m. on Friday, Sept. 10 in the Fine Arts Center. Tickets can be purchased at the FAC box office, which is open from 10 a.m. to 6 p.m. on weekdays. With ticket prices on the rise, seeing a concert for only $10 a ticket is inarguably a great deal. Just take note that the event is for UMass students only, and only you can purchase your own ticket with a valid student ID.

Even if you do not know the bands very well, the performance should definitely be an entertaining one and would be a shame to miss. It's a great opportunity for something to do on a Friday before the night really begins. If you are a freshman, this will be an excellent way to both meet new people and also take advantage of what is undoubtedly this year's biggest First Week event.

Acacia DiCiaccio can be reached at adiciaccio@student.umass.edu.

We the Kings and Grace Potter and the Nocturnals will end First Week by invading the Fine Arts Center on Sept. 10, for the Back to School Concert.

A rice-stuffed omelet at downtown Amherst's Fresh Side fell flat, with a mismatched sauce too spicy to enjoy. The restaurant is open Monday through Sunday 11 a.m. to 10 p.m.

Saucy sides sour Fresh Side's menu

By Jess Watsky
Collegian Correspondent

It was an eve of mixed emotions the night my companion and I went to Fresh Side, invigorated and ready to face the academic year with an open mind as the summer's end drew upon us. We had just come face to face with the Dirty Truth — the beer hall, that is — and the stark realization of the necessity of a photo ID, and headed to Fresh Side for some purely gastronomic pleasures.

Upon arriving at the eccentric Amherst establishment, we ordered a selection of iced teas. A classic Thai iced tea for myself, and a jasmine and coconut milk tea for my date. The Thai iced tea, similar to ones I've had before, was sweet and milky, but a little mild for my standards. The intensity of the spices seemed to be lost in the creamy base. The jasmine tea was the hit of the evening, to my surprise. My dining companion found it floral, perfume-like and complimentary with the coconut milk; neither flavor seemed to clash.

When faced with the choice of which delicious appetizer to sample, the decision was obvious: a carb-packed pad thai tea roll that I had enjoyed on previous occasions. I was admittedly disappointed when the dumpling served was dry and bland, soapy at best from some perky cilantro, mollified only with a dash of peanut sauce. All the aromatics and flavors of pad thai, a dish that hits every single gustatory sensation, were muted to the point of boredom.

See FRESH SIDE on page 7

COURTESY JESS WATSKY

Despite a dinner of spicy entrees that failed to wow, Fresh Side's smooth Thai tea sweetened an otherwise sour experience. Fresh Side is located at 61 Main Street in Amherst.

BYOB Thai restaurant lacks 'Fresh' entrees

FRESH SIDE from page 6

The entrees, grouped into singular ingredient-based conceptions – pad thai, ginger, beef, Peking – comprise of soups, rice noodle dishes, or tea rolls. Feeling autumnal, I opted for an apple curry noodle dish with fresh summer vegetables. The noodle plate was exuberant in its execution, with bright chunks of perfectly cooked and seasoned vegetables covering fettuccine pasta — odd for a Thai-esque restaurant. Unfortunately, the sauce, the very apex of the dish itself, lacked the intense interest. Harboring a gelatinous texture, it smelled like cinnamon, curry spices and cloves, but was devoid of that apple lushness I so coveted. The sauce's underwhelming flavor contradicted the original concept of presenting a dish with such an interesting combination.

My date enjoyed her entree, fried rice stuffed inside a delicate pillow of an omelet. I found the rice to be well seasoned and crunchy, with nice pieces of water chestnut.

The egg was more of a sheet than a blanket and did not overwhelm the senses, providing enough [illegible] to [illegible] the rice and vegetables.

There was a strange [illegible] plate, though — a sauce that [illegible] above all to be [illegible] on the side of the [illegible] a peanut [illegible] gravy, spicy [illegible] Thai basil, [illegible] and coriander. Was it a small [illegible] palate cleanser? A shot and a [illegible] traditional French [illegible] WTF [illegible] and it, too, did we down. It [illegible] with the savory rice dish and to [illegible] as either a sauce nor a side.

Fresh Side is a funky, albeit standard restaurant. It tries to be quirky and succeeds in most areas, but fails to provide the bold flavors and dishes beyond it to [illegible].

If the diner is willing to step [illegible] his or her comfort zone, the results can occasionally be exquisite. Perhaps Fresh Side ought to take a page from the menus of more traditional Thai restaurants in the area and master the classics first. Playing with the big boys means you have to bring a big game, and Fresh Side needs a little more practice.

NEVER FORGET PROJECT

Saturday, September 11th, 2010

At 8:46 AM

Outside the Campus Center Concourse Entrance
between the Campus Center and Hasbrouck.

Over 300 American Flags will be displayed to remember the over 3,000 victims of the 9/11 attacks.

This event is co-sponsored by
the UMASS Republican Club and the U-Dems.

Afterwards ½ the flags will be brought to downtown Amherst in a peaceful protest of the recent decision not to display flags in commemoration of this national tragedy

UM defense eyes UNH

Minutewomen defense stands guard as UNH's Nogueira approaches Rudd

By Michael Counos
Collegian Staff

The Massachusetts women's soccer team will face New Hampshire on Friday at Rudd Field in search of its second win of the season at home.

The Minutewomen are currently 1-2-0 on the young season, recently falling to Albany last Monday. The Wildcats will come to Rudd Field with a 2-1-2 record, their last game ending in a 2-0 loss at home against Harvard.

The Minutewomen defense will be keeping their eyes on Drea Nogueira, who leads the team with two goals, and Alyssa Michel who has a goal and two assists. Freshman goalkeeper Erica Correa started and finished all five games in net for UNH this year with a 1.1 goals-against average and a .824 save percentage.

UMass is historically dominant against the Wildcats, boasting an all-time record of 17-2-3. The Minutewomen are 214-65-11 all-time when playing at home and 36-34-2 when playing at Rudd Field.

However, the last win for the Maroon and White over UNH hasn't been since Sept. 28, 2001 which was a 3-0 shutout at home. Last season, the Minutewomen traveled to Durham where the contest ended in a 0-0 draw.

The key for UMass will have to be the offense coming alive as it did in its 4-0 blowout win over Vermont on Sept. 3rd, when captain Sydney Stoll had two goals. Sharing the ball could prove to be essential as four players had assists in the previous win.

UMass' defense has played well this season with a .103 shot percentage against and 1.33 goals-against percentage.

"UNH is a hardworking and very fast team that likes to push the offensive attack," UMass coach Ed Matz said. "They tend to create opportunities from the outside with their midfielders and we are going to have to use our natural intensity to defend against that."

Friday's game will be the third consecutive America Conference opponent the Minutewomen have faced this season. The Minutewomen then go on a four game road trip to play Fairfield, Michigan State, Brown and Oakland. The game begins at 4 p.m. and will be aired on CBS 3 Now.

Michael Counos can be reached at mcounos@student.umass.edu.

Sowry, Kelly call for offense

By Pete Vasquez
Collegian Staff

After losing three out of its first four games to begin the season, the Massachusetts field hockey team went into practice this week determined to strengthen the lines of communication between the midfield and forward lines, while continually developing its young players.

"We have young members on our forward and midfield lines so we're all trying to get on the same page with communication," UMass coach Justine Sowry said. "Working as a unit is something that we're really trying to work on and we're getting there."

Senior captain Katie Kelly knows the responsibility falls on her as well as other veterans on the team to be role models for the 11 new players.

"We have such a young team," Kelly said. "The new freshmen definitely outnumber the upperclassmen, so it's important to continually set the right example because they are constantly watching me and the other seniors. We just have to make sure we're pointing them in the right direction so that we can be successful."

The Minutewomen will have to set aside their growing pains this weekend when they square off against stiff competition in Connecticut and Yale.

UConn is 3-0 this season, outscoring their opponents 7-1. Last year the Huskies went 17-2 in the regular season and topped it off with a Big East championship.

UConn will play its first game away from home when it travels to Amherst for Saturday's game. Sowry knows how important it will be for UMass to sustain its periods of strong play.

"They're solid through all of the lines and they're coached very, very well," Sowry said. "It's going to be a really tough battle for us. What we're looking for is to continue to work and be consistent for longer periods of time in the games. We had a great second half against [Boston University] but if we're going to compete with UConn, we're not going to be able to let up for one minute. We're going to have to work very hard to get the ball. Once we have the ball, we have to be smart and then take the opportunities when we get them."

The Minutewomen cannot afford to come out sluggishly. In their last game, BU scored twice on them in the first fifteen minutes of play. Instead, they are going to have to be the aggressors.

"We're definitely going to have to get on them early," Kelly said. "Using our goal-scoring positions is going to be crucial. We can't just fire it at the goalie's pads and keep firing it straight back at her. We have to pass and kind of go around her."

UMass hopes to get around UConn's freshman goalie Sarah Mansfield. In over 200 minutes of action this season, Mansfield allowed just one goal, shutting out two opponents, while amassing 12 saves.

After Saturday's game, UMass will have to quickly switch gears and travel to New Haven, CT, for a game against Yale.

Like UConn, the Bulldogs have yet to lose this season, going 2-0 with nine goals spread across both games. Freshman Erica Borgo, who on Tuesday was given the Ivy League Rookie of the Week award, leads the Bulldogs with three goals along with two assists.

Last year, UMass defeated Yale, 1-0, at home on Oct. 4th, behind the strong play of its current third-year goalie Alesha Widdall. It was her fifth shutout of the season.

"Yale is a good team," Sowry said. "We actually had a good battle with them last year. We really want to stick with our game plan. We're still trying to work with our outleting from the backfield, trying to get our combinations going, getting our midfield involved. Then when there's a turnover, our counter-defense is making sure that we have good structure and organization. If we do it as a team, with team defense, we should be able to contain their players."

Widdall is not concerned with containing these two high-scoring offenses as much as she is focused on coordinating her defense.

"I don't worry about controlling them. I worry about controlling my defense," Widdall said. "I have Jaime Bouraeris and [Thando Zono] both working very well together. Both of my halfbacks have been working really well communicating and listening to me. If we just execute our basic defensive structure then we'll be good."

Pete Vasquez can be reached at pvasquez@student.umass.edu.

The Minutewomen will look for an offensive push against UConn and Yale. UMass lost three of it's opening four games, while UConn and Yale are undefeated.

Historic edge for UM

By Herb Scribner
Collegian Staff

The Massachusetts men's soccer team may have found the confidence boost it needs, after going winless in its two openers, when it faces Fairfield this Saturday.

The Minutemen (0-1-1) will head to the home of the Stags (1-1-1) after suffering a loss to Harvard this past Monday in a game that featured odious fouls and late-game theatrics.

"There were a lot of positives, but bottom-line is we lost and no one likes losing. So we've got to get back to work and get ready for Saturday's game," UMass coach Sam Koch said.

Historically speaking, Saturday's game looks to be in the favor of the Minutemen who boast an 8-1-1 all-time record over Fairfield. Many things have changed since their last meeting however, as the two sides haven't faced off since 1993.

Instead of looking to the past for answers on what to do next, Koch is looking as recent as this past Monday's game against the Crimson.

"Well I mean, [we're going to work on] sort of the same things we've been talking about. Our ball movement needs to be quicker," Koch said. "We get caught with the ball at our feet; we didn't switch the field as well as we could. We attacked the flanks really well in the second half [against Harvard], created a lot of chances; we need to keep doing that until teams stop us."

But don't sell Fairfield short just yet. The Stags are riding into the game against the Minutemen after a late-game comeback against Yale in their third game of the season.

Trailing 1-0 towards the end of the game, Fairfield turned up the heat offensively and put the ball in the back of the net with 20 minutes remaining with Erik Ilisije getting the goal. Ilisije proved to be the difference maker for the entire game, as in the 101st minute, he scored again to put the lead in favor of the Stags.

So with the Stags entering into the match with that heavy amount of confidence, and a streaking hot player in Ilisije, Koch and Co. are looking for other ways to improve their game.

"We stop ourselves, and we've got to believe in the things that are successful," Koch said. "I think when we do that, we're going to win a lot of games. Defensively, we've got to make sure we keep the shape and we don't get caught. We call it the Helter Skelton situation, and we get into those situations we lose our shape and when we lose our shape we're just not good enough. And teams can get through us pretty easily and so we've got to make sure we're helping each other."

Koch will likely be looking towards seniors Bryant Craft and Ben Arikian to aid the offensive side of the game. Craft has had a lucky streak lately, scoring two goals in two games already this season, while Arikian has yet to produce offensively thus far in the campaign.

Koch hopes to open up the game a little more on the offensive side, which has been a goal for the Maroon and White throughout the summer and opening games.

"We couldn't get the extra runner in the box today, but when we do that we'll score a lot more goals," Koch said after the loss to Harvard.

"It's a team sport, and for us it's more important that we stay together as a whole team and we stay compact both offensively and defensively. When we do that, we're going to be very hard to beat and I think it will create a lot of chances."

Herb Scribner can be reached at hscribne@student.umass.edu.

Chris Roswess dribbles away from the defense in a game last year. Roswess will look to aid an already strong offensive side when UMass faces Fairfield.

UMass boasts midfield

By Steve Levine
Collegian Staff

After going going 7-7-3 last season for its , its worst mark since 2005, the aspect Massachusetts men's soccer team knows that most important aspect of this season will be the play of its midfield.

The Minutemen aren't coming off the best season of UMass coach Sam Koch's tenure, but last season, Koch saw good performances out of the midfield –something he hopes will continue as he heads into his 20th season at the helm with the Minutemen.

Leading that strong midfield was Ben Arikian, who will be returning as a senior in 2010. Arikian sat second behindbehind Mark DeSantis last season inn terms of goals scoringed, registering three goals and four assists with a team-high 36 shots on goal.

"He's our leader; he's very important," Koch said. "We know Ben is going to do the job. The guys around him have to step their games up in order to make Ben more effective by being in better positions, by receiving balls on the ends of passes and crosses, by [creating] a dangerous situation and then getting the ball back to Ben to score goals."

Still, Koch believes there's room for his star midfielder to improve, who is expected to be a leading scorer in 2010, to improve.

"Ben's ability to improve will depend on the players around him and their improvement," Koch said. "They all work off of each other. Ben makes other players better and other players make Ben better."

Much of the Arikian's success will depend on fellow senior Stuart Amick, who has started alongside Arikian since partway through 2007, when both were sophomores. Amick scored a goal and an assist last year, while using his speed and ability to get into scoring position to create chances for the Minutemen.

The third pillar of the UMass midfield will be junior Bryant Craft, whose consistency as a starter dates back to his freshman campaign in 2008, when he tallied a goal and an assist. Last year, Craft replicated those statistics, something both he and Koch would like to improve upon this year.

"Bryant Craft on the flank is dangerous going forward," Koch said. "He's worked hard all summer from what he's told us, and he can have a huge impact on scoring goals for us. We need him to help us score goals. We've got players that can do that, and we'll show up when they show up."

With Arikian, Amick and Craft presumably starting in the midfield this season, the competition for the remaining starters has already begun. One candidate for the remaining starting job is junior Chris Stoker, who transferred from Providence this year

"Stoker is a veteran player who will be another edition to the midfield, and he can help us in that area," Koch said.

It's obvious that the midfield will be the foundation for the Minutemen this year, not only because of its talented midfielders, but also because of the midfield-heavy formations Koch plans to employ throughout the 2010 campaign.

"[We will use] a traditional 4-4-2," Koch said. "We will also play a 4-5-1 and a 3-5-2. However,, the way the game goes will determine what our formation is. Midfield will be in the attack."

Holub taps Christopher Dunn to advocate for UM in Boston

By Katie Byrne
Collegian Correspondent

The University of Massachusetts is expanding out east - specifically creating a new executive position in the hopes of making higher education a top priority statewide, and in the corridors of Beacon Hill.

To fill the position, administrators called on State House Staffer Christopher L. Dunn Jr., who began his post last month.

"I believe in the opportunity for the sons and daughters of Massachusetts to have a world-class education, something that is meaningful to the economy, to the Commonwealth and to a person's life," said Dunn, in a phone interview from his Boston office.

Dunn is making a career out of something he believes in, higher education at UMass.

In August, Dunn began his duties as the director of public and constituent relations for the Amherst campus. To fulfill the $78,500 paid position, Dunn will be splitting his time between the State House in Boston and his newly-opened University-provided office in downtown Boston.

Nancy Buffone, executive director of the Office of External Relations and University Events, believes the University's presence in Boston is crucial to garnering increased support for the campus. "Having Chris in Boston is key for us," she said. "He is our eyes and ears on the ground in Boston."

"It is critical we have someone like Chris involved at the State House because he already has so much experience there. He lets us know what up-and-coming topics may be, and we need faculty involvement there to help set policy."

Buffone works closely with Dunn and state legislators to help form legislative policy pertaining to the campus.

Dunn's involvement in politics began at a young age. As a senior at Beverly High School on the North Shore, Dunn worked as an intern in Congressman John Tierney's office. As Dunn puts it, he "caught the political bug."

His involvement in politics continued as an undergraduate at Suffolk University, where he studied political science and history. Upon graduation, Dunn served in the Office of the Clerk to the Senate for four years. His latest position had been as associate counsel.

In 2007 he continued his education at the Suffolk University Law School, and was admitted to the Massachussetts Bar in 2009.

"Boston is where the leadership of the Commonwealth meets, it is the center of commerce for Massachusetts and the region, and is home to many thousands of our alumni and friends," said Chancellor Robert C. Holub in a University press release.

"By bringing someone with Chris Dunn's experience and background to our reorganized team, we've got the right pieces in place to make real strides in Boston and to win greater support for the Commonwealth's flagship campus. We intend to be a larger presence in Boston and to be more effective in advocating for the institution."

Christina Maguire is advocating alongside Dunn for support for the flagship campus in the Boston area as well. Maguire's job is to engage and motivate alumni around Beantown to support UMass Amherst.

With many alumni located in the Boston area, the space also serves as a place for graduates to meet and connect. Alumni groups have the opportunity to use the space to network and communicate with each other. The senior alumni meet with younger alumni in the office to engage them as part of the Financial Services Affinity Network.

The office, which the campus is renting for $63,000 a year, is located on Franklin Street in Downtown Boston.

In the upcoming election season, Dunn expects the state to see about a 20 percent change in the makeup of the legislators.

See BEACON HILL on page 3

Christopher Dunn will be splitting his time between his Franklin St. office and the Massachusetts State House, where he will be advocating for higher public education.

School of rock: UM number 18 in AOL rock school rankings

By Sam Butterfield
Collegian Staff

The sleepy west of the woody east apparently isn't so quiet when it comes to generating great rock music. AOL's Spinner.com named the University of Massachusetts the number 18 school for producing musically successful and influential alumni last week.

UMass clocked in ahead of Cornell and Toronto's York University and behind such institutions as the University of Pennsylvania, Wesleyan University, McGill University, UC Berkeley, New York University and the number one choice, Thames Valley University in London.

UMass got the ranking for producing such notable artists as 1972 graduate Natalie Cole, blues singer-songwriter Taj Mahal (who attended the University while he was still Henry Saint Clair Fredericks) a 1963 alum, folk and country singer-songwriter Buffy Saint-Marie, a 1970 grad, and two members of the seminal alternative rock band Pixies, Frank Black and Joey Santiago.

The site lists a brief "pass" and "fail" feature about each school, detailing a positive note and a negative aspect about the universities it profiles. Spinner gave a pass to the W.E.B. Du Bois Library, noting that "UMass boasts the tallest library in the U.S.," but gave failing marks to the library's late policy, quipping that Du Bois charges "two bucks a day for overdue books."

The site also points out one funny anecdote about one of UMass famous alums. Spinner comments that Henry Saint Clair Fredericks (who became Taj Mahal) certainly had a different future in front of him while he resided in the Valley Fredericks was a member of the Future Farmers of America and an animal science major while he attended the University.

Cole a nine-time Grammy winner and the daughter of fabled singer Nat King Cole, attended the nearby Northfield Mount Hermon School in Northfield for high school, and then moved slightly south to enroll at UMass upon graduation. While at UMass, she majored in child psychology and minored in German. Just three years after graduating in 1972, Cole won her first Grammy for Best Female R&B Vocal Performance for "This Will Be" and took home a second prize for Best New Artist for *Inseparable*.

Saint-Marie graduated in 1970 with degrees in teaching and Oriental philosophy. She has become a highly renowned folk singer who has focused much of her writing on the struggle and plight of Native Americans, and emerged amid a spate of successful Canadian folk around the same time as Joni Mitchell, Leonard Cohen and Neil Young. Coincidentally enough, her work has also been covered by Taj Mahal.

Board says no to 9/11 commemorative flags

By Bobby Hitt
Collegian Staff

The Board of Selectmen of Amherst decided against flying special commemorative flags in remembrance of the 9/11 terrorist attacks in Amherst. The decision was made in a three-two vote last Thursday to extend the rule, which stipulated that special flags be flown once every three years, to once every five years.

When the flags were first introduced, coincidentally on Sept. 10, 2001, they were meant to be celebratory in nature. However, some town residents, such as Larry Kelley, have pointed out that these flags are also flown for Memorial Day and Veterans' Day.

"They should either fly the flags on 9/11 or not fly them on Memorial Day and Veterans' Day," said Kelley, who writes a blog titled, "Only in the Republic of Amherst."

"People feel very strongly about this issue both ways," said Select Board Chair Stephanie O'Keeffe, "I can definitely see how both sides could be angry or upset."

Two members of the Select Board had people close to them present at the 9/11 attacks in New York City, Diana Stein and Aaron Hayden. Both felt it was inappropriate to fly the flags on 9/11.

Hayden, who lost two close friends on 9/11, said during the meeting that the flags were meant to celebrate something that changed the world in a positive way. He went on to say that the flags should only be flown on six dates, Presidents' Day, Memorial Day, July 4th, Sept. 22, the date women were granted the right to vote, Nov. 20, the anniversary of the Gettysburg Address, and Human Rights Day.

Kelley argued that 9/11 should be made one of seven permanent days on which the special 29 commemorative flags are flown, and has brought this issue to the select board every year since 2001. He was successful in both 2002 and 2003, but the Board decided not to make the decision permanent and instead to vote on it annually.

Many residents and local students were upset by the Board's

'08 UM alum seeks Story's State Rep. seat

BY MATTHEW M. ROBARE

Daniel Melick, a 2008 graduate of the University of Massachusetts, is running as an Independent in the Third Hampshire District of the Massachusetts House of Representatives. Currently, the district is represented by Democrat Ellen Story. She has been in office since 1992, according to the general court's website and was previously a member of the Amherst Town Meeting. Dan Sandell, a Republican from Amherst, is also running.

"I'm advocating for greater transparency in government," Melick said. "I think that, in order for government to really work, people need to know what's going on. I think that our state legislature has taken some steps in the right direction, for instance in this past session, they passed a bill posting the state budget online and made that information available to the public."

He added that he believes that the bill tracking system the state legislature uses needs to be improved.

"It's very hard to find out exactly what's going on. For example, when I was researching this transparency bill, it was very hard to find accurate information."

Melick said he believes personal transparency is important for members of the legislature, suggesting that it is difficult to find information on Story's political positions. One position where the two have similar stances is support of instant runoff voting. In that method, if there are three candidates, A, B and C, then voters rank them preferentially on the ballot. If no candidate receives a majority of votes then the one who received the fewest votes, candidate C, for example, has lost the election. Then the votes of the people who voted for C are transferred to their second choices.

"Instant runoff voting would be good because it would help break up the two-party system, which I think does a lot of damage to the country," Melick said. "A lot of people don't vote for Independents or third party candidates because they want to vote for a winner, and I think that instant runoff voting will allow people to vote for a candidate they actually believe in without the fear that if that candidate turns out to be non-viable, their vote won't be going to someone that's even worse. The example I like to use is of people who voted for Nader in the 2000 election in Florida; people who voted for Nader were essentially voting for Bush. I believe that while Nader was their first choice, they would have preferred Gore to Bush. Instant runoff voting would have made that more feasible."

Melick is a strong supporter of drug law reform.

"I want to continue to work on ending drug prohibition in this state," he said. "I think that all drugs should be legalized, but keep in mind that a, this doesn't count as advocacy for drug use and b, not all legalizations are going to look alike. While marijuana could perhaps be similar to alcohol, other 'hard drugs' could have other restrictions on them. Ultimately, I think that drug prohibition has been one of the biggest failures in policy going on in the world. It creates crime that ranges from innercity gangs to the insurgency in Afghanistan."

He said he supports health care reform and thinks Massachusetts should move to a single-payer system or public option available to everyone, but he's unsure what form it should take. Melick is interested in helping municipalities fund renovations to school kitchens in order to provide healthier food to schoolchildren. He also opposes casinos.

"Education needs to be better funded," Melick said. "However, considering we are facing a huge deficit I cannot promise that we will be able to fund the University as much as we'd like."

Melick will face nine-term incumbent Ellen Story and Republican Dan Sandell in the general election November 2.

Matthew M Robare can be reached at mrobare@student.umass.edu.

2008 graduate Matthew Melick is running for State Representative.

Remembering 9/11

COURTESY OF MARSHA GELIN

Members of the UMass Democrats and the Republican Club pose with SGA President Brandon Tower (second row, right) outside Campus Center Saturday to remember those lost in the attacks of September 11th.

DAILYCOLLEGIAN.COM HAS A NEW MULTIMEDIA SECTION!

Already we have produced:
- a video feature on the marching band
- a campus perspectives survey about construction during the school year
- a look at the textbook annex rental program
- and a highlight reel of UMass football's victory against William & Mary.

We are excited to produce web-only content every week for our site in the form of:

- breaking news updates
- videos
- podcasts
- blogs
- photo slideshows
- maps
- useful links
- and news round-ups

If you are interested in working for us, please email multimedia@dailycollegian.com.

We are looking for videographers, photographers, bloggers, and web-based reporters who are seeking to becoming involved with a growing news website.

Dunn to advocate for UM on Beacon Hill

BEACON HILL from page 1

Some members of the House and Senate have decided to not run for reelection, and many races are highly contested, making for an interesting campaign season.

Dunn hopes to emphasize the importance of the Amherst campus to both new and seasoned elected officials by stressing some of the valuable qualities the school has to offer not only to students, but to the Commonwealth as a whole.

"I want to show legislators that UMass is the Commonwealth's flagship campus. It is a great public research facility; a place that should be at the forefront of the legislature's mind," he said.

Both Dunn and Buffone expect the upcoming year to be difficult financially, due to reasons including large cuts in state funding. Buffone projects it will be a very challenging year, but despite the lack of available funds, she hopes to send a message to legislators.

"When they have questions about something, I want the UMass faculty to be the first place they turn to for their expertise. The faculty of the University is there to help them."

Dunn emphasized the importance of student involvement in the voting process.

"We'd love to have the students' support and for them to push their hometown elected officials to support UMass."

Katie Byrne can be reached at kebyrne@student.umass.edu.

UMass marks 9 years since 9/11 with tribute

FLAGS from page 1

decision, including some University of Massachusetts student organizations, such as the Republican Club and the UMass Democrats. Both groups had an impromptu memorial service Saturday morning on the behind the Campus Center, where they held a moment of silence for those lost on 9/11.

President of the Republican Club Justin Thompson believes it is imperative to make sure the date is not forgotten.

"The purpose of this memorial is to remember a national tragedy," said Thompson, "not to make a political statement."

UMass Democrats President Emily Jacobs was approached by Thompson and the Republicans to help with the memorial.

"It is important that we make sure this a non-partisan issue," said Jacobs.

Brandon Tower, president of the Student Government Association (SGA), also attended the memorial outside the campus center.

"Amherst got it wrong," said Tower. "This memorial is the right thing to do, and I applaud the UDems and U Republicans for getting together and putting on such a significant event."

After the ceremony concluded, the group walked through downtown Amherst planting American flags in the grass along the sidewalk.

Another memorial service put on by the town started at 9:45 a.m. in front of the fire station, but no commemorative flags were displayed.

Kelley also applauded the efforts of the UMass political organizations.

"[The flag] is a symbol of our country," said Kelley. "Sure the United States isn't perfect, but it is the best country in the world and we should do anything else to remember that."

Amherst did fly all American flags in town at half-staff in remembrance of the lives lost on 9/11 and, according to the once-every-five-year rule, should fly the commemorative flags next year for the 10-year anniversary of the terrorist attacks.

The not so sleepy west: University ranks high

ROCK SCHOOL from page 1

Black and Santiago attended the University in the mid-80s, and became close friends while they were roommates. After dropping out, the two moved to Boston and linked up with bassist Kim Deal and drummer David Lovering. They rose to prominence after Nirvana front man Kurt Cobain stated that the Pixies had been influential for him, and despite the fact that they have not recorded new music since 1991's *Trompe Le Monde*, the group's popularity has only grown in that interim. On their last album, they paid homage to their time in Amherst with the iconic "UMass."

'Machete' could be a bit sharper

Robert Rodriguez's latest film "Machete" stars Danny Trejo in the title role as an ex-Federale hired to assassinate a U.S. Senator, played by Robert DeNiro. The movie also features Michele Rodriguez and Jessica Alba and is based on the concept presented in a trailer from the 2007 movie "Grindhouse." "Machete" is currently playing in theaters everywhere.

By Matthew M. Robare
Collegian Staff

Robert Rodriguez's newest film, "Machete" is the fulfillment of a promise made several years ago in 2007's "Grindhouse," which he co-produced with Quentin Tarantino.

In the double-feature, there was a trailer for a Mexploitation film titled "Machete," featuring Danny Trejo in the title role. The feature-length version includes many of the same actors and follows the plot as depicted in the trailer.

Essentially, Machete is an ex-Federale living as a day laborer in the United States who's hired to assassinate a senator (played by Robert DeNiro), but is double-crossed and goes on a rampage of revenge. He is assisted by an Immigrations Agent played by Jessica Alba and a woman played by Michelle Rodriguez who helps Mexicans cross the border and settle in the United States.

"Machete" can really only be called a fun movie. Like "Grindhouse," it is an homage to exploitation films and state of the art production values are mixed with film scratches and an occasional murky image quality to resemble older, low budget B-movies.

Violence in the film is so over-the-top that it takes on a comedic quality. For instance, in a scene set at a hospital, a doctor says the human body has 60 feet of intestines. In the very next scene Machete reaches into a bad guy's stomach, pulls out his intestines and uses them to repel out of a window.

Also in common with the genre, everyone seems to have extraordinarily high blood pressure, resulting in gigantic fountains of blood gushing out from injuries as small as a paper cut, and all cars are carrying nitroglycerin so they explode when bumped.

Characters and dialogue are cliched and stereotyped, which makes the film somewhat predictable despite being part of the genre. Additionally, as an exploitation film, there are hardly any scenes without a naked or nearly naked woman, all of whom naturally want Machete. The sexism of those scenes is not necessary and serves to detract from the more fully developed female characters played by Alba and Rodriguez.

On a more positive note, the action does not stop for anything. Exposition is almost absent, with the movie explaining itself as it goes along. There is nothing to prevent the viewer from enjoying the ride.

Rodriguez takes great delight in visuals—even where the film quality is murky for the sake of homage, the lighting is still perfect enough to highlight all of Machete's scars, or to give just the right shading to underline a villainous character. Visually, the film is gorgeous.

The cameo by Cheech Marin as Machete's badass brother and priest is special, adding to the silliness, and Steven Seagal's return to theaters as the villainous Cortez gives Machete a challenging antagonist.

If one can accept "Machete" as a tongue-in-cheek homage or parody, it makes for a very enjoyable two hours, but one shouldn't expect great acting, dialogue or any sort of attempt to portray life either realistically or artistically.

A fun film, but not a great one.

Matthew M. Robare can be reached at mrobare@student.umass.edu.

'Summer Jam' a party worth singing about

By Ashley Berger
Collegian Correspondent

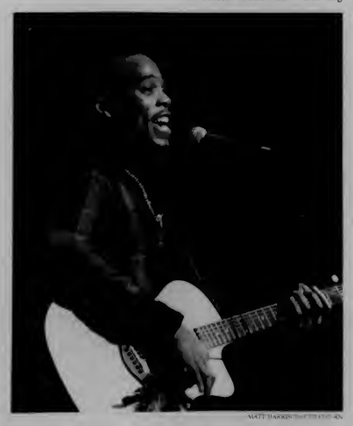
On a particularly hot and humid Saturday in June, thousands of fans packed the Comcast Center in Mansfield to witness JAMN 94.5's annual Summer Jam concert. The lineup included megastars such as Ludacris and Trey Songz, while also featuring newcomers B.o.B. and hometown hero Sam Adams.

Sam Adams opened the show – a wise move by concert organizers. Though he blew up on the college scene, most fans attending the show probably did not want nor expect the 22 year old Wayland native to headline the show. Adams brought an intense energy, playing fan favorites such as "Driving Me Crazy" and the song that launched him onto the scene, "I Hate College." The crowd also appreciated Sam's "f**k the Lakers" chant to close out his set.

The show continued on with two lackluster performances from Kevin Rudolf and Clinton Sparks. Rudolf did relatively nothing to pump up the crowd and stood in one place behind his guitar, which was a little weird for a rap concert. Though he played his two hits, "I Made It" and "Let It Rock," the rest of his songs are virtually unknown. Clinton Sparks, a new DJ on the scene, seemed nervous and failed to interact much with the crowd.

The audience was soon regaled by newcomer and instant sensation B.o.B., a rapper with an incredible stage presence. Also supporting the Celtics by wearing a green and white jumpsuit, the rapper also known as Bobby Ray attracted the spotlight, and if anyone in the crowded stadium wasn't already a fan, they should have been by the end of his set. Fellow newcomer and lone female performer Nicki Minaj, clad in a hot pink dress and stiletto heels, added some woman power and sex appeal to the show. She was a sure hit with male audience members. Her set included some slow and fast-paced raps, yet most of her songs were virtually unknown, so it was rather hard to sing along to. Minaj made her performance interesting when she brought a six-year-old boy up on stage.

"Any boy I date needs to stay in school. Promise me you'll stay in school," she said to him.



B.o.B. also performed at this year's Summer Jam. The up-and-comer is best known for the recent hit "Airplanes."

Jam'n 94.5 FM brought one of the summer's biggest concert festivals to the Comcast Center in Mansfield, Mass. Headlined by Spring Concert star Ludacris, the show proved to be a memorable one – especially for the ladies.

As dusk set in, the heavy hitters of the show began pouring out. Former Degrassi star Drake played the longest of any set up to that point, pausing every few songs to shout out to the audience and thank them all for their support. He also paused to shout out and remind the crowd to continue their support to "Free Weezy." Though Drake's sound quality was horrible (barely audible from the lawn section), he played all his hits and welcomed Minaj back onstage for a rendition of Young Money's hit single "Bed Rock."

Trey Songz, known for his sensual lyrics and voice, did nothing to disappoint female fans. Singing a string of ballads that drove women in the audience crazy, Songz literally re-enacted what it would be like to go home with him. Women went mad over "I Invented Sex," and males envied the man that their girlfriend probably wished she were dating. Songz invited Drake back on stage, a showing of two beautiful, talented men who sang a duet that was unique and unforgettable. To close out his set, he invited one lucky lady from the audience on stage for a kiss before finishing with smash-hit "Say Ahh."

During the finale, Ludacris had all eyes on him 'till the end of the show. Even during Taio Cruz's cameo for "Break Your Heart," audience members were clinging to Luda's energy and vivacity. While performing old and new tracks, audience members danced and sang. Though the set list wasn't much different from his show at the University of Massachusetts' 2010 Spring Concert, everyone appreciated old favorites such as "What's Your Fantasy," "Area Codes," and "Stand Up."" Luda also played fan favorites such as "All I Do Is Win" and "Yeah!" – arguably two of the best songs he could have chosen. Minaj was again welcomed back on for a spectacular duet of "My Chick Bad." Ludacris closed out the all-day event with his signature song, "Move B*tch," a tune which fans proceeded to sing in the parking lot while trying to fight their way from the concert.

Ashley Berger can be reached at aberger@student.umass.edu.

Clint Eastwood as Superman or James Bond? He says that 'it could have happened.' Imagine.

By Geoff Boucher
Los Angeles Times

Clint Eastwood is watching the contemporary superhero craze in Hollywood with a bit of generational relief. "Thank God that I didn't have to do that," says the 80-year-old star.

The Oscar-winning actor and filmmaker is best known to moviegoers as a cowboy or a cop, but during a recent interview in Carmel, the Hollywood icon said that in the 1970s he was an early candidate to play the Man of Steel. He added that, a few years before that, he was approached with an offer to join her majesty's secret service in the role of suave spy James Bond.

"I can remember – and this was many years ago when (Warner Bros. President) Frank Wells came to me about doing Superman. So it could have happened. This was when they first started to think about making it. I was like, 'Superman? Nah, nah, that's not for me.' Not that there's anything wrong with it. It's for somebody, but not me.

"I was also offered pretty good money to do James Bond if I would take on the role. This was after Sean Connery left. My lawyer represented the Broccolis," who produce the Bond franchise, "and he came and said, 'They would love to have you.' But to me, well, that was somebody else's gig. That's Sean's deal. It didn't feel right for me to be doing it."

In December 1978, the same month that a relatively unknown actor named Christopher Reeve soared to fame in Richard Donner's "Superman," Eastwood had a new comedy hit on his hands with "Every Which Way but Loose," which did not bring with it the indignity of wearing tights but did pair the tough-guy icon with a saucy orangutan named Clyde. The Superman film had taken a number of years to reach the screen, and Eastwood was 48 by that point, so he was too old to play the superhero. Still, had he been 30, the star said his answer would have been the same: "No, thanks."

Eastwood explained: "I always liked characters that were more grounded in reality. Maybe they do super things or more-than-human things, like Dirty Harry, he has a knack for doing crazy things, or the Western guys – but, still, they're not caped crusaders."

For most of Eastwood's time in Hollywood, comic-book roles were career kryptonite. That's changed now, certainly, with Jack Nicholson, George Clooney, Robert Downey Jr., Christian Bale, Michael Keaton and Hugh Jackman as just a few of the leading men who have played costumed heroes or villains and avoided the typecasting that haunted actors of the past, such as Superman stars George Reeves and Christopher Reeve.

"That was part of the consideration, a big part," Eastwood said. "Look at Reeve, he was excellent. That was a big factor. You get a role like that, and it locks you in a bit. True, I had the Western genre and the 'Dirty Harry' role, but everybody made Westerns and did cop movies; they didn't seem as bad," as far as typecasting.

I told Eastwood that, after watching him dispatch criminals as San Francisco cop Harry Callahan, he was probably a better fit for the alleys of Gotham City as opposed to the skies of Metropolis. Eastwood surprised me by, with a wink, boasting that his funny-book allegiance was to Namor, Bill Everett's imperious sea prince.

"Hey buddy," Eastwood said with a thumbs-up gesture, "the Sub-Mariner, that's the one I always liked. I had all of those comics when I was a kid."

As for Bond, no American has played Ian Fleming's spy. Connery is a native of Scotland, and Roger Moore, Daniel Craig and Timothy Dalton were born in England. Pierce Brosnan was born in Ireland, and George Lazenby hails from Australia. Though it's hard to imagine Eastwood in the coolly ironic mode most associated with 007 of the 1970s, it's interesting to note that the two most recent films in the venerable series have taken the secret agent to a gritty, stoic style with Craig that has far more in common with Eastwood's signature screen personae than, say, the safari-suit work of Moore.

I was in Carmel to interview Eastwood about "Hereafter," which he directed. The film, a tender story about three broken souls and their lurching quest to understand the great beyond, hits theaters on Oct. 22, and we spent more than three hours together talking both on and off the record. We chatted about the Superman and Bond roles for all of three or four minutes, but, later in the day, I joked to Eastwood that I was having trouble shaking the image of him in blue tights.

"That was a long time ago. I was a little more pumped," Eastwood answered with a wink. "But believe me, I can get it out of my mind. I got it out of mind back then. It was easy."

Summer vacation is the real drag

Summer used to be the best time of the year. Do you remember that anticipation during the last class, waiting for that final bell to ring?

Then there was that mad rush out the doors into a perfect sunny day. Along with it came release from the sense of obligation that grade school forced on us. We could forget the books for a while to be full time kids.

Once free, some of us stuck close to home, others went off to camp to meet up with friends from distant places, and for many of us, there was the compulsory summer family vacation.

It somehow justified our belief that all of those commitments placed on us September through May weren't natural. Now we could return to our true state where the world was easy to understand and even control.

I don't think I'm alone when I say the school year has become the more fun part of the year as opposed to summer, which feels like a shocking return to reality. We all have to hunt down internships to boost our

Mike Fox

The curse of being a political science major is that internships that seem prestigious are surprisingly easy to get, but are practically never paid.

resumes or jobs to supplement our college expenses. We're no longer living with our friends. Parties are fewer and farther in between.

For me, it means reprising my role as camp counselor because nothing else worthwhile awaits. The curse of being a political science major is that internships that seem prestigious are surprisingly easy to get, but are practically never paid.

The summer after freshman year I went back to camp. I loved the return to camp after a several year absence, and truly felt like I was mentoring young adults. However, there was some sort of unspoken agreement among the kids my age that to stay here any longer past our year would exceed our "expiration date."

Sure, we still fit in those trips to the beach, and there isn't the constant barrage of papers and exams. But we can decide so much more about the balance between fun and work in college.

Anyone who says summer brings a needed respite from college work either needs to suck it up, switch their major, or feel lucky that they have the opportunity to work hard.

Last summer I had a sort of unique situation. I was set to leave halfway through for a study abroad. I wondered , "Why on earth would someone hire me for a month - especially when plenty of people would work for that month and beyond considering the current state of the economy?" I might have fibbed my way into a job at Panera, but was lucky enough to score a gig selling knock-off designer sunglasses at the Wrentham Outlets (paid under-the-table by the way).

This summer I weighed my options. Unfortunately, with the pickings slim, and my car off to the auto body shop in the sky, I wouldn't be able to commute to most jobs, anyway. Plus, at this point, my hometown, no matter how much I love it, was starting to feel like a drag in comparison to Amherst.

Therefore, I found a listing to work as a help-line operator for the University, (I like talking to people…) and extended the lease at my house through the summer. In addition, I had an ungodly number of commitments set for the fall, and being in Amherst those few extra months would make fulfilling them that much easier.

Instead of complaining, I have been hit with the heart-warming reality of how extremely committed and passionate tons of families are to ensuring their children's futures.

I have walked families through their financing options. Some find a way to continue their time at UMass. Others are pushed to the point of desperation where their frustrations lead to feelings of failure. Finally, I apologize for not being able to help further, and our conversation ends.

I realize how lucky I am. My grandparents cleared a straightforward path for me to college and the journey has been fairly easy. For many securing a college education is far from straightforward. The amount of students taking out loans, scraping for scholarships and grants, and chasing down every other whim out there is the way of the world.

Putting a call to action at the end of something is never the smartest idea, but for those few that have read my ramblings to this point, please let go of your K-12 summers and realize that the real world is coming fast.

The only way we will all make it and not be rattled by the shock is by helping to advocate for our school and for our classmates. Reality can be harsh. Keep that in mind the next time someone asks you for a simple signature to help support those that aren't as lucky as you are, and are forced to put it all on the line to stay here.

Trains, pains and automobiles

Matthew M. Robare

There was a lot of news about trains over the summer. President Obama announced plans to encourage the development of high-speed rail service in this country, with $8 billion allocated to its development by the American Recovery and Reinvestment Act.

Earlier, in November of 2009 (not really the summer, but I didn't hear about it until then), gazillionaire Warren Buffet bought Burlington Northern Santa Fe, one of the largest railroads in the country.

And why shouldn't they be pumping billions of dollars into this ancient and environmentally friendly industry? After all, railroads made this country great. Just think of all the Chinese and Irish laborers who were shamelessly exploited to give prominent politicians a photo op and a big payday.

Well, for one: railroads suck.

When you're on the outside looking in, trains are amazing.

I remember being enchanted by them when I was little.

Steam, diesel, there was even a proposal for a nuclear-powered train at one time. Whatever the motive power, trains were awesome when I was five.

They were big, fast, made great and easily imitated noises and you never had to worry about choking on toy ones if you put them in your mouth.

Well, I'm a lot older now.

I'm more knowledgeable, and I like to think I'm wiser. I'm also more cynical, since I made the normal growing-up discovery that the real world does not often live up to our imaginings.

I've ridden in trains of all kinds: the MBTA in Boston, the WMTA in Washington, the New York subway, the Philadelphia rail service and Amtrak.

If I could have astrally projected myself into the driver's seat of any car with air conditioning, it would have made a great commercial for any car, anywhere, anytime (especially an affordable one).

One of the first things I discovered was that trains are loud, cramped and rickety; the bathrooms are annoying (when there are any), they're always behind schedule and (like every form of public transportation) there is always a 3 year-old screaming his or her head off.

When this ha ppens, if you're lucky, you get to share a sympathetic look with the parent. Most of the time, however, Mom and Dad are completely oblivious. Not only are they used to it, but they have child-rearing "hormones," rushing through their systems which provide immunity. Some of the things these kids do are absolutely horrendous. The parents have to be on something.

I was on the B43 bus to Target the other day. I swear there was a set of triplets. They did not stop screaming. If I could have astrally projected myself into the driver's seat of any car with air conditioning it would have made a great commercial for any car anywhere anytime (especially an affordable one).

We can't ban children from public transportation or require parents to gag their rugrats, or even segregate transportation based on a traveler being with or without children; all we can do is take the hint and buy the clunker Crazy Phil's Used Car Barn is advertising for $500—the one with no seatbelts and the weird smell coming from the back seat.

There has never been a car in my life where the experience was inferior to that of public transit. Shocks, control, no screaming kids, a radio playing music you actually listen to—or even CD's or an iPod, or, most blessed of all, silence.

Just the gentle "Vrrrrr" of the engine, maybe a little bit of chassis vibration and smooth, gentle acceleration along the way.

Another problem with public transit is that the bathrooms are invariably inoperable. I don't even know why they bother building trains and buses with toilets when they never work.

I'm sure ingenuity and engineering could overcome this technological hurdle that's preventing American public transit from competing with Europe, but why bother going through the Apollo program all over again?

With a car you don't have to worry about it. Guys can use bushes, and women can use smart phones to find clean gas stations that aren't run by perverts.

Compared to buses or trains, the automobile is paradise on wheels. With a car you can set your own schedule, go on a Great American Road trip, be free of the wildly unpredictable and overcrowded buses and trains, and in a pinch you can use it as a mobile bachelor pad.

Yeah, you have to add on to your debt peonage in order to buy one, but it's worth it.

I find myself at peace just thinking about never having to listen to a little stinker scream for no reason in particular ever again. Well, at least until I become a parent myself. For now, however, my mother has enough nighimares.

Five Reasons Why

There's no blue wall at The Blue Wall

1) Health Dept. made them replace it

2) It's a metaphor

3) They were sued by the Blue Man Group

4) No great blues come from Massachusetts, so why bother?

5) Wall, table, floor - what's the difference?

A new SGA for a new era

Over the course of the last decade, the undergraduate Student Government Association (SGA) has come under fire from a myriad of sources for an array of offenses. These range from allegations of governmental sloth to downright illegal practices, such as the provisions made for appointed SGA Senate seats.

Dan Stratford

However, over the past academic year, the SGA - especially the Senate and the Executive branches - has skillfully reformed itself with all deliberate speed in the direction of increased transparency, accountability, and efficacy.

There is a widespread belief that the SGA is nothing but a faux governmental organization, an ineffectual body replete with cynical resume-padders that is devoid of any "actual" authority. A body in which, to quote Macbeth, "all is but toys." For a time this was the status quo.

The SGA acted like a nineteenth-century political machine instead of a body devoted to student governance. The continuation of a self-serving political order took priority over the needs of its student constituency.

Instead of unifying students, the SGA undermined them; instead of emboldening students to take possession of their academic destinies, it exploited divisions and wedge issues. For the perpetuation of these offenses, there is no excuse or justification, only the necessity of, to paraphrase Franklin Roosevelt, "admitting it frankly and moving forward."

There is a widespread belief that the SGA is nothing but a faux governmental organization, an ineffectual body replete with cynical resume-padders that is devoid of any "actual" authority.

I am proud to decree that these aspects of the SGA's existence were and are being cast asunder. Under the leadership of President Brandon Tower every member of the Executive Branch and Senate must now serve on either the Faculty Senate committee or other special committee as per a change to the SGA By-Laws. Indeed, the reformist spirit that became cause célebre of the past year continues into this year.

It manifested itself in the many SGA Senate committees. For example, the overhaul of the SGA election process and the reconfiguration of the Executive Cabinet originated in the Senate Administrative Affairs committee whilst the concept for the lauded textbook rental program and swap market was the brainchild of the Student & Academic Affairs committee. In addition, the Ways & Means committee worked its very hardest last year to both streamline the budgeting process and emphasize a renewed enforcement of the SGA Constitution & By-laws regarding eligibility for SGA funding. The result is a rejuvenated focus on fairness in the distribution of funds as well as fiscal prudence in confounding economic times.

The reforms of both the substance and style of the Executive Cabinet deserve special mention, as they are evidence of what great works the Tower Administration seeks to accomplish in its term. Instead of deciding cabinet appointments through patronage, which often leads to one's friends being appointed to cabinet seats regardless of qualifications (or lack thereof),

President Tower initiated an open-application process in which any student could apply for a cabinet position. Appointments are now soley based on merit. The result of this reform is a diverse and adroit cabinet that serve in their various capacities as tribunes of the student body, not of the President or the SGA bureaucracy.

In conjunction with this intra-Executive Branch reform, the Senate passed a comprehensive overhaul bill for the Cabinet last semester, which included the addition of a Chief of Staff as a replacement for the Secretary of Administrative Affairs, a salary for the Secretary of Sustainability, (formerly the Secretary of the Environment), and reforms to the Secretary of University Policy - (now officially titled "Secretary of University Policy & External Affairs) – amongst many others.

These hard-won reforms such as the implementation of online elections, the removal of all appointed Senate seats, the requirement of SGA Senators to serve one or more Faculty Senate committees, the complete reorganization of the Executive Branch and the illumination of the appointment process for Cabinet members by means of open application are but a few of the many reforms that have been accomplished in the past year alone. There are many more to come.

In this sense, the main focus of the SGA, through its serious internal restructuring, has not been merely for the sake of the reform-minded, but also for the sake of the good government-minded, the cheaper textbook-minded, and the new bike rack-minded.

This has not just been a battle for the integrity of the SGA, but for the hearts, minds, and the very soul of the student body, which it purports to represent and advocate for. It is, to put it succinctly, a new declaration of competence. It is an assertion that the SGA again personifies the core values of the student body, and that it is unshakably invested in those interests once again. Paraphrasing the great Roman politician and orator Cicero, it gives the SGA a special satisfaction to address the concerns of the students once more.

UMass thrives after "deficit" vs. Huskies

F. HOCKEY from page 10

a decision, and communicating it and going with confidence. We definitely worked hard this week.'"

In each of the last four games prior to the UConn game, the Minutewomen faced at least a one-goal deficit which they needed to overcome. Prior to Saturday's game, Sowry sought to end that streak using an unorthodox approach.

Just before the Minutewomen went onto the field, Sowry called the press box to ask them to put a goal on the scoreboard for the Huskies. Before the game had even started, UMass was behind, 1-0.

"If that's what it took then it worked and we came out really hard and strong and certainly took it to them," Sowry said. "We disrupted their flow for the first time since I've been at UMass. I'm just really proud of the efforts of the team."

UMass fell behind again Sunday, needing to overcome a 2-0 deficit to Yale with under 30 minutes left in the game. Senior captain Katie Kelly, off an assist from Makaela Potts, cut the deficit to one in the 54th minute before Bowman scored her second goal in as many games to tie the game with six minutes left.

In overtime, after an attempted shot by Yale, senior defender Jaime Bourazeris found Kelly on a long pass, leading to a breakaway goal, and a 3-2 UMass win.

"Bourazeris had the poise to see an open lane to Kelly and pretty much made a 30-yard bullet pass straight to [Kelly's] stick," Sowry said. "It was a breakaway. Kelly drew the goalkeeper and low-footed her and just pushed the ball past the goalkeeper's right foot. Very calm, composed, and poised on the ball by Katie and it was a great pass by [Bourazeris]."

Still, Sowry saw a very tired team on the field that just one day after upsetting UConn, had to find the willpower to come back against Yale.

"It was just finding a way to play together to get the job done," Sowry said. "It was not pretty. People were tired, mentally and physically. But we were going to do it together. It was a fabulous effort to come through on a tough day. To come back from a two-goal deficit certainly shows a great deal about our character and we certainly showed a lot of character this weekend."

Pete Vasquez can be reached at pvasquez@student.umass.edu.

VETERANS from page 10

"In the second half, Kelly and Potts were the driving force when we were attacking," Sowry said. "Then we were held up strong at the other end by Widdall and Bourazeris."

Bourazeris is the last of the seniors. The defenseman is from New Hyde Park, N.Y, and someone who Sowry calls a "ball hawk". Regardless of where the opposing team is attacking, Bourazeris always seems to be there or nearby. Consistently directing and coordinating her defensive line, she displays skills of a quality defenseman and true leader.

Bourazeris also directs the penalty corners for the Minutewomen, something every team needs to be successful. In three seasons she has 10 goals and 12 assists. This season, she already has a goal and an assist.

Although there are three seniors this season, the team and all its coaches talk as if there are four. That fourth player is junior goalkeeper Alesha Widdall from Whitney Point, N.Y.

Widdall is a special case, and although she is not a senior, she has just as much, if not more experience than the other three. She is the only UMass player to have ever played on the United States Junior National Team, and is coming off back-to-back All-Conference nominations and All-American honors in 2008. Sowry says that her experience makes her a better goalie as well as a better leader on the field, and that the entire team benefits from her leadership.

"Alesha is outstanding," Sowry said. "With a quality goalkeeper back there we can play more aggressive, and having Alesha back there really gives the team great confidence."

Leadership is unquestionably an essential component to any team, especially if they want to compete. While UMass has three experienced seniors on the roster, it has four leaders who are ready and willing to do whatever it takes to make the team better.

Michael Wood can be reached at mcwood@student.umass.edu.

Fast pace paying off for UM

By Michael Counos
Collegian Staff

A large part of the Massachusetts women's soccer team's success this season has been its new-look offensive attack. Playing fast-paced and much more aggressive under new coach Ed Matz, the Minutewomen are 2-2-0 overall, with six goals scored through four games in the young season. Meghan Collins leads the team with four points and two goals, while midfielders Kelsey Anderson, Kayla Austin, Ashley Hamel and Deanna Colarossi have each scored as well.

The six goals for the Minutewomen are a huge improvement from last season. In 2009 goals were scarce, as it took the Maroon and White until Oct. 4 last year to get to the six-goal mark.

Another factor in the squad's offensive production has been that the Minutewomen are taking more shots on goal this season. With 69 shot attempts compared to their opponents' 49 shot attempts, they are getting more opportunities on which to capitalize. Out of those 69 attempts, 33 have been shots on goal, with the team averaging 17.2 shots per game.

UMass also comes enters the heart of the season with a very versatile roster, which mixes returning experience along with new young talent. The Minutewomen return eight players who saw regular action in 2009. They also recorded 42 points in 2009, 35 of which returners were responsible for.

Sophomore goalkeeper Emily Cota will be in net full-time this season, having played in 17 games as a freshman last year. Cota already has a shutout under her belt in 2010 and has five goals allowed in four games.

Ten newcomers are on the roster this year, and have already begun to make an impact. Austin, Annie Ward and Brittany Moore all made their first collegiate starts, with Austin registering a goal against Vermont.

Other freshmen Jen Houtmann, Blair Ferry and Lauren Skesavage all made their debuts off the bench. UMass also features a talented transfer. Colarossi, a junior from Oakland University in Michigan, was an All-Summit League Second Team selection in 2009 after leading the Golden Grizzlies in scoring with 15 points on seven goals and one assist, including three game-winners.

Michael Counos can be reached at mcounos@student.umass.edu

Senior Kelsey Anderson dribbles the ball during a game last year. The Minutewomen won two games over the weekend.

HC turnovers boost UMass

FOOTBALL from page 10

touchdown to Sheeran midway through the first quarter. Hernandez's runs, along with a 19-yard reception by Julian Talley put the Maroon and White in red zone territory to set up the first score of the game.

UMass forced Holy Cross to turn the ball over on its next possession, when Holmes broke through the Crusader frontline to force a Sam Auffant fumble four yards deep in the backfield. Redshirt freshman Theo Agnew recovered the ball on the opposing 42-yard line, and set up the offense for its second touchdown of the game.

Havens completed a 28-yard pass to Sheeran on the next play to move the Minutemen to the Holy Cross 14-yard line. On third down and seven, Nelson gave UMass a first-and-goal on the one-yard line. He leapt head-first down the sideline, just missing the pylon before being upended out of bounds. Two plays later, Griffin scampered into the end zone untouched for his third touchdown of the season.

On the ensuing kickoff, the Minutemen special teams unit successfully converted an onside kick and marched downfield for 11 plays, 57 yards and a score. The drive ended with a one-yard Hernandez rushing touchdown with about 13 minutes left in the second quarter.

"We had scored the second touchdown, and we wanted to capitalize on the momentum," Morris said about the decision to attempt an onside kick. "It was definitely a high risk, but we went with the high risk, high reward play."

UMass scored on its next possession to push its lead to 28-0. Rob Blanchflower caught a three-yard pass from Havens in the end zone with five and a half minutes to play, ending the Minutemen's longest drive of the game at 14 plays and 81 yards.

UMass won its eighth-straight contest against the Crusaders, who are the reigning champions of the Patriot League and came into the game tied with Colgate for No. 25 in the Sportsnetwork.com polls.

Gilmore was more frustrated with the way that his team performed than he was impressed by the Minutemen's play.

"I was not surprised at the level of this team," Gilmore said. "They're a good football team, but we didn't go out and play to our ability. We didn't need UMass on the field to expose how poorly we were playing and that's not taking anything away from [them]."

The win comes on the heels of a close victory in UMass' home opener against then No. 4 William & Mary on Sept. 4. With two straight wins to begin the season, coach Kevin Morris' players can now focus on this weekend's highly anticipated match-up, as they travel to Ann Arbor on Saturday to face the Michigan Wolverines.

"[The players] are well aware of the opportunity," Morris said. "Everyone knows Michigan. They are traditionally one of the best programs in the country year in and year out. We have to press on the guys that we need to just play our game and not get over-impressed or under-impressed, one way or another. We're just going to have to play our football game and do it in practice."

Dan Gigliotti can be reached at dgiglio@student.umass.edu.

SAMANTHA WEBBER/COLLEGIAN

Tight end Andrew Krevis carries the ball against Holy Cross in the Minutemen's 31-7 win over the Crusaders.

Havens finds new receiving targets

BY JAY ASSER
COLLEGIAN STAFF

In the 31-7 win for the Massachusetts football team on Saturday night against Holy Cross, UMass quarterback Kyle Havens found two targets who scored their first career touchdowns.

During the offensive barrage by the Minutemen on their final five possessions of the first half, wide receiver Dan Sheeran and tight end Rob Blanchflower each got into the end zone. Sheeran's score came first on a 19-yard touchdown reception to put UMass up 7-0, a lead that wouldn't be challenged the rest of the night. After scores by tailbacks John Griffin and Jonathan Hernandez, Blanchflower caught a three-yard pass on a play-action to make the score 21-0.

SAMANTHA WEBBER/COLLEGIAN

Redshirt freshman Rob Blanchflower carries the ball into the open field against the Crusaders.

For Sheeran, it's been a journey from Syracuse to UMass for the final two years of his career. As a redshirt junior in 2009, he played in all 11 games and caught four passes for 35 yards. As well as lining up as a receiver in the offense, Sheeran saw lots of action on special teams.

This season, he's caught four passes for 77 yards through two contests, making him the second-leading receiver on the Minutemen roster behind transfer Anthony Nelson.

"It's been a long road for me at Syracuse not playing much and last year not playing much," Sheeran said after the win over the Crusaders. "I just kept at it, kept working hard and I knew my time would eventually come. It's definitely satisfying to have all the hard work pay off."

Though he wasn't one of the main options in the passing game last season, Sheeran's talent isn't lost on UMass coach Kevin Morris.

"He's a guy who could have played a bunch for us, we just had some quality wide receivers," Morris said. "He was in the mix but he certainly wasn't the focal point. This year he's right in the mix with us and he's going to continue making plays for us."

While Sheeran is in his fifth year of eligibility, Blanchflower is a redshirt freshman who is making a mark early in his career.

In 2009, the Leominster native worked with the scout team and traveled to early season games, but never saw action. This season, Blanchflower has four receptions for 26 yards, with the majority of those numbers coming in the win against Holy Cross. More importantly, the tight end was able to fill in more than adequately for captain Emil Igwenagu, who sat out Saturday night with what Morris called an injury precaution.

"[Blanchflower] played a lot in Game 1 as well as our second tight end, and also played some of the first tight end in that game," Morris said. "Rob came and did an excellent job and got his name on the board with the points, which is great for him and it just happened to be the play that we ran at that time. He's a redshirt freshman but he's really come a long way in the one year, and we're excited about his future."

Both Blanchflower and Sheeran bolster a strong UMass offense which is averaging 29.0 points per game so far this year. The Minutemen have outrushed opponents to the tune of 447 yards to 156, while throwing for 516 yards compared to opponents' 391. The offense has been especially sharp in the red zone, scoring a touchdown on 70 percent of their opportunities.

If UMass plans on earning a huge upset win over Michigan this Saturday at Ann Arbor, Sheeran and Blanchflower will need to build off their career-performances this past weekend.

Jay Asser can be reached at jasser@student.umass.edu.

"Conn't" touch this

UM knocks off No. 4 Huskies, tops Yale late

By Pete Vasquez
Collegian Staff

The Massachusetts field hockey team that began its season losing three out of four games responded this weekend by shutting out No. 4 University of Connecticut 1-0, on Saturday before traveling to Yale to earn an overtime victory Sunday.

In what UMass coach Justine Sowry called one of the biggest wins of her UMass career, the Minutewomen beat the previously undefeated Huskies, a feat that took 10 years to accomplish.

"It's a huge win for the program, not just for the team that played out here. it's for the players before this team," Sowry said. "UConn has definitely had the better of us for all this time, but we've really worked hard to get to this point to be able to compete. Finally, the monkey's off our back and hopefully it will give us confidence to move forward in the season."

UMass (3-3) came into Saturday's game against UConn (3-1) having lost 10 straight matchups with the Huskies. Its last win against its foes from Storrs came Sept. 30, 2000, when it won, 2-1, in Amherst.

"We thought we'd throw something different at them today, just throw something that they've never seen before," Sowry said. "So we changed up our press and we executed it, and it was just incredible. Everybody on the field contributed today. I was just thrilled to bits."

After a week of practice devoted to trying to strengthen the communication of the young forward line, a pair of freshmen teamed up to give the Minutewomen the winning goal with 14 minutes, 26 seconds left in the first half.

UMass freshman Mika Black put a pass in front of the goal that freshman Lindsay Bowman knocked out of the air and into the top of the goal. Both rookies collected their first career points on the deciding play of the game.

"I thought that the freshmen played an outstanding game [against UConn]," Sowry said. "Everybody has to contribute and he on the same page. It's not about whether a decision is right or wrong, it's just making

JEFF BERNSTEIN/COLLEGIAN

Senior Makaela Potts pushes the ball upfield during the Minutewomen's win over Connecticut on Friday. UMass also came from behind to defeat Yale, 3-2, in overtime.

Veteran leadership key to early season success

By Michael Wood
Collegian Staff

Veteran leadership is something every team depends on, regardless of the sport, and the Massachusetts field hockey team is no different. In fact, the 2010 squad will be relying even more heavily than usual on its veterans to lead the way, because of the 10 new freshmen on the team. As the new players develop, there will be increased responsibility and pressure on the shoulders of the three seniors, Katie Kelly, Makaela Potts and Jaime Bourazeris.

Kelly, a senior forward from Dedham, Mass. is probably the most experienced of the Minutewomen, and unquestionably the leader of the team. She provides power and physical toughness on the front line and she has a knack for finding the back of the net. All things aside, Kelly attributes her success to playing against the best and learning from her mistakes.

"The main thing is experience," Kelly said. "Being in pressure situations and learning how to deal with those has definitely helped me this year. Last year we didn't have many upperclassmen and this year we still don't, but the three of us plus Alesha [Widdall] have really learned how to work well under pressure and that's what's going to be key for us this year."

As in previous seasons, Kelly has taken on the task of providing the scoring for the Minutewomen, and is off to a quick start. In six games this season, Kelly already recorded five goals, including two against Yale on Sunday.

Potts is a 5-foot-7 inch senior midfielder from Sydney, Australia and is the leader and quarterback of the offense at the center of the field. Potts is a two-time All-American at her position, and has been a captain since her sophomore season. Having come to UMass from Australia, she brought with her special skills that come from her international background. Although she is a talented player, often times her leadership contributions come in areas that are not quantifiable.

Trailing Yale 2-0, Potts took charge of the team and directed successful scoring drives, culminating in goals from Kelly. Sowry acknowledged not only Potts' determination, but the play and leadership from all her seniors after the game.

UMass blows out Holy Cross

Havens throws for 293 yards, 2 touchdowns vs. Crusaders

By Dan Gigliotti
Collegian Staff

The Massachusetts football team ran out to a dominant first half lead in a 31-7 romp over Holy Cross Saturday night at McGuirk Stadium.

The No. 18 Minutemen capitalized on a Crusader turnover and an onside kick recovery to take a 31-0 halftime lead.

"We wanted to come out and have a great start, and we got up early," UMass coach Kevin Morris said. "That's certainly where we wanted to be at the end of the half."

Junior captain Tyler Holmes forced a fumble and caught an interception, helping the Minutemen win possession for nearly 40 minutes and 91 plays.

Holy Cross managed 213 total yards of offense, including 69 yards in the first half. Crusader coach Tom Gilmore was unhappy with his team's lackluster performance.

"We just didn't go out there and play," Gilmore said. "We didn't do anything real well and we weren't playing that hard. I don't know if playing at our best would have beaten this UMass team, but you should know that after a game and I don't. That's extremely disappointing."

The Minutemen finished the night with 525 yards in total offense (232 rushing, 293 passing). Quarterback Kyle Havens found seven different receivers, completing 25-of-38 pass attempts en route to 293 yards and two touchdowns.

The Minutemen tailback tandem of John Griffin and Jonathan Hernandez combined for 148 rushing yards and two touchdowns on 33 carries, leading a ground attack that surpassed 200 yards for the second week in a row.

Senior wideout Anthony Nelson led UMass in catches and yards with eight for 103 yards while redshirt senior wide receiver Dan Sheeran and redshirt freshman tight end Rob Blanchflower each had their first career touchdown receptions.

The Minutemen found the end zone on four consecutive drives in the first half. They out-gained the Crusaders by almost 300 yards while netting 21 first downs before heading into the locker room.

UMass broke into the scoring column on a 19-yard pass

Minutewomen win 2 straight matches vs. Fairfield, Vermont

Maroon & White net 4 away from Amherst

By David Martin
Collegian Staff

The Massachusetts women's soccer team put on a stunning offensive show on the road against Fairfield that ended with a 4-0 victory on Sunday.

The Stags (3-3-0) found themselves on the wrong end of a game that saw junior Deanna Colarossi score twice as sophomore Emily Cota secured her second shutout of the season and the third of her career.

The Minutewomen (3-2-0) scored twice in the first half while out-shooting Fairfield, 14-3.

Senior Ashley Hamel scored the first goal of the game and her second of the season at the 31 minute, 57 second mark off of a pass from junior Meghan Collins. Colarossi followed up with a tally of her own less than 10 minutes later.

In the second half, freshman Blair Ferry scored her first-ever collegiate goal in the 59th minute of play off a shot by senior co-captain Therese Smith. The midfielder then set up the fourth goal of the game with a long pass to Colarossi, who connected with the back of the net on the 87th minute of play. That goal would be the second on the day for Colarossi, bringing her season total to three.

Cota provided a strong performance in net for the second straight game, turning away seven Fairfield shots for the Minutewomen's second shutout of the year.

When the final whistle blew, UMass finished with a 20-11 shot advantage. The Minutewomen have now outshot their opponents 89-60 this season.

On Friday, it pulled off a come-from-behind 2-1 victory in double overtime against New Hampshire at Rudd field.

Though the UMass offense beat out the Wildcats in shots, 21-10, and corner kicks, 6-1, the first tally didn't come until the 82nd minute of the contest, in which UNH attacker Jordyn Krall put a low shot past goalkeeper Emily Cota.

Junior Meghan Collins then struck back for UMass in the 88th minute, tying the game with a shot that came amid a mad scramble in front of the opposing net. From there, the score would sit at one apiece until well into the second overtime period.

The Maroon and White kept applying pressure to the UNH defense, bringing play after play well into the opposing zone and onto Wildcat goalkeeper Erica Correa's doorstep. The closest chance came at the 63:46 mark, in which senior Ashley Hamel shot a beauty that rolled just wide of crossing the goal line.

Just three minutes later, Hamel sealed the deal with the golden goal that made it past the far post off of a pass from freshman Kayla Austin. The goal was the first tally for Hamel in her UMass career.

Correa put up a solid game in net for UNH despite the loss. She had 10 saves in the losing effort.

Koch and Co. settle for a tie, Piekos earns 1st shutout of year

By Steve Levine
Collegian Staff

The Massachusetts men's soccer team will have to wait until Friday for a shot at winning its first game of the season.

The Minutemen tied Fairfield in a scoreless game to move their record to 0-1-2, while the Stags are now 1-1-2. The match was even in many statistical categories with neither team able to muster much offense. Fairfield registered nine shots, with two on goal, while UMass took eight shots – four of which were on goal.

The first half was uneventful for the Minutemen, as they failed to register a single shot. The first opportunity for the Minutemen came in the 56th minute, when senior midfielder Ben Arikian registered a shot wide of the goal. Arikian's shot started an offensive flurry for the Maroon and White, which could not convert on junior defender Chris Gilbert's shot off the crossbar. Seconds later, Arikian took a shot on goal that was denied by Stag goalkeeper Michael O'Keefe.

UMass' only other chances to score came in the first overtime period, when junior forwards Chris Roswess and Bryant Craft were unsuccessful in their opportunities. The game marked the first in which Craft hadn't scored a goal – he had two in the Minutemen's first two games.

Goalkeeper Chris Piekos turned away both shots on his way to recording his fifth career shutout and UMass' first on the season.

UMass hopes to record its first win on Friday when it hosts the University of Central Florida at Rudd Field. The Minutemen lost a 3-2 decision at the hands of Harvard University in their first game at Rudd Field on Sept. 6. UCF should give the Minutemen a challenge, as the Knights are 2-0 on the season and have outscored their opponents, 9-0, in their first two games.

Steve Levine can be reached at slevine@student.umass.edu.

An 'iConic' class: UM offers new course

iCons focuses on problem solving in science

By Alyssa Creamer
Collegian Staff

This spring, a program called iCons will launch its first course for freshmen enrolled in the University of Massachusetts' College of Natural Sciences' (CNS) majors looking to enhance their education in modern scientific procedures. According to one of its developers, UMass chemistry professor Scott Auerbach, the program is believed to be the first of its kind in the nation.

The program will be constructed of four courses offered over four years geared to teach students how to identify, research, debate and analyze data that will help solve major issues facing today's scientific world.

"I and other faculty members did a study during the past year into how 50 major universities and 30 colleges were conducting their integrated science program," said Auerbach. "And we found other universities were paying a lot of lip service, saying they had an integrated science program when they really didn't."

Auerbach explained that the point of iCons is to apply the idea of integrated sciences, where students will use their knowledge of the disciplines of sciences, biology, physics, chemistry and other subjects currently offered as courses at the University, simultaneously to solve real-world problems.

Auerbach believes that, as the current majors stand, at no point are majors in CNS taught how to integrate all the different fields of science.

However, iCons is not intended to replace a student's major, but rather to enhance it, and Auerbach has seen a great deal of interest from the student body and students around the country to whom he has explained the program.

Initially, students that complete the program will graduate with a concentration in either biomedicine or renewable energy, and the concentration will be recognized as a certification in the students' chosen field. Eventually, the professors creating the curriculum for the course also hope to offer students concentrations in clean water and climate change, in addition to the two other subjects.

The first iCons course, aptly called iCons 1, is titled Global Problems and Scientific Solutions. The course, according to Auerbach, will explore problems through looking at different kinds of case studies that are related to biomedicine, renewable energy, clean water and climate change.

"We picked these four topics," Auerback said. "Because they are the four biggest problems facing the scientific world. "Case studies are a great way to teach integrated thinking," continued Auerbach.

UMass students Carolina Adams, Buruk Aragawi, Shera Demchak, Irina Keefe, Matthew Liu and Rachel Roberts worked over the summer under a $50,000 grant given by the Camille and Henry Dreyfus Foundation Special Grant Program in the Chemical Sciences to build the case studies for the first class.

"It was a lot of fun and very interesting to work over the summer," Keefe said. "I would love to be able to take the course in the spring because it was our creation and it was us kids that made the material. I want to know what the reaction is going to be from the incoming freshman."

"I am really excited for it. It's a great concentration for the college of natural sciences," Roberts said. "And I think it's a great opportunity for the students to basically learn science in a new way. They're learning it through the case studies themselves. As opposed to starting with the textbooks and scientific concepts, they start with real world problems and through the problems they find the scientific concepts."

"It was a great opportunity for us on the development team," she continued. "We got to choose a topic of interest to us and try to develop classroom activities through that. It was a lot harder than I thought it would be to set up the classroom activities. I liked it a lot, because students were developing the course and it's hard for professors to remember what it was like to be a student, and therefore nice to have students developing work for students."

Auerbach also explained that iCons gives students more of a hands-on approach to problem solving through these case studies that could also spark student interest in an area they have yet to

See iCons on page 3

The new iCons science program will give students pragmatic grounding in a variety of disciplines. Here students stroll the Integrated Sciences Building.

Two Springfield men charged with distributing marijuana

Amherst PD make two drug possession arrests last week

Last Wednesday, the Amherst Police Department arrested two Springfield men on charges of possession of a Class D substance, marijuana, with intent to distribute and possession of a Class B substance, cocaine.

Arrested were 21-year-old Craig Brian McNair of 119 Littleton St. and Alberto Jose Ramos, 20, of 36 Alvin street. The pair was taken into custody after a traffic stop on College St. just after 3 a.m. In addition to the narcotics, officers confiscated several hundred dollars of cash.

The duo were held overnight at the Hampshire County House of Corrections in Northampton and arraigned last Wednesday morning at Eastern Hampshire District Court in Belchertown.

Neither man is a student at the University of Massachusetts or any of the Five Colleges.

The Massachusetts General Laws stipulate that a first offense conviction for possession of marijuana with intent to distribute can carry a sentence of up to two years in jail.

The Amherst Police Department announced last week that it had arrested 20-year-old Alberto Jose Ramos (left) and 21-year-old Craig Brian McNair (right), both of Springfield, on charges of possession with intent.

Report cautions against combining two colleges

By Sam Butterfield
Collegian Staff

University of Massachusetts faculty and staff who participated in a committee examining the feasibility and costs and benefits of consolidating the College of Humanities and Fine Arts (CHFA) and the College of Social and Behavioral Sciences (CSBS) into one large College of Humanities, Arts, and Social Science (CHASS) had largely negative views of such a decision, according to a March 28 report recently obtained by the Collegian.

The 18-page "Report of the CHFA-CSBS Reorganization Committee to Deans Joel Martin and Robert Feldman" outlines potential complications and hurdles to synthesizing the two colleges, as well as suggesting potential remedies for issues the Committee foresaw.

The report, authored by 22 members of the faculty and staff of the two schools, attempts to analyze the challenges which would face the colleges if they were to merge in a similar fashion to the joining of the former Colleges of Natural Sciences and Mathematics (CNSM) and Natural Resource and the Environment (CNRE) into the College of Natural Sciences (CNS).

The committee formed subgroups to investigate how a potential merger would impact the structure of each of the colleges, human resources and finance, development and alumni relations, research, curricula, advising, and faculty personnel actions.

According to sociology and public policy professor Joya Misra, the deans of the schools instructed those on the committee to especially focus on the potential costs of a merger, both financial and logistical.

In March 2009, Chancellor Robert Holub proposed creating a unified CHASS to save on administrative costs by combining the two schools, as well as to promote cross-college collaboration on research.

The committee found that "the benefits of merging these two colleges would have to be quite substantial to outweigh the considerable costs" of combining the schools. The committee also added that, because of the financial and human resources cost of such a shift costs associated with the restructuring would have to be added to the budget of the new college, cutting into the amount the unified school would be saving.

"Some of the costs would increase the base budget of the merged college and would thus reduce the savings anticipated from the merger without producing clear long term benefits," the committee wrote.

The committee first examined potential issues in combining the administrative staff of the two colleges. Noting that "there are many parallels in staff responsibilities in the two colleges," the committee found CHFA has a larger body of Dean-level employees than CSBS, which could create an imbalance in bookkeeping abilities for the new school. The committee notes that, because CHFA has some small, specialized departments, it has more Dean-level staff to aid these smaller departments with bookkeeping and finding sponsored research. As such, the committee recommended creating an Associate Dean staff of three members to support research in social science, humanities and fine arts.

The committee found that another cost associated with restructuring administration would be in providing more administrative staff for some of the smaller departments presently in CHFA. This would give all departments in the new college ample staff for bookkeeping and research grant aid, but would also increase the cost of the new school.

Another complication merging the two schools could present is in ensuring there are ample facilities. A space review conducted by the University found that combining all functions of CSBS and CHFA would mandate at least 11,640 square feet of new space, an area the size of the Textbook Annex.

According to the committee, space on campus is limited, and even where there is sufficient room, there would be the cost of clearing out what is currently housed and moving in the files and items of the two colleges. The committee estimates that if the University were to convert the Textbook Annex into a new office for the hypothetical CHASS, renovations would cost around $3.4 million, a whopping number considering UMass' financial condition.

The committee had further concerns about leadership and organizational structure. According to Misra, the committee met with the dean of the new CNS, who said that "there were not a lot of cost savings he could point to." The committee's report adds that "discussions with staff in the Dean's Office of the new CNS revealed that not answering [what the organizational structure would be] greatly exacerbated the difficulties of merging the old CNSM and CNRE."

The committee adds that "the general functioning of the college would be hampered during a period of transition, undermining productivity, faculty services, and the morale of staff."

The committee also had reservations about creating a new Dean's office. They cite issues with the availability of space for files dealing with 600 current faculty and staff and more than 400 inactive staffers, adding that the University would need to consult a structural engineer simply to determine a feasible location to hold the weight of such files.

Another issue arises with tying together the separate business practices of the two Colleges. CHFA, the report states, has a "more centralized model, whereas CSBS is more decentralized."

The committee recommended much consultation between the new Dean and staff from the former two schools to get both schools on the same page in business practices, however, it also notes that, because each Dean's Office has its own personnel database management system, "the merging of these two systems could cost in the area of $20-30K or more."

The committee also concluded that there could be difficulties in alumni relations and fund raising, as the two schools have maintained separate staffs for those functions, and administrators would need to reassign job duties. Further, the opportunity for staff to bring in donations and solicit gifts could be cut into, as staff would need to learn their new duties and acclimate to the new structure, instead of continuing with their roles.

See RESTRUCTURING on page 3

APD investigating two assaults, takes 231 calls over the weekend

The Amherst Police Department announced Monday that it is investigating two "serious assaults" which took place last weekend.

On Sunday around 2 a.m., numerous officers responded to 213 Grantwood Dr., just off East Pleasant St., to a report of an assault.

Once at the scene, officers found an unresponsive 18-year-old Worcester man suffering from major head wounds. The unidentified man was transported to Baystate Medical Center in Springfield, where he remains in critical condition, according to the Monday release.

Further investigation revealed the victim was struck in the head with a baseball bat, which the APD recovered later. No arrests have been made yet, and Lieutenant Ronald Young wrote in the release that the victim is not a Five College student.

The day before, Sept. 11, just after 2:30 a.m., officers responded to a report of a man who had been struck in the head outside 768 North Pleasant St. Officers located a 24-year-old, who was taken to Cooley Dickinson Hospital in Northampton by Amherst Fire Department ambulance. At Cooley Dickinson, the man was treated and released for head lacerations.

Officers on scene identified a suspect as a 21-year-old still unnamed Dracut, Mass. man. Officers said the victim had been struck in the head with a piece of wood from a nearby construction site. Young wrote in the release that the Dracut man will be summoned to Eastern Hampshire District Court in Belchertown to face charges of assault and battery with a dangerous weapon. Neither man was a student at an area college.

Further, Amherst police responded to 231 calls for service this weekend, with 31 disturbance calls and 49 individuals charged with crimes through arrest or summons.

Are your professors on Facebook? Study says they just may be

By Sam Hayes
Collegian Staff

When one thinks of a professor, the image of a reclusive, bearded intellectual, perhaps in a coffee-house, perhaps in a dimly lit study poring over yellowed papers may come to mind. According to a recent study called Social Media in Higher Education, that image may be a thing of the past as the study found some 80 percent of college professors use at least one form of social media.

The May 4 survey asked 939 professors at two and four-year colleges if they had at least one account with Facebook, Twitter, MySpace, YouTube, Flickr, Google Wave, Skype, LinkedIn or Slideshare. Eighty percent said they used at least one of these functions, with 60 percent reporting that they had accounts with more than one social media site.

University of Massachusetts' professors seemed not to quite fit that trend.

"Facebook is terrible," said UMass history professor Sigrid Schmalzer. "The Internet is a wonderful open public source for knowledge and information. Facebook privatizes and controls content, disallowing photographs of mothers nursing and forcing all content through one single entry point. It limits sharing."

"As an academic and an activist [Facebook] frustrates me," Schmalzer continued, "many activists only post on Facebook, and that restricts the publicity and allows policing."

Other professors were more simple and direct. Microbiology department head professor John Lopes simply said, "Sorry, I don't use social media."

Women, gender, and sexuality studies' department head Arlene Avakian does not use social media either. She said that there are many advantages and disadvantages to social media but does not use them herself. "I see no pedagogical advantage to this media," Avakian said. "I use email lists to contact students with messages."

"One thing I fear is that young people using social media may be losing the ability to have significant face-to-face interaction," continued Avakian.

"LinkedIn [a business oriented social networking site] has been very useful connecting our undergraduates and graduate students to alumni and alumni back to the department," said department of mechanical and industrial engineering head Donald Fisher.

Social media may be too broad a term to use when examining professors' online activity. In a May 4 article on the college news site Inside Higher Ed, journalist Steve Kolowich wrote that, "not all Web 2.0 tools are created equal. Among respondents to the Babson survey, YouTube was the preferred tool for teaching, with more than a fifth of professors using material from the video-sharing community in class."

Sam Hayes can be reached at sdhayes@student.umass.edu.

Area man arrested on Sunset, charged with B&E, warrants

Collegian News Staff

On Sept. 8 just after 10:30 p.m., Amherst police officers received a report from a Sunset Ave resident of a larceny in his apartment.

The resident told police he had observed Michael Gibbs, 23, of 173 Chapin Terrace, Springfield leave his apartment, and that he noticed some missing electronic equipment.

Gibbs was stopped by an officer of the University of Massachusetts Police Department a short way from the scene of the crime and was found to have the stolen items in his possession.

Gibbs was then held at the Hampshire County House of Corrections in Northampton in lieu of $5,000 cash bail. He was arraigned last Thursday, Sept. 9 on charges of entering a dwelling at night to commit a felony, larceny from a building, furnishing a false name, and having an outstanding arrest warrant from Springfield District Court.

The Sept. 9 Amherst Police Department release from Lieutenant Ronald Young also stated that investigators are attempting to determine if Gibbs has been involved in a string of burglaries around Amherst.

COURTESY AMHERST POLICE DEPARTMENT

Michael Gibbs was charged with three crimes.

Amherst PD report string of break-ins in South Amherst

Since the start of July, the Amherst Police Department has investigated a string of 12 "separate but distinct residential breaks in the South Amherst neighborhood."

The department defines that neighborhood as encompassing "all streets and neighborhoods from East Hadley Rd. south to Granby east to Belchertown and west to Hadley."

The majority of these breaks, according to the Sept. 7 release, have occurred late at night, when residents have been in their homes. APD stated that burglars have gained entry to these residences through unlocked doors, with items stolen including purses, wallets and some electronics.

The investigation into this series of break-ins is ongoing, according to the release.

Yesterday, APD hosted an open forum-style community meeting at Crocker Farms Elementary School to discuss the issue and what residents can do to protect themselves.

Questions about the break-ins can be referred to Officer Michael Johnson, who can be reached at 413-259-2054, or to Officer William Laramee in the Community Outreach Unit at 413-259-2069.

DAILYCOLLEGIAN.COM HAS A NEW MULTIMEDIA SECTION!
Already we have produced:
- a video feature on the marching band
- a campus perspectives survey about construction during the school year
- a look at the textbook annex rental program
- and a highlight reel of UMass football's victory against William & Mary.

We are excited to produce web-only content every week for our site in the form of:
- breaking news updates
- videos
- podcasts
- blogs
- photo slideshows
- maps
- useful links
- and news round-ups

If you are interested in working for us, please email multimedia@dailycollegian.com.
We are looking for videographers, photographers, bloggers, and web-based reporters who are seeking to becoming involved with a growing news website.

Prof develops new science class focused on problem solving

explore.

"Let's say you are a science major, and you're attracted to the sciences because you want to solve a big problem like energy and you have to learn about elements," said Auerbach of current science majors, "and you go around and around and around, and by the time you're a junior you might start to learn about the thing you're really interested in."

"This gives students the juicy stuff right off the bat," continued Auerbach, "but also gives it to them in a way that makes sense because you can't expect a freshman to understand about solar energy at the deepest possible level, but you can teach them the basics."

Because the program is currently only open to freshman, the idea is that the freshmen enrolled in the program will be required to pick out of the four concentrations offered before continuing into iCons' second course, as they may not yet fully know what field piques their interest. By designing iCons 1 to give students exposure to case studies in each of the subject areas, it will enable students to "rotate through all of them and get a flavor for the subjects," in Auerbach's words.

The program's developers are considering allowing a small number of sophomores to apply for slots in the program; however, it is likely these students would have to delay their graduation date in order to finish iCons' final course.

In the second course, iCons 2, titled Integrated Scientific Communication, students will read, write, speak and debate about the issues that are relevant to their particular concentration.

"So if students are interested in renewable energy, they would talk about recent developments in solar panels or the chemistry of trying to solve the oil spill in the Gulf," said Auerbach. "Whatever the topics that are relevant in the modern world and to the theme that the student is concentrating in will be looked at [in iCons 2]."

"It makes it very difficult [to have a definitive curriculum], because new problems are arising," Auerbach continued. "But that is what makes the program come to life."

Auerbach believes that by looking at today's topical problems, students will benefit because they are able to take on fresh issues as opposed to solely learning about "science that has been already worked out."

"Modern science involves a lot of complicated experiments," Auerbach said. "Students will learn through iCons that [the modern scientific process] involves a lot of data and discussion and not necessarily right or wrong answers."

Within a student's third year in the program, iCons 3, students will be working in laboratories doing either biomedicine or renewable energy research.

Students with a biomedical focus will work in teams to conduct experiments in an on-campus laboratory funded by the UMass biology department and the Howard Hughes Medical Institute. Lab work will heavily involve research on genetics.

There is another on-campus laboratory for students focusing in renewable energy to use. It is funded by the Massachusetts Center for Renewable Energy, Science and Technology (MassCREST), and students, according to Auerbach, are likely to research solar energy and materials and fuel cells.

Students will then complete the iCons program with a Capstone Experience, iCons 4.

Students within CNS often find it difficult to add extra courses to their schedule, and because of this, iCons 1 will also count as an interdisciplinary general education requirement, iCons 2 will count as a junior year writing course, iCons 3 will have the potential to count as an upper level elective, and iCons 4 will take the place of a student's capstone experience requirement.

iCons 1 will be taught by chemistry professor Justin Fermann, microbiology professor Sue Leschine, and Professor Steve Petsch of the geosciences department.

"We're excited about the chance to bring students together who are interested in science and do not have a completely crystallized in stone idea of what particular science to learn with each and from each other," Petsch said. "We're pretty excited about the novel approach to teaching this class. As best we can tell is pretty unprecedented across the country. It's a program that in contrast to a traditional classroom where a professor talks at you, what we're going to do is provide students with just a bit of inception material to get people interested in a real world science problem, and then allow people to recognize for themselves what are the questions we need to ask to assess this problem and to develop a solution to this problem."

According to Auerbach, employers working in the science fields are looking for people with identifiable skills and what he calls a "deep skill."

"They don't want a general science major who knows a little bit about a lot of things, they want someone who is essentially a card-carrying geoscientist, biologist or microbiologist who knows how to work well in teams, communicate well and who shows leadership," Auerbach said. "And those are exactly the extra skills that we do not teach currently."I will be proud when the first cohort of students graduate in the year 2014 as the first group of iCons scholars. And I will be proud when each and every one of them has been accepted into the top grad school of their choice or top job of their choice."

Students may currently apply for the iCons program, and applications, which can be found at http://cns.umass.edu/iCons-program, will be accepted until Oct. 17. The developers are looking to enroll approximately 60 students for the first course.

Alyssa Creamer can be reached at acreamer@student.umass.edu.

Professor Scott Auerbach (right) developed the iCons curriculum and program, which focuses on problem solving in science.

Report critiques plan to reshape colleges

RESTRUCTURING from page 1

Further, each school has a separate alumni advisory board, and collating those two boards into one could prove contentious and delicate, as administration would need to consult with members of each board to draft a new one, with neither side feeling marginalized or left out.

In addition, the new CHASS would need to develop a branding and identity effort, which would take funds both to develop and to put into place. A unified college could also prove stressful for its new dean, as donors from each of the existing schools would now be coming to campus to visit one dean, placing complications on the Dean's schedule, which would already be packed with adjustment and management.

Another area the committee addressed and found issues with is research. While both schools have prioritized faculty research in recent years, "each college emphasizes different kinds of research and funding that reflect different paradigms within the faculties."

CHFA research often requires support for individual scholars or for international on-site research, while CSBS research tends to focus on data-driven studies. To work around these divergent research areas, the committee recommended to the deans that the schools maintain their current research centers.

Another issue pertaining to research the committee examined is an imbalance in research funds between hard sciences and social sciences and humanities. In FY09, the committee notes, CNS generated $77,385,500 in externally-funded research, while CSBS produced $2,797,700 and CHFA accounted for $788,200.

Advocates for the merger have argued that combining the schools will create a "binary star" effect, with two large schools balancing each other and keeping the University anchored.

Misra, however, argued that if anything, combining the two schools may actually weaken them both relative to the mammoth CNS.

"I'd actually prefer for there to be two deans counter-weighing the natural sciences," she said. "My worry is that it will actually weaken the position of HFA and SBS on campus."

One issue many faculty members had was that psychology had been put into the natural sciences umbrella, where many other schools which use a two-college structure include psychology in a traditional "Arts and Sciences" model.

The members of the committee also wrote that, as CHFA and CSBS account for about 37 percent of total undergraduate majors, funding to the two colleges should be proportionate to where presently more money flows into CNS due to its research output.

Another consideration would be in curriculum. Undergrads in each school presently must fulfill different requirements to graduate. A unified CHASS would need to streamline college requirements from the two schools.

Much like research, the committee recommended maintaining separate advising centers for the colleges. To find a new space for an advising center would likely be prohibitive, they wrote, and after the last restructuring of advising, "CHFA and CSBS majors have now made a real connection with the separate advising centers."

The committee concludes that "it is clear that on the whole, faculty and administrators in CHFA and CSBS do not want to merge," adding that "all aspects of the proposed merger would be costly, both in real dollars and in terms of faculty and staff time and effort."

"We should hesitate to merge even in good times, when we have all the resources we would need to pull the merger off successfully," the committee concludes. "But these are not good times. Instead, we are working in a period of ever shrinking resources, and current economic forecasts predict that the recovery, such as it is, will be slow and halting."

Despite these stark recommendations, the reorganization plan is still being debated.

According to Associate Dean for Research Affairs in SBS Doug Anderton, Provost James V. Staros will be convening a new committee shortly. The Collegian will have more on this issue as it develops in the coming weeks.

Kings poor at FAC; Potter impresses

HASSAN CHEN/COLLEGIAN

We the Kings opened up for Vermont-based rockers Grace Potter and the Nocturnals at the Fine Arts Center on Friday, Sept. 10. Though most people left after the first act, those who stayed were treated to an entertaining show.

By Acacia DiCiaccio
Collegian Correspondent

As a part of UMass' annual First Week events, We the Kings and Grace Potter and the Nocturnals played an intimate show put on strictly for students. While one band's desperate attempts at getting laid overpowered the power pop music they played, the other band wowed crowds of both dedicated fans and never-before listeners.

To everyone's surprise, the headliners We the Kings opened the show. Their performance featured a lot of audience interaction; with gimmicks such as shining a flashlight on the crowd from the stage, encouraging use of a "W" sign made with two hands, and throwing all instrument accessories at their fans.

They accomplished getting the crowd on their feet with their upbeat, bubblegum sound, but those who were there for the music were left unmoved.

We the Kings asked for a lot of audience sing-a-longs and many accredited the highlight of the performance to their cover of Jimmy Eat World's "The Middle."

The lead singer, donning a distracting head of voluminous red hair, paused during his acoustic set before performing the song "All Again for You" to inform the audience that the track was based on a true story – a story that involved him knocking on the window of the hottest girl in high school and whisking her away to hook up on the beach. Though hardly a believable story, a lot of girls seemed to be eating up his multiple compliments about how sexy everyone in the crowd was and comments about how many attractive girls he saw on campus that day.

We the Kings got to the point of sounding desperate when they randomly reported that it was the first time they had been to UMass, and the first time they were all single. The music that the band played only seemed to be a catalyst to getting laid that night.

The small venue only became more intimate when many left the show after the first set. The local, Vermont-based band, Grace Potter and the Nocturnals,

See CONCERT on page 5

played to a group of no more than 200 people. The band even made a stab at We the Kings when they asked the emcee to inform the audience that they were all STD free, apparently picking up on the previous band's pathetic attempts.

The difference between these two bands was phenomenal. From the moment the first note was struck, Grace Potter and the Nocturnals showed immense talent, and it was obvious that their focus was on sharing their talents and having fun. Potter herself seemed to be having a blast on stage, and it radiated through the music. Each song sounded immensely different. The opener, "Only Love," a bluesy track, immediately displayed Potters' aptitude and her sex appeal.

The band members stood out as well; the bassist was also a sexy female, and the drummer and guitarists seemed to be as enthusiastic about the music as the crowd was. Each member displayed their own musical talent throughout the performance.

Songs such as "Oasis" and "Tiny Light" turned into long jams that seemed to have everyone in an awed trance. The audience needed no cues to interact; clap-a-longs and a dance party in front of the stage ensued out of pure enthusiasm for the music. Potter even admitted to applying to UMass and not getting in, but all assumed it was for the best because otherwise the band would not exist.

The most moving point of the band's performance was when Potter stood solo on stage and performed a gospel-inspired piece about baptism entitled "Nothing But the Water Part 1", with merely her strong voice ringing throughout the venue. The silence found in the pauses between vocals resounded more than any other sound in the entire show. Not an echo of a note or a cough was heard; it was almost eerie how silent the auditorium could become when the crowd was so moved.

During the last song before the encore, each band member abandoned their instrument to drum on a designated piece of the drum set to create an extremely powerful drum solo.

Even those who had never heard of Grace Potter and the Nocturnals before this night were blown away by both the talent and creative entertainment factor that the band had to offer. No gimmicks were found during this performance, and also, no STDs.

Acacia DiCiaccio can be reached at adiciacc@student.umass.edu.

HASSAN CHEN/COLLEGIAN

We the Kings put on a performance that was geared more towards hormonal teenage girls than a mixed college audience. The pop-rock band seemed more interested in bringing girls home than playing its set.

Nothing 'Fancy' about Video Music Awards

By Kate MacDonald
Collegian Staff

MTV's Video Music Awards usually has a reputation for being a dramatic, controversial and highly entertaining show. Unfortunately, their 27th VMAs, held on Sunday, Sept. 12 at the Nokia Theater in Los Angeles, Calif. just missed the mark.

Chelsea Handler, the E! Network's resident Queen of Comedy, became the second woman to host the awards - Roseanne Barr was the first female emcee in 1994. Known for her late-night talk show "Chelsea Lately" and three bestselling memoirs, Handler is thought of nation-wide as a hilarious comedienne.

Last night, however, her jokes were either spot-on or missed completely, ushering awkward chuckles from the audience. While her bits with Lindsay Lohan and Jason Derulo were amusing, her skit with the Jersey Shore members, which involved Handler hopping fully dressed into a hot tub and coming out pregnant, seemed stilted.

Perhaps this performance could be attributed to the fact that once she took the stage in a Lady Gaga-like getup, Handler admitted, "In an interesting twist, I'm as high as a kite."

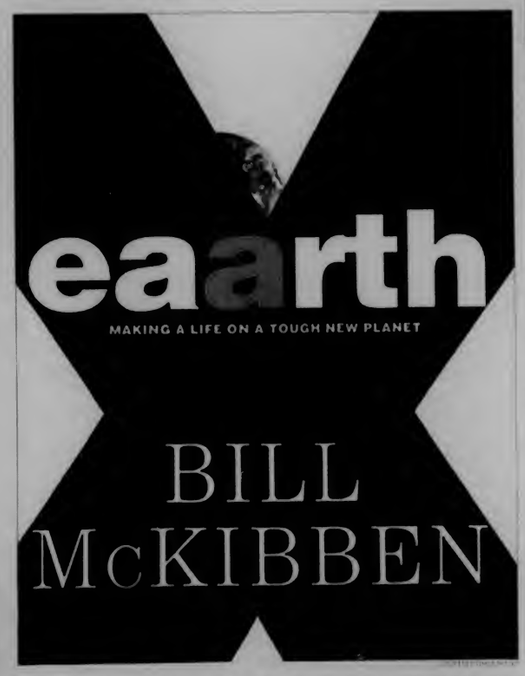
This light-hearted revelation followed a performance of "I'm Not Afraid" and "Love the Way You Lie," by Eminem. Despite telling "Entertainment Tonight" that she wouldn't be present, Rihanna provided backup vocals on the second hit, dressed in a costume that was part ballerina, part Little Mermaid.

Eminem was a big winner, taking the awards for "Best Male Video" and "Best Hip Hop Video," upsetting Drake in both categories. Drake, then, did not take home a single award Sunday night, which was somewhat surprising.

Lady Gaga, however, was the biggest winner of the evening, bringing home eight of the moon man trophies for categories including "Best Female Video," "Best Pop Video" and "Best Collaboration." She was eligible for 13 awards for her hits "Bad Romance" and "Telephone," and five for the collaboration with Beyonce.

See VMAS on page 5

The 2010 MTV Video Music Awards lacked the drama of past years and host Chelsea Handler's jokes were hit-or-miss throughout the show. Lady Gaga unsurprisingly reigned as the night's big winner across the board.



Bill McKibben's latest book is about a distopian planet called "Eaarth" that is eerily similar to the planet we may live on if we don't change our destructive habits, according the author.

McKibben's 'Eaarth' makes readers think

By Lily Hicks
Collegian Staff

Look up "global warming plus grandchildren" on Google and you'll find 585,000 responses, writes environmentalist Bill McKibben in his newest book, "Eaarth." Politicians and movie critics from the likes of Bill Clinton and Roger Ebert and, ironically, corporate icons like Richard Branson, chair of Virgin Airways, all use nearly-identical rhetoric to describe the guilty parts we play as creators of the hot, thirsty world that awaits our grandchildren. The problem, according to McKibben, with these moralized calls to action is that they are all lies. That hot, thirsty world we're trying to keep our grandchildren from encountering? It's ours already.

Welcome to Eaarth, a planet so irreconcilably different from the one we lived on not more than half a century ago that McKibben merited it a different spelling. The average temperature of the planet has risen a degree and a half Fahrenheit. Arctic melt has accelerated to such a degree that within a decade or two, "a summertime spacecraft pointing its camera to the North Pole would see nothing but open ocean."

The consequences of these phenomena have been observed across the globe. While the tropics expand - a further 8.5 million square miles, to be precise - they push the dry subtropics ahead of them. In 2008 in Australia, half the country was in drought and the following years have seen no improvement.

McKibben writes in the book that the executive director of the Water Services Association of Australia said, "We are trying to avoid the term 'drought' and saying this is the new reality."

In response, McKibben wrote "They are trying to avoid the term drought because it implies the condition may someday end."

And in America? In 2008, hydrologists in the United States predicted drought across the American Southwest had become a "permanent condition."

McKibben shoves statistics like these in front of his readers with little concern for their fragile consciences. More than once I found myself staring sheepishly at my white, 1992 Ford Taurus before opening the door and starting the engine. I smiled queasily at the vendors of a roadside farmer's market on my way to the supermarket to check out the specials on deli meat and strawberries. At least I remembered to bring my reusable bags?

But it is important not to confuse my guilt with resentment. The importance of this book to the world, particularly to developed countries, the largest global consumers of fossil fuels, far outweighs the discomfort experienced by the average American as he or she reads it. Three hundred and ninety parts per million of carbon dioxide flood our atmosphere today. That's 40 parts per million above the "safe" amount projected by James Hansen, the planet's leading climatologist.By "safe," he meant the number at which droughts don't become permanent, storms caused by increased oceanic temperatures don't routinely turn into severely damaging hurricanes, and the Arctic ice cap doesn't melt.

Kevin Anderson, a scientist presenting at Exeter University in 2008 during a conference on global warming, predicted before an audience of leading climate scientists that it was "inprob-

See EAARTH on page 5

Potter ends First Week

CONCERT from page 4

Swift sings about West; '10 VMAs disappoint

VMAS from page 4

"Videophone."

Gaga cried while accepting the last award of the night, "Best Video of the Year," for "Bad Romance." During her thank you speech, she revealed the name of her next album to be "Born This Way," and even sang a few lines of its title track.

The performances during the VMAs weren't all that impressive. Drake took to the stage with Swizz Beatz to perform "Fancy." Mary J. Blige accompanied as female vocalist, though she seemed a bit mature to be singing about getting ready to go out for the night.

Justin Beiber and Usher both sang as well, though they showed off their dancing skills much more than their vocal stylings, choosing to rely on previously recorded tracks.

Taylor Swift performed live, and she did a great job for someone who doesn't always have a good track record where live performances are concerned. She sang "Innocent," a song unofficially dedicated to Kanye West. At last year's VMAs, West stormed the stage when Swift won "Best Female Video," yelling that Beyonce should have won.

West performed a track about the controversy as well, singing, "I always find something wrong, you've been putting up with my sh*t for way too long." His performance was decent. The same can be said about Linkin Park, B.O.B. and Paramore.

Florence and the Machine sang "Dog Days are Over," known as the song from the "Eat, Pray, Love" previews. She didn't need to rely on a backtrack or choreography, though that was impressive too. Showing her talent through her strong voice and impressive range, she had what was probably the best performance of the night.

Unfortunately, the 2010 VMAs were rather boring. There weren't really any surprises or controversies, and nothing truly impressive enough to keep the viewer's attention. Lady Gaga was bound to win in just about every award she was nominated for, the Swift/ Kanye event was definitely going to be brought up and teenage girls were going to be seen having conniptions when Justin Beiber appeared.

Nothing new was brought to the table, and this year's VMAs was just another award show. But when MTV is a station that's now known more for shows like "Jersey Shore" and "Teen Mom" than having actual music, is anyone really surprised that the 2010 VMAs were mediocre at best?

Kate MacDonald can be reached at kaitlynm@student.umass.edu

'Eaarth' an eerie read

EAARTH from page 4

able" that the world would be able to stave off 650 parts per million in the years to come. Six hundred and fifty parts per million equates to a rise of seven degrees in the global average temperature.

And you thought this summer was hot.

In a normal world, problems - even big ones - respond well to "comfortable" solutions. Comfortable solutions allow us humans to continue to burn our oil, mass-produce our food, and grow our economies exponentially.

But this is Eaarth. Things don't work the way they used to. To accommodate this change, McKibben proposes solutions that will seem radical to a business major. He applauds Woody Tasch, founder of the Slow Money movement, which hails a steady, three or four percent return for businesses over a 20 percent annual gain. He'll take Berkshares - a local currency native to our very own western Massachusetts - over greenbacks any day. In McKibben's utopia, suburban families use their yards for gardens instead of pools.

Weaning ourselves off of fossil fuels, off of exponential economic growth, off of high fructose corn syrup and imported strawberries in the dead of winter, won't be "comfortable." But it will be necessary; it is necessary. McKibben's wry humor carried me through what was a largely depressing book, and his recounting of a few promising figures such as "...the consulting firm McKinsey estimated in 2008 that existing technologies could cut world energy demand 20 percent by 2020" might just carry me through what is a strongly fought-against transition.

Bill Clinton, Roger Ebert and Richard Branson would tell you to read this book for your grandchildren. But what if you don't plan on having grandchildren? If you don't even like kids? Or just the idea of your kids having kids? Because the planet has changed, and we're doomed if we don't change too, McKibben would tell you that, if nothing else, you should read it for yourself. And, if it means anything to anyone, I agree.

EDITORIAL OPINION

TUESDAY, SEPTEMBER 14, 2010

"If we don't believe in free expression for people we despise, we don't believe in it at all."- Noam Chomsky

EDITORIAL@DAILYCOLLEGIAN.COM

New McGuirk seats are total bust

Nick O'Malley

The University of Massachusetts has a great marching band. They put on a great show for halftime, postgame and in the stands.

They're so great, in fact, that due to the movement of the student section at McGuirk Alumni Stadium, it is mostly those who pay for tickets that get a good look at them.

As any student who has gone to either of the two football games this year has noticed, the student section, previously located on the home sideline, was flipped to the other side of the field, which is the away side.

In short, the location of the student section is on the less–desirable side of the stadium. Logistics, proximity to the midfield or non-student marketability do not matter as much.

Students who enter through the Big Y Student Entrance at McGuirk are currently directed to sit somewhere in sections 17-20, according to the UMass Athletics story promoting the change. The decision to move the seating is promoted as being a change that will move students closer to the field because it allows students a wider selection of seats near midfield. The problem with that argument is that McGuirk is not very big, certainly not big enough to have any bad seats. Unfortunately, this also presents a number of other issues, which follow in no particular order:

1. The Sun. The student section is on the east sideline. The sun sets in the west. Sure, some kids may get a great view - great enough to make out Kyle Havens somewhere in the glare. However, most visible from the student section are the non-student sections located in the comfortable shade. This is a major issue if you are Irish.

2. It's the away sideline. Putting the student section behind the opposition's bench is a popular move at places like Louisiana State's stadium, also known as "Death Valley." UMass, however, has the students way too far away from the field to make a difference, and its fans don't exactly make the same amount of noise as Tigers fans.

Also, being at the away sideline, it shouldn't come as a surprise if a student were to sit next to a crowd of Holy Cross fans, or that silly four-piece pep band they sometimes send.

3. No one's looking. Being the UMass band, it would only make sense for the UMMB to play the pregame show and virtually all of the halftime show facing the home crowd. So remember Minutefans, stand, clap and cheer as your UMass Marching Band that you fund with your tuition plays towards other people.

4. The bathroom's further away.

5. Most of the seats in the student section were really good seats, if a little off-center. Someone's parents are now sitting there.

In short, the location of the student section is on the less-desirable side of the stadium. Logistics, proximity to the midfield or non-student marketability do not matter as much. Students now have worse seats. Now, it does make some sense to spread people throughout the stadium. There is less traffic on the stairs and around concessions. We do that call-and-answer "U . . . Mass" chant much better. It also better evenly spreads the exiting masses.

However nice it is to use the whole stadium, it shouldn't be the students who are tossed to the crappy end of the stadium. Where do the students sit at basketball and hockey games? Answer: the home side. Why? The home fans sit on the home side. Is it the school putting the rabble on the other side of the stadium to appease the non-student fans (the parents and kids that pay for their tickets)? Maybe.

It wouldn't be without precedent, as hockey teams regularly lobby for students to be less vulgar at hockey games. Though it would be nice to appease both sides, it doesn't make sense to leave students out in the boonies.

Some students at Saturday's game were understanding of the move. Others, like sophomore Billy Rainsford, think the move "sucks," but understand that "they need to make room for non-students."

Junior Jeremiah Driscoll vehemently disagrees and suggests that the person who made him sit there should do something that is not even close to publishable. To be fair, students are able to get seats on the home sideline, as spillover begins to fill section 10 during the middle of the first quarter. In addition, due to general admission, they can look for a seat anywhere on that side.

The majority of seats meant for students on the home side, though, would remain empty with a smaller crowd, leading to a bigger issue. The problem created by putting the student section on the away sideline is that the home fans are prevented from sitting by their own sideline.

There is no problem in catering to the non-student crowd. Ticket sales and endorsements from local companies (like the Official UMass Supermarket or whatever. So, do I get paid now?) are major components in how the athletic department should market each sport.

The lifeline of each UMass sport though, should and always will be student attendance. It's the number one reason why the hockey team has skyrocketed in popularity in recent years.

If the school wants UMass students to show up and cheer like they do at hockey games, then it should give them the same seating as at hockey games: front row, home side, everyone else get out of the way.

Nick O'Malley is a Collegian columnist. He can be reached at normalley@student.umass.edu.

UM hackerama proliferates with new hire

Shane Cronin

The bureaucrats at the University of Massachusetts are at it again. Administrators love to trumpet the precarious financial situation in which UMass finds itself, and yet they've managed to induct a new hack. That's right.

Student fees were raised last year by $1500 to close a $100 million budget gap, but there was somehow some extra cash in the till for Christopher Dunn: the new Director of Public and Constituent Relations. This summer Chancellor Holub hired Dunn to fill the brand new executive position at a salary of $78,500. In order to accommodate Mr. Dunn and another "gift fundraiser," the University is shelling out 63,000 bucks a year for an office in downtown Boston's financial district. The Chancellor notes, "by bringing someone with Chris Dunn's experience and background to our reorganized team, we've got the right pieces in place to make real strides in Boston and to win greater support for the Commonwealth's flagship campus."

The Chancellor certainly has the "experience and background" part right. If there's one thing Chris Dunn has, it's experience. He's spent the last several years working in the Office of the Counsel to the Senate, the Office of the Clerk of the Senate, as well as interning for U.S. Representative John F. Tierney. In other words, he's fully integrated himself among Beacon Hill's culture of hackerama.

The Boston Herald's payroll database has Christopher Dunn listed as earning $63,000 as "Senate Default." This means the new director gig comes with a $15,000 raise.

The fiscal reality is there are hundreds of people employed by the University with salaries well over $100,000.

The Chancellor's costly decision to hire Dunn starkly contracts his rhetoric of last year when he chided opponents of the student fee increase who weren't "...taking into account the fiscal realities."

With all due respect, Chancellor, the fiscal reality is President Jack Wilson was awarded a 15 percent pay hike as students were shouldered with a $1500 fee increase. The fiscal reality is there are hundreds of people employed by the University with salaries well over $100,000.

A few are making over half a million. In addition, according to a July Masslive.com article, the UMass system has completed or planned hundreds of millions of dollars in construction projects over the last several years including a $400 million science center in Worcester, a $70 million technologies center in Lowell, and $12.5 million dollar police station, which is set to open early next year.

Furthermore, the Worcester project is one of the largest in New England. That doesn't sound like financial straits to me. So why now, is there a need for Mr. Dunn?

Some would argue that Mr. Dunn is the perfect solution for hitting up the State House hacks in the legislature for more campus dough, being a "veteran" staffer and all. I, however, have a brilliant idea to address "administrative reorganization" (to borrow a phrase from the Chancellor) that requires no task force, advisory committee, joint- · collaborative effort or bureaucracy of any kind.

Eliminate all administrative positions that earn $200,000 or more as well as half of the positions earning $100,000 or more. Although we'll miss our well paid empty suits, we'll find a way to forge onward. I'm sure there are plenty of other universities out there in need of vices, deputies, and assistant associates.

UMass is certainly no stranger to hackerama. Just before Jack Wilson's appointment as head honcho, the brother of one of the FBI's most wanted, Billy Bulger, was President.

His tenure was marred by secrecy and corruption. He resigned under intense pressure from Governor Mitt Romney in 2003. Bulger refused to fully cooperate with a Congressional investigation concerning his outlaw brother, James "Whitey" Bulger, who has been on the lam for over a decade. Despite his scandal-plagued departure, Bill Bulger enjoys an annual pension worth over $200,000, courtesy of the Massachusetts' taxpayers.

When the economy bounces back, the $1500 fee increase won't be revoked. Administrators know it will be yesterday's news by the time they're forced to close the next "budget gap." Despite future bumps in the road, expensive construction will likely still be booming.

Perhaps even the rotary by the Lederle Graduate Research Tower will be completed by then. You won't see any more professors, but you'll see a large influx of students. The President will continue to receive raises and lucrative benefits, and Chris Dunn's director position in a cushy downtown Boston office will exist in perpetuity.

Change begins with your vote

Roy Ribitzky

Student voices are a mere whisper these days. Using our collective voice and influence on this campus is vital to continuing reform here at the University of Massachusetts. For three days beginning Sept. 28, the Student Government Association will hold elections for its student representatives. It is imperative that we all take the 20 seconds to vote in support of our fellow students in order to develop a more unified student body.

I was one of those students who thought the SGA was a joke. I actually never heard of it until the end of freshman year, despite the fact that I was a community leader using funds from the SGA to support community building initiatives. I found myself split between having no respect for the SGA and seeing it as a window of opportunity.

I kept on having to make sure I was living in the 21st century during the online voting debates. Should we have online voting or not? The fact that it was even a question was outrageous. In the era of Facebook, digital voting in national elections, e-mail, and BlackBerry messaging,

I was irritated by the fact that some individuals felt that a mere voting process on Campus Pulse would hinder the ability of the SGA to actually do something on campus.

mittee is made up of faculty, staff, SGA members, and, most importantly, students.

What does this have to do with voting for SGA representatives exactly? I am using this story to show that when the right people are elected, we the students gain a powerful voice in the administration.

Jean Kim specifically invited students to this committee. While it was a tragedy that caused us to move forward, it happened, nonetheless. While this is an extreme case, this is still an example of average students working with the SGA to advise Whitmore. This is the change we need on campus, and the only way to get there is for all of us to vote.

In an ideal situation, let's say that 10,000 students vote this month. That roughly represents the majority of on-campus residents. When that newly inaugurated senator goes into a meeting with the Vice Chancellor or Dean of Students with a proposal to cut textbook prices, or plans to help create new residence halls, or ways to curb students from falling behind in school, the administrator will know that he/she has thousands of students backing him/her.

In other words, our voices cannot go unheard. We know two things: barely anyon bothers to vote in SGA elections, and that with the right mix of people the student body can achieve significant

We're the game changer UMass has been looking for, and the game starts on Sept. 28.

After the initiative passed, voter turnout was discouragingly low. Is it all that surprising? Students were laughing at the pointless debates taking precedent over the real issues. I don't want to say I lost hope – it's not like I had any to begin with. I was more disappointed in the divisiveness and lackluster performance of our SGA.

Interestingly, it was a campus tragedy that got me thinking that the SGA could actually turn things around with the right people in place. It got me thinking that perhaps power truly does lie within the student body, and that the administration can work with us as opposed to just above us.

The Boston Globe printed an article about how an admitted rapist avoided virtually any punishment from the UMass administration. This tapped into a wide spectrum of feelings and emotions, which are still felt today.

I wrote an editorial in the Collegian about what we, as students, could do to change the campus culture of violence. One of the e-mails I received was from a senator in the SGA. He told me how he had been trying to get a student-run committee to look into ways to end sexual assaults on campus for about a year, but that he wasn't gaining traction.

While that group is now winding down, many of the members are a part of the Catalysts for Campus Culture Change, which was just officially charged by Vice Chancellor of Student Affairs Jean Kim. This comclout in our community.

While these elections have nothing to do with national taxation or war, these elections are about creating a bright future for UMass. I am often skeptical of new policies the administration devises, especially if no students are involved in their crafting. That being said, students must work in conjunction with the administration or else everyone loses.

I have two years left at UMass. I figure if significant changes in the SGA occur, I will be graduated before they are fully implemented. The current class of freshmen and future students will be here to witness the improvements, however. At some point, perhaps even our younger siblings or our own children might go here.

That project the SGA worked on with students and administrators might become reality. I won't try to make these elections bigger than they are, but I will point to the importance of having a voice.

If anything, students need to play a major role in the remodeling of UMass. We're the game changer UMass has been looking for, and the game starts on Sept. 28.

Matz, coaching staff brings new formation ideas to Rudd Field

Maroon & White aspire for more competitive side

By David Martin
Collegian Staff

As the year advances closer and closer to the start of the 2010 season, change is heavy in the air for the Massachusetts women's soccer team.

UMass saw a change at the top of the chain in hiring head coach Ed Matz from Northeastern. Matz, who is coming off two of the best seasons in Huskies' history, earned the 2009 Colonial Athletic Association Coach of the Year. He helped lead NortheasternU to its first ever CAA regular season title with a stunning 12-4-3 record.

Also arriving with Matz are assistant coaches Brendan Faherty of New Haven and Abby Shiffler of the University of Pennsylvania. All three coaches bring impressive resumes highlighted by achievements and success, which they hope to carry over to Amherst.

"This year is definitely going to be a learning year for us," Matz said. "It's a new season and there are going to be new roles and new approaches to the game."

Matz's biggest change of pace for the Minutewomen is in the formations on the field.

Last year, the team played a 4-5-1 line, a heavily defensive brand of soccer which through increasing the level of protection in the home zone, leaves more to be desired on offense.

During its last campaign, UMass allowed 33 goals compared to the 15 it scored, a major influence in the team's change of pace. Matz is changing that to a 4-3-3, which should bring more offensive pressure and incite a more "exciting brand of soccer."

Another change which is boosting the team is a large influx of young talent.

A total of 10 new players arrive, all of whom are freshman and are looking to increase the dynamic and versatility of the team. Aside from fresh talent and great potential, Matz is most excited for the newest edge his squad now has.

"It's going to be more competitive on this team," Matz said. "Each player is going to be working as hard as possible, both individually and as a team, to prove that they deserve that starting spot on the roster. Everybody is pushed to be better."

A big key to that competitive edge, Matz says, is the leadership skills and work ethic set by the team's five seniors.

"I could not be more pleased with our seniors," he said. "They worked very hard in the offseason, got into great shape and came into practice with a great desire to win. They have excelled at all the fitness tests and set the tone for how the season is going to go. They play great roles on this team."

With a great mix of veteran know-how and young talent, Matz is expecting the Minutewomen to be among the top six teams in the Atlantic 10.

Last season, UMass finished with a 6-11-2 record, including an even 5-5-0 record at home and a disappointing 1-6-2 record on the road. To establish themselves as a dominant force in the conference, the Minutewomen will need to have a very strong record at home and at least an above-.500 record on the road.

"The biggest challenge on the road lies in the team's preparation and mindset going into the game," Matz said. "We are going to change how we prepare for road games and how we work towards the physical stress that accompanies traveling to the opposing field. We have to be able to adjust to not playing with the advantage of home field."

With all the tools and abilities at UMass' disposal, Matz feels that the greatest assets are the teamwork and defense. With those, he feels that the girls can grow into a team capable of playing strongly through the season and into the playoffs.

David Martin can be reached at dmmartin@student.umass.edu.

A new coach will bring a new game to the Minutewomen, including a switch in their formation. Last year, the Minutewomen finished 6–11–2, including a 5–5–0 record at home.

UM falls in weekend invitational, injuries effect Minutewomen

By Eric Mansfield
Collegian Staff

The Massachusetts women's cross country team took an eighth place finish in the Boston College Invitational this past Saturday.

The 10-team meet included some of the top programs from around New England. Boston College, New Hampshire, Maine and Brown all participated, with the Eagles taking first place.

Courtney Baldwin crossed the line first for the Minutewomen and completed the five kilometer course in 19 minutes, three seconds. Senior Gina Perno finished right behind Baldwin with a time of 19:04. Senior Elizabeth Fisk ran a personal best of 19:10, while juniors Karen Roa and Jennifer Harkey finished with times of 19:11 and 19:27, respectively.

UMass coach Julie LaFreniere said she was devastated by the team's performance, adding that it was "definitely subpar."

LaFreniere said that it's possible it's only a matter of confidence and not having the opportunity to race since last spring during track and field season.

LaFreniere also mentioned the speed of the course, especially the first mile, saying that some of the girls may have seen their splits in the first mile and thought they were too good. Having seen that, they backed off too much, not keeping their pace.

"They ran hard. I don't feel they raced hard," LaFreniere said.LaFreniere figured the Eagles would do well in the meet, noting their traditionally nationally-ranked standing. For LaFreniere, one of the downsides of the meet was witnessing eight Wildcat runners pass before one Minutewoman graced across the line.LaFreniere is impressed with the team's training.

"Up until Saturday I was really excited," LaFreniere said. "Up to this point the team's workouts have been superior to where they were last year. Now it's just a matter of taking that same attitude in training and bringing it to the races."LaFreniere stated that the team will progress and that it will take a lot of work to do so.

"We need to be tough competitors. I don't want just a good training squad," LaFreniere said.UMass will have plenty of opportunity to show they can run with the best starting this weekend, as Boston College will come to Amherst on Saturday for the team's first home meet. LaFreniere is glad the Eagles are coming and that she wants her athletes to race against the top women.

This meet will serve as an opportunity for redemption, as the Minutewomen look to gather strength from each other and have more pride in their running.

LaFreniere added that a few of the top runners on her team were unable to compete due to overuse type of injuries. Senior Lauren Stocker and freshman Mary Cole sat out the race, however they completed a workout on the course pain-free.

Eric Mansfield can be reached at eamansfi@student.umass.edu

JED BERNSTEIN / COLLEGIAN

UMass trails behind as they did at the Boston College Invitational last Saturday. The Minutewomen finished in eighth place behind rival school New Hampshire.

GET A 5% REBATE ON TEXTBOOKS

It's easy to get your 5% rebate on textbook purchases from the
UMass Textbook Annex

Here's how it works:

Step 1: Purchase your books from the UMass Textbook Annex.

Step 2: Bring your receipt and UMass I.D. to the UMass University Store in the Campus Center between the fourth week and last day of classes.

Step 3: Get a 5% rebate credit to use on anything at the UMass University Store.

UMASS AMHERST UNIVERSITY STORE AND TEXTBOOK ANNEX
Amherst Campus Center | umass.bkstr.com

Rebate offer is good only on textbook purchases. Valid ID required. Returned books not eligible for rebate. Textbook receipts must be presented during the semester purchases where made. Store rebate credits expire at the end of the semester they where received. Rebate not to exceed $50.00 per semester. See store for details. Restrictions apply.

Quality In Everything We Do

JMU defeats No. 13 Virginia

Dudzik led JMU offense with two touchdowns, Dukes ascend four spots to No. 11 in FCS

By Stephen Sellner
Collegian Correspondent

The James Madison football team pulled off a high-profile victory on Saturday as they defeated No. 13 Virginia Tech, 21-17. JMU coach Mickey Matthews, who won the FCS National Championship in 2004 coaching the Dukes, was ecstatic over the victory.

The JMU defense came up big in the second half with clutch defensive stops in the red zone, capturing any momentum from the VT sideline. With nine minutes, 41 seconds remaining in the contest, the Dukes forced a turnover on downs after deflecting Hokies quarterback Tyrod Taylor's pass at the goal line. Just four minutes later, the Hokies coughed up the ball at the JMU 10-yard line, forfeiting their possession and ending a possible game-winning drive.

Dukes quarterback Drew Dudzik led the JMU offense with two rushing touchdowns and another through the air.

After the final kneel down by Dudzik, the Dukes sideline stormed the field in triumph and disbelief. James Madison marks only the second team from a lower division to defeat a nationally-ranked team. The first was Appalachian State's shocker over Michigan in 2007. VT players and coaches can only attempt to let their second straight loss sink in. Saturday's loss marks the Hokies' first home loss in 33 games against nonleague opponents.

James Madison appears to be back on track after a disappointing 6-5 mark the year before. Last season was highlighted by a four game losing streak in October, in which the Dukes lost heartbreakers to Hofstra, Richmond, Villanova and William & Mary.

Despite their shortcomings last season, the Dukes seem ready for another Football Championship Subdivision National Championship run. James Madison ranks 11th in the coaches poll through two weeks, jumping four spots from the week before.

Virginia ends losing streak

On Saturday, Virginia overpowered Richmond, 34-13, in a game which snapped the Cavaliers' four-game losing streak in season openers.

During the offseason, former Cavaliers receiver Latrell Scott was named head coach of the Spiders. In addition, the man Scott replaced was on the opposite sideline on Saturday as Mike London, the former Spiders' head coach, was named to the same position with the Virginia in December.

Both London and Scott brought assistant coaches from their previous locations with them to their new teams, including former Richmond defensive coordinator Jim Reid joining London with the Cavaliers.

CAA names POW

JMU quarterback Drew Dudzik earned the Colonial Athletic Association Offensive Player of the Week honors after leading the Dukes over national powerhouse Virginia Tech.

Dudzik rushed 12 times for 35 yards and a pair of touchdowns, while also going 5-of-8 through the air for 121 yards and a touchdown.

Delaware defensive back Anthony Bratton earned the CAA Defensive Player of the Week honors for his contributions to limiting South Dakota State to a minimal three points in its 26-3 handling of the Jackrabbits.

Bratton anchored a Blue Hen defense that limited the Jackrabbit offense to only 250 yards of total offense.

The CAA Special Teams Player of the Week was B.W. Webb of William & Mary. Webb opened the scoring for the Tribe with a 64-yard punt return for a touchdown. He finished the contest with 73 punt return yards.

Delaware running back Andrew Pierce earned his second CAA Rookie of the Week recognition for his performance against South Dakota State. Pierce rushed for 165 yards and a touchdown. The Blue Hen back leads the league averaging 142 rushing yards per contest.

Also earning the CAA Rookie of the Week honor was James Madison linebacker Stephon Robertson. His game-high 13 tackles led the Duke defense to the monumental upset over Virginia Tech. Robertson forced a fumble late in the fourth quarter, which was recovered by James Madison to seal the game.

Stephen Sellner can be reached at ssellner@student.umass.edu.

During Stone's 23-year tenure as head coach of the Minutemen, 30 players have found their way to the major leagues. Stone claims UMass baseball program prepares players well for the next level.

Stone prasies baseball program, prepares players for next level

BASEBALL from page 10

year," Serino said. "About four or five days after the draft, I had a workout with the Nationals. After that, I started thinking 'OK this might happen.' I knew that I was going to be playing at the next level. I just didn't know when that was."

Serino is getting limited time with his new minor league club. In 10 games since joining the GCL Nationals, Serino is 1-2 with 16 strikeouts and a 2.93 ERA. He has pitched 15.1 innings in relief as the team makes room for rehabbing pitchers such as Scott Olsen and Chien-Ming Wang.

"It's really tough to get innings," Serino said. "When a guy gets hurt in the minor leagues or the big leagues, they come down here to rehab. It's crazy—I grew up playing with these guys in video games and now I'm standing next to them."

Leigh, 22 years-old from Somerset, Mass., was passed over in the MLB draft and signed with Seattle as a free agent. On June 25, he was assigned to the Mariner's' affiliate team in Pulaski, Va., a member of the Appalachian League.

After transferring from Barry University as a sophomore in 2008, Leigh pitched in 39 games as a Minuteman, starting 19 of them. He holds a 9-14 record with a 4.63 ERA and 128 strikeouts. Leigh began his senior season going 0-4 before registering five-straight wins. He finished 6-5 with a 4.80 ERA and 55 strikeouts in 12 games.

His performance out of the UMass bullpen and later as a starter made enough of an impression to garner the attention of Brian Nichols, the major league scout of the New England area for the Mariners' organization. Once he got the offer to play, his decision was a quick one.

"I was shocked, excited and surprised at the same time," Leigh said. "They told me they had a spot for me and I left the next day. It was either that or start looking for another job."

Leigh is given limited time on the mound for the Pulaski Mariners. He currently has 13.1 innings pitched in eight relief appearances. Part of the reason for Leigh not getting out of the bullpen is because of his extensive time spent on the mound for UMass. He now has a 1-0 record with a 1.35 ERA and 14 strikeouts.

Over 30 former players have now made the move to the professional level in Stone's 23-year tenure.

"UMass has always had the kind of baseball program that would have the kind of players that can play at the next level and we prepare them to play at the next level," Stone said. "It is something that we promote when we recruit and it is something we are very proud of."

New schedule gives UM, Kellogg time to earn wins, experience

By Adam Miller
Collegian Staff

Adam Miller

If you've gotten used to seeing the Massachusetts men's basketball team play some of the best teams in the nation on ESPN, you might not like this year's schedule.

In the first two years under UMass coach Derek Kellogg, the Minutemen have played two teams ranked in the Top 25 during their non-conference schedule. This season, they are taking a step back, focusing on playing games closer to Amherst instead of around the country.

The highlight of the schedule is on Dec. 4 when the Maroon and White will play Boston College at TD Garden. At the end of November, it will face New Mexico State and either Bradley or Southern California (which is a few years past the days of O.J. Mayo).

That's about as good as it gets this year, and I have no problem with that.

The Minutemen suffered losses above a 20-point margin to Michigan State, Baylor and Dayton. No matter how much a coach tries to keep a team on a positive note, there are only so many blowouts a team can handle before it starts to kill the morale of a team.

And after ending the 2009-10 season on a positive note with a First Round victory over Charlotte in the Atlantic 10 tournament and nearly knocking off Richmond in the Quarterfinals, the last thing Kellogg needs is to have his team take two steps back by playing a team like Duke or Syracuse.

Yes, UMass gets a big pay day out of it if Kellogg agrees to go on the road, and it might be a fun road trip to plan, but it's not practical in rebuilding a basketball program for the long term.

The priority for the Minutemen needs to be winning, especially with guards Gary Correia and Anthony Gurley being the only players with two years of experience playing for Kellogg.

There's no better way to do that than to schedule several home games against teams UMass should have little difficulty beating. In fact, it's very possible that the Minutemen go into their A-10 schedule with a winning record for the first time in Kellogg's tenure.

Going along those lines, Kellogg made a wise decision by not inviting Dowling – or any other Division II team – to the Mullins Center. Over the past two years, the Golden Lions have made the games perhaps a little too interesting for Kellogg's liking.

While Kellogg used this exhibition game as a way to mix and match lineups to figure out his team's roles, the matchup with the Minutemen was the biggest game of the year for Dowling.

As a result, Kellogg had to play his starters longer than he probably would've liked in order to scratch out victories both years.

This season, UMass won't have to worry about a Division II team going all-out at the Mullins Center as if it was an NCAA Final Four game, which should keep the confidence level high early in the season.

In addition to giving the Minutemen the best chance to win, Kellogg made sure that fans from around the state and New England would get to see his team as much as possible by scheduling 21 games within 90 miles of Amherst.

Having so many games close to home helps UMass rebuild a fan base it's lost ever since John Calipari left the program. It also helps that most of the games will be on television thanks to a deal made with CBS Sports.

Ever since Kellogg took over, he's wanted to make his team a household name in Massachusetts. This year's schedule is made to do just that.

The attendance numbers will probably reflect the fact that you don't care if the Minutemen can defeat Sacred Heart by 15 points. But this year, having a softer schedule with more manageable games is a better option than running the risk of losing by 30 points to a nationally-ranked powerhouse.

The current schedule will allow the younger players to develop and get used to a winning tradition so that when they're upperclassmen, they will be both the players Kellogg wants them to be and a team that is used to being successful.

Icy road ahead for Minutemen

By Nick O'Malley
Collegian Staff

(This article was originally published August 20 on DailycoHegian.com).

In the Hockey East, where top-tier teams, Hobey Baker Award finalists and national championship contenders so often reside, there's no such thing as a quick glance over the schedule.

Top to bottom, one of the strongest conferences in college hockey, the Hockey East has produced the last three consecutive national champions. So it should come as no surprise that, once again, the Massachusetts hockey team's regular season schedule reads like a laundry list of NCAA tournament favorites.

In addition to perennial powerhouses, including reigning champion Boston College and Boston University, the Mass Attack has a pair of non-conference series against two of the nation's top flight programs: Minnesota and Wisconsin.

All in all, UMass is slated to take on eight teams receiving votes in last season's final United States Collegiate Hockey Organization top-20 poll and five participants in the 2010 national championship tournament, including both teams from the national championship game.

To begin the season though, will be the usual scrimmage against New Brunswick, whose season will already be underway in Canadian Interuniversity Sport play. Then, the Minutemen are set to go to Minnesota to face off against the five-time national champion Golden Gophers twice to open up the regular season on Oct. 8.

The following weekend, the Minutemen open up their conference schedule with home-and-home games against the Terriers. Such an early season matchup has usually resulted in big weekends for UMass, which is 4-0-1 against BU in fall matchups over the last five years.

Following a home-and-home against Providence, which finished last in the Hockey East last season, the Minutemen dip back into their non-conference schedule in November at home against Army, Nov. 6 and the Swedish National Under-20 Team for an exhibition the next night.

Continuing with the pattern established last year, this year's series against New Hampshire will feature both games played at one site – this year being in Durham, NH. UNH finished last season ranked No. 12 in the USCHO poll before reaching the quarterfinals of the 2010 NCAA tournament.

The following weekend, UMass starts a three-game home stand, starting with Vermont, who finished last season with a loss against the Badgers in the NCAA tournament. The team will then take on Quinnipiac, who won last year's matchup 5-4 in overtime and sister school UMass Lowell, who finished fifth in the conference standings. The Minutemen will then face Maine before the holiday break.

After the holidays though, is where the schedule really heats up for UMass, as it heads to Wisconsin for a pair of games against the Badgers. The following weekend, the Mass Attack will head home to face the bulk of its conference schedule in an attempt to avoid the late season slides that have plagued them in the past. The renewed HEA play starts with ninth-place finisher last year Northeastern Jan. 7 and UNH the following night.

The Minutemen then face the River Hawks again in a home-and-home, which UMass swept last season, starting Jan. 14. The Minutemen then head up to UVM for two straight games against the Catamounts similar to the series format against UNH to begin a stretch of five-of-six road games.

UMass won the first game of its series against Vermont last year, but fell into a vicious 1-8-0 slide that dropped them from the top tier of the Hockey East standings.

UMass then plays a home-and-home against Northeastern, at reigning champs BC and at Merrimack before facing a final stretch that features six of eight games at home: home against BU, at Providence, home-and-homes against Merrimack and BC and finally, two home games against Maine.

Nick O'Malley can be reached at nomalley@student.umass.edu.

UMass looks to improve its stamp on the Hockey East division this upcoming campaign. The Minutemen finished last year with an 1-8-0 slide that eliminated them from playoff contention and will open up this season against New Brunswick.

Serino, Leigh move to majors

By Dan Gigliotti
Collegian Staff

(This article was originally published August 16 on Dailycollegian.com)

Massachusetts baseball players Nick Serino and Bryan Leigh signed with major league squads this summer, after concluding their careers as Minutemen.

On June 9, the junior left-handed pitcher, Serino was first pick in the 37th round of the Major League Baseball First Year Player Draft by the Washington Nationals. On June 24, right-handed pitcher Leigh signed a contract with the Seattle Mariners.

"We're happy for them," UMass coach Mike Stone said. "They had good enough years and showed enough potential to be [signed]. It's a great opportunity for them and hopefully they make the best of it."

Serino, a 21-year-old from Saugus, Mass., is the latest of 75 Minutemen to be selected in the MLB draft and the first since Washington selected left-handed pitcher Mitchell Clegg in the 21st round in 2009.

Serino opted to forego his senior year at UMass to sign a minor league contract with the National's' affiliate team in the Rookie Gulf Coast League in Viera, Fl.

"If I went back to school, I could have gotten drafted higher or been a senior-sign," Serino said. "I didn't know what was going to happen. I thought if I had a good year, I could get picked up."

Serino posted a 2-6 record with a 6.72 earned run average in 11 starts this past spring and ranked 21st[st] in the nation in strikeouts per nine innings (10.72). His 83 strikeouts rank ninth in the program's history for a single season.

In his career at UMass, Serino threw in 39 games, including 26 starts, going 9-14 with a 5.67 ERA. He leaves sixth all-time in career strikeouts (189).

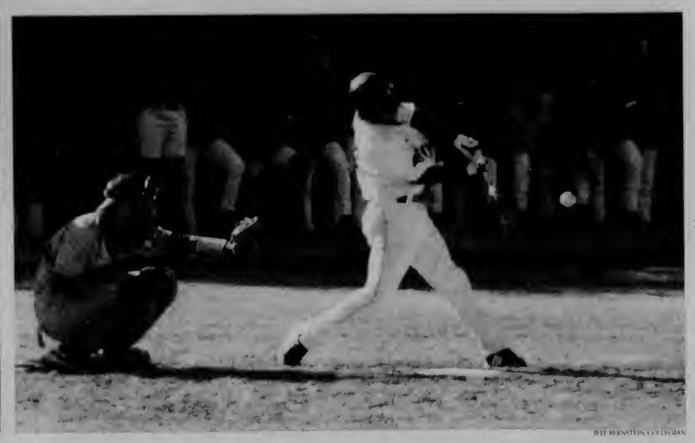
Serino pitched for the Lowell All-Americans of the New England Collegiate Baseball League during the summer of 2009 where he earned an all-star selection. His performance that season reaffirmed his confidence that he could take the leap to the professional level.

Serino's decision became easier after a workout he had with Mike Albert, a scout for the Nationals organization, who helped Clegg get drafted last year.

"On paper, I didn't have a great

See BASEBALL on page 8

The upcoming schedule for the Minutemen would have a healthy effect on the team, providing them time to build their roster.



UMass players Serino and Leigh will move the majors despite the troubled season the Minutemen had. While Serino signed on to play with the Washington Nationals, Leigh, who went undrafted, signed with the Seattle Mariners.

Presidential Commitee fields questions

The Search Commitee meets with community to discuss qualifications of new UM President

By Mathew M. Robare
Collegian Staff

Presidential Search Committee headed by Vice-Chairman Henry Thomas III third from left answered inquires by students and members of the UMass community Tuesday September 14.

The University of Massachusetts Presidential Search Committee held a public forum yesterday morning to hear questions and concerns from students, faculty and staff.

The panel was presided over by Henry Thomas III, Vice-Chairman of the search committee and an UMass trustee from Springfield. He said that the panel's purpose was to establish common interests and hear opinions on the qualifications the presidential finalists should have, as well as answer questions about the search process. Also present were Jan Greenwood, Betty Asher and Marion Frenche of Greenwood/Asher & Associates, a firm the committee hired to facilitate the search; Professor Mari Castaneda of the communications department and Paul Reville, Massachusetts secretary of education.

"This is a great opportunity to hear from the front lines about your thinking," Reville said. "The Amherst campus is the crown jewel of the education system. I want to say how much we appreciate the leadership, faculty, staff and students. We are proud to have this campus as our flagship."

"Amherst is pretty doggone good," Thomas added.

The committee formed in March after President Jack Wilson announced he would step down at the end of his term on June 30, 2011. It consists of trustees, professors and students.

"We don't want somebody who's a wannabe chancellor or wannabe provost," Professor John McCarthy of the linguistics department said. "We want someone to be the system's liaison to legislators, the governor's council and business leaders. The president should look outward."

The issue of presidents micromanaging campuses came up again and again. "Outreach is the role of the president, not micromanagement" said Ernie May, Faculty Senate secretary and music professor. "We resist micromanagement. We've had our collaborations and we've also had conflicts with previous presidents."

"The number one thing the next president has to be is an advocate against the privatization of public higher education," said Professor Max Page of the architecture department. "The students and their families pay more to operate this institution than the Commonwealth of Massachusetts."

Page, a former president of the Massachusetts Society of Professors and a member of the Executive Committee of the Massachusetts Teachers Association explained further. "Privatization means that more money for the University is provided by families—private dollars—not from the commonwealth's budget. This has been a huge trend over the past 25 years. There's less money for everything."

"The next president should embrace the mission of higher education," said Audrey Altstead, professor of history. "I want to see candidates who have recent classroom experience and instead of rhetoric the things they say should have solid, obvious, intellectual content. The next president should also demonstrate respect for the faculty. When we're called 'world class,' that is, in my mind a sign of Big Y and not applicable to faculty."

She added that she would like to see a diverse pool of candidates, with women and people of color being considered as finalists. She said that that would restore confidence in university leadership.

Debora Ferreira, executive director of the Office of Equal Opportunity and Diversity at UMass Amherst, echoed those concerns. "The president should take into account issues of diversity," she said. "Especially in these hard economic times diversity gets put on the back burner."

"We would like to see a president who respects us," said graduate student Sarah Hughes on behalf of the Graduate Employee Organization. "The president should support grad students."

"We need somebody who is willing to talk with unions," said grad student Anna Nitowe of the GEO. "Candidates always say they're willing, but their actions do not always reflect this."

Page agreed. "In our relationship with the UMass president we've had ups and downs. The present chancellor has been very difficult for unions to work with. The point is for the leaders to work with the unions to advocate on behalf of higher education funding."

AIDS activist Jones To speak at UMass

By Michelle Williams
Collegian Staff

In celebration of the 25th anniversary of the Stonewall Center at the University of Massachusetts campus, AIDS activist Cleve Jones will speak, kicking off a semester-long speaker series.

"An Evening with Cleve Jones: Four Decades of Activism," is scheduled to begin at 8 p.m. on Wednesday, Sept. 15, in 65 Bartlett Hall. Jones' discussion, focusing on the AIDS movement, will be the first of several dozen speakers, each covering a different topic affecting the LGBT community.

"To mark the occasion of the 25th anniversary, we decided to look back [on] the past 25 years," said Genny Beemyn, director of the Stonewall Center. "I wanted to do something each week that would bring in scholars, activists, artists, and also local talent."

When considering issues that affected the LGBT community over the last quarter of a century, Beemyn and other organizers narrowed the list to 10 topics including politics, transgender rights and politics.

Facebook keeps kids in shool says Professor

By Ashley Berger
Collegian Staff

In the midst of writing papers, doing quizzes on SPARK, and attempting OWLs, there is another key component to daily life at college: Facebook.

Facebook is a social networking site that is slowly becoming an inherent, permanent, and compulsive part of most collegiate student's lives. With the ever-increasing Facebook phenomena, researchers are constantly conducting new studies to discover potential links between the usage of Facebook and academics.

In a 2006-07 study at Abilene Christian University located in Abilene, Texas, active Facebook users were found to be more likely to return for their sophomore year than infrequent users. Of those, the returning sophomores had 27 more friends and 59 more wall posts than students who chose not to return to the university.

"The variable we believed to be predictive of student retention was social connection, having a lot of friendships on the campus," said Richard Beck, co-author of the study.

Beck's study found that social networking made it easier for freshmen to make new friends, but also increase finding and developing deeper relationships with these friends.

Beck also believes that even though Facebook won't change a student's personality, it will reflect a student's social tendencies in the classroom. "For extroverts, Facebook makes getting involved with extracurricular activities even easier. They can quickly seek out, join, and make contact with the people they have met on campus," said Beck. For introverts, Facebook might give them a method to find and foster relationships that is less dependent upon the social skills and energy of extroverts."

Other studies have shown that there is no correlation

New social networking site Claims to be for college only

By Tim Jones
Collegian Staff

Are you one of the students who's tired of the random online wall posts from your parents or friends uploading embarrassing photos that you don't want others to see? You're answer may soon be here, thanks to www.collegeonly.com, a website that combines certain elements of social networking with a community of only college students.

Created by Josh Weinstein, the site only allows students with a college e-mail address to sign up, though, the current number of schools is still very limited, considering the site launched at the beginning of the month.

The University of Massachusetts has yet to be added to the list, but popular demand will hasten the process.

Students can post anything on the site, including pictures they wouldn't want people, such as parents or future employers to see and have discussions without their entire family finding out.

With such categories as "after party," "missed connections" and "events," students can label the content they want and keep utmost privacy on the material they don't want to fall into the wrong hands.

Weinstein said in a phone interview that he felt there was a need for a college networking site.

"I got the idea from GoodCrush, because I think there is a need for college students to connect, but not necessarily for dating," he said.

He also says that the site isn't necessarily about hiding all of your secrets online and going wild.

University Professor explores mines for scientific inquiry

By Cameron Ford
Collegian Staff

An assistant professor in the geosciences department at the University of Massachusetts went on an excursion to S.D. this summer to examine a defunct gold mine for its research potential.

Professor David Boutt traveled to the now-abandoned, 8,000-feet-deep Homestake Mine in Lead, S.D. along with a select group of researchers. Their objective was to study rock dynamics and water flow deep underground as a suitability check for the successful construction of the National Science Foundation proposed Sanford Deep Underground Science and Engineering Laboratory, a $900 million project.

According to Boutt, the idea to create an underground laboratory has been around for quite some time.

"About 10 to 15 years ago, the NSF, along with the Department of Energy...started looking into trying to develop a deep underground lab in the U.S.," he said during a phone interview. "So they kind of put forth a number of solicitations...from people who wanted to put together a deep lab."

These solicitations were for possible locations for the new lab and after a lengthy review process, the Homestate Mine was eventually dubbed the best location.

"South Dakota was chosen because of a number of different reasons," Boutt went on. "The rock type was ideal, the actual mine itself was being closed...and the mining company actually gave the mine to the state of South Dakota."

He added that the mine already has some 18 miles of tunnels and shaft ready for experimenting.

Currently, several groups are competing for their experiments to be installed in the DUSEL. Boutt's group is championing a project that involves studying carbon-based micro-organisms deep underground.

"The proposal's really motivated by what the subsurface biosphere looks like," he said. "There are a lot of estimates that suggest that about half of the carbon mass is actually underground in the form of microorganisms."

Blouut added that further research into these microorganisms provide a new perspective on the origins of life.

"A lot of these microorganisms...don't use oxygen as an

College only website hopes to enhance the college social scene

COLLEGE from page 1

"We definitely don't want people to put up pictures of themselves drinking or doing drugs," said Weinstein. "Once stuff like that goes on the internet, it's only a matter of time before someone finds it somehow."

He added, "What it's really about is removing parents or employers from the equation of what you're doing on a daily basis in your social life."

Sophomore Amy Piermarini likes the concept of the site and the idea that she could escape from the younger generations.

"I think that site would be cool because you won't have to deal with the immature high school kids," she said.

Piermarini added, "It's also a good idea to not let jobs be able to look at personal information."

As far as relations to Facebook, the most popular networking site online, Weinstein says that he isn't trying to replicate it or compete against it in any way.

"It's not going to be as big as Facebook, so it won't have the clutter, but we will pick and choose what features we will add once we receive feedback from the users," said Weinstein.

As far as what happens when students graduate, people have a couple of options they may choose from. They can just delete all of their data or export their content to their computer, saving what they placed on the site before.

Sophomore Catalina James is interested in seeing how exactly the site will function.

"I'm curious as to how they will set a boundary between personal and professional usage," she said. Weinstein originally got his foundation through "GoodCrush" and "RandomDorm," which were sites that provided a dating spin on the social networking sites in college and linked students from different colleges in chatrooms.

CollegeOnly launched at around seven different schools in time for the 2010 school year, including Yale, in which over half of the student population has signed up.

According to the site's press kit, "We're still mapping out the schools we're looking to expand to -- it's really going to depend on the number of sign-ups and requests that we get from users at each of the schools before we officially launch there."

Tim Jones can be reached at tjones@student.umass.edu.

Facebook users said to make lasting friendships

FACEBOOK from page 1

between Facebook and retention rates. Eszter Hargittai, an associate professor of communication studies and sociology at Northwestery says that Facebook fails to take into account students backgrounds and personality types. She says that while the connections made on Facebook tend to make students feel more comfortable linking up with others for class notes and advice, it is also used a lot for procrastination.

"I think [Facebook] made connecting with people I had met through classes easier," said sophomore Kelsey Laning. but I wouldn't say it was a determining factor to whether or not I returned [to school]." Laningyalso said, "It's definitely a huge distraction but when I need to connect with someone from a class it makes it really easy to get in touch."

"I really don't think Facebook has influenced my relationships with friends," said sophomore Anthony Michaels, I tend to only use Facebook to maintain friendships with people I met last year that I see on campus on a regular basis, such as people in my classes or who live near me. I'll say that Facebook connections were good in the first week to check in with people I hadn't seen or heard from all summer."

Though students, professor, and researchers alike don't believe that Facebook is a huge factor in determining retention rates among students at various colleges, they do believe that it is a big part of the college social scene. "Facebook connects you to people on campus. Those relationships will draw you back," said Beck.

At root the issue is about relationships. Facebook is just one tool that can be used to make up or follow up with those relationships as they become deeper and more established."

Ashley Berger can be reached at aberger@student.umass.edu.

Richard Beck thinks Facebook builds stronger relationships for college students, and helps them stay in school.

Speaker series kicks off

JONES from page 1

After determining the topics, organizers began to brainstorm potential speakers.

"When it came to AIDS, almost everyone said we should get Cleve Jones," said Beemyn.

Jones has been an AIDS and LGBT activist since the 1970s when he worked as an intern in Harvey Milk's office. the first openly gay elected politician. In a 2008 interview with The Washington Post, Jones credited Milk with his involvement in the movement, insisting none of his activism would have happened without him. "He was extraordinarily kind to me and saw strengths in me that I didn't even know I had."

In the early 1980s, while AIDS was still a new and widely misunderstood issue, Jones was a founder of the San Francisco AIDS Foundation, a group that has grown into one of the largest advocacy organizations for people living in the United States with AIDS.

Jones conceived the idea for the AIDS Memorial Quilt in the mid-1980s, and created the first quilt panel in honor of a friend. Since the idea's conception, it has grown into the world's largest community arts project, memorializing over 85,000 killed by AIDS in the U.S.

Expecting a large crowd for Jones' speech, Beemyn said, "I don't expect a single seat to be empty."

Though focusing on LGBT issues, Beemyn is optimistic that Jones will see people of all gender and sexual orientations in the audience.

"I hope the panels increase visibility by bringing people in from beyond the LGBT community," he said.

Speakers in upcoming weeks include Amy Ray, half of Folk group, The Indigo Girls, Singer-Songwriter Zoe Lewis and Leslea Newman, the author of "Heather Has Two Mommies," along with 56 other books.

Chancellor Robert C. Holub will introduce Jones before his speech and will welcome him to campus. Beemyn said the event has received, "a lot of support from the administration."

The final cost of the event was approximately $30,000 according to Beemyn and paid for with grants, university funding and community sponsors. Wednesday's event is co-sponsored by the UMass Center for Health Promotion and Tapestry Health.

The Stonewall Center is a bisexual, gay, lesbian, queer and transgender center on campus. It is open to all students, faculty and members of the Pioneer Valley community.

According to the center's website, it also seeks to educate the community and campus about ways to create a more welcoming environment for bisexual, gay, lesbian, queer and transgender individuals and supporters.

UMass is home to the third oldest Stonewall Center in the nation, according to Beemyn. The center is named for the Stonewall Inn, a gathering place for LGBT community members in the Greenwich Village neighborhood of New York City during the 1960s, when homosexuality was considered a criminal act. Often raided by police, it is largely regarded as the first location where LGBT community members stood up and protested the laws. The protests are today considered a key event in the Gay Rights Movement in the United States.

Michelle Williams can be reached at mawillia@student.umass.edu

Search for micro-organisms

CAVES from page 1

electron acceptor; they use various different things," he said. "They have a lot of novel behaviors that are currently not understood that could be helpful for energy generation. Understanding these bugs could give us insight into the origin of life on Earth and potentially on other planets as well."

Bloutt's field of interest is water flow, specifically in the fluids that exist deep in the mine amongst the microorganisms.

"I'm interested in looking at the interface between these fluids and the life that they support deep underground," he said.

However interesting the exploration may have been, the working conditions of the mine were far from ideal. Despite a surface temperature of nearly 100 degrees,

Bloutt and his team experienced temperatures of a mere 50 degrees Fahrenheit in the middle sections of the mine and 90 degrees or more at their maximum depth of 4,900 feet. In addition, many tunnel pathways contained a myriad of obstacles, including massive rubble piles impeding travel and pools of freezing water, waist-high at times, to be waded through.

Overall, Blount concluded, it was a successful trip, but the research is not yet over.

"I'm actually planning to go back to the mine in October this year to put in some instrumentation," he said. "So if you think about it, it's kind of the beginning of a long-term project."

Cameron Ford can be reached at cjford@student.umass.edu

David Boutt explored an abandoned gold mine in South Dakota for a potential underground lab location.

UMass discusses Funding questions at Forum

TITLE from page 1

The issue of funding was on the minds of many participants in the forum, especially the conflict between state funding and the entrepreneurial approach.

"If we go without state support," May said, "then we 'take off the handcuffs' and can avoid a lot of bureaucratic processes we have to go through because of the state."

Massachusetts was compared to public higher education in Virginia, which uses a system of incentives and institutional autonomy from the state bureaucracy to encourage performance and affordability. "The president could look at tax policy," May continued. "The tax exemption on Harvard's endowment would float the UMass system."

"I don't see it as an either state-support or entrepreneurial support position," Reville said. "There's going to be state-support for the University for the foreseeable future. There are a lot of different arguments about at what level that support should be offered. The budget exists within a macroeconomic picture that's very complicated, so as we look to the future it's going to be challenging—as it is in virtually every state—to see dramatic increases in public support for higher education under the circumstances," continued Reville.

"So I think we'll have no choice but to be entrepreneurial in the system and in time I hope state government will continue to support public higher education and do so at an increasing level and in exchange for that, demand a public mission. So I think we've got to find ways of balancing being a state supported institution at the same time as being more entrepreneurial and maintaining a public mission," Reville said.

"I've been here since 1990 and in that time there have been three-to-four economic downturns," said Professor John Kingston of the linguistics department. "Each time there are always deep budget cuts, but those cuts are never restored. The president should have the capacity to extract resources from every possible source. Without state support we won't have the resources to generate revenue by our own means."

"Most public universities have three sources of funding federal, state and tuition and fees," May said. "In times past they were mostly funded by the states; now they're mostly funded by the federal government, followed by tuition and then state support.

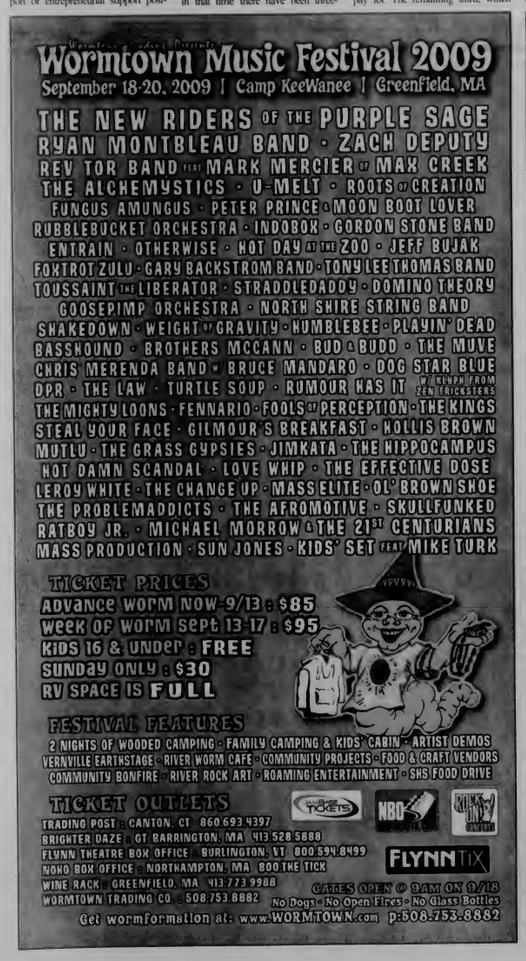
Most people agree that public education should have public funding, but they don't want to have to pay higher taxes, so it becomes possible to tax the populace when they go to college. Two-thirds of the state budget is non-discretionary, things like Medicare and pensions and bonds that the state must pay for. The remaining third, which includes education and services, is discretionary funding. The discretionary funding always gets squeezed in a downturn, especially education, because the University can always raise tuition and fees, but MassCare and mental health services can't."

"Developing alternative revenue streams is another role of the president, as well," Thomas said. "I think the state support approach and the entrepreneurial approach can be mutually compatible. Some systems may want to make a heavier investment in one versus the other, but I think it's based on the circumstances and all of the environmental considerations—the economic environment, I'm talking about—that should play into the final consideration on that, but no they're not mutually incompatible."

The public forum was the third for the Committee in a circuit of the UMass system this week.

Mathew M. Robare can be reached at mmbare@student.umass.edu.

SGA president Brandon Tower asks a question at the open forum Tuesday.



Wormtown Music Festival 2009
September 18-20, 2009 | Camp KeeWanee | Greenfield, MA

Leave UMass, study abroad

Hannah Grossman

If the thought of studying abroad has shot across your mind for a millionth of a second, do it! If you don't and you suffer from fear of missing out, clinically known as FOMO, you will surely have to see a physician.

Living and studying in Prague is now entrenched in my box of memories, which I'm constantly reopening.

I can't believe my semester abroad is over and I'm back at the University of Massachusetts this fall. Don't get me wrong, I'm pumped to be here.

I remember how anxious I was before departing last January. I didn't know the Czech language, I had no clue what or where anything was, I didn't have a single friend and in all truth, I didn't really know that much about Prague. But, with anxiety came excitement. I could not wait to be walking through the alleyways and castles of which I had only seen in photographs. I was eager to study and travel with friends I had yet to meet.

Living and studying in Prague is now entrenched in my box of memories, which I'm constantly reopening.

Now, sitting 4,000 miles from Europe, I reflect on all the memories shelved in my mind – picnicking in Vienna, hiking through the Bohemian Paradise, walking through a damp silver mine, sitting in on Mass in the most beautiful cathedrals, dancing in Berlin, driving along the River Thames, tracing Kafka's peripatetic journey to school with my own feet to better understand him and his labyrinth and eating delicious *zmrzlina* (ice cream).

I was walking into castles because I felt like it, playing with royal peacocks, drinking in beer gardens, taking aimless midnight walks, spontaneously hopping onto trams leaving Prague, not being able to correctly say my street name, *řeznická* (pronounced rjeznеetska), dancing on tram tracks, learning history I've never been exposed to before, walking through Auschwitz, missing home, feeling like I'm on top of the world and swimming outdoors in Prague's biggest pool, Podoli while it snowed.

In choosing central European and Jewish studies, I expected to learn an immense amount of modern Jewish history in central Europe - and boy did I learn. As a Judaic studies and comparative literature major, this experience abroad taught me in a way that's impossible to learn here at UMass.

Not only did I get to study in a formal academic setting, but CET brought me to Budapest, Vienna and Krakow, where remnants of what I had read in essays and books came to life. In addition to studying the Jewish past, I was granted the opportunity to participate in its present.

Through volunteering at Prague's Jewish day school, participating in Sabbath services and establishing friendships with members of the Czech Union of Jewish Students, I was able to familiarize myself with today's community.

As I enter my senior year, I reflect on all of the courses I have taken. Although I learned a great deal at UMass, one of the most impacting educational experiences of my career as a student has certainly been with CET in Prague.

Through writing book reviews, listening to my enormously knowledgeable professors as well as to visiting lecturers and touring numerous east-central European capitals, I accrued an immense familiarity with the history I had come to learn.

Previously, I had a modicum of knowledge about life in Prague. How it seated the Holy Roman Empire, when the country gained independence after World War I, how it was handed over to Nazi Germany under the Munich Agreement and how Soviet communism veiled the country for decades and about the Velvet Revolution which overthrew the authoritarian rule.

After learning all of this in class, I walked the streets with my beaming professors who had lived through years of the country's struggles and were able to present their country with pride.

Living where the history unfolded augmented my education, as my feet felt the cobblestone beneath me and my eyes absorbed monuments and evidence of a changing society.

With the encroaching Oct. 10 International Programs Office application deadline for many study abroad programs, it is wise to begin pondering which country you want to be living in next semester. The geographically comprehensive list of UMass programs is impressively long and there are also many non-UMass programs, one of which I participated in to get an even more unfamiliar experience.

Though I feared the paperwork would be a complex hindrance to the actual studying abroad, it was surprisingly simple and straightforward. The experienced and devoted IPO and CET staff could not have been more helpful in making the pre-program process slide by with ease.

Unless your time sensitive course requirements must be filled on the UMass campus or your health is threatened, there is really no reason to not study abroad. If you're eligible and love new opportunities, take a look at IPO's offering of programs in over 60 countries.

Drink mate in Argentina, walk past the Coliseum on your way to class in Rome, take bucket showers in Ghana, snorkel in the Great Barrier Reef, hear a government address in Tiananmen Square or flirt with sexy blondes on Stockholm's Djurgården Island. Learn a new tongue, meet new people and examine a new area of history.

Walking past the UMass pond or climbing Mt. Sugarloaf can be breathtaking if you allow it, but it's nothing like strolling through 1,000-year-old castles and alleyways.

No matter what continent you choose to live on for a semester or two, the experience will be life defining and an ineffaceable memory. UMass will be here when you get back.

Betting for better grades

Amanda Joinson

Working for good grades that amount to a GPA close enough to 4.0 is what most students strive for in their four years in college, but motivation sometimes fades when roommates and organizations grab their attention, rather than keeping in mind the final outcome of their academic hard work at the end of the semester.

What if there was something to increase motivation much like when their parents or grandparents would take them for ice cream when they achieved honor-roll in grade school?

A website called Ultrinsic aims to do just that, increasing motivation of students enrolled in universities and colleges by providing incentives to students that reach their goals.

Currently available at Harvard, Boston College and Boston University along with 33 other universities across the country, Ultrinsic allows students to place money on what they intend to achieve in class.

The amount of money the student bets on their studies is up to them. Ultrinsic then looks into the students' history and determines how much they are willing to pay if the student does succeed.

When the semester ends and grades are posted, "rewards" are given.

The "reward," as it is called by CEO Steven Wolf and co-founder, Jeremy Gelbart, is just like getting paid for good grades. With Ultrinsic students that cannot physically and mentally handle adding another responsibility of a job during their enrollment can have the opportunity to make money on what is essentially full-time employment – their education.

In this day and age students are so accustomed to immediate results like that of searching on the Internet for their reference article.

College does not give you immediate satisfaction; students wait for their test grades and wait on their GPA to adjust at the end of each semester. No one can guarantee you a high paying job, or even a job, after you graduate but Ultrinsic convinces students to stay motivated throughout their four or more years and achieve the grades that will push them forward in this tough economy.

The expenses put toward tuition and textbooks are astronomical enough, students do not need to be losing the little money they have so to guarantee that students do not waste their money away, so Ultrinsic offers grade insurance.

The "reward" as it is called by CEO Steven Wolf and Co-Founder, Jeremy Gelbart, is just like getting paid for good grades. With Ultrinsic students that cannot physically and mentally handle adding another responsibility of a job during their enrollment can have opportunity to make money on what is essentially full time employment.

You are putting money down to push you to do well, an incentive, according Ultrinsic. It is not about luck, it is all about your motivation to make the money, much like if you knew how to count cards.

Students' skill level or ability to follow through with course work is what the incentive relies on. Success and cash earned is 100 percent in the hands of the student, much like if you were working on commission.

If students allow their roommates to overwhelm them and clubs to take up more time than their coursework, they will lose the money, but that is their fault. The claim to academic success was placed in confidence by the student. The mishaps of sleeping in and missing homework assignments are on their shoulders.

The money may not be much though, when students first join Ultrinsic.

During the first year of involvement students can only put as much as $25 towards an incentive. Once students' academic years continue, the incentives which are registered with the company increase.

Ultrinsic is offering students money for their success much like the "real world" Higher grades, more knowledge and more money just like if you are good at what you do in the job force.

Let's be honest, all students need extra cash, whether it goes towards next semester's tuition or Friday night's bar tab.

Ultrinsic is handing money to you if you are willing to put as much time and effort into your class work as you probably should be in the first place.

Unfortunately, for UMass students willing to bet on their success, Ultrinsic does not include us as one of its participating schools.

THE S.P. SULLIVAN MEMORIAL PRIZE FOR HAIKU WRITING

Emphasis on haikus! The winner each week will be published and receive a prize.

S.P. Sullivan

A haiku is an old form of poetry from Japan, originating from around the 17th century.

In English haikus have usually been 17 syllables on three lines: five, seven and five.

S.P. Sullivan, former Collegian Managing Editor, was a major proponent of the haiku.

Mythology and misconceptions about taxation policy

Ben Rudnick

The sheer volume of demagoguery surrounding the subject of taxes demands that I take some time to dispel a few of its biggest myths.

The myth repeated most often is the idea that tax cuts "cost" the government money, which is wrongheaded on at least two levels. The first issue is that revenue from income taxes does not belong to the government, but rather to those under the threat of IRS persecution who were coerced into handing over their cash.

Politicians arguing that tax cuts cost the government are like schoolyard bullies, whining when their victims suddenly decide to only give them a quarter of their lunch money instead of half. Contrary to the myths, history proves that cutting taxes leads to increased economic activity, which actually swells the government's coffers.

In 1964, the tax cuts that JFK pushed for before his death enacted, which lowered the top tax rate from 90 to 70 percent and the bottom rate from 20 to 14 percent in 1965. IRS data shows a small drop in individual tax revenue that year, but then revenues exploded from $53.7 billion to $159 billion in 1976, a rise of close to 300 percent. Inflation over that period was around 80 percent, therefore the growth in tax revenue was overwhelmingly due to increased economic activity.

Over the course of Reagan's two terms, the highest inflation rate decreased to 33 percent and the system was dramatically simplified from 16 different tax brackets down to four. The rates stayed roughly the same until Clinton raised them in 1993, but individual income tax revenues almost doubled between 1980 and 1992 – again far exceeding the rate of inflation.

The picture during the 2000s is less clear with contributors warping economic data such as the dot-com crash, 9/11, two wars and the complex phasing in of the Bush tax cuts.

However, government collections from economic sources that rose in 2001 later fell in the wake of that year's events, but increased again even faster between 2003 and 2008, after which the effects of the most recent recession came into play.

Even President Obama implicitly recognizes that lowering taxes encourages greater economic activity. Otherwise, why would he give impassioned speeches touting his plans to fix the current economic malaise by helping "small businesses upgrade their plants and equipment," and persuading "large corporations to get off the sidelines and start putting their profits to work" by giving them tax breaks for investment?

Obviously, he understands that the way to persuade people and companies to invest in the economy is to increase the potential rewards for that risk and accept the stimulative effect of tax cuts as fact.

All that does is make the system more vulnerable to the lobbyists.

Unfortunately, the Congressional Budget Office, which pundits and politicians invariably cite when claiming that tax cuts "cost" the government money by increasing deficits, does not recognize the relationship between lower taxes and greater economic activity. Amazingly, the CBO reports display an utter detachment from reality in predicting GDP growth of 4.5 to 5.6 percent and an easing of unemployment to five percent between 2012 and 2020, regardless of the tax policies enacted over those years.

Another whopper told about the Bush tax cuts is that they benefit only the rich. However, factual analysis reveals that if extended to 2020, less than 19 percent of their value will benefit upper income taxpayers. This is according to the Tax Policy Center of the Urban Institute and Brookings Institution, hardly a bunch of right-wing firebrands.

The truth is, with or without the Bush tax cuts, those with higher incomes pay more than their "fair share" of federal income taxes. In 2007, the top one percent of earners, defined as those making more than $410 thousand per year, earned 22.83 percent of all personal income but paid 40.42 percent of personal income taxes. The numbers for the top five percent, defined as those earning more than $160 thousand, are even more lopsided as their share of income was 37.44 percent while their share of taxes was 60.63 percent.

Yet, none of this gets to the root of America's tax problems. For example, the truly wealthy, whose income is derived mostly from investments, pay lower rates on their capital gains and dividends than many do on hourly wages or salaries. In reality, the government levies the highest tax rates against those who happen to be successful in their occupations, perversely providing a huge disincentive to seek greater success.

It might seem simple to address this problem by raising the tax rates on these sources of income, but that would be disastrous. Investment enables companies to grow, hire more workers and research new technologies, but only at the risk of losing money if the company fails. If rewards decrease by higher taxes on capital gains and dividends, the inducement to invest in the first place decreases.

Real progress on taxes will require more than adjusting rates a bit here and there or tweaking the code with incentives for this or that. All that does is make the system more vulnerable to the lobbyists. To abolish the favoritism and social engineering of the current tax code, encourage greater prosperity, and make the system truly equitable, we must stop taxing income and start taxing economic activity. What we need is the Fair Tax, so check it out at fairtax.org.

Artists Impress with Summer of Music

By Kate MacDonald
Collegian Staff

One of the main reasons no one buys whole albums anymore is because most albums that come out only have a few good songs. What's the sense in spending $15 if you're just going to listen to two or three good tunes? It's more feasible to download individual songs and just throw them onto your iPod. Very rarely do albums come along that entertain a listener throughout the entire listening experience.

This makes 2010 a rare occurrence. Many albums that were released during the short summer months were actually worth paying full price. Great compilation sets were released by Oasis and Jay-Z, and new music was debuted by many of the most popular acts out there, in all genres.

The summer of 2010 had something for everyone and music aficionados of all kinds nodded their heads to the beat this months.

From the man who penned "Single Ladies," and "Umbrella," could you expect anything other than a catchy summer must-have? The Dream, the master of slow jams, released "Love King," a highly acclaimed album full of intelligent lyrics and memorable hooks. Summer playlists around the nation included "Make Up Bag," and "F.I.L.A."

A wildly popular rapper in the early 2000's, Eminem burst onto the 2010 scene with "Recovery." Anyone not living under a rock this summer heard "Love the Way You Lie," his now overplayed hit with Rihanna. "W.T.P." is a fun, club-like song, and with the beats from "You're Never Over," and background music reminiscent of T.I.'s "What You Know About That." Mr. Mathers had definitely made a comeback.

No summer list would be complete without Drake. The Canadian actor-turned rapper-is a fixture on the radio, in commercials and on red carpets. His newest albuna, "Thank Me Later," includes the now well-known "Over" and "Find Your Love." The wordsmith also debuts new jams and future hits "Show Me a Good Time" and "Fireworks."

A sort of mini-CD with only six tracks, Blake Shelton's "All About Tonight" proves that quality is better than quantity. "Draggin' the River," featuring Shelton's fiancee Miranda Lambert is a feel-good tune, while ballad "Suffocating" is sure to tug at the heartstrings of country fans.

Another country singer, Dierks Bentley, released an album this summer. On his new CD "Up on the Ridge," Bentley relies on other country crooners, including Lambert and Kris Kristofferson. This album is a throwback to the days when the fiddle and banjo were the most featured instruments in country tunes and is nothing like the mainstream country heard on radios today. His backwoods spin on U2's "Pride (In the Name of Love)" is a must-listen.

Sheryl Crow returned back to her country roots this summer with "100 Miles from Memphis," though it has more of a contemporary and easy listening feel to it. Crow covers the Jackson 5's "I Want You Back," and does the song justice. Though "Sign Your Name," featuring Justin Timberlake is quite good, it's "Our Love is Fading" that steals the show and won't work itself out of your head easily.

After Band of Horses' mediocre "Life on Earth" made its way onto "The Twilight Saga: Eclipse Soundtrack," it can be assumed that the band will gain a little notoriety, which they deserve. Anyone who enjoyed that track will be blown away by "Laredo" or "Factory" off the band's summer album "Infinite Arms." The album, however, falls a little flat after the first half.

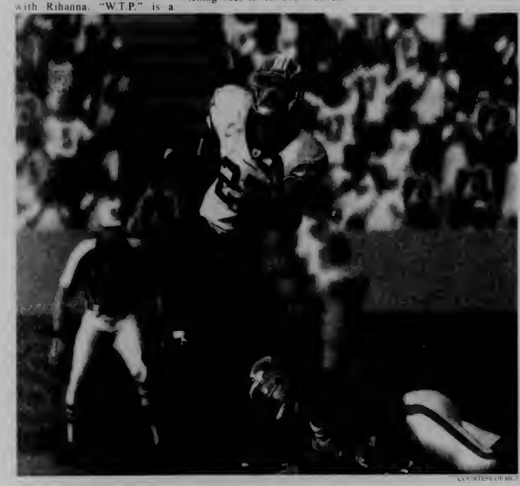
Relatively unknown indie band Wolf Parade doesn't have the cleanest vocals or strongest guitar riffs, but "Expo 86" is worth a listen. "Ghost Parade," which made it onto the airwaves this summer is addicting and the strong drumbeats of "Palm Road" and "Cave-O-Sapien" provide a good soundtrack for rushing to classes.

Tokyo Police Club's "Champ" isn't as engaging as last year's "Elephant Shell," but it's definitely a toe-tapper and should propel the Canadian group into the realm of mainstream indie rock. Songs "Bambi" and "Favourite Colour" are must-listens.

Other worthwhile albums that came out this summer include Stone Temple Pilot's self-titled CD, 30H!3's pop extravaganza "Streets of Gold" and Lil Jon's fist-pumping album "Crunk

See SUMMER on page 6

Eminem had a major comeback this summer, with his hit album "Recovery." Music lovers everywhere couldn't get enough of his top-charting song "Love the Way You Lie."



Madden 2011, which was released on August 10th, was yet another great title in a video game franchise that has yet to disappoint its many loyal fans.

Madden 2011 Impresses

By Nick O'Malley
Collegian Staff

Year after year, EA Sports puts out its version of Madden NFL, which is immediately gobbled up by its core audience. But when it comes to the franchise's more casual audience, one question usually comes up: "Am I just paying $60 for a roster update?"

The answer is usually along the lines of "meh," as EA Sports tries to throw in a flashy new feature that may or may not pan out in future years (See: QB vision cone, Superstar Mode). But in the most recent rendition of Madden, which no longer features the former NFL coach at a voice talent, a couple of key yet subtle gameplay changes could be enough to upgrade that answer to "not as much."

To non-fans of the series, not much has changed in the Madden world since 2004. Randy Moss is still broken and most players are still open to average about 500 yards passing a game if they want. So, obviously, if you don't care about blocking schemes or play calling, by all means don't buy the game.

But, the changes made in this year's game are the sort of minor tweaks that add that little extra spark to the hardcore football video game fan.

First, it's a huge deal for enthusiasts of the X's and O's aspect of football: a revamping of blocking schemes. In the past, running the ball involved looking at your linemen, looking at the defense and hoping that the right people get blocked. What's changed is that, instead of showing lineman following a vague "run block" command, the game will show you the specific blocking assignments pre-snap.

So, if you take a glance at the play map before the snap of the ball, you can actually see whether or not your right guard is actually trying to go after the middle linebacker on a halfback dive instead of going after the backside end. It's a small difference, but it makes running the ball a dream compared to years past. If the back is stopped in the backfield, you can at least be glad that the line actually tried to stop the defender.

Second is a feature marketed towards both the casual and impatient gamer. Gameflow, which is sort of a better version of the "Ask Madden" option in games past, allows the player to forego the full playbook and let the game choose the play. It's like having your own offensive coordinator, a comparison that's supported by the fact that the game will have a "coach" advise you on the play as the offense walks to the line.

Functional on both sides of the ball, Gameflow, with the help of the accelerated clock option, speeds up the pace of the normal game and usually comes up with a solid choice for a play, especially since draws and running out of the shotgun are now more effective.

While a perfect choice for the less-picky users on offense, Gameflow has a minor flaw on defense. It speeds up the pace, but at the expense of the amount of time players used to have to make pre-snap adjustments.

Speaking of which, pre-snap adjustment controls have been changed to a clunkier, less-intuitive format. However, due to fan outcry, a patch is now available online to restore the original con-

See Madden on page 6

Tobacco to break down Iron Horse this Thursday night

Garth Brody
Collegian Staff

Tom Fec, better known as Tobacco, is coming to the Iron Horse Music Hall in Northampton this Thursday. Tobacco is the principle songwriter and "singer" for the psychedelic electro-pop band Black Moth Super Rainbow. Tobacco exclusively "sings" through a vocoder.

His signature vocals build a great deal of the haunting atmosphere found in both Black Moth and his solo work. Hunched over the bizarre-looking vocoder, Tobacco generates surprisingly lush harmonic textures where there would otherwise be the voice of a puny human.

In Black Moth Super Rainbow, the vocoder vocals take on a character of childlike pop whimsy, but they tend to sound a little more frantic in Tobacco's solo work. Against skittering saccharine synth riffs, chunky hip-hop beats and bass-lines fuzzed out almost to the point of being incomprehensible, his psychotic electronic whispers become creepily engaging. On "Heavy Makeup," he repeats to the listener, "You got sick from a lolly lolly lollipop. You feel free when you're killing me." The darkly absurd tone of Tobacco's solo work is what distinguishes it from his work with the band.

He released his first solo LP, "F*cked Up Friends," in October of 2008, featuring the likes of Aesop Rock on an outstanding rap track entitled "Dirt." Earlier this year, he followed up with the similarly alliterative "Maniac Meat."

Like the first album, it is largely comprised of scratchy industrial beats, piercing sirens, creepy/catchy synth hook, and robotic ramblings strained through atonal chromatic crescendos. It also features Beck on two tracks,owhich provides enough nonsense to keep up with the insanity in the music. The feeling that the machines being used to generate the sounds on the album are constantly breaking down pervades the listening experience. Notes cut out, tones bend awkwardly, melodies flicker on and off – it sounds as though Tobacco himself is malfunctioning.

He released two visual projects based on his "F*cked Up Friends" album – the "F*cked Up Friends" DVD and the "F*cked Up Friends 2" DVD/Blu-ray set, which is curiously self-described as "the first ever low resolution, Lo-Fi BlueRay video." Primarily scrapped together out of obscure 1980s VHS and Betamax, the visuals of "F*cked Up Friends" reflect Tobacc"s artistic ethic. Like the video, he thrives on taking outdated technology and reusing it in bold, often frightening new ways. Doors open at 10 p.mn an. Tobacco featured openery Junk Culture and Dreamend. Keep an eye out for his garishly named Black Moth ban-mate, The Seven Fields of Aphelion, backing him up on synthesizers.

Garth Brody can be reached at gbrody@student.umass.edu.

Tobacco, also a member of popular indie-band Black Moth Super Rainbow, promises to put on an incredible show this Thursday at the Iron Horse Music Hall.

COURTESY OF MYSPACE

Actor/rapper Drake made a splash this summer with his album "Thank Me Later." Listeners everywhere were snapping their fingers to the now quite-popular songs "Over" and "Find Your Love."

Summer of Music

MUSIC from page 5

Rock." Even M.I.A. released a new CD, which sounds almost exactly like her older ones, titled "/\/\/\Y /\." It was quite weird, but fun at times.

Though the habit of downloading music isn't going out of style any time soon, the success of 2010's summertime releases may provide some reassurance to the tanking CD industry.

This summer also provided a successful artistic release for artists of all kinds. Music fans everywhere surely found something to blast from car stereos, something to make a bonfire more enjoyable or at least something to distract them from the monotony of summer jobs.

Madden 2011 a fan favorite

MADDEN from page 5

trols. Hooray community influence.

A third major change is in the Madden's announcer's booth. Now completely devoid of the familiar tandem of Al Michaels and John Madden, the game now features the solid color commentary of Cris Collinsworth and the new addition this year, the oft-over-the-top-but-in-an-awesome-way Gus Johnson. Instead of Michaels' usual professional tone of broadcasting, Johnson actually brings a level of excitement, which is a nice touch, especially for big plays and close games.

All-in-all, Madden NFL 11 makes a few subtle changes that blend nicely into the familiar franchise. It's a better change than in years past, where new modes have tried to change things outside of the number one reason people buy the game: to sit down and play a football game.

If you were on the fence about Madden NFL 11, and those changes don't entice you, don't buy the game, especially if you've gotten a version in recent years. But if they do, it gives a new feel to actually playing the game.

Nick O'Malley can be reached at nomalley@student.umass.edu.

"The American": More Than Just Another Action Film

Ian Winship
Collegian Staff

The late-summer release "The American" was not one for the masses. With big-name actor George Clooney and trailers that made the movie seem like an action flick, this movie had commercial potential. It turns out this potential was used in unanticipated fashion. It ended up being a compelling low-key thriller about a man trying to retire from his lifelong work as an assassin.

The most challenging aspect of this movie is that the audience is given very little information to work with. You are abruptly thrown into the plot, not knowing how our main character got there or where he is going. You can never really be sure of the main character's real name as he goes by Jack, Edward and Mr. Butterfly at different points in the story. This automatically adds a mysterious element to Clooney's character. It is also hard to determine why Jack is doing what he is doing in the first place. You don't know why he is killing people-or for that matter why they are trying to kill him.

Another thing some audiences may find unsettling is the partial lack of sound. There were many silent moments, which some may find pointless. These parts don't really fit in to this day and age of movies where the commercially-successful ones are full of explosions, laughs and loud soundtracks. While there is some music, it is not fully present and it certainly doesn't lead the film. There are quite a few scenes where the only audible language that is being used by the characters is body language. While this may be interesting to some, it may not hold the attention of everyone in the theatre. All that being said this was an interesting film.

"The American" did surprisingly well at the box office. It was No. 1 during the weekend of its release and now it is third, two weeks afterwards. Making just over $28 million in two weeks, it seems that a good amount of people did decide to go see this intriguing movie. A lot of people may have been drawn in by the flashy style of the advertisements for this movie which unfortunately painted a different picture about it but hopefully some were thoughtful enough to enjoy this strange and risky piece of film.

This movie told the thoughtful story of a man who had a very difficult job and who was dwelling on his past actions. We find ourselves in the life of Jack Edward/Mr. Butterfly on his last job in a small town in Italy. He is hired to make a specialized machine gun/ sniper rifle hybrid for another assassin to use on their target. While the process he uses in making this gun is interesting and creative, it takes pretty much the entire movie to complete and then leads to a somewhat unexpected ending.

There is no real end to this story. Just as suddenly as we find ourselves in it we are out of the plot. The film is not for the easily distracted. But, if you want to sit down and watch an interestingly shot film about a topic that is seldom viewed with any sort of realistic ideas, then go see this movie.

JED BERNSTEIN/COLLEGIAN

Senior Makaela Potts is looking to repeat her junior year when she led the Minutewomen in points and assists and ranked second in goals. In six games this season, the midfielder has a goal and an assist.

Potts anchors midfield in senior year for UM

FIELD HOCKEY from page 10

higher on the field, and having Alesha back there really gives the team great confidence."

Barring any injury, Widdall should be in between the pipes all season. Backing her up will be freshman Kori Huffman, a two-time All-State player from Brattleboro, Vt.

Defense

Sowry has focused a great deal on defensive play in her time at the helm, with this season not likely to be any different.

Returning senior Jamie Bourazeris will be the anchor of the line, because of her extensive postseason experience. She displays skills of a quality defenseman and has become the team's best outlet passer. Many teams will also choose a defensive player to anchor the penalty corner due to their passing skills, and Bourazeris fills this role for UMass. In three seasons with the corner unit, she has tallied 12 goals and 10 assists.

Bourazeris will work with talented newcomers to fill the rest of the defensive lines. South Africa native Thando Zono figures to dazzle opposing coaches and players with her natural skills and instincts for the game. Freshman Hannah Prince has also impressed Sowry with her speed and versatility throughout preseason play.

Also contending for defensive slots are junior Christine Cutry, sophomore Sarah Schlossstein, junior Amanda Dietz, freshman Lauren Hague and last season's Atlantic 10 conference All-Rookie Callie Swengart, who will be a redshirt sophomore.

Midfielders

Makaela Potts, two-time All-American who has started and been a captain since her sophomore season will serve as the quarterback of the team. She has shown steady improvement in each of her three years and even became the points leader in 2009 with 10 goals and 11 assists. Potts is another corner unit player and she commands as much action there as she does patrolling the midfield.

In addition to Potts, Nikki Panciocco returns to the midfield from the 2009 squad after a brief stint at halfback. With three assists last year, Sowry only expects her numbers to go up now that she is back in the midfield.

Freshman Marisa Dunn will also be looking to work her way into the rotation in the midfield.

Forwards

The Minutewomen are fortunate enough to bring back their team captain and biggest scoring threat from 2009 in forward Katie Kelly. Often called the most physical and emotional player on the team, Kelly led her team in goals last year with 11 and added six assists to set a new personal record in points (28).

Kelly played at the United States Field Hockey Association High Performance National Championship this summer and in doing so, gained vital experience playing against the best competitors in the game. She is also the leader of the press attack for UMass and forces turnovers and mismatches.

Another newcomer who is creating a buzz around camp is freshman transfer Melaine Sutherland. She comes to UMass from Seaford College in England where she played for two years. Sowry expects Sutherland to bring with her a natural talent as well as international playing experience that will help the entire team.

"Mel has great endurance," Sowry said. "She will probably be rotated in a lot to provide fresh legs, and when she's in we expect her to use her skills and instincts to get a lot of goals for us."

Rounding out the forwards are sophomores Kara Charochak and Nicole Cordero, who saw plenty of action last season on the front line, as well as freshmen Mika Black, Lindsay Bowman, Alyssa Inesun, Molly MacDonnell and Alexa Sikalis.

It remains to be seen who will be in the everyday starting lineup, but Sowry says she is excited about how the season will play out no matter who it is.

JMU earns upset victory over ranked VT

By Nick Bellofatto
Collegian Correspondent

James Madison did its best 2007 Appalachian State impression by handing a Top 25 BCS opponent Virginia Tech its second loss of this early season.

Ranked No. 13 in the BCS national polls, VA Tech was upset 21-16 by the Dukes. The win is considered the second-biggest upset in a matchup between a Football Championship Subdivision and a Football Bowl Subdivision college football team, right behind ASU's win over No. 5 Michigan during the first week of the 2007 season.

The Dukes are coming off a 2009 season in which it was only one game over .500 and played the second half of the season without its starting quarterback.

However, with quarterback Drew Dudzik back in the picture, the Dukes opened up with a 48-7 win over Morehead State and then defeated the in-state rival Hokies in surprising fashion.

With this second win, JMU moved up nine spots in the FCS polls from No. 12 to No. 3.Dudzik, who was injured the last half of the 2009 season, is back in his starting position and has already compiled seven touchdowns through only two games (four rushing, three passing).

With their starting quarterback performing at such a high level, it's not surprising that the Dukes look as if they are ready to shake things up in the FCS Top 25 this year.

Villanova could move

National Champion Villanova is reportedly thinking about taking on one of the hardest conferences in the FBS and moving into the Big East conference for 2011 season.

FCS Top 25

Fresh off of a 35-0 win at Lehigh, the Wildcats climbed back into the top spot in the FCS polls with 74 of a possible 139 first place votes.

In second place came the Mountaineers (2-0), with 25 first place votes and JMU in third with 30 first place votes.

Even though the season has just begun, many analysts are already looking toward a 2011 Wildcats team that could be moving to the FBS and the very competitive Big East. All other Villanova sports teams have been part of the Big East conference since the second year of the conference's existence.

This is not the first time that the Wildcats have been offered a chance to join the Big East in football, such was the case in 1997, with the Wildcats declining the invitation. Today, the Big East is made up of eight football teams.According to the Philadelphia Daily News, the Big East has not made a formal offer to Villanova, but the conference is ready to accept the Wildcats if they settle on making the move.

Riddle nears record

Senior quarterback Scott Riddle will become the Southern Conference's all-time leader in passing yards if he throws for just 79 yards next Saturday.

Elon is playing Division II Shaw this Saturday and Riddle is entering the game as the active passing leader in the FCS.

Entering the game with 10,314 career passing yards, Riddle looks to surpass the Mountaineers'Armanti Edwards in the statistical category. Edwards finished last season and his career with 10,392 passing yards making him the all-time passing leader in this Southern Conference.

This would not be the first record for Riddle, who already owns the Southern Conference all-time records for completions, touchdown passes and pass attempts. Riddle led the league in passing yards three times, and is looking to etch his name onto another record this coming Saturday.

Nick Bellofatto can be reached at nbellofatto@student.umass.edu.

Quarterback Drew Dudzik led JMU to a significant upset victory over Virginia Tech over the weekend. Dudzik threw for 121 yards and a score.

COURTESY DAYTON MEDIA RELATIONS

After claiming the Atlantic 10 championship last year, the Flyers won the Penn Invitational Tournament with a victory over Pennsylvania.

Dayton wins Penn Invitational

BY DAN LAJOIE
COLLEGIAN CORRESPONDENT

On Sunday afternoon, the Dayton women's soccer team defeated Pennsylvania, 2-0, becoming the champions of the 2010 Penn Invitational Tournament.

The Flyers, the defending champions of the Atlantic 10 and the preseason favorite to repeat, improved to a 6-2 record with the win.

A-10 Notebook

Dayton played evenly with the Quakers in the first half, with both teams registering five shots apiece. In the second half, however, the Flyers ran away with the game, holding an 11-2 advantage in shots.

Early in the second half, Dayton got on the board. In the 51st minute, a ball was served in from the left side and from the far post, freshman Juliana Libertin served the ball to Jerica DeWolfe. DeWolfe controlled the ball from about 12 yards out and fired a shot past Quaker goalkeeper Caroline Williams for her first goal of the season.

Sophomore Colleen Williams provided an insurance goal for the Flyers in the 75th minute from a corner kick by senior Kelly Blumenschein. Williams leads the team with 14 points, while the Flyers have won every time Williams has scored in a game so far this season.

Dayton stars Williams, Blumenschein, DeWolfe and Emily Kenyon were also named to the 2010 Penn Invitation All-Tournament Team.

ATLANTIC 10 NAMES POW

Xavier's Jessica Brooks and St. Bonaventure's Courtney Hoenicke were named the Atlantic 10 Conference Women's Soccer Player and Rookie of the Week, respectively.

Brooks posted back-to-back two-goal games and finished the week with eight points as the Musketeers (4-3) defeated Mercer (3-1) and Western Carolina (2-1) in the Catamount Classic this past weekend.

The junior forward was responsible for four of the five goals scored by Xavier leading them to a share of the tournament title. With two wins over the weekend and four on the season, the Musketeers have already eclipsed last year's win total and are off to the best start record-wise in school history since 1997.

Hoenicke helped lead the Bonnies to a pair of road victories this weekend, improving the team's record to 4-3. The freshman defender was an imposing force on the Bonnies backline that limited the opposition to one goal on only four shots.

Hoenicke also registered the game-winning assist in a 1-0 victory over Colgate. Since becoming a starter, Hoenicke leads the Bonnies with a 3-1 record, posting two shutouts and allowing three goals.

STENARD LEADS 49ERS

On Saturday, Charlotte gutted out a double-overtime, come-from-behind victory over in-state rival UNC-Wilmington.

Four minutes into the second overtime period, senior Kirby Stenard scored her first goal of the season, collecting a rebound off a save by UNC goalie Chandler Follet and putting it away to seal the game for Charlotte.

The 49ers (4-2) struggled in the first half and went into halftime down 1-0. During the second half, Charlotte came out reenergized, notching the equalizer six minutes into the half. The 49ers continued to put pressure on the Seahawks defense, but they could not put in the go-ahead goal in regulation.

The first overtime was a defensive battle, with both teams combining for three shots on goal. Seniors Whitney Weinraub and Danielle Mayeaux both had good looks but could not put away the game in the first overtime. In the second overtime, the 49ers came out much more aggressive and won the game on Stenard's goal.

The 49ers next two games will be played in Philadelphia, PA for the Villanova Classic, where they will play Towson on Friday and host the Wildcats on Sunday.

Dan Lajoie can be reached at dlajoie@student.umass.edu.

Beaulieu scores game-winning goal for 49ers over rival Elon

BY CHRIS NOREIKA
COLLEGIAN CORRESPONDENT

The Atlantic 10 Conference Men's Soccer Player of the Week and Rookie of the Week awards were announced last Monday by the league office. Forward T.J. Beaulieu of Charlotte and forward Simon Gomez of Duquesne were both rewarded for their hard play this week.

In the first game of the year, Beaulieu assisted the only goal scored for the 49ers in a losing effort to UNC-Greensboro. In the second game, however, Beaulieu scored the game-winning goal against in-state rival Elon in a 1-0 victory at home. The junior ended the first week of the season with one goal on five shots as well as one assist to total three points. After winning its home opener, the team has won 10 of its last 11 home openers since 2000. Charlotte is currently 3-2-0 after a 2-1 overtime loss at Alabama-Birmingham and a 4-0 win against Memphis.

A-10 Notebook

In his first week of playing college soccer, freshman Simon Gomez respectively won the Rookie of the Week honors for his two goals and assist in a 3-1 victory over Robert Morris. The Dukes won their last two games to climb to first place in the standings with a record of 3-1-0. Gomez leads the entire league in points and goals scored with four, respectively.

FIRST HAT TRICK

The first hat trick of the young season was recorded by George Washington's Seth Rudolph on Saturday against Mount St. Mary's.

The goals scored by Rudolph were in the 22nd, 49th and 55th minutes, with the last score tying up the contest, 3-3. The Belleville, Ill. native also won the Player of the Week award this past Monday for tallying eight points on four total goals.

HAWKS START SLOW

The Hawks began the season with losses in its first four games to drop to last place in conference standings.

Of the four games, two of them were closely-contested in a 3-2 loss to Towson and a 1-0 loss to Duquesne. The only two goals scored by the Hawks this season are from Giacomo Dilisi and Colin Reilly. In order to bounce back from its rough start, SJU will look to improve its number of shots per game (7.5), while limiting its opponents in the same area (18.8).

The Hawks are also averaging less than a goal per game and are allowing an average of nearly three scores. On top of scoring, the Hawks can look to limit the number of mistakes and fouls committed with seven yellow cards recorded already this season.

Chris Noreika can be reached at cnoreika@student.umass.edu.

COURTESY HARRIS TEETER MEDIA RELATIONS

Forward T.J. Beaulieu was named the Player of the Week in the Atlantic 10 last Monday after scoring a goal and an assist. The 49ers are currently 3-2 after defeating Wake Forest on Tuesday, 2-0.

Minutewomen bring in international talent

UMass returns three seniors for new season

By Michael Wood
Collegian Staff

The 2010 Massachusetts field hockey team has a flurry of new faces this season who are trying to make an immediate impact, with only three players entering their senior season.

But, the last time UMass entered the season with only three seniors on the roster, they finished with the Atlantic 10 crown and a birth in the NCAA tournament, a result that this senior class would certainly hope to emulate.

Replacing the three players lost to graduation are 10 freshmen and a junior transfer from South Africa. Along with the new additions, the Minutewomen are returning are nine of last year's 11 starters, but UMass coach Justine Sowry made it clear that nothing is currently decided.

"The new [players] have been terrific so far," Sowry said. "We've added athleticism, speed, energy and strength and we have tremendous depth this year. We'll be able to rotate a lot more with all our young legs, and there's a lot to be excited about. Everyone will get their chance, and the added flexibility will really help us out this year."

Although much of the team is new, UMass still has veterans at all key positions will help the learning curve of the new players. Looking at the position-by-position breakdown, the veteran presence will certainly be felt, even if there are only three seniors.

Goalkeeping

When looking at a team's roster, it only makes sense to start with the most important position, and for the Minutewomen, it also happens to be the most talented. Sowry, a former goalkeeper herself in Australia, took over in 2007 and the position has been the team's strongest ever since.

This season, Alesha Widdall returns to the net for her third season as the team's main goalkeeper, and for good reason. Widdall is coming off two consecutive First Team All-Conference nominations and All-American honors in 2008. Widdall also played for the U.S. Junior National team for the past two years, She is only UMass player to do so, and is widely considered to be among the best in the nation at her position.

Sowry says that, Widdall having such experience allows her squad to be a little more aggressive in offensive attacks, knowing their backs are covered.

"[Alesha] is one of the best goalkeepers in the country," Sowry said. "She's been practicing a lot this summer and in preseason and the team trusts her behind them. With a quality goalkeeper we can put people up a lot

See FIELD HOCKEY on page 7

Two incoming freshmen in Molly MacDonnell (left) and Lindsay Bowman (right) attack the defense in a game this season. Both have played in all six games and Bowman has scored two goals for four points.

Sophomore goalkeeper Emily Cota will once again be the last line of defense for UMass this season. She has made 24 saves so far this year.

UM will rely on midfield this year with inexperienced group

By Michael Counos
Collegian Staff

For the Massachusetts women's soccer team, learning quickly might be its best strategy, as the squad welcomes 10 new players onto the pitch for the upcoming season.

UMass head coach Ed Matz faces the challenge of developing a younger and less experienced team, despite the good news of losing just three starting players to graduation.

Eight members of the starting group will be back for the 2010 season, a lineup which consists of 10 incoming freshmaen.

While all players are competing for starting spots and playing time, Matz is concerned that the freshmen are not showing consistency yet in the preseason.

"They are playing like normal freshmen would," Matz said. "Two or three will standout one day, and the next day a different two or three will catch my attention."

Matz also stated that his team is very versatile and anyone who can contribute to making the team better will be given the chance.

The 2009 Colonial Athletic Association Coach of the Year has known nothing but winning in his past few seasons with his previous teams at Northeastern. With over 20 years of collegiate coaching experience, Matz assembled a brand new staff, including assistant coaches Brendan Faherty, who is a former head coach at New Haven, and Abby Shiffler who was in charge of goalkeepers at Pennsylvania.

Forwards

In 2010, Matz looks to improve upon the team's offensive production. The forward position is poised as one of the more experienced areas of the Maroon and White with redshirt senior co-captain Sydney Stoll leading the way. Stroll chipped in five goals and one assist in 2009. The other returning starter from last season is Ashley Hamel who distributed a pair of assists in 2009.

UMass averaged less than a goal a game in 2009 and connected on 15-of-192 shot attempts, 81 of which were shots on goal. The Minutewomen averaged about 10 shots per game, just half of which their opponents averaged..

"The key is the offense is going to need to make the most out of scoring opportunties, which is vital to our success," Matz said.

Sophomore Jenna Goodwin returns with 12 games under her belt and an assist in 2009, along with junior Natalie Muka, who played in four games last year.

Junior Deanna Colarossi returns as well as freshmen additions Blair Ferry and Alexa Zielinski.

Stoll and Goodwin have faced injuries in the preseason but look to be healthy for the start of the regular season.

Midfielders

The deepest part of the lineup for the fall lies in the midfield. Led by senior co-captain Therese Smith, who contributed with five goals and three assists last mightseason, might prove to be the heart and soul of the squad.

Starters returning to the midfield include sophomore Meredith Fox, who had a goal and an assist in 2009, as well as senior Kelsey Anderson and juniors Meghan Collins and Lauren Yelinek, who handed out two assists last season. The only freshmen addition to the midfield is Jen Houtman.

"I was ecstatic with the way the girls trained in the offseason and that they entered this preseason ready to work and adjust to my way of coaching," Matz said.

Defense

The most impressive aspect of the 2010 Minutewomen for Matz has been the defense early on.

Led by two seniors Alyssa Viscanti and Anderson, the Minutewomen will pose as a brick wall, challenging their opponents to score.

The defense allowed 169 shots on goal attempts last season and will try to improve upon that to cut down on the opposition scoring, whom averaged nearly two goals a game in 2009.

Other returners include juniors Lindsey DiOrio and Rachel Miranda, sophomore Jess Howe and Marissa Dos Santos.

Matz said that he is looking to fill a spot on the defensive unit, which he expects could come from a freshman. Contenders for the position include Brittany Moore, Jenna Skagerlind, Annie Ward and Lauren Skesavage.

The last bit of defense for the Minutewomen will likely be sophomore goalkeeper Emily Cota. As a freshman, Cota started seven of her 17 games last season , allowing 23 goals and currently boasts 83 saves in net. However, freshman Emersyn Pullan may give her competition as the season progresses.

"I am very impressed with the defense so far," Matz said. "We had a scrimmage against Saint John's in which they played well together and are showing a lot of positive potential for the upcoming season ahead of us."

Michael Counos can be reached at mcounos@student.umass.edu.

Goalkeeper Dalrymple leads Owls to success

By Stephen Hewitt
Collegian Correspondent

A-10 Notebook

The Temple field hockey team currently sits at the top of the Atlantic 10 standings with a 4-1 record, one game ahead of West Chester.

The Owls achieved a winning record mainly due to the outstanding play of goalkeeper Sarah Dalrymple. The senior has come up big for the Owls between the pipes, posting three shutouts in victories against Fairfield, St. Francis and Georgetown, and also recorded a .76 goals-against average so far this season, good for first in the A-10.

On the offensive side, the Owls have been finding the back of the net often due to junior Bridget Settles instrumental attacking ability.

The forward mustered five goals, two assists and 12 points in five games, leading her team. She earned A-10 Co-Performer of the Week honors last week for her efforts.

Settles and the rest of the Owls look to continue their winning ways later this week as they host Delaware and No. 16 Penn State at Geasey Field.

Saint Louis struggles

Heading into its 2010 campaign and picked to finish last in the A-10 standings, Saint Louis was expected to struggle, especially with 14 of its 21 players being underclassmen. Through six games, the Billikens have gone winless and struggled mightily on offense, mustering just one goal, of which came in a 6-1 blowout loss to Ohio.

The offensive play doesn't appear to be the only weakness for SLU. In its six games, it has given up 25 goals, the most of any team in the A-10, which can be attributed to the very inexperienced defense that features one senior and has left junior goalkeeper Alex LaBarge scrambling in front of her net, being shot at 121 times by opponents this season.

For the Billikens, the first four games of the season, which happened to be on the road, did not seem to favor them. They were outscored 14-1 over the first four games, which included a 1-0 loss to Robert Morris in overtime and may have been their closest sniff at victory so far.

The Billikens were hopeful home support would propel them to victory. Instead, they were dealt back-to-back losses, including an embarrassing 10-0 loss to Northwestern this past Sunday.

Saint Louis will attempt to put a win in the column this week, as they host UC Davis and Central Michigan.

Lock Haven debuts

The Lock Haven field hockey team has officially begun play as part of the Atlantic 10 conference.

The Lady Eagles are off to a bumpy debut, sitting in sixth place in the conference with a 2-4 record.

LHU opened the season participating in the Wildcat Invitational at New Hampshire, but couldn't rack up a win, losing 3-1 consecutively to both UNH and Vermont.

The Lady Eagles returned home, where they were shutout 1-0 to Cornell. They tasted victory shortly after, shutting out Saint Francis 4-0 on the road and then defeating Longwood 2-1 at home.

LHU recently traveled to in-state rival PSU, where they were beaten 3-1.

Leading the offensive charge for the Lady Eagles is senior forward Amy Hordenlorf. The former Northeastern Conference Offensive Player of the Year has totaled 10 points, including five goals on the season.

LHU will take to the road as they travel to Bucknell before returning home to play against Colgate and Appalachian State later this week.

Stephen Hewitt can be reached at shewitt@student.umass.edu.

Bridgett Settles has scored five goals and two assists in five games this season for a total of 12 points. The junior leads Temple in nearly every offensive category, helping the Owls to an early 4-1 record.

UMass continues search for president

Transparency a must in search to replace Wilson

By Matthew M. Robare
Collegian Staff

Transparency in the process of selecting the next president of the University of Massachusetts Amherst was at the forefront of Tuesday's public forum.

Search Committee Vice-Chairman Henry Thomas III was adamant about the need for an open search, reiterating a commitment to it throughout the forum.

"Holding public forums on all the campuses and leaving the door and the phone and the e-mail open for input and suggestions [is important]," said Thomas. "But you communicate what people were saying in these forums on the web and give them full access to that information. Through the various web portals, people will have the opportunity to weigh in what their opinions are."

Massachusetts Secretary of Education Paul Reville is looking for diversity as well as strength among the candidates.

"My first interest as a board member is ensuring that it's a strong, fair, transparent process and that we have a diverse pool of candidates," Reville said. "And then as we look forward to the kind of leadership we need in the future, we're looking for somebody with vision, we're looking for somebody with an understand of this sector, but at the same time an understanding of opportunities and challenges outside of the sector.

"We're looking for somebody with experience and a track record of working with government, because government is obviously a part of this and we're looking for a creative leader because I think we have some challenges that we're facing that we need to solve," he added.

However, Jan Greenwood, of Greenwood Asher Associates, a firm hired by the UMass Presidential Search Committee to assist in the process, said that the candidate search is being kept confidential.

"Public searches dwindle candidate pools because job searching loses money for their current institutions," she said.

Greenwood added that public searches draw fewer applicants than confidential searches. However, once the Committee decides on finalists for the presidency, those names become public.

According to Thomas, the Search Committee has yet to decide whether or not to involve the full Board of Trustees in interviewing each finalist in depth.

"Once a finalist is named, those individuals become public," Thomas said. "Massachusetts law gives us the opportunity to keep the search private until it gets to the finalists, as it relates to the who, not in terms of the process," he said.

This means that the process is public and open while the names of the candidates are kept private.

Brandon Tower, president of the UMass Amherst Student Government Association, was concerned about not only transparency, but ensuring the role of the University's students.

"We want a president that's responsible to students as a constituent body," Tower said. "Outreach is a big part of that. The next president doesn't have to follow student ideas to a 'T,' but we would like to see someone who will take them into consideration."

Reville backed Tower's views on the role of students in the process.

"Massachusetts higher education is distinguished by student participation," he said.

Greenwood added that she had participated in over 1,000 similar searches, but that Tuesday featured the greatest number of students in attendance she had ever seen at a function not in the afternoon and where pizza was not served.

Tower believes that the student population isn't sufficiently represented by the online forums.

"I think web forums are inefficient," Tower said. "I think they have the right ideas and the right intentions, but students should have more participation."

The qualities of the next president each participant desired varied according to their interest, but many forum attendees expressed a desire for the next president to make a commitment to the mission of UMass.

"The president should cultivate new strategies in relation to the land-grant tradition," said Lisa Henderson, a communications professor.

Alumnus Bob Shaughnessy said that he'd like to see the next president work on a previous idea.

According to Shaughnessy, the president should "build on the 'Wilson trajectory.'"

"He put us on a good path and we're looking to build on that, not go backwards," he said.

A representative of the Environmental Performance Advisory Committee praised President Wilson's green initiatives, especially the commitment to be climate neutral by 2030 and said that the next president should share the same commitment.

"Vision is part of the perspective of having a new leader," Reville said. "There are a variety of directions in which a university could move at this point, facing the current challenges. From moving to a highly entrepreneurial model to refocusing in on garnering a greater level of state support to describing a public mission and seeking more autonomy while at the same time bringing accountability to that public mission."

Reville continued that a good balance and perspective is necessary in a strong candidate.

He added, "So I think there are a number of things that have to be balanced; how you balance the teaching function, for example, against the research function; what kinds of activities you're willing to undertake in order to garner revenue and what are the implications of taking on those activities to the public mission of the University."

"So it's in that area that I think the board will look to the candidates to find what the mission is for the University," Reville added. "And then somebody with whom we can work as board members over time in shaping that mission, because the board has a lot of ideas in terms of the future of higher education."

Students ignoring 'Mom's missed calls'

By Katie Byrne
Collegian Staff

September has almost come and gone, and most students have finally settled into their routines. Some parents are experiencing the "empty-nest" syndrome while some might be worried their son or daughter not eating enough vegetables, drinking enough milk or getting enough sleep.

College kids 15 years ago were not subject to the bombardment of these kinds of questions from parents since cell phones were not readily available and the idea of Facebook wasn't even thought of. Now, those parental fears can be lessened with just a call or a click.

Some might argue that since parents are able to contact their children easier than ever before it could benefit the relationship as a whole.

The question becomes, "How much is too much?" How much contact is healthy for a parent to have with their college student, and in what ways can students and parents find a balance in communicating effectively?

Barbara K. Hofer, Professor of Psychology at Middlebury College in Middlebury, Vermont and co-author of the book, "The iConnected Parent: Staying Connected to Your College Kids (and Beyond) While Letting Them Grow Up," published in Aug. 2010, helped to answer some of these questions. The research for her book was initially conducted in Middlebury, Vt. with Middlebury College Students, then eventually expanded to the University of Michigan where a more stratified sample of students were surveyed.

During a phone interview earlier this week, Dr. Hofer emphasized how developmentally crucial this transitional phase of a student's life is and how his or her parents need to understand the importance of letting go.

"Parents need to try hard to realize this is a different phase of life," she said. "Kids need to learn how to do things on their own."

Chandler Kaplan, a freshman, will answer her parents depending on the situation.

"When my parents call, I just press ignore if I don't feel like talking, and I'll talk to them whenever," she said.

Leah Jacobson, also a freshman, calls her parents once or twice a week and texts them about once a day just to check in.

With cell phones, e-mail, Skype and Facebook among others, communicating has never been easier. Parents have access to all of these means of communication which puts them one click away from being connected to their son or daughter.

Hofer commented that there needs to be a fine balance between checking in and giving kids their personal space.

"It should be about quality not quantity, so don't use phone calls to nag or remind. There are ways to be involved without being too involved," she said. "Let the student do the guidance about how much is enough."

Junior Hannah Stoops said that she has a system of sorts set up with her parents.

"I think the boundaries came naturally for us, because when I was a freshman I would call every three to four days, and if I didn't call by the fifth day my parents would call me," she said.

Janine Roberts Ed.D., Professor at the University of Massachusetts commented in a phone interview that students just need to develop on their own.

"This is the first time at 18, 19 or 20 that kids have to structure their own lives. They're going to have ups and downs and make mistakes," she said. "The best thing is for parents to just be available."

James Covino and Brian Carroll, both freshmen, said they haven't spoke to their parents since they moved in two weeks ago.

"I have a missed call from my Mom, and I haven't called her back yet," stated Covino.

Both agree that they'll only contact their parents when they need something, never just to talk.

When Facebook was introduced into the conversation, Hofer addressed the concerns she has with parents using Facebook to connect with their children.

"There was a brief period of time Facebook was the playground for college students, they had the freedom to explore that space," she said. "It is a wonderful place for adults to reconnect with old friends and classmates, but there is a difference between commenting to peers on Facebook and commenting to kids on Facebook."

When conducting research, Hofer found that some students have activated two Facebook accounts, one for their parents and one for their friends.

Hofer explains how the wrong kind of communication will result in the lack of students' growth and independence.

"This is the time for students to be making connections to other peers, not to parents, she said.

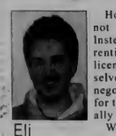
Fighting IP encroachment



Eli Gottlieb

How would we like to not own our textbooks? Instead of owning or even renting them, we could license them and bind ourselves to arbitrary, non-negotiable agreements, all for the same price as actually buying the textbook.

Well guess what? Now we can.

Last Friday, the Ninth Circuit Court of Appeals ruled that a long-standing provision of United States copyright law known as the "First Sale Doctrine" does not apply when someone has merely licensed a copy of a work instead of owning it. What does it mean that someone licensed the work instead of owning it? It means that they opened the box, and by doing so "agreed" to the terms of the license. If the license forbids ever transferring the work, for example to sell it second-hand, too bad.

The "licensee" has, after all, "agreed."

Of course, the case at hand merely revoked the First Sale Doctrine in the case of licensed software, but in fact the same principle can apply to absolutely anything to which copyright law applies: movies, music, software, pictures, magazines, newspapers, web pages and books.

If it can be written down, we can no longer really own it unless the "licensor" allows. After all, we paid money for a physical object and opened the package, so we really should not have any illusions of ownership.

This might sound paranoid or insane, but the extension of copyright from a government-backed social covenant between writers and the public into a form of "intellectual property" that enables large corporations to control all media use has proceeded at a rapid pace.

Just a few decades ago, copyright did not last perpetually, and works actually entered the public domain after their creators had their fair chance to make money.

Now, copyright never ends (at least not for anything made after 1923), and anything digital comes with anti-copying software in place that the government has made it illegal to break, regardless of whether one has the right to make copies of the work in question under copyright law or license. Amazon.com even reached into their customers' pockets to enforce "intellectual property" by remotely deleting electronic books without correct copyright licenses.

We can strip the Digital Restrictions Management software from the e-books we own – quite possibly the most convenient, effortless act of civil disobedience ever.

What does this matter to us as students?

Other than the strong possibility that we will find ourselves licensing textbooks we now own for just as much money, our university has already begun a transition towards electronic textbooks and electronic homework systems. These come in the form of licensed software or, more commonly, the even worse form of access to a web site.

You cannot take and pass anything so simple as Intro to Biology, Calculus I, or Physics 151 anymore without having to purchase an access code ($65 when I had to get one) and "agree" to a license that literally allows the textbook publisher to revoke your access any time for any reason, or after a specified time period of a semester or a year – whichever comes first. The classes will fail you if you don't buy it since they collect their homework through these systems, despite the existence of free e-homework systems like OWL (which belongs to UMass) and WebWork (which is open-source software).

I also recently took a survey from a textbook publisher in the campus center.

It asked me whether I would value the opportunity to purchase permanent access to an electronic textbook, in contrast to the current temporary access. I don't call this an opportunity, I call it a restriction of my rights as a student. We students have a right to take a class without coercive contracts that strip away our ownership of goods we purchase, especially at such exorbitant prices. The nightmarish future has already arrived, and as more reading moves into digital form and textbook publishers push the envelope in their paper editions, we will learn to value what previous generations of students took for granted: that our books belong to us.

So what can we do? We can write to our professors and demand that they stop using restrictive electronic textbooks at the very least, by enabling us to download the texts themselves rather than simply viewing them through a revocable web portal.

We can strip the Digital Restrictions Management software from the e-books we own – quite possibly the most convenient, effortless act of civil disobedience ever. We can refuse to purchase restrictive e-books, and especially the restrictive hardbacks to come, whenever we can, and we can purchase, to truly own, second-hand textbooks from our fellow students (which is cheaper too).

If we really got organized, we could even attempt a mass boycott of e-textbooks and non-free e-homework systems.

We really need to do all of these before we find ourselves in a society where students pay monthly subscription fees for their education instead of owning their own knowledge.

Eli Gottlieb is a Collegian columnist. He can be reached at egottlie@student.umass.edu

In the Python's nefarious coils

Matthew M. Robare

An insidious force has bored its way into America's heart, threatening our fundamental rights and freedoms with nonsense and silliness. Some of you will laugh and call me a conspiracy theorist, but I am only interested in the facts of conspiracies and the facts are plain to see.

Think about it. Sarah Palin and the Rev. Terry Jones have come to define the right-wing in America and they have made its public image into a laughingstock.

I mean, "refudiate?"

If the next big conservative faux-pas is made by a Tea Partier named "Gilliam," don't say I didn't warn you. The United States is being taken over by Monty Python.

It all started back in the 60's when "Monty Python's Flying Circus" first came to the United States on PBS. With a blend of subversion, surrealism and funny British accents, this devious foreign show was innocently welcomed into American homes and minds. It made people laugh and the laughter gave them a foothold on our shores.

The thought of watching soccer does not fill me with revulsion; the thought of being Anglicized enough to enjoy it does.

Soon enough, the Pythons themselves started coming over here. Eric Idle has lived in the United States for some time – he's probably the ringleader – as has John Cleese.

Terry Gilliam was born in America; Terry Jones and Michael Palin remain in the United Kingdom, allegedly, and Graham Chapman remains dead, allegedly.

Now that I know the truth about how this great country is being destroyed from within, the warning signs are plain to see. I mean, a "Tea Party?" Tea parties, like Monty Python, are British. Meanwhile, a huge oil spill in the Gulf of Mexico undermined public confidence in the American president, paving the way for Tea Party victories in the mid-terms – an oil spill involving British Petroleum.

If we do not act soon, we run the risk of being re-colonized, of having to use all sorts of superfluous "U's" and the incomprehensible grammatical styling of the Queen's English (What's up with not ending sentences with prepositions?). To imagine this country ruled by any monarch other than Hilary Clinton causes my patriotic blood to boil. The thought of watching soccer does not fill me with revulsion; the thought of being Anglicized enough to enjoy it does.

The entire Tea Party Movement has the feel of a Python sketch.

Where else would conservatives behave like college students going on protests and calling for the establishment's overthrow, than in a surreal skit? In a show that featured a musical number about money, the last word in redundant government agencies, the greatest argument ever against gun control and taxation gone mad, it is clear that this conspiracy is very old and has been aimed at subverting American conservatives so that they would betray their country at such a crucial moment in history.

But can we fight back? Armed with the truth, we can.

Only by remaining true to the principles of comedy the Founding Fathers' class clown friends laid out for us 234 years ago, can we hope to withstand the onslaught and survive this heinous conspiracy. Principles of rapid-paced wordplay, slapstick involving matronly women looking for love and farces set in the most sacred stomping grounds of high society.

Yes, in Marx we entrust our independence. Just remember, outside of a dog, this column is your best friend. Inside of a dog it's too dark to read.

Matthew M. Robare is a Collegian columnist. He can be reached at mrobare@student.umass.edu.

Ed/Op presents the S.P Sullivan Memorial Prize for Haiku Writing

MEMORIAL PRIZE FOR HAIKU WRITING

I mail us our haiku's
The winner collected will be published and receive a prize

S P Sullivan

A haiku is an old form of poetry from Japan, originating from around the 17th century.

In English, haikus have usually been 17 syllables on three lines – five, seven and five.

S.P. Sullivan, former Collegian Managing Editor, was a major proponent of the haiku.

Our very first winner!

UMass student
Jeffery Bernoth

The haiku's about
Packing a cosmos into
So few syllables.
–Jeffery Bernoth

Congratulations!

Come down to the newsroom to claim your prize.

LETTERS *to the* EDITOR

Editorial@DailyCollegian.com

Letters to the editor should be no longer than 350 words and can be sent to editorial@dailycollegian.com or submitted online at dailycollegian.com. We regret that, due to space constraints, not all letters will be printed, but can be found online.

NO SERVICE TO GRAD STUDENTS

Dear Editor,

I was extremely disappointed to learn that Career Services will no longer be providing dossier service for graduate students. This was a remarkably short-sighted decision, not to mention sharply detrimental to the University of Massachusetts' attempts to present itself as an attractive option for prospective graduate students.

How can we claim that UMass Amherst is a competitive school, committed to helping its graduates find good employment, when the administration abdicates its responsibilities to its students?

How can the Graduate School justify increasing student fees each year while, at the same time, cutting the services for which those fees pay?

Given that dossier management is one of the most crucial administrative components for graduate students in going on the job market, I'm not clear on what services the office of Career Services now provides for graduate students at UMass, nor why graduate student fees should continue to go to support that office.

Matteo A. Pangallo
Renaissance Center

VOICE FROM BEYOND THE GRAVE

The rumors of my death have been greatly exaggerated.

S.P. Sullivan
UMass '10

IT'S TIME FOR CYCLISTS TO USE THEIR HEADS

Dear Editor,

The University of Massachusetts encourages students to ride bikes as a way to help the environment. I don't see any problem in this, but from my experiences as a student traveling on foot, bicyclists don't have any safety concerns. When you put safety and bike in the same sentence, you think of a helmet. There aren't many bikers that wear a helmet when riding a bike. Of my observations on campus, one out of 15 bicyclists wears a helmet. There isn't a law that you have to wear a helmet when riding a bike but it can save your life if you ever get into an accident. Most bicycle deaths are from head and face injuries. Each year, about 800 bicyclists are killed and more than half a million are treated in hospital emergency rooms. In recent years, almost two-thirds of the deaths and one-third of the injuries involved head and face injury. Shouldn't this encourage people to wear a helmet?

Bicyclists and pedestrians share the same paths. There is a law which states that bicyclists must give pedestrians an audible signal before overtaking or passing them. Nobody has done this yet. They could easily knock someone down when coming from behind at such a fast speed. Pedestrians shouldn't have to worry about getting hurt by a biker.

I think bicyclists should read the bike laws before they ride their bikes. This way there will be safety to both bikers and pedestrians and can also prevent accidents from happening.

Jenny Yuen
UMass student

A LONG WAY FOR NOTHING

Dear Editor,

Freshman commuters are a largely ignored minority here. It's assumed that all freshmen will live on campus and most of them do. Everything done for freshmen is done with resident students in mind.

What is there for commuters? I investigated this question and the answers were depressing. There is no official office for commuters. When I looked for one I was told to go to the RSO office, find a club I liked, and join it.

Unfortunately, most clubs meet at night when I'm already back home in Chicopee, Mass. and have little inclination to drive back. There are signs in the student union pointing to a commuter lounge that does not exist. I have searched endlessly for anything resembling commuter integration here and I have yet to find it.

Because of this lack of commuter integration, I know very few people on campus. The few people I do know are former high school classmates. I have no one who I can call a friend here. The University of Massachusetts needs to be commuter-friendly, especially if there is going to be an option for freshmen to commute. My freshmen year has already been ruined, but it's not too late to save someone else's.

Fall fashion preview: back to basics

Layer your look as cold weather beckons a chic new wardrobe

By Joanna Guberow
Collegian Correspondent

Whether you want to be cute, chic or just warm this fall, a new refined fashion that blends trendy with comfort is "in" this season. The basics remain the same: great denim, sexy boots, and comfy sweaters. Layering is as important as accessories are to make any look complete. Want to update your wardrobe? Try something new this year; one unique piece can make a statement.

Jeans

Acid jeans are in, and washed-out grays and blacks, or other dark washes, are best. Go for embellishments. Appliqués are back as are studs, and rhinestones.

If you don't have the cash for department store brands, go to your local thrift shop for a pair of jeans. Invite your friends over and ask each of them to bring patches, appliqués, or anything else you can attach to fabric, and you can create custom denim together. Want something a little more understated? There's nothing better than a great dark jean.

The most important thing about denim is fit. Although a skinny leg opening is convenient when wearing boots because they can tuck in easily, a flare leg can be just as equally flattering. For short legs, go for denim with a skinny leg opening that you can wear with heels; it will make your legs look longer. For tall girls, a flare is chic and will make you stand out. For those in the middle, boot-cut jeans will look great with both flats and stiletto boots.

Pick denim that you know you will be comfortable wearing. Mid-rise and flare work together to balance your hips out with your legs if you have a curvier figure. Boot-cut and skinny leg openings are usually low-rise, but mid-rise options are out there, so girls of all sizes can rock them too.

Top

What's better than a comfy sweater in the fall? Start with your favorite pair of denim and build up. If you love skinny jeans, bigger is better. Feel like a flying squirrel? Belt it. Or go in the opposite direction: Pair your favorite summer tank top with a long boyfriend cardigan. For a boot-cut pair of jeans, try a v-neck sweater in a jewel color. If you have blue eyes, try teal; if you like pink, try magenta. Flare jeans will look sophisticated with a light sweater under a neo double-breasted jacket.

If you're not partial to sweaters, there are other trends that might be right for you. Try a men's button-down shirt. This season you can find chiffon and satin fabrics, or borrow your boyfriend's. Fit a vintage style belt at the smallest part of your waist, and pair with skinny jeans and ballet flats or oxfords.

Want to be a commander of this fashion season? Go military. Army green is in. (Please no camo.) You can find military style jackets, patterned tops and skinny pants all in this color. Pair it with cream or black. Prefer the navy over the army? Try a pair of navy pants or a navy button-down. Need a fall date outfit? Pair a navy t-shirt with a black denim mini skirt.

Shoes

Boots, boots and more boots. If you want an edgier look, try a motorcycle boot with studs, rhinestones, and/or buckles. Go for black, brown or army green. Another great boot is the wedge bootie. It looks sexy, but sweet with skirts and tights. Dress it up or down.

Go for a slouchy flat boot this year to walk around on campus, but for night, amp it up with an over the knee look in taupe or gray. If you'd rather not shell out on fancy boots, try socks with heels. Legwarmers also pair well with stilettos, and wedges. With skirts, try over-the-knee socks with lace or ribbon details, and wooden heel clogs.

Accessories

For jewelry, find one-of-a-kind artisan work at websites like Novica.com or Elizabethplumbjewelry.com. Thrift shops are great places to find vintage pieces. Mixed metal jewelry will pair well with the military focus this year. Black and burnished gold are in, and so is black. Mix with pearls or other warm-colored jewelry like amber beads. These will add a feminine flair to lace looks.

Craving warmth, but don't want to sacrifice fashion? Try a scarf, hat or tights. You can make your own scarf from your favorite old t-shirt. Snip the top half off just below the armpits, and fringe one side of the loop. Let it hang over a loose T and skinny jeans, or double loop it over a fitted button-down and boot-cut jeans.

This University of Massachusetts student skillfully pieced together an autumn outfit comprised of a classic skirt, patterned top and cream sweater. Finishing off the fashionable outfit are a pair of eye-catching flat booties.

Sister duo CocoRosie hits the right chords in Noho

By Sam Butterfield
Collegian Staff

Sisters Bianca "Coco" and Sierra "Rosie" Casady, better known as indie-folk-psych group CocoRosie, certainly defy any easy categorization.

The duo, who have made beatboxer Gael Rakotondrabe a permanent member of their group, will play at the Pearl Street Ballroom in Northampton Thursday night at 8:30 p.m.

The pair is fresh off the release of its fourth album, "Grey Oceans," their first studio work since 2007's "The Adventures of Ghosthorse and Stillborn."

Dreamlike and ethereal, CocoRosie's material consists of often sleepy, weaving synth lines with haunting, swooning vocals from sister Sierra and overdubbed, hip-hop-styled bursts from Bianca, better known as Coco.

The combination and contrast create something unbelievably unique in today's oft-homogeneous world of lo-fi indie music. Often sampling from children's toys, broken phones and music boxes, the group's unorthodox approach fashion for them an avant-garde, almost Lynchian aesthetic. CocoRosie is meant to be weird, but to them, weird is beautiful and beautiful is weird.

The sisters were raised in and out of the Native American Church, and this is often evident in their style of dress. The two will do anything from war paint and feathers to Chicago Bulls jerseys, and anything in between.

Often gloomy and melancholy, some of the pair's work, such as that found on their 2003 debut, "La Maison de Mon Reve," is evocative of a grey fall day with the first frost of the year nipping at your skin. It tugs, it croons and it juxtaposes Coco's squeaky singsong rhymes with Rosie's riveting call.

CocoRosie's 2005 release "Noah's Ark" is a more elaborate production, opening with the anthemic "K-Hole," which deals with spirituality and repentance. With a dreamy synth line and beatboxed percussion, Coco sets a striking tone for the album. The work then transitions to "Beautiful Boyz" which lets Rosie rip into her deepest, most intense operatic range.

CocoRosie is nothing if not eclectic and varied. They command a wide range of abilities, as their distinct, separate styles make for a unique hybrid of electronic folk and l'opera Francais.

In performance, look for emphasis on their newest work, "Grey Oceans," which they are currently promoting.

The album, which was released in May, incorporates many of the same harmonies and dynamics as their earlier work, but features more emphasis on the harp and relics less on the backbone of garbled synth the duo traditionally relies on. The opening track "Trinity's Crying" features a livelier synth than much of the pair's work, with an eerie, almost out of place conflict between synth and the sleepy folk of the harp.

One clear winner is the third track, "Hopscotch," which opens with Coco chanting about the children's game before shifting to a much deeper, more robust synth line than the duo features with Rosie enchantingly crowing almost unintelligible notes. The whimsical piano is a welcome departure from the pair's more familiar, sleepy whir.

Ready or not, CocoRosie will bring its blend of weirdness, eccentricity and overwhelming creativity to Pearl Street tonight.

Sam Butterfield can be reached at sbutterfield@dailycollegian.com.

COURTESY MISSQ

CocoRosie shatters indie rock standards with its avant-garde blend of ethereal vocals, hip-hop interjections, and dischordant tones. The sister duo will be playing at the Pearl Street Ballroom in Northampton on Thursday night at 8:30 pm.

Amour or less: Summer Fling

Got a one-nighter dilemma? Take a gander at your options

By L. Chisolm
Collegian Staff

Welcome to the new relationship advice column Amour or Less. Amour or Less will run weekly with real questions and dilemmas from students like you.

Our first student had the following dilemma:

"I hooked up with this girl on a summer program, and even though I thought it was something casual, she really thought it was something more serious. We don't go to the same school, but I'm likely to run into her again, since she's friends with all my friends from the program. How do I deal with her at the inevitable program reunion?"

First things first: Don't worry about seeing this girl – let's call her Summer Fling – until you know a reunion has been scheduled.

Worrying about things that haven't happened yet can cause a lot of unnecessary stress, especially when it comes to things like current or past relationships. Don't do it.

If your friends from the program do get together for a reunion at some point this semester, you have a few options on how to handle it:

The Douche Bag Option: Go to the reunion. Party with your friends. Completely ignore Summer Fling, or interact with her only through snide comments and insults.

The positive side of this option is that it's easy – it doesn't sound like you're a huge fan of Summer Fling, and acting on those feelings of dislike would be the simplest thing to do.

The negative side, of course, is that acting on your dislike makes you come across as a douche bag. Sure, you don't really care what Summer Fling thinks, but what about the other people from the program?

The Weak Option: Skip the reunion altogether. Seeing your friends isn't worth the potential awkwardness of dealing with Summer Fling.

This option guarantees a minimum of uncomfortable interactions with SF. It is, however, likely to confuse your other friends from the program, especially if they don't know all the details about your relations with this girl. Plus, it'd be a huge bummer to miss out on fun times with all your summer friends just to avoid a little bit of lady drama.

The Mature Option: Go to the reunion. Party with your friends. Treat Summer Fling politely, but don't go out of your way to make conversation with her unless you decide you want to.

While treating Summer Fling with politeness when all you really want to do is drop her off a cliff (Amour or Less does not, under any circumstances, condone any actions – such as dropping people off of cliffs – that involve bodily harm or death. Things like that are never worth the legal fees) might seem difficult, it's definitely the best way to act in the long run.

It's good for your relationship with your friends from the program, since they'll see that you can behave like a decent person around your ex. It's good for Summer Fling, who might be feeling just as embarrassed and awkward about seeing you at this point in the year. Most importantly, it's always, always a good idea for you to maintain the moral high ground. That way, if Summer Fling turns out to be more like Summer Cling, you come out of the reunion looking spotless and none the worse for wear.

Have a relationship question but don't know who to ask? Send in all of your relationship dilemmas to amourorless@gmail.com

Canty dishes on new album collaboration

By Dave Coffey
Collegian Staff

Amidst the rising popularity of Lady Gaga and the club-pop archetype of female musicians, singer-songwriter Caitlin Canty recently recorded and released her second full-length album, a seven-track folk-pop offering entitled "Neon Streets." The sparse but sincere album is a first for the Vermont-born singer-songwriter, as its creation was the result of collaboration between the songstress and Northampton-based string-rock group Darlingside.

While Canty quickly acknowledges that her largely acoustic and vintage sound contrasts starkly with the average popular female musician's, she wouldn't have it any other way. She prefers the intimate vibe of strumming her music out in smaller venues such as coffee shops and bars to selling out stadiums any day. Similarly, as opposed to many of her more poppy contemporaries, Canty says she is more inclined to write stripped down, personal songs instead of the average glossy pop tune.

"I think of the Gaga's more as actresses than musicians of my ilk," says Canty. "It's less about the music and more the persona."

According to Canty, the family of her childhood best friend, Liza, originally influenced her organic approach to making and performing music. Liza, as well as her parents and brother, were all musicians, which inspired Canty to take trumpet in the fourth grade. Canty says she picked the trumpet because she noticed all the other girls were playing either flute or clarinet, and she didn't want to be "girly."

Canty played and sang music as much as she possibly could throughout her childhood and adolescence. Through music classes in high school, she met several music teachers who further fostered her love for music. They also helped her into performing at state and regional festivals for trombone and voice, an experience she recounts as, "eye-opening for a hick from Vermont."

In her senior year of high school, Canty says her parents gave her an acoustic guitar as a birthday present. After essentially teaching herself how to play guitar, she played in the stairwells of her dorm and at open mic nights and began experimenting with songwriting. While she admits to sometimes regretting never taking any formal guitar lessons, she ultimately believes her self-taught methods are potentially a blessing more than a curse.

"I sometimes wish I had taken real lessons so my technique wouldn't be so god-awful," says Canty, "but I also think it can be beneficial that I haven't learned rules that I might be hesitant to break."

Heavily influenced by classic rock legends such as Led Zeppelin, CCR and Tom Petty, as well as a diverse array of singer-songwriters from Paul Simon and Johnny Cash to Joni Mitchell and Ani DiFranco, Canty developed a taste for trying to write songs that combine the stirring and rhythmic movement of rock n' roll with the clever and thoughtful nature of vintage singer-songwriter material. However, she admits that the genre of music that she tends to fit in with best - acoustic singer-songwriter - has its shortcomings that she feels she needs to transcend as an artist.

"I don't like middling singer-songwriter dribble at all, it makes me feel ill … And I can recognize some of the dribble in my music," says Canty. "I want to get better at writing and performing music that has movement to it."

For Canty, her latest album, "Neon Streets," is a step in that musical direction. While Canty wrote all of the songs, sings all lead vocals and plays acoustic guitar on the record, the accompaniment in each song is provided by Noho-based quintet Darlingside. In addition to providing an instrumental backline for Canty on the record, the string-rockers also took care of producing, engineering and mixing the record. The result of the collaboration, according to Canty, was an entirely new sense of depth and dimension taken on by her songs.

"This album takes me out of my almost completely solo apartment recordings of [Canty's self-produced 1997 full-length debut] 'Green' …and opened my music up to collaborators with different strengths and opinions," she says. "It felt like moving from black and white to color."

Don Mitchell, guitarist/vocalist for Darlingside, not only lent his singing and playing skills to "Neon Streets," but also had a heavy hand in engineering the record. Despite tight deadlines and newly treaded water on Canty's part, Mitchell said Canty's growth as a musician and songwriter was readily apparent during the recording sessions.

"It's hard to perceive a maturity shift on a short timescale, but Caitlin certainly adapted over the course of this project according to our initial rehearsals and first recordings," Mitchell says.

Mitchell also specifically praises Canty's vocal abilities, calling her a "natural vocalist." Noting that she has had little to no formal training, he alleges, she succeeds where other folk and pop female vocalists tend to fall short.

"She can somehow pull off runs and turns that sound forced to me on many successful female pop artists," says Mitchell. "And she has a knack for making the standard folk lines very much her own."

As a result of Canty's overwhelming satisfaction with the direction of "Neon Streets," she plans on working with Darlingside again in the near future if at all possible. In addition, Canty is also eager to explore collaborations with other musical artists in the form of future recording work.

"I'd love to see what happens when I find my musical soul mate, my Lennon or Paige," Canty says wistfully.

For the time being, however, she is content to taking her show on the road, promoting "Neon Streets" in intimate venues across the country. Though she does not have any solid plans for exactly who her next collaborators will be or the direction in which her next album will take her, Canty is merely content to keep one goal in mind: "All I know is I want to make music that moves people."

To find out more about Caitlin Canty's upcoming shows and how to purchase "Neon Streets," visit Caitlincanty.com. For information on Darlingside and their self-titled debut EP out now, visit Darlingside.com.

Fashion: Trendy meets comfy

FASHION from page 4

Tights with prints or patterns, as well as bright colors, are chic, and will update any bland fall palette.

Something else on the scene for this year for all of you animal-lovers out there are animal-shaped knit hats. Pandas, monkeys and frogs top the list for highly desired designs. If you would rather save the animals for dinner, go for a funky knit beret or 1930's-inspired felt hat.

Fashion doesn't have to be expensive to be chic. Mix some of your favorite basics like plain white T's, lace camis, and basic denim with some of the trends this fall season, and make a visit to your local thrift shop. Donate last season's clothes, and pick up some new signature pieces to add to your wardrobe. In any case, make a statement this year.

Now is UM's time to shine

Massachusetts football coach Kevin Morris said his team is not going to Michigan just for the spectacle of playing a Football Championship Subdivision team.

He doesn't care about putting his team in front of 100,000-plus fans along with a national TV audience and picking up a paycheck (The Republican reports it's around $550,000) and going home happy regardless of the outcome.

Adam Miller

The second-year coach expects his team to play the Wolverines with as much intent on winning as it would against any other Football Championship Subdivision opponent. Just before practice on Tuesday, he went as far as saying that anything other than a victory would make this trip a failure.

"We're going there to win," Morris said. "We're not going there to be a show team. You know, we're not the Generals playing the Harlem Globetrotters. We're going to try to win a game."

Everyone else outside of Morris and the Minutemen are likely not picking UMass to be the second FCS team in recent history to upset Michigan.

It's far from a foregone conclusion that the Maroon and White will have to "hail to the victors valiant" when it comes to the Big House. It only needs to look at last week's game, where James Madison upset then-No.13 Virginia Tech.

Since then, the Hokies are now out of Associated Press Top 25 poll. If the Minutemen upset the Wolverines, it would be without a doubt a huge boost to a team that's already off to a solid start.

But even if they can't dethrone the "Champions of the West," Morris should consider this game to be all in vain. While the phrase "moral victory" is cliché, Morris and Co. will come home with a victory of some sort, even if it's not reflected in the final score.

UMass football is beginning to get about as popular as anyone can ask for in a FCS setting, between current New York Jets tackle Vladimir Ducasse getting selected in the second round of the NFL Draft and New York Giants receiver Victor Cruz becoming a household name overnight with his preseason play.

The game against the Wolverines only adds to those accomplishments. Recruits want to know that they'll receive a chance to perform on the big stage and this weekend's game is just the latest example of that.

If the Minutemen can stay relatively close to Michigan this weekend, there is little doubt that it's going to create interest.

Their trip to Ann Arbor, Mich. will also create excitement at home and around the state. UMass doesn't exactly have problems getting fans into games, but a little extra publicity never hurt anyone.

This year, fans that can't get to Michigan will be treated to something a little closer to home when UMass plays New Hampshire at Gillette Stadium on Oct. 23. Morris said he had nothing to do with the decision to play at the home of the New England Patriots, but it's safe to assume that the decision-makers had to look no further than last year's basketball game against Memphis at TD Garden to make that decision.

That game reached higher attendance numbers than any UMass home game last season, despite a snowstorm. While UNH doesn't quite bring the same buzz as Memphis, watching a game at a pro sports stadium should draw large numbers.

Besides, it also brings the Minutemen to the more populated Eastern Massachusetts, where fans and alumni who don't feel like making the trip out to Amherst will get a chance to see their school in their own backyard.

There's no better time to ride the success of recent football graduates than this year and the games against Michigan and New Hampshire are great for making sure the buzz UMass received in recent months continues into the fall.

Add to that the fact that the Minutemen are now one of the best teams in the FCS and you've got something that's better than a show team; the potential to be a serious force in the subdivision for years to come.

Lawrence hitting holes at next level

UMass alum finding success with Ravens

By David Brinch
Collegian Staff

(This article was originally published Sept. 6 on Dailycollegian.com).

On an early August morning, former Massachusetts and current Baltimore Ravens running back Matt Lawrence eagerly watches and cheers on his teammates as they lift their knees high in the humid Westminster, Md. air, jumping through a rope ladder while securing a 15-pound weighted football filled with sand.

Lawrence carries the weighted ball everywhere he goes, from drill to drill, practice to practice, going through the motions mentally so that when he returns from a knee injury that landed him on injured reserve last season, he will be ready to start his second season in the Charm City.

"When I get back on the field, I will be able to hold that ball so tight, it won't even be funny," Lawrence says.

Finishing his collegiate career in 2007 with the Minutemen after spending his first two collegiate seasons at Connecticut, Lawrence has since had an interesting journey through the NFL so far.

Lawrence signed with the Chicago Bears as a rookie free agent in 2008 but was later released. Last January, he signed with the Ravens and made a strong contribution on special teams in his first season with the team before his season was cut short.

Lawrence played in eight games in 2009, totaling 16 special teams tackles, four rushes for zero yards and one reception for four yards before going down in Week 11 in a 17-15 loss to the Indianapolis Colts.

In his first NFL game, he had three special teams tackles and forced a fumble in a 38-24 victory over the Kansas City Chiefs. He would not play another down for the Ravens in 2009.

After playing in six games as a freshman and 10 as a sophomore for the Huskies, Lawrence decided he needed a change.

Former UMass coach and current Maryland defensive coordinator Don Brown gave him that opportunity.

"I give a lot of credit to coach Brown, he took me as a transfer late coming out of UConn. We had a month until camp, I signed in July and if it wasn't for him, who knows where I would be," Lawrence says. "I just thanked him for the opportunity to play the game I love."

Lawrence got to catch up with his former head coach when the Terrapins visited Ravens training camp in early August, as the two reminisced about their time spent in Amherst.

As a Minuteman, Lawrence compiled an impressive resume, playing in 43 games, starting 24, and rushing for 2,035 yards with 21 touchdowns.

But in his first game in a UMass uniform in 2005, Lawrence went down with a knee injury and redshirted the rest of the season.

In 2006, he came back and started seven games at fullback and blocked for the second-leading all-time rusher in UMass history, Steve Baylark.

Much like he did in college, Lawrence now wants to overcome a serious injury and find success at the next level.

"You know you want to get out there so bad," Lawrence says. "Anything you love and can't do it, and you're so close. When I first got hurt it was a long way away, but now that I'm so close to coming back, I just want to be out there."

While Lawrence has been held out of contact drills and has not seen any action in any preseason games, he has learned a lot over the past two seasons from veterans such as Willis McGahee and Le'Ron McClain, as well as third-year back and starter Ray Rice.

"You learn a lot especially being here for two years, [you learn] a lot of little stuff, techniques, hitting the holes a certain way, and that's what I take away from guys like Willis and Le'Ron," Lawrence says.

Coming off of a 9-7 year, which ended with a divisional playoff defeat to the Colts, the Ravens bolstered their offensive unit with a pair of new receivers, acquiring Anquan Boldin and signing Donte' Stallworth while getting younger on defense by drafting defensive tackle Terrance Cody and linebacker Sergio Kindle.

The Ravens are a popular pick to reach the Super Bowl for the first time since 2001, but Lawrence wants his team to take it one game at a time.

"Obviously we want to win every game, and I kind of have the old school mentality, to get ready for one game at a time," Lawrence says. "Everybody wants to win a championship, but personally, I want to get ready for the first game, and then the next game, and then the game after that."

This preseason and upcoming season, Lawrence is seeing some former UMass teammates that are currently trying to make an NFL roster from the opposite sideline.

Running back Matt Lawrence celebrates after scoring a touchdown during his UMass career. He is currently looking to overcome an injury from last season before playing for the Baltimore Ravens.

One of those former teammates is New York Giants receiver Victor Cruz, who was the NFL's current leader in preseason receptions, including four touchdowns, while making the Giants final roster.

Along with the Giants, the Ravens face former UMass offensive lineman Vladimir Ducasse and the New York Jets Week 1. Ducasse, an All-American at UMass, was drafted in the second round in 2010 and has impressed so far in camp. Moved from tackle to guard after being drafted, Ducasse, could start against the Ravens Sept. 13.

Safety James Ihedigbo and receivers Brandon London and Jeremy Horne are also on NFL rosters, while 11 players from UMass' 2009 team were invited to NFL training camps.

"We are top of the line. I definitely represent for the players coming out of the CAA. We are all over the place, we work hard," Lawrence says.

Lawrence's transition to the Ravens was made easier with two coaches who have ties to the UMass program.

Ravens defensive line coach Clarence Brooks and his son, offensive assistant Jason Brooks, both coached for the Minutemen.

Clarence played offensive line for UMass from 1970-72, and was named a captain in his final season after earning All-Conference and All-East honors. From 1976-80, he coached the defensive ends.

Jason joined the team last season, helping the offensive unit in a number of different areas. For two months in 2007, he helped the Minutemen's defensive backs in spring practice under Coach Brown.

"Matt and I hit it off right away. I always followed him," Clarence Brooks says. "I still keep in touch with as many as my UMass friends as I can. [I] haven't been back to the campus in a while, but I look forward to doing that one day."

Like Lawrence, the younger Brown is impressed with the NFL talent not only coming out of UMass, but out of the entire Colonial Athletic Association.

"I've always told guys, no matter where you are, scouts are tireless workers and they will find you," Jason, Brooks says. "To see guys from UMass, Richmond, James Madison, other I-AA schools, Division II and III schools, I think we will see more guys coming from that conference in the years to come."

Looking back on his UMass days, there are a few things Lawrence will take with him and misses off the field from his days in Amherst.

"Don't take UMass for granted, keep going, and Don Brown taught me to go 100 miles an hour," Lawrence says. "Coaches talk about that, but he emphasized it more than any other coach

"I miss Antonio's and Bueno Y Sano, and Black Sheep and Pasta Y Basta, restaurant-wise. But you miss college, and you always miss the guys and try to keep in contact with them."

Griffin helping to fill gap left by Nelson

Husky transfer teams up with Hernandez to form tandem

By Dan Gigliotti
Collegian Staff

(This article was originally published Sept. 6 on Dailycollegian.com).

Losing its leading rusher from last season, the Massachusetts football team recruited a forsaken player with proven talent to fill its vacancy in the backfield.

The Minutemen acquired senior tailback John Griffin from Northeastern after it cut the football program this past offseason.

The acclaimed running back must adjust quickly in his first and only season with UMass in order to supplant the loss of one of the school's most prolific runners in Tony Nelson.

The Huskies dropped their program in November due to a lack of productivity and funding, leaving Griffin the option of playing anywhere he wanted for his senior season.

As upsetting as it was for him to begin playing at a new school during his senior season, he saw it as a blessing in disguise, determined to make the most of the opportunity.

"At first I was mad about the situation, but when God gives you direction, you just have to go with it," Griffin said. "I don't want to miss a practice or a lift, because this is the last time I'm going to do this."

Last season, Griffin became the fifth player in Northeastern history to rush for over 1,000 yards in a season, gaining 1,009 yards on 207 carries, including five touchdowns.

Griffin earned the Huskies' Most Valuable Player and Most Improved Player honors for the 2009 season.

The success Griffin had in his junior year recently put him on the College Athletic Association Preseason All-Conference First Team and Phil Steele Second Team honors as elected by league coaches.

Griffin now must live up to his reputation as a productive running back if he is to make up for the loss of one of the Minutemen's best running backs in recent history.

Nelson led the Minutemen last season in every rushing category, including yards (741), yards per carry (4.9), yards per game (82.7) and touchdowns (nine). He put a stamp on the school's record book before graduating, leaving UMass as the sixth all-time leading rusher in yards (2,787) and scores (25).

Aside from his numbers, Nelson was the cornerstone of an offense amidst a transition between a new coach and quarterback. He took pressure off of quarterback Kyle Havens in his first year starting under center, while allowing Morris to implement the type of balanced offense that he preferred.

UMass finished second in the Colonial Athletic Conference in total offense last season with 378 yards per game. The Minutemen split their play-calling nearly in half, running the ball 412 times (54 percent) to 357 pass attempts.

Morris, the former UMass offensive coordinator under Don Brown, will call plays based on what will benefit his team most, and if that means relying on the pass, then he is willing to call more plays for his quarterbacks and receivers. Ideally, the second-year head coach will balance out running plays and throwing plays, as his team was able to effectively execute last season.

Griffin is now expected to help maintain the stability in a rushing attack that gained over 1,600 yards, but he will not have to shoulder the load alone.

Jonathan Hernandez played back-up tailback last season, finishing with 609 yards on 121 carries (4.8 ypg) and eight touchdowns.

Hernandez performed admirably in place of Nelson when he was injured before the team's fourth game.

In his first college start on Sept. 26, Hernandez led the UMass offense to a 44-17 victory over Stony Brook, running for 140 yards and scoring three touchdowns.

Three weeks later, Hernandez was named the Bill Knight Most Valuable Player after scampering for the game-winning 42-yard touchdown in a 23-17 win over New Hampshire.

"It's great to have someone like [Hernandez] on the same team as me," Griffin said. "It's a one-two punch, regardless of who is starting. I think it is very dangerous."

Hernandez is expected to assume more responsibility in the offense, yet despite all his potential, the Minutemen need another tailback to compliment him in order to mirror their formidable rushing attack from last season.

The addition of Griffin now gives the backfield a similar dynamic to last season's two-headed rushing attack, allowing Morris a luxury that not every team in UMass' conference has.

As for their order on the depth chart, Morris has chosen to take each game as it comes and let the players decide on the field.

"These guys are both top-of-the line CAA running backs," Morris said, "and we'll use them that way."

Dan Gigliotti can be reached at dgigliot@student.umass.edu.

Tailback John Griffin carries the ball against Holy Cross. A Northeastern transfer, Griffin has found a place in the UMass backfield this season.

Holmes looks to lead young defense this year

By Jay Asser
Collegian Staff

For Massachusetts linebacker Tyler Holmes, preseason honors are all well and good, but leading the defense in his first year as team captain is a more exciting notion.

The Blacksburg, Va. native has been garnering a lot of attention in the offseason and for good reason. As a true sophomore last season, Holmes led the Minutemen in tackles with 11 per game, interceptions with four and passes defended with nine. His 110 tackles also ranked second in the Colonial Athletic Association (CAA)and eighth in NCAA. For his efforts, he was named to the 2009 CAA All-Conference Second Team.

It's no surprise that the expectations are higher heading into the 2010 season. Holmes earned honors forwas named to the Preseason All-CAA team, the Sports Network Preseason Second Team, the Phil Steele Magazine CAA First Team as well as the Preseason All-American Third Team and is also a Preseason Honorable Mention All-American by Consensus Draft Services.

"It's been great," Holmes said at media day. "As a player, you always want to receive things for your achievements. But also, preseason awards mean nothing, you still have to go out and perform. Hopefully I can live up to all the hype."

The accolades have not been lost on UMass head coach Kevin Morris, who knows he has an up-and-coming stalwart on the defensive side of the ball.

"Tyler's come along and he's got a lot of press in the preseason for All-American and rightfully so," Morris said. "He's a true sophomore and now he's going to be a true junior and he's getting all these awards."

Already into the season, Holmes has displayed his anticipated skill and proven to be a defensive presence in the back field.

In the first game of the season against William & Mary, Holmes earned CAA Defensive Player of the Week after his dominating performance. Not only did Holmes have 10 tackles in the contest, but he also nabbed the interception that put away the game for the Minutemen.

In the recent victory over Holy Cross, Holmes stopped the ball six times and intercepted the ball for the second time in two games.

Holmes has become a leader in only his third year in the program, which is why Morris and the team named him captain for this season along with rising red-shirt junior Emil Igwenagu.

"For him to be named captain, he's such a good player on the field and he does everything right the first time off the field," Morris said. "He's a guy we can rally around because he's going to make plays for us and he's going to lead us in the right way in the locker room."

The last junior to be named a team captain for UMass was defensive lineman Brandon Collier in 2008. Before Collier, it was linebacker Serge Tikum in 2004.

"It was great, you know there aren't many junior captains out there," Holmes said of the honor. "I think my teammates look at me for leadership and I hope I can provide that for them."

Along with being named a captain, Holmes will be the leader of the defense this season at the Mike linebacker position. The Mike, or the middle linebacker, is responsible for organizing the defensive line and is the quarterback to the defense.

Holmes realizes he will have added responsibility this year, but won't be alone as a leader at linebacker.

"It's going to be a tough task but I'm willing to take it on with force," Holmes said. "We have a lot of veterans in the linebacker core. Mike Mele, he started two years at Syracuse so he makes the job a lot easier and helps me out a lot."

Mele enters his second and final season with the Minutemen and will have an expanded role after seeing limited action last year. He played in only three games in 2009 but made good contributions, recording 11 tackles and recovering a fumble. Along with seeing time at Mike, Mele is expected to play the Sam, or strong side linebacker position. He'll help Holmes settle into handling the full reigns of the defense as the captain works on becoming more vocal.

As a defense last season, UMass ranked in the middle of the pack compared to the rest of the CAA. Though there weren't many glaring weaknesses, what really stood out was the lack of take-aways. The Minutemen were tied with Northeastern with a conference-worst seven recovered fumbles, while intercepting 13 passes.

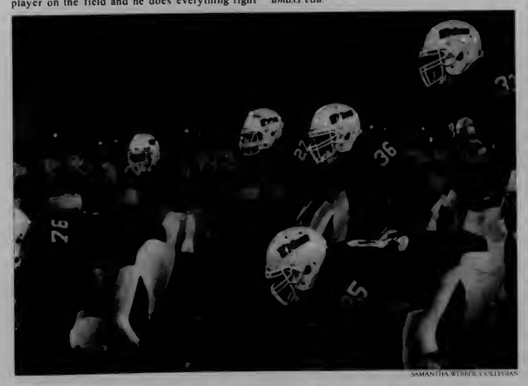
When asked of the goals this year for the defense, Holmes was quick to emphasize a need for ball-hawking.

"I know we're going to get a lot more stops this year," Holmes said. "Definitely a couple more shutouts, force more turnovers."

Holmes had a less specific expectation for the team, but a confident one nonetheless.

"As a team overall, just get to the playoffs and make some noise."

Jay Asser can be reached at jasser@student.umass.edu.



Linebacker Tyler Holmes (36) lines up against the Crusaders Saturday night. Holmes became a captain at the beginning of the season and looks to lead a young defense in 2010.

Minutemen to pressure Big Blue

UMass looks to shock national powerhouse

By Dan Gigliotti
Collegian Staff

The Massachusetts football team travels to Ann Arbor, Mich., this weekend to play in the largest stadium in the country against one of the best teams in the nation.

No. 20 Michigan (2-0) hosts the Minutemen (2-0, 1-0 Colonial Athletic Association) for the teams' first ever meeting on Saturday, in what is projected to be the largest crowd ever to see a UMass sporting event.

"This is incredibly exciting," Minutemen quarterback Kyle Havens said in an interview with Michigan media members on Monday. "I'm pretty sure any kid who grows up playing football pretty much dreams of playing at Michigan. It's the biggest stage in the country, so it's really exciting."

2010 marks the 10th consecutive season that No. 16 UMass faces an Football Bowl Subdivision opponent, with the most recent being a 21-14 loss at Kansas State to open the season last year.

The Minutemen have not beaten a FBS opponent in 16 years, since a victory over Ball State on Sept. 1, 1984 at McGuirk Stadium. They are 8-21 all-time against the FBS.

Michigan is one of the most accomplished football programs in the country. The Wolverines have won 11 NCAA championships, made 39 bowl appearances and have produced three Heisman Trophy winners in its history.

As fabled a football program as they are, Minutemen coach Kevin Morris does not expect his team to go into this game with less expectations.

"We're going to win," Morris said. "We're not going there as a show team."

"We will be in front of a lot of people," Havens said, "but in reality it is just a football game. We're not playing against the New England Patriots. It is just another college football team and they happen to have a good team and a bigger stadium than anyone we play."

Michigan goes into this weekend's game after rallying to beat Notre Dame 28-24 last Saturday. Wolverine quarterback Denard Robinson ran for a game-winning 2-yard touchdown with 27 seconds left in the game. He finished with 502 all-purpose yards, including 28 carries for 258 yards.

Robinson, a sophomore, is the current Walter Camp Foundation National Offensive Player of the Week and Big Ten Offensive Player of the Week for the second consecutive time.

He is the focus of national attention for his play in the first two weeks of the season and demands attention as Morris prepares his defensive strategy.

"They're a [shotgun] team with a quarterback who can play," Morris said. "They use a lot of gun-run. [Robinson] can throw the ball well and he's basically a Heisman Trophy candidate right now."

UMass won its last game handily, beating Holy Cross 31-7 Saturday at home. The Minutemen offense gained 525 total yards, including over 300 yards by halftime.

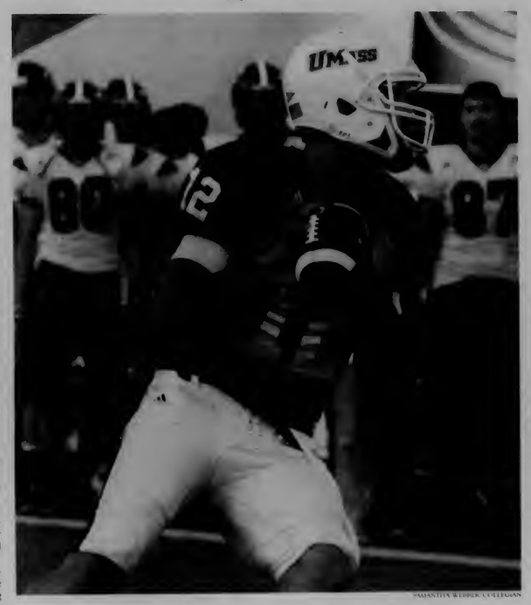
Havens completed passes to seven different receivers, throwing for 293 yards and two touchdowns.

Tailbacks John Griffin and Jonathan Hernandez combined to lead a rushing unit that ran for 232 total yards. In two games this season, the duo has 358 yards rushing and five touchdowns.

Morris is not surprised by the effectiveness of his running game in the Minutemen's first two games. He hopes to continue making the running tandem the focal point of the offense while maintaining a balanced attack.

"It was expected," Morris said. "They are two quality backs. We're going to put the load on them and expect them to produce.

"We always want to establish the run. We want to be a balanced team and in order to do that we need to run the ball effectively."



Samantha Weyblick/Collegian

Quarterback Kyle Havens drops back and looks to pass against Holy Cross on Saturday. Havens faces arguably his biggest test when the Minutemen square off against the Wolverines this Saturday.

The UMass defense was stifling in its last game, shutting out Holy Cross in the first half. Led by junior captain Tyler Holmes, the Minutemen have allowed less than 200 yards per game and 15 points so far this season.

Holmes won Colonial Athletic Association Defensive Player of the Week honors after his play in Week 1 and registered a sack, a forced fumble, and an interception in Week 2.

"It's an exciting opportunity, but it still comes down to 11-on-11 and playing the game," Morris said. "Fortunately, we're going out and having a great opportunity to play a fantastic team in Michigan. Unfortunately, it's a fantastic team in Michigan. They are really rolling now."

Six FCS schools have beaten FBS teams thus far in the 2010 season, highlighted by James Madison's upset win over No. 13 Virginia Tech last week.

The historic Michigan stadium, known as The Big House, set an NCAA record for attendance on Sept. 4, seating 113,090 fans. The previous attendance record for a Minutemen sporting event was 53, 190 at Texas Tech in 2008.

Dan Gigliotti can be reached at dgigliot@student.umass.edu

Containing Robinson crucial for UM defense

By Jay Asser
Collegian Staff

When the Massachusetts football team travels to Ann Arbor, Mich. this weekend to take on Michigan, Tyler Holmes and company will have a defensive task awaiting them that neither Connecticut nor Notre Dame could tackle – containing Denard Robinson.

The Wolverines (2-0) quarterback led Michigan to victories in their first two games this season, including an impressive 28-24 last-minute win against the Fighting Irish this past Saturday.

Robinson rushed for a two-yard touchdown with 27 seconds remaining, giving the Wolverines the go-ahead score, while adding to his incredible 258 yards on the ground. The sophomore accounted for 502 of Michigan's 532 total yards, making him only the ninth quarterback in Football Bowl Subdivision history to gain more than 200 passing yards and 200 rushing yards in the same game. The performance followed his school-record feat of 197 rushing yards in Week 1 against the Huskies.

Facing an early Heisman Trophy favorite, UMass coach Kevin Morris knows that the Minutemen (2-0) will have the toughest defensive test of the season on Saturday.

"He's the real deal and he's put on a show in the first two games," Morris said. "The thing I like about him as a quarterback coach myself is that he's playing within the system now. If something does go wrong and he has a negative situation, he's athletic enough to make it positive.

"He's making his plays right off the script, right off the run schemes and the pass schemes. He's executing the offense extremely well and he himself is playing at a very high level. He's certainly on a roll right now and it's going to be a big-time challenge for us to contain."

Though Philadelphia Eagles quarterback Michael Vick is always the first player that comes to mind when comparing rushing signal-callers, it's a different player that Morris relates Robinson to.

"Just recently, we played Armanti Edwards from Appalachian State in the national final game a few years back in 2006 when I was here as the offensive coordinator," Morris said. "[Robinson] is that type of guy, he can run [and] he can throw. Obviously, I think Robinson is at a particular level just with his overall speed and his throwing ability than Armanti was when we played him.

I think he was only a true freshman when we played him at that point in time. He's got all those skills and probably reminds you of those guys and that's a scary reminder."

In that game against the Mountaineers, the Minutemen defense held Edwards to 140 yards in the air and 81 yards on the ground in 15 attempts. In fact, it was tailback Kevin Richardson who gashed UMass for 184 yards and four scores en route to a 28-17 win for Appalachian State. The game marked the first time in the last five weeks of the 2006 season in which Edwards failed to rush for 100 yards or more.

Linebacker Tyler Holmes, who leads the defense for UMass, is up to the difficult challenge of facing an electrifying duel-threat quarterback in what he calls the biggest game of his career.

"Me personally, I feel a running quarterback is the hardest to defend because you can have perfect coverage and he can make a play off of athleticism," Holmes said. "Robinson seems to be a very athletic kid so I really don't have that much experience with running quarterbacks. We got to play Justin Thorpe from [James Madison] last year. He was a duel-threat quarterback. I'm just very excited for the opportunity that's in front of me."

Thorpe had more success than Edwards against UMass on the ground, rushing for 106 yards on 20 carries. The James Madison quarterback also threw for 120 yards on 8-of-13 attempts to lead the Dukes to a 17-14 victory.

As tough as it was to play against Thorpe, Holmes realizes that Robinson is a different player and will require more attention to just slow him down.

"I don't know if you can stop him," Holmes said. "He's a great player. I think he has 800 or 900 yards of total offense in two games, so it's really just believing in our schemes and I believe our coaches are going to come up with a good gameplan and we can hopefully just execute that. Hopefully, we can get 11 guys to the ball. He seems to get out in space a lot, so if we can rally to him, maybe it would work to our advantage."

While UMass needs to have success in all three facets of the game against Michigan, limiting Robinson will be a foremost priority to pull off the upset victory.

Holub hopes for the best

By Sam Hayes
Collegian Staff

With a $60 million downturn in state funding and $35 million less projected in federal stimulus money for the upcoming year, University of Massachusetts Chancellor Robert Holub warned that the school's "debts will rise" earlier this week.

Speaking at this year's first Faculty Senate budget meeting on Thursday afternoon, Holub said that stimulus money is what has kept UMass's financials from being worse.

"What saved us last year was a large amount of federal stimulus," said Holub, "otherwise we would have been $44 million in debt." This year only $5 million in federal stimulus has been allocated so far, but Holub "anticipates more than $5 million."

Last year's deficit was also lessened by raising student fees by $12 million and $4.2 million for out-of-state students, said Holub.

Student fees will continue to rise this year up to 1.7 percent and 3 percent each year for 2012 and 2013. The out-of-state student rate is also rising, with 350 additional out-of state freshmen on campus this year. Holub said the rise in out-of-state students is due to a herculean campaign from UMass and a hired consultant firm.

"The number of out-of-state students is up, but what is not reflected in this spreadsheet is that the quality of out-of-state students is up," said Holub in his Budget Update address.

The cut in state funding will likely bring future deficits to UMass, Holub went on.

"One of the places the state takes money from is us." He continued that the deficit will be $11 million in 2012 fiscal year and $24 million in 2013.

Before Chancellor Holub spoke about the budget at the meeting, he addressed a Sept. 5 Boston Globe article which discusses UMass's trouble getting top Massachusetts students. In the article Holub said, "We certainly can't look to the state" for funding, yet in Thursday's meeting he said "it could not be further from the truth," and he has "not given up on state support."

Randy Phillis, an associate professor of biology and president of the Massachusetts Society of Professors Union, also spoke at Thursday's meeting.

Phillis said "to suggest we are second at best [in state universities] is disappointing," and said that the state "can cut us to death, but we still are fabulous."

State funding is up 2 percent from last year, but the state's public university funding is down 13 percent, said Phillis in his address to the senate. Phillis then switched toward advocating for the faculty.

"Investment in building is appreciated, investment in the students is appreciated, but the investment in faculty is not appreciated," he said, noting the importance of the professors to the University's fortunes.

Student Government Association President Brandon Tower was also present, and addressed the senate for his first time on Thursday.

"I am here, both literally and figuratively, I am here," Tower said before he pledged to fill all vacant seats in the student government.

"There will be a lot of changes, we will work collaboratively, not as adversaries," he added.

Vice Chancellor of Administration and Finance, Joyce Hatch gave updates on the campuses construction projects. She explained that the Southwest residential area project was scheduled to be complete by the beginning of the fall semester, but when PCBs, toxic chemicals banned in the United States since 1979, were found in certain structures, "staff worked around the clock to get it everything except for the planting done during the fall semester," she said.

Hatch, a 1988 UMass graduate, also said that the new police station will be open in the spring, two new sites are being reviewed for new student housing, and the two science buildings will be done in approximately two years. She called all this "the fastest project UMass has ever done with the state."

Joseph Bartolomeo of the English Department, Joseph Berger of the Education Policy, Research, and Administration Department, D. Anthony Butterfield from the School of Management, and Mari Castaneda from the Communication Department were unanimously elected to the Rules Committee. Barolomeo was also elected Chair of the Rules Committee.

The Faculty Senate Office also submitted new course proposals, including Civil Engineering 550 "Introduction to Bridge Engineering," French 289 "Paris Through the Centuries," Scandinavian 387 "Viking Revival: National Romanticism and the Creation of a Nordic Ideal," and Junior Year writing classes for sports management majors, accounting majors, finance majors, and hospitality management majors.

Fish tales: New UMass grad program goes with the flow

By Jessica Sacco
Collegian Staff

The University of Massachusetts, in partnership with the U.S. Fish and Wildlife Service (USFWS) station in Hadley, Mass., launched a first-in-the-nation graduate program in ecohydrology and fish passage engineering this fall.

The program, which is based in the Department of Civil and Environmental Engineering, is an extension of hydraulic engineering with intertwined aspects of biology and ecology. Ecohydrology is viewed as the science that lies at the interface of hydrology (study of the water cycle) and ecology.

Upon completing the program, students will graduate with a Master's degree in Civil Engineering and a concentration or focus in fish passages and ecohydrology.

Hydraulic engineers Brett Towler and Brian Waz, both of USFWS, will teach one 500-level, three-credit course in fish passage engineering each semester.

The six students currently enrolled will spend time in and out of the classroom learning about natural and structural fish way design, dam breaching and removal, stream restoration and watershed management.

Fish passage engineering refers to the re-linking of fish habitats throughout a water shed (river or tributary off a river) or from bodies of fresh to salt water that have been blockaded by dams, culverts, dikes, or other barriers in rivers.

Today in the U.S., there are hundreds of thousands of dams that serve as barriers to fish passages, with about 25,000 lying in the Northeast area alone, not to mention the 2.5 million culverts and road barriers throughout the country. These obstructions have prevented fish from returning to their natural habitat, leaving many native species in decline.

"It's a fair statement to say that in the state, region, country, and world as whole, environmental concerns are only ramping up as we face climate change and things like fish passage need to be looked at," said Towler.

Because the life cycle for fish takes place in fresh water for spawning and juvenile development, and also in the ocean, where fish spend most of their adult lives, engineers will look at ways to help fish cross the barriers and return to their desired destinations.

This can be done through dam removal, although Towler said this is rarely feasible unless "fish ways" are created, which are mechanisms designed to lift fish over dams. Students will also study large-scale elevators, which deposit fish from one side of the dam to the other, and pools that direct fish over the blockades.

The field of fish passage, Towler said, is close to 300 years old and takes a variety of skills, from engineers who understand hydrology, to biologists and ecologists.

The latter understand how fast fish swim and what motivates them to successfully implement change.

"The program is a recognition of that," said Towler. "Our goal here at USFWS is to develop a program that really shines a light on a need for a marketable degree for engineers."

David Ahlfeld, graduate program director for Civil Engineering, said that the interesting part of the program is that engineers, who are used to designing facilities for humans, will now be creating structures for fish to use.

"'What do fish need?'" he said. "That's not something we've traditionally looked at."

An internship was also rewarded to Bryan Sojkowski, a graduate student enrolled in the program.

His job includes working closely with USFWS, while also taking classes and developing his thesis, which will focus on culverts.

Sojkowski said after he receives his degree in civil engineering he looks forward to having a career with USFWS and is happy to be a part of the new UMass program.

"I feel honored that I'm the guinea pig," he said. "It looks like there's going to be a lot of opportunities for other student's and people who see this [program] as a [future] career."

Jessica Sacco can be reached at jsacco@student.umass.edu.

Summer's endless days have come to a close

Harrison Searles

It is a fact of life in college that summer break is never what it once was. In high school and even before that, summer vacation was liberation from what, at least for the most of us, was dull monotony of 12 years of servitude to the state's educational apparatus. For those two and a half months, we were free to spend a good majority of the time in a state often so mind-numbingly unproductive and yet enjoyable.

But the arrival of Labor Day set the eyes of the student population firmly on the next June in hopeful anticipation.

However, such things as a blissful summer break have come to pass as they do every year. When students ascend into a higher tier of education, college, they find their summers spent working away in a menial job and in an alienated state in a hometown which one has been disconnected from during the school year. The first month of summer's passing marks a point when so many of us would prefer to be back in college despite the essays, tests and studying.

I find that much of the suffocating boredom is simply the lack of direction and improvement in life. Much of anyone's life can be analyzed through the goals that the given individual has desired and set for himself, and through the progress taken in order to reach them. But, during the summer months, it is very possible to feel as if one is in stasis, stuck in Nietzsche's scenario of eternal recurrence burdened to live the same couple days until the end of August came, and one would once again be at college free to do the things that college students do.

While it may be a fact that many college students are stuck doing whatever pays the bills or wherever they find themselves, it is also true that a fundamental misinterpretation of what constitutes leisure.

There are plenty of ventures out there that are more than worthy of anyone's time.

To avoid the crushing boredom of a static summer, it is often necessary to rethink the four months at one's disposal not only as a chance to take a break from class, to earn some money and to visit old friends, but also as a chance to use those months to improve oneself in ways that would not have been practical during the school year.

Much of anyone's life can be analyzed through the goals that the given individual has desired and set for himself, and through the progress taken in order to reach them.

Simply focusing on that which leaves a lasting impact on ourselves is much more worth while than the leisurely activities that we consider "fun."

How many of us have been content wasting away the day in front of a television screen of some kind rather than dedicating much of our free time to something that leaves us better individuals when we go to sleep than when we had woken up? Whether it is exercising, reading, learning a new skill or none of the above, this summer I was able to train in both jiu-jitsu and mixed martial arts and every day I am thankful for the physical conditioning and martial discipline that I have gained.

Training at the dojo as much as I could due to my work commitments, made me stronger, has forced me to rethink what I am physically capable of and has given me a unique set of skills that I would not have been able to learn elsewhere.

In sum, it has made me a better person.

While there certainly may have been days in my summer that felt like they were nothing but clones of the day before, when I was able to train, I found that my psychology was different. Instead, each day I trained was a day in which my gaze was set upon the improvement of myself, whether it be in the execution of a certain technique or pushing my endurance further.

By striving to improve myself in those martial arts I was able to slice through the monotony of much of the summer by giving my time a direction, and therefore greatly improve not only the quality of my summer, but also my enjoyment of it.

In the end, for many of us the time spent on summer vacation can often seem like a never-ending series of menial tasks followed by the whittling away of time..

However, a correct understanding of leisure as a chance to do activities that result in the improvement of oneself can greatly augment that time by not only giving one something to do, but also a direction and purpose for one's life.

Now at the school years beginning, time for leisure is not abundant but the academic year still presents the opportunity to become who we'd like.

Point-Counter-Point

"I disapprove of what you say, but I will defend to the death your right to say it." -Evelyn Beatrice Hall

Notorious B.I.G. or Tupac?

'Keep ya head up'

Chris Shores

Contrary to what Collegian Arts and Living Editor Justin Gagnon may tell students in our journalism class, I am not an expert on "gangsta" rap. I know full well that I don't fall in the target demographic. I enjoy rap, but my iPod also includes Steely Dan, Keane and Lady Gaga.

But I also know that in a head-to-head contest between Tupac Shakur and the Notorious B.I.G., it isn't even close: 2Pac wins hands down.

Let's start with a simple fact: Tupac's career and music production vastly surpasses Biggie's.

Biggie's first solo studio album, "Ready to Die," was released on Sept. 13, 1994. It was the only album that was released during his lifetime. His second studio album, "Life After Death," was released two weeks after his death in March 1997. Two posthumous albums were released, along with two other compilations and a collaboration album with Junior M.A.F.I.A.

Tupac, on the other hand, recorded six studio albums, the last of which was released two months after his death.

In 2006, his eighth posthumous album (including compilations) was released, and the recently revived Death Row Records report there are more albums on the way.

Many artists today aren't able to record six studio albums. The biggest rap stars today have surpassed the mark, but their careers have been significantly longer. Eminem's "Recovery" was his seventh. Nas has released nine, Snoop Dogg 10 and Jay-Z 11.

But recording enough demos during a lifetime of studio recording, concert tours and a stint in jail to have content for eight posthumous albums? That's a mark that will be a lot harder to top.

On The Daily Collegian's website, a Campus Perspectives video segment this past week, students weighed in on their thoughts about the Tupac/Biggie debate. Many cited support of the Notorious B.I.G. only because he was the representative of the East Coast during the hip-hop battles of the 1990s.

The loyalty is all fine and good but it doesn't serve as a legitimate comparison over who the better rapper was. Would the opinions of these students been flip-flopped if Tupac had lived in New York and Biggie in California?

Another point often brought up in the interviews was a comparison of the lyrical and musical composition in the two artists' work. I am not a music critic, so I am not going to delve into the nuances of the rhythm and particular style of their songs.

But what I can say about Tupac's lyrics is that they are surprisingly poetic and inspiring, even for someone like me who was not in his intended audience. Take for instance the song "Keep Ya Head Up," in which Tupac tells listeners to never give up despite how tough circumstances may become.

In one verse, Tupac calls for the end of violence against women.

"Since we all came from a woman, got our name from a woman and our game from a woman, I wonder why we take from our women. Why we rape our women? Do we hate our women? I think it's time to kill for our women. Time to heal our women, be real to our women."

Other songs, such as "Brenda's Got A Baby" and the popular song "Changes" (which was released two years after his death) are critiques on urban poverty and racism.

In one verse of "Changes," Tupac says, "And still I see no changes, can't a brother get a little peace? It's war on the streets and war in the Middle East. Instead of war on poverty, they got a war on drugs so the police can bother me."

Now the police have never bothered me because of drug use, but these lyrics still hold relevance in my life and yours. Last time I checked there is still poverty in America and still war in the Middle East. Maybe the changes haven't come as fast as Tupac would have liked.

Of course, it would be remiss not to mention the thug life aspect of Tupac's career and life. He served time in prison for sexual assault. Many of his songs contain lyrics about drugs and violence. His infamous song "Hit 'Em Up" is a vicious diss song about Biggie and the east coast rappers, which begins with Tupac saying that he had sex with Biggie's wife.

By no means was Tupac perfect. But neither was Biggie. This discussion isn't about their characters, but of the product of their music.

The Notorious B.I.G. released some solid hits. But in terms of the number of songs and albums, Tupac surpassed him long ago and continues to produce music from the grave. And while "Big Poppa" is a fun song to listen to, Tupac's observations about the world and people continue to be relevant and important today.

I have the utmost respect for Biggie and his music, but this Massachusetts college student is going "West Coast" in this debate.

Chris Shores is a Collegian columnist. He can be reached at cshores@dailycollegian.com.

Biggie's legacy

Dan Gigliotti

The 1994 album "Ready to Die" was a presage to the death of the greatest hip-hop artist to ever live, and it was a dispute sparked by his counterpart which led to his demise.

His death will always be seen as a tragic event, eternally linked to the infamous East Coast versus West Coast feud that separated hip-hop culture and pit two of rap's iconoclasts against each other.

Perhaps, Notorious B.I.G. meant what he said and really did feel like his life was "played out like a Jheri curl." It could be that he is wearing black Tim's and a black hoodie right now, shooting dice and spitting rhymes off-the-top somewhere in the afterlife with the likes of Big L and Big Pun.

Although Biggie had suicidal thoughts, it wasn't from his own hand that he fell fatal to a gunshot wound on March 9, 1997. It wasn't until his former friend-turned-rival Tupac Shakur attempted to pick a petty fight.

The term "beef" didn't originate from the Tupac-Biggie rivalry, but it gained new meaning. The escalation of the coastal battle in the mid-90s was a realization of the severity of violence in hip-hop and its consequences.

The defiant California rapper was the main proponent of the outward violence that was rampant in hip-hop during the 1990s and which led to the murders of both individuals.

B.I.G. spoke about delinquency in his lyrics, but his emphasis was on the struggle to go from having very little in life to having everything he dreamed of. Songs such as "Sky is the Limit" and "Juicy" are uplifting anthems for urban slum-dwellers and suburban high school students alike.

His subject matter and content is not relevant to everyone, but references to classic '90s video game consoles and Word Up Magazine assure that you don't need to be in a gang or deal drugs to find wisdom in his words.

Tupac, on the other hand simply purported the traditions and values in hip-hop and did so maliciously. He created a thug life persona which likely accurate to his true personality and imposed the lessons of rap on mainstream society with an abrasive tone and a murderer's determination.

Tupac's most valuable asset was his fearlessness and his sheer desire to challenge the establishment is admirable. Unfortunately, it did more to create a negative perception of hip-hop culture than it helped.

His collaboration, "Hit 'em Up" with the Outlawz, a group of third-rate rappers whom he attempted to put-on to the rap scene, was ill-advised and distasteful, even by rap's standards. Besides, do you remember any other verses on that song or the name of one of Pac's cohorts?

Me neither.

Rather than feed into the trivial argument, Biggie declared that it wasn't his style to create a rebuttal on record. If only other rappers had that type of restraint, perhaps most of the violent acts in hip-hop wouldn't occur.

Would rap music be as prominent if it wasn't for Tupac? No. Though, I would contend that the music would still maintain its attraction through the depths of its message as opposed to the militant coup d'état on pop culture of which the self-proclaimed Machiavelli chose to enact in his rap career.

Furthermore, Shakur's most popular and most identifiable song was released after his death. Tupac broke onto the rap scene as a roadie for the group Digital Underground, hyping up their goofy, big-nosed front-man and prancing around stage to the Humpty Dance.

Take a minute to imagine the over-sized East Coast rapper doing the electric slide.

Can you picture it? I can't either.

B.I.G. is the personification of rap music and culture, a model for lyricists to shape their approach to rhyming and helping many of today's best to establish their names in popular culture.

He legitimized the careers of many artists and launched the careers of executives the same. Before Biggie, there was no P. Diddy and Ma$e. Method Man's solo career took off after his vocals in the1994 "What's Beef." Jay-Z was able to boast his status as one of Brooklyn's finest only after B.I.G. appeared on his debut album Reasonable Doubt.

In sports, the award for the Most Valuable Player is usually decided by the best player on the best team. With all due respect to Big L, Biggie is the "Most Valuable Poet" on the mic.

Life after the death of Notorious B.I.G. goes on and the greatest rappers alive pay homage to him in contemporary music. Rappers have yet to reach the bar that Biggie set when he was alive as his rhymes still remain to be the most influential and it is hard to imagine that they will be.

And if you don't know, now you know.

Dan Gigliotti is a Collegian columnist and can be reached at dgigliot@student.umass.edu

YOUR WEEKEND GUIDE TO ART, MUSIC, FILM & CULTURE

ARTS@DAILYCOLLEGIAN.COM

10 easy shots to impress your friends

By Katie Evans and Leslie Rosenfeld
Collegian Staff

Every Friday or Tuesday, for some we put away our books, laptops and morals, and then ask ourselves a simple question. What should I drink tonight?

Fortunately, the burden has been lifted. As college students, our funds are low due to escalating textbook prices. In lieu of this dilemma, a carefully compiled list of 10 deliciously easy to make shots for the everyday college student has been created. Warning: Do not attempt these mind-blowing concoctions all at once for fear of taste bud overload and alcohol poisoning. Please, drink responsibly.

Chocolate Cake

For those of you with a sweet tooth, the combination of only two ingredients one part vodka and one part hazelnut liqueur is not only affordable, but will also reward your senses with far fewer calories than the real deal. This dessert shot not only goes down smooth, but it flaunts your newly acquired bartending skills and leaves the crowd begging for more.

Buttery Nipple

Staying on the sweeter side, this shot is as tantalizing as its name suggests. Again with only two simple ingredients one part butterscotch schnapps and one part Bailey's Irish Cream it is quite the conversation starter. Once you throw it back, the conversation steadily improves, because how can you beat a burst of caramel sliding down your throat?

Fireball

Now for those of you who want to spice it up a little, this oral explosion consists of one part rum, one part cinnamon schnapps and a splash of Tabasco sauce. This unique mixture of hotness will require immediate relief in the form of any other shot on this list. Stir it up, shoot it back and let the flames ensue.

Tequila XO

Put the whips and chains aside, but leave out the whipped cream. Calling all tequila lovers for this perfect blend that will take the bark out of the bite. This simple shot of tequila with a dollop of whipped cream on top is a great substitute for the overplayed lime wedge and salt combination.

The Collegiate

This shot is similar to Tech N9ne's hit song, "Caribou Lou," but for half the cost and double the taste. This simple shooter of one part Malibu rum and one part pineapple juice represents UMass as a fun and lively refreshment.

Tootsie Roll

A blast from the past,this chocolaty treat was always a childhood fan favorite. Add one part amaretto and one part orange juice to recreate some much wilder days of adolescence. This delectable delight encompasses both the sweet and savory aspects that will leave you asking Mom for more.

Woo Woo

For all you fist pumping Cape Codder junkies, this is the holy grail of tangy goodness. We've upped the ante to three ingredients for those of you with deeper pockets to one part vodka, one part peach schnapps, and a splash of cranberry juice. By the end of the night, your voice will be horse from all the "woo woo's!"

Redheaded St**

Cue all the dads saying, "I've had a few of those back in my day, if you know what I mean." This popular shot has made a name for itself not only because of its name but also because of its minimal ingredients. With one part Jaegermeister and one part peach schnapps, the Redheaded S**t is possibly better than the real thing.

Deep Throat

For all you badass drinkers that are willing to champ it, this burly beverage of one part whiskey and a dash of root beer schnapps will have you growing a little extra hair on your chest. Don't be afraid to do as the name says and throw it down the hatch.

Alabama Slamma'

Break out your Southern roots, cowboy boots and lasso for a slammin' good time. Open your liquor stash and dust off one part Southern Comfort, one part gin, and one part amaretto, because this tart shot will beat out the Waffle House any day.

Now that you have been informed, it's time to pin this list onto your micro-fridges and cork-boards and play bartender. The initial question has been answered and it's time to take matters into your own hands to decide which shot best suits you.

Kate Evans can be reached at kevans@student.umass.edu. Leslie Rosenfeld can be reached at lrosenfi@student.umass.edu.

Concocting your own shots can be exceedingly simple. The "Collegiate," for example, consists only of pineapple juice and Malibu rum.

Katy Perry's 'Teenage Dream' a candy–coated mess

By Austin Dale
Collegian Correspondent

If you have never been asked if you feel like a plastic bag, if you have never had a beautiful girl tell you she wants to see your peacock, if you have never thought E.T. could be a term of endearment, you had better be prepared.

Katy Perry's "Teenage Dream" is an explosion of adolescent hormones and bad poetry that hasn't been seen since Julia Stiles had an English class hissy fit in "10 Things I Hate About You," and it will give you all those things and more. It will certainly give you a headache.

This is the pop album from Hell, and it works brilliantly as all that implies. It is like a box of marzipann it has no nutritional content whatsoever, but it's so tempting you won't know what hit you until you're sick to your stomach.

The music itself is so thoroughly mediocre and uniformly peppy and banal that you'll hardly notice song transitions. As for the songs, well, the less said the better. The standouts are only standouts because of their sheer stupidity. "Peacock" is the best example because it barely rises above a cheerleading ditty based around a stupid double-entendre about genitalia it ends up crass and annoying rather than funny.

When Ms. Perry attempts balladry, which she does twice, her weak, over-trained contralto seems terrified. Shockingly, nestled notably in this candy-coated sorority house of doom lies the title track, a keen and effective slice of charming dance-pop.

What does this tell us about Katy Perry's career? A great deal. While riding on the last waves of popularity stemming from some particularly catchy and cocky hits from summers past, Ms. Perry released a record that will undoubtedly maintain her second-in-command pop-star position behind the marvelous Lady Gaga, currently the Dalai Lama of the airwaves. It is so serviceably average that it sits almost above criticism, and that can't hurt.

As anyone who has looked at her knows, it's not the music that matters to Perry anyway, and it's unfortunate. When she tells us to "show 'em what you're worth" on the boring club track "Firework," one wants to think she ought to take that advice herself.

Austin Dale can be reached at adale@student.umass.edu.

Minutewomen look to build off wins

Maryland, AU on weekend slate

By Michael Wood
Collegian Staff

The Massachusetts field hockey team will hit the road this weekend, looking to build off consecutive wins against Yale and Connecticut as it takes on two more nationally-ranked teams.

The first matchup of the weekend occurs on Saturday and features the No. 20 Minutewomen facing off against No. 18 American. Given the rankings, one would assume the squads would be evenly matched. Yet, the major difference between the two is that the Eagles are still searching for their identity, while UMass has a pretty good idea of what type of team it is.

They may be young, but the Minutewomen know they have solid leadership from their core three seniors, and stellar play behind them in their goalkeeper, Alesha Widdall. As has become customary, UMass will rely on its tough defensive line to stave off attacks from their opponent, while trying to assault the net at the opposite end with shots from team captain Katie Kelly.

In addition, several freshmen have already stepped up on the offense, namely Lindsay Bowman, who has two clutch goals on the year.

The Eagles (3-2) enter the game with a higher ranking than the Maroon and White, yet by looking at their schedule it is easy to see they are a team in search of their identity.

They manhandled defending champion Richmond, 5-1, but subsequently lost two in a row to the likes of Old Dominion and Louisville. AU plays to the level of its competition so it will have to step up its offensive attack in order to win.

On Sunday, the task gets a whole lot tougher for UMass as it visits No. 2 Maryland.

The Terrapins are the defending Atlantic Coast Conference champions and winners of three out of the last five national titles. They enter the weekend with a perfect 5-0 record, and their opponents thus far have a combined 27-4 record.

Maryland also leads the nation in goals per game, averaging 5.4 goals in each contest.

The Terrapins are led on defense by three-time ACC Offensive Player of the Year and last season's best all around player, Katie O'Donnell, as well as sophomore forward Megan Frazer. O'Donnell tallied 22 points on six goals and 10 assists last season, while Frazer already has four goals and three assists in 2010.

Last week, after defeating then-No. 4 UConn and Yale in consecutive games, the Minutewomen moved into the national Top 25 rankings, reaching No. 20. The wins came in part by believing in the system. UMass coach Justine Sowry put into place, while also receiving outstanding play from Bowman, Kelly and Widdall.

In recognition of their performance, Bowman received Atlantic 10 Rookie of the Week and UMass Co-Athlete of the Week honors, while Kelly earned the A-10 Player of the Week honors.

Michael Wood can be reached at mcwood@student.umass.edu.

Freshman Molly MacDonnell looks for the ball on offense during a game earlier this season. After upsetting No. 4 Connecticut, the Minutewomen hope to have similar success against Maryland and American.

UMass adds international influence

Foreign additions add help to UM

By Pete Vasquez
Collegian Staff

After a sudden first round exit from the Atlantic 10 tournament last year, the Massachusetts field hockey team is expanding its recruiting efforts overseas in hopes of claiming its third conference title in four years.

Thando Zono, a junior from Grahamstown, South Africa and Mel Sutherland, a freshman from Farnham, England, will join the Minutewomen for the upcoming season, bringing a wealth of international field hockey experience with them.

Zono was a member of the 2009 South African under-21 Hockey World Cup Team, while Sutherland has spent tours competing in Canada, Spain and South Africa. Both met with head coach Justine Sowry who, being a native Australian, had help from colleagues around the globe in finding the two women.

The fourth-year coach was involved with the United States team in the Junior World Cup at the same time that Zono was playing for the South African squad. After speaking with a few South African coaches as well as watching game footage of the 20-year old, Sowry knew that the unique skill set of Zono would significantly add to the UMass lineup.

"She provides the team with something that we haven't had before," Sowry said. "A different skill set, so we're excited about that, along with her positivity and energy."

As for Sutherland, word got to Sowry about the impressive 18-year old and the two developed an initial relationship over the phone. Eventually, Sowry went to England to meet Sutherland's family and her school coaches. Sutherland also got her chance to see UMass.

"[Sutherland] had an opportunity to come and visit and I think she really fell in love with the place," Sowry said. "It was easy for her, she didn't visit any other schools and we were able to bring her out.

"We definitely connected on the phone and developed a good relationship. She felt comfortable. She's a transfer student, so it becomes a little bit more difficult. You have to work really hard, but I felt that she was worth the work [because] of what she would be able to provide the team."

Zono and Sutherland are familiar with playing year-round, as more field hockey is played overseas. Adjusting to the collegiate style of play will be difficult, because everything is concentrated in a two-month season. However, Sowry has been impressed with their work ethic so far.

"Both have adjusted very, very well to this style," Sowry said. "We do preach a lot on specific concepts, to have good structure, and they're learning that. Because they've been brought up with the game and have been playing it for years, it becomes a very natural way to play. Whereas here it's a bit more structured because we've picked up our sticks pretty late [in the year]."

The two international players will have to adjust quickly because both are expected to play big roles in Sowry's rotation. Zono will play in the backfield, a position that demands a lot more from a player than other positions.

"Backfielders normally tend to stay on the field a lot more," Sowry said. "So we need [Zono] to remain fit and healthy, and she'll be a significant contributor on the field."

Sutherland was first considered to play defense, too, but since has moved to the forward line. Sowry sees her as a better fit on the offensive side of the ball where she can execute the "hard pressure hockey" that the Minutewomen play.

"What we're trying to do this year is rotate quite often to keep fresh legs so when she comes out on the field we expect her to work hard and use her athleticism and instincts which can produce a lot of turnovers and set us up for some goals," Sowry said.

Pete Vasquez can be reached at pvasquez@student.umass.edu.

Minutewomen reunite with Napoli in Ann Arbor

By David Martin
Collegian Staff

As the Massachusetts women's soccer team prepares for its big matchup against Michigan this weekend, one cannot help but notice the overwhelming similarities between the two clubs: both are in rebuilding seasons, both have a large number of young talent, and both are seeing more offensively-oriented strategies unfold on the field.

The most prevalent commonality, however, may be the histories both teams have with Wolverine assistant coach Angela Napoli.

Napoli went to Michigan (3-1-2) after the 2009 season to help Michigan coach Greg Ryan build his team into one strong enough to go far into postseason play. Since her arrival, the team transitioned from an older, more defensive team to a younger, faster, more offensively potent lineup, starting with the new recruits.

"We have had a great number of new players come in for the season," Napoli said. "Nine new players came to the organization, of which four of them have made it up to the starting roster."

Two of those players, freshmen attackers Nkem Ezurike and Tori McCombs, have led a reenergized Wolverine offense with a combined five goals and 31 shots in six games. Senior attacker Amanda Bowery has also proved critical with a goal, two assists and 14 shots. The three combined have 14 points and have started every game of the season.

These three players have been critical in the development of Michigan's new offensive strategy.

"In the last few seasons, we have had a slower, more defensive game plan," Napoli said. "We are still going with the 4-5-1 style, but we are making sure that the midfielders are much more offensively minded. It's definitely led to more goals and a more exciting game to watch."

Another important piece to Michigan's success is its prominent veteran defensive staff. The experience and maturity that the senior defenders have make it possible for the team to "deal with high pressure situations" in their own end.

The backbone of the team's defensive line stands strong in front of the net with junior goalkeeper Kristen Keane.

Keane, who is starting consistently for the first time in her career, is really growing into her starting role. She currently has six goals allowed and two shutouts.

"She can come up with great saves, especially in close games where we really need them," Napoli said.

With all of these factors working together for the Wolverines, Napoli can't help but feel that this team is going to make a splash as the season progresses.

"There's a lot of chemistry on this team," Napoli said. "They're in a great position to attack and defend throughout the game. And with the great combination of fresh and veteran talent, our team has blended really well."

Napoli had worked at four different schools as an assistant coach before beginning the season with Michigan. But her first chance at moving up came last season with the Minutewomen.

She served as an assistant coach under longtime women's soccer coach Jim Rudy for four years before she took over preceding the start of the 2009 season. As head coach, Napoli led the team to a 6-11-2 record.

COURTESY UMASS ATHLETICS

Senior Therese Smith has experience playing for both Angela Napoli and Jim Rudy.

At the end of the season, Napoli wasn't approached to return by the coaching administration.

"I met with the administration briefly over the winter," Napoli said. "I really did not know what their intentions were until then, where they decided that they wanted to take a new direction with the team."

Of her experiences, Napoli knew that she would be able to take both the good and the bad with her to Michigan in her efforts to help bring the team to first-rate standards.

"Every team in the country wants to play a strong, offensively-minded game, and I'm going to do everything I can to help lead the team in that direction," Napoli said.

UMass hopes to extend win steak

By Michael Counos
Collegian Staff

Both the Massachusetts women's soccer and football teams will look to expand their winstreaks to three this weekend as they travel to play Michigan. The Minutewomen will see a familiar face as well as they take on their ex-coach from 2009, Angela Napoli, in a brand new soccer facility that the Wolverines are unveiling before the game.

The Minutewomen are 3-2-0 overall, with their most recent victory coming against Fairfield in a 4-0 shutout. This game marks the second of a four-game road trip for UMass, which also includes games against Oakland and Brown.

The Maroon and White are 1-2 all-time against Michigan, with their last meeting coming on Sept. 13, 2002. The Wolverines won that game, 3-0.

Michigan is currently 3-1-2 with wins over Pepperdine, Detroit and Oakland. The UMass defense will have its eyes open for the offensive trio of Nkem Ezurike, Tori McCombs and Amanda Bowery.

Ezurike leads the Wolverines with six points and three goals, while McCombs has four points and two goals.

The offense will be focused on getting the ball past Michigan goalkeeper Haley Kopmeyer. She boasts a 0.93 goals-against average and a .700 save percentage. Playing all 580 minutes between the pipes this season, Kopmeyer already has two shutouts.

"The key to getting a win for us is to not fall into all the hype of playing such a large program in a beautiful facility," Matz said. "It is important we do not go out there and try to win but instead just play our game, bring a lot of energy and the results should come."

UMass is coming off an impressive offensive performance against Fairfield last Sunday, rolling to a 4-0 shutout with a pair of goals in each half, and a seven-save shutout performance by sophomore goalkeeper Emily Cota.

The first half goals came via senior Ashley Hamel redirecting the pass of junior Meghan Collins into the net by the far post. Shortly after, Deanna Colorassi scored on a dribbler on the far left post from just inside the 18-yard-box.

A key for the Minutewomen has been how well they have distributed the ball this season. Six players have scored goals, and at least eight players have a point. The last time UMass won two games in the same season by four or more goals was in 2001.

Oakland is also on the weekend schedule for the Maroon and White as it will face their first ever opponent from the Summit League. UMass has never faced the Grizzlies (1-4-1) before, with their lone winning coming against Rochester State.

Oakland is led by Amy Trandell with three goals and Kara Weber who has two goals and two assists.

"We are going to have to stay focused after a big game against Michigan and make sure we don't have a let-down game," Matz said. "As long as we continue to play the way we've been I have a good feeling about this weekend."

Shannon Coley will look to cool off the red-hot Minutewomen offense. She sports a 1.35 goals-against average and a .692 save percentage.

Michael Counos can be reached at mcounos@dailycollegian.com.

Minutemen host IU, UCF in Amherst

UM searching for 1st victory

By Steve Levine
Collegian Staff

If the Massachusetts men's soccer team hopes to continue its winning tradition at home, this weekend would be a good start.

The Minutemen will open an eight-game homestand this weekend when they host two dangerous teams at Rudd Field – Central Florida on Friday and No. 24 Indiana on Sunday. UMass is still looking for its first win, as its record stands at 0-2-1.

UCF (3-1) opened its season with 5-0 and 4-0 victories against Jacksonville and Florida Atlantic, respectively. The Knights' season continued last weekend, when they followed a 1-0 loss to North Carolina-Wilmington with a 2-0 victory against Long Island.

The Knights are led by Nicholas Keown-Robson, who has three goals and three assists. His teammate, Spencer Scott, has two goals and three assists. UMass coach Sam Koch is not concerned about the individual threats his team will go up against.

"We're going to focus on ourselves," Koch said. "We decide who wins or loses – not the other team. Central Florida has good players but are [we about] to focus on any particular player? No."

Koch is keeping a close eye on UMass' goalkeeping situation, which features both Chris Piekos and Shane Curran-Hays, who will start against UCF on Friday. As of now, Piekos has started two of the team's three games, allowing one goal for a .889 save percentage and a 0.41 goals-against average. Curran-Hays had a tough time in his only start, when he allowed three goals on seven shots against Harvard in a 3-2 loss.

"We've been trying to work out our goalkeeping situation," Koch said. "But Hays will start on Friday."

Most importantly, UMass has to work out its kinks in the offensive zone.

"We have to work on finishing," Koch said. "We create a lot of good chances but we can't put them away. That's something that will take time."

Putting those chances away should be very difficult against UCF keeper Shawn Doyle, who has allowed one goal with three shutouts in 360 minutes of play, posting a 0.25 GAA and a .900 save percentage.

The last thing UMass needs is a repeat of last season, when it desperately struggled to score goals. In fact, the Minutemen were 6-0-2 last year when scoring at least one goal. Koch understands that winning out this weekend would be a tough task, comparing it to the final weekend on UMass' schedule.

- *Our football season preview*
- *W&M football highlights*
- *UConn field hockey highlights*
- *Our podcast with W&M sports staff*

"In a way [this weekend is] very similar to our Charlotte [and] Saint Louis weekend with Central Florida being Charlotte which is a skillful team, and Indiana being Saint Louis which is a strong, very physical team," he said.

Indiana (2-2) opened its season on September 3 when it lost to California, 2-1. Since then, the Hoosiers defeated then-No. 5 UCLA, 5-1, lost to Cal Poly, 1-0, and defeated No. 22 Drake, 2-0. Indiana's offense is highlighted by junior forward Will Bruin, who has four goals and one assist. His teammate, senior forward Andy Adlard, has two goals and two assists.

"We've got a great opportunity to test ourselves and to play consistently well and play within our system within the game," Koch said referring to the upcoming weekend. "If we do that, I'll feel good no matter what the results are and hopefully we'll be getting where we need to be by the time we start conference play."

Although the Minutemen have yet to win a game, Koch and his players are far from dispirited.

"I think that [first win] is important to any team," Koch said. "More importantly, though, is making sure that we're playing well and that we're doing the things we've stressed in practice as well as sticking to the game plan that we have for Friday's game."

Amick looks forward to match with native school

By Herb Scribner
Collegian Staff

On paper, this Sunday's contest between the Massachusetts men's soccer team and No. 24 Indiana has all the makings of a competitive bout.

For midfielder Stuart Amick and UMass coach Sam Koch, the game is far more important.

Amick will not only compete against a team within two hours of his home town of West Lafayette, Ind., but also a few of his former teammates and a program that he has history with.

"I'm pretty excited. I know like four or five guys on the team that I actually grew up playing with on my club team before I got here," Amick said. "I know they have some quality players and it's going be a huge test for us. I think we're a very capable team this year and we could easily come out with a win if we stick to the game plan. I think that they will definitely get the best out of us."

For Amick, the match against the Hoosiers (2-2), who have won seven national championships, brings the senior midfielder back to his soccer beginnings.

"I went to soccer camp down there for three or four years, and their old head coach, Jerry Yeagley, was at a lot of my club team's game," Amick said. "I've had a connection with him over the years. Like I said, I have a lot of friends that play there and I've gone to a few of their games in the past before I got out here. I've got a lot of history with the program actually."

Yeagley, who coached Indiana for 31 years before his son Todd Yeagley took over the program last season, watched Amick compete at the club level. Amick strongly considered getting involved with the Hoosiers.

"I talked to the coach. It wasn't a great fit for me," Amick said. "They picked up three or four guys on my team, because they were a better fit."

Despite being an Indiana native and growing an attachment to the Hoosiers, Amick still boasts his support in the Maroon and White.

"I definitely had some interest in the program growing up, but Massachusetts seemed like the better choice," Amick said. "I think it'll be an exciting game and I'm looking forward to seeing the outcome, and hopefully we get the [win]."

"He said he never liked it at home," Koch joked on Amick's support of UMass (0-1-2). "Indiana is traditionally one of the top teams in college soccer. They have an incredible traditions, it's great for them to come here."

Koch also has an attachment to the Indiana program, one that started the four-time Atlantic 10 Coach of the Year's coaching career.

"Jerry Yeggly had a big impact on me when I was coaching," Koch said. "He's one of the reasons why I am in coaching. They're a special team and a special tradition. It'll be a real big boost for our program for them to be here. They're playing a game that counts on our field which you couldn't ask for more."

UMass hosts home meet against Northeast teams

By Eric Mansfield
Collegian Staff

The Massachusetts cross-country teams will begin their season at home this Saturday against select teams from the Northeast.

The Minutemen, a team loaded with seniors and freshmen, will look to accomplish a "variety of goals," according to men's coach Ken O'Brien.

O'Brien knows what he will be getting from his seniors. However, he is hoping to get his freshmen accustomed to the longer races in college.

At the start of the season, O'Brien does not necessarily want or need his team to exceed its times and finishes from the end of last season, but to maintain a consistency. At the very least he wants the team to be near the same times they were at this time last year.

On Saturday O'Brien expects the University of Connecticut to be near the top of the standings as it returns a "good, young team," but the rest of the competition should be evenly-matched.

The Huskies are coming off of a second place finish in the Fairfield Invitational.

The Maroon and White hope to top UConn by riding the shoulders of Kevin Johnson, who highlights this group of seniors expected to take a significant leadership position.

Meanwhile, the Minutewomen will also host a home meet at the Wysocki fields. They will host Boston College, Amherst, Maine, and Vermont.

UMass will look to rebound from an eighth place finish in last week's BC Invitational.

Women's coach Julie LaFreniere said that the Eagles will definitely be the strongest team there. LaFreniere expects her team to be a lot more aggressive in its racing.

"They're capable of running with the competition," LaFreniere said. "I want to see a big team effort."

UMass will have to compete without one of its veterans, Lauren Stocker, who will miss her second consecutive race with a nagging foot injury she sustained in training.

LaFreniere maintains that the Minutewomen have enough people to run well together and that they should be fine.

Sophomore Courtney Baldwin is one of the runners LaFreniere expects to finish in the top five.

"Baldwin is gutsy," LaFreniere said.

Junior Karen Roa is another runner LaFreniere expects well of. Roa has been leading the team in practices.

LaFreniere believes one of the keys to success this weekend is getting off the line hard and staying up front.

UMass band honors fallen director

George Parks, 57, passed away while traveling to Michigan; band played show in his honor

By Lindsey Davis
Collegian Staff

At the University of Massachusetts-University of Michigan football game in Ann Arbor, Mich. Saturday, one of the biggest stages ever for the UMass Minutemen Marching Band, the band took the field to perform without their beloved leader and cherished friend.

George N. Parks, 57, the University band director for the past 33 years, passed away last Thursday after suffering from a heart attack following a performance at Cuyahoga Falls High School in Ohio, said Frederick Omega Pye, associate director of the band.

The band decided to continue on to Ann Arbor, Mich. to play on Saturday as planned. Assistant Director Thomas Hannum, who assumed leadership of the band during the game, placed Parks' hat on the conductor's podium for the show.

"It's a mixture of awesomeness and sadness. We don't know what to feel," said junior color guard member Kassie Wolin as she sat on the sidelines with the band.

It was a surreal feeling throughout the weekend for the Marching Band.

"It feels like he is going to come in the stadium any second," said Pye.

The band embarked on its long anticipated trip to the University of Michigan Thursday morning. The caravan of seven coach buses stopped at Cuyahoga Falls High School Thursday night to perform for the local community and spend the night in the school gym.

Prior to the game, Parks began to complain of chest and neck pain, said Pye. His close colleagues urged him go to the hospital but he insisted on completing the evening's show and promised he would go immediately afterwards.

Pye, a longtime colleague and friend of Parks for nearly 30 years, described Parks' last performance.

"He was incredible with so much energy. He knew how to make the crowd go wild," he said.

Very few were aware of Parks' pain, said Pye. The 57-year-old director fainted next to the van that would take him to the hospital five minutes from the high school. Paramedics arrived at the scene and transported him to Summa Western Reserve Hospital. He was pronounced dead at 11:02 p.m.

The band was fast asleep on the gym floor when Hannum woke them around midnight. He asked the band to gather around and broke the news that Parks had passed away, said Pye.

Band members described the next few moments as that of instant shock, followed by hours of tears and grieving. Five local clergymen were called to assist students and faculty during the grieving process but arrived to find that band members were using each other for support.

See PARKS on page 3

During his 33 years as the director of the University of Massachusetts Minuteman Marching Band, George Parks was a beloved leader and friend to students and colleagues.

Researchers help map animal transit routes

By Chelsea Whitton
Collegian Staff

The ecology of life involves both nature and humans in an interconnected path, a path that is often dominated by humans. To reconnect the intricate transportation routes of wildlife that are critical to their health and survival three University of Massachusetts researchers have created a project called Critical Linkages.

Using digital maps, aerial photography, and first hand observation, the program is working to improve water, underground, and above ground transportation routes for wildlife. The program is a part of the Department of Environmental Conservation at UMass. It was created a year ago to help preserve and restore high ecological integrity across Massachusetts.

The project, directed under the authority of extension specialist Scott Jackson, Professor Kevin McGarigal and research fellow Brad Compton, all part of the Environmental Conservation Department, aims to collect research-based information for state and environmental agencies. Agencies benefitting from the project include the Massachusetts Department of Transportation (MDOT), the Nature Conservancy of Massachusetts, the Berkshire Environmental Action Team (BEAT), and the Department of Fish and Game.

"We use computers to evaluate the best way to connect habitats and ecology," said Jackson, when describing the Critical Linkages program and its reliance on prior research known as the Conservation Assessment and Prioritization System (CAPS), a software program written by Compton in 1998.

"It is a community-based approach," said Jackson. Jackson explained that the scientists simply do not look at one affected area, but look at regions of affected areas, and then evaluate and address what natural wildlife movement paths are most critical to preserve and restore.

"We take a course filtered approach - we answer what are the larger questions to address over long time periods," said Jackson.

One question Jackson said the program evaluates is, "How is the landscape going to change over 200 years with climate change in mind?"

The UMass Landscape Ecology Laboratory website describes that, "CAPS computes an Index of Ecological Integrity (IEI) which depicts the relative wildlife habitat and biodiversity value of any point on the landscape based on landscape ecology principles and expert opinion."

The three scientists are not the only ones working on the project. There is participation on the statewide level between graduate students and undergraduate students at several UMass campuses.

The program identifies current issues and also prospective or otherwise anticipated issues for agencies responsible for preserving and restoring the environment.

"It's always hard to say if the changes we see are related to climate change or just variability in the seasons. We are starting to see fall later and spring earlier and major changes in storm patterns. The storms are much stronger," said Jackson.

"We don't know what it's going to look like, so it's hard to see what exactly will protect the species in Massachusetts," he added.

Critical linkages addresses various ways in which the climate could change and how the wildlife and habitat balance could change. The program addresses and presents options

Researchers used a combination of aerial photography and on-the-ground research to map natural transportation routes for wildlife.

UMass a part of new ethical apparel outfit

By Max Calloway
Collegian Staff

When Joe Bozich founded Knights Apparel back in 2000, profit was the name of the game. As CEO, Bozich deftly maneuvered the company to the front of the collegiate apparel pack, ahead of giants such as Nike and Adidas, making Knights the largest supplier of college sportswear nationwide. That all changed shortly after he started the company.

While attending his son's baseball game, Bozich suddenly lost his sight. It was multiple sclerosis.

Shortly after his diagnosis, a close friend and his own brother passed away. Three blows were too much for Bozich's son to handle, and he began to suffer anxiety attacks.

For Bozich, the tragedies were an epiphany.

"I thought of people who were going through the same thing as my child and me," said Bozich in an interview with the New York Times. "Fortunately, we had the resources for medical help, and I thought of all the families that didn't."

"I started thinking that I wanted to do something more important with my business than worry just about winning market share...That seemed kind of empty after what I've been through. I wanted to find a way to use my business to impact people that it touched on a daily basis," added Bozich.

Teaming up with Scott Nova, the head of the Worker Rights Consortium - a group of 186 universities which pressure factories to treat workers fairly - Bozich set out to make a difference.

Nova and Bozich turned their attention to Alta Gracia, a small village in the Dominican Republic that suffered massive layoffs after the Korean owned BJ&J apparel factory closed, searching for cheaper labor markets.

According to 2008 U.S. State Department report, the current minimum wage in the Dominican Republic is approximately 85 cents an hour.

Collaborating with former executives of J.P Stevens Textile Corporation, Milliken & Company and Gerber Childrenswear, the team organized a $500,000 renovation of the Dominican Republic factory. Every effort was made to create a safe and comfortable working environment for the community. Adequate lighting and ventilation systems were installed and all seamstresses were provided ergonomic chairs, originally suspected

The University of Massachusetts is within the top 97 schools considered great places to work, according to The Chronicle of Higher Education.

Survey results were based on responses from over 43,000 administrators, professors, and staff members from 275 colleges and universities across the country. Although the survey did not specify which position UMass holds on the list, the University did receive merits for tenure clarity, faculty's right to not have positions terminated without just cause.

Each survey was divided into two parts: an assessment of workplace policies and demographics, and a questionaire which touched upon subjects including the quality of shared government, satisfactory workplace quality and quality of department share.

Ed Blaguszewski, UMass' executive director of news and media relations, said the University is honored to have received such a title.

"We're pleased that a nationwide survey by the Chronicle praises workplace practices at UMass Amherst. The University is committed to providing a

UM among top 97 universities at which to work, finds study

The UMass system's flagship campus was ranked one of the top universities in the country at which to work at by the Chronicle of Higher Education.

TOP 97 from page 1

quality work environment, and this distinction reflects that approach," said Blaguszewski.

To assist with the survey, the Chronicle joined with ModernThink LLC, a counseling firm which has conducted many surveys related to workplace environments.

In order for schools to be eligible to make the list, the organizers of the survey must have received positive feedback from the faculty of the school in question.

Richard Boyer, co-founder of ModernThink, said in a phone interview that the survey was conducted based on a need to find out how colleges are performing.

"One of the reasons we're excited about these surveys is because higher education is late getting to the party in terms of workplace quality; in fact it's about 10-15 years behind," he said.

Boyer went on to explain that survey on the quality of workplace environments for colleges began in 2008, when ModernThink invited around 800 colleges and universities, with 90 replying and agreeing to be part of the survey.

Afterward, the decision was made was to allow any school interested in the survey to apply.

When asked why there was only a Top 97 list, Boyer said this had nothing to do with who got the highest scores, but that schools were selected for pre-determined merits.

"The recognition categories are divided based upon the size of the schools, either small medium or large," he said.

LINKAGES from page 1

for dealing with the unknown future of weather, climate and wildlife species changes.

The project's funds were $150,000 from the Federal Highway Administration and $120,000 from the Massachusetts Nature Conservancy.

There are two phases to the project. The first phase is focused on the end of the year in December. It will produce identification of culverts to connect aquatic ecosystems, evaluations of road segments statewide and dams. The second phase is to continue addressing ecological integrity on a local level and a broader level.

Jackson addressed how the program goes about evaluating and prioritizing projects for preservation and restoration. He said that sometimes, it is as simple as asking, "What are the most important issues? Is connectivity three times as important as keeping road traffic in mind?"

"The program lends itself to scenario analysis. We have the baseline assessment and the ability to answer the 'what if' questions. We rely heavily on what was researched with CAPS based on literature," said Jackson.

Two principle uses in identifying areas for priority to protect existing ecological values are where the greatest restoration opportunities and where ecological integrity can be improved the most.

"In general, wherever we have urban growth, CAPS and Critical Linkages is designed to help in the planning process," said McGarigal, a professor in the Department of Environmental Conservation.

There are five systems to focus on in Massachusetts; forested, non-forested, upland wetlands, aquatic and coastal landscapes, said Jackson.

The current goals for the Critical Linkages program are expected to be reached by December. After that, the project will expand to other states.

"It will be necessary to update this [the project]," said Jackson.

"Most of our work has been in Massachusetts, but with an eye addressing how we could apply the program to other states," said McGarigal.

"The final result of the projected goals will be to ultimately identify the critical linkages. That is the end point we want to get to," said Jackson.

Chelsea Whitton can be reached at cwhitton@student.umass.edu.

Area young women lined up Sunday for a sweet treat as Herrell's Ice Cream in Northampton gave out free medium cups or cones to celebrate 30 years of business.

It was a sweet day in Northampton on Sunday. To celebrate 30 years of serving the Pioneer Valley, Herrell's Ice Cream gave its customers free medium cups or cones yesterday. Last Tuesday, September 8, Herrell's Ice Cream in Northampton celebrated its 30-year anniversary. To mark the momentous occasion, management decided to give customers medium helpings of their award-winning treats.

In 1973, Steve Herrell opened the first Steve's Ice Cream shop in Somerville, Mass., just outside of Boston. Herrell's store gained notoriety for pioneering the concept of "mix-ins," as the ice cream entrepreneur devised a way to adapt commercial freezers to reduce their airiness, thereby allowing him to freeze delectable candies into his concoctions.

In 1977, Herrell sold the original Steve's Ice Cream, but he couldn't find richer pastures; in 1980, Herrell brought his ice cream operation to Northampton, opening Herrell's on Old South Street.

In a release, Herrell explained why he just can't stay out of the freezer, "When you're having such a great time making delicious ice cream, the time flies by," he said. "I look forward to 30 more years!"

Police Log Week Of 9/10-9/13

FRIDAY, SEPTEMBER 10

Vincent P. Grouke, 21, of Seekonk, Mass., was arrested on charges of operating under the influence of alcohol and failure to have a valid registration sticker. At 8:55 p.m., a University of Massachusetts Police Department (UMPD) officer on patrol noticed a green Toyota Camry driving on Clark Hill Road without an updated registration decal on the rear license plate. While speaking with the driver, the officer detected what was the report described as a "slight odor of alcohol." After failing several field sobriety tests, Grouke, was arrested.

SATURDAY, SEPTEMBER 11

Mikaela Baker, 18, of Ashburnham, Mass., was arrested on charges of operating under the influence of alcohol and speeding, unsafe operation of a motor vehicle, and a marked lanes violation. A UMPD officer allegedly saw a blue Toyota Yaris speeding. While following the car, the officer allegedly observed the car cross the yellow traffic line into another car's lane. The officer pulled the vehicle over on North Pleasant Street at 2:18 a.m. In the police report, the officer noted the driver appeared disoriented and under the influence of a substance. After failing several field sobriety tests, Baker was arrested on the four charges.

Michael S. Burridge, 23, of Malden, Mass., was arrested on charges of operating under the influence of alcohol and speeding. At 3:10 a.m., a UMPD officer allegedly observed a grey Toyota Camry speeding on North Pleasant Street. While speaking with Burridge, the officer asked him to participate in field sobriety tests, which he failed. Burridge was arrested on two charges.

Casey Daby, 20, of Pittsfield, Mass., was arrested on several liquor law charges. At 12:12 a.m., an officer on patrol watched a blue Ford Explorer pull into a parking lot and drive onto the grass next to Totman Gym, according to police reports. Upon viewing this, the officer approached the vehicle and, while speaking with the driver, noticed the smell of marijuana. The driver, Daby, admitted the group in his car had smoked marijuana, and gave the officer the remaining amount. While searching the car, the officer found wine and vodka. While running Daby's drivers license number in the state database, it showed that is was suspended. Daby, a non-student, was arrested on charges of driving with a suspended license, possession of alcohol while under the age of 21, and possession of an open container of alcohol in a motor vehicle.

Adam Philip Harold, 32, of Chicopee, Mass., was arrested on charges of operating a motor vehicle with a suspended license. An officer driving on Massachusetts Avenue signaled a white Ford Crown Victoria to pull to the side of the road. After running Harold's drivers license number through the state database, it showed that it was suspended. Harold, a non-student, was arrested.

Courtney Margossian, 18, of Winchester, Mass., was arrested on charges of a liquor OUI, speeding, and unsafe operation of a motor vehicle. While on patrol, a UMPD officer reportedly saw a blue Toyota speeding at 1:39 a.m., and signaled for the car to pull to the side of the road. While speaking with Margossian, she appeared disoriented to the officer, and was asked to perform several field sobriety tests, which she failed.

Andrew D. Tibma, 19, of Needham, Mass., and Michael Libertini, 19, of Needham, Mass., were arrested on charges of possession of liquor while under the age of 21. While driving on North Pleasant Street, an officer signaled for a blue Kia Rio SL to pull to the side of the road, due to what a police report called suspicious activity. While approaching the car, the officer saw alcohol and asked the driver to verify his age. Upon learning he and his passenger were under the legal age, Tibma and Libertini both received summonses to Hampshire District Court.

David Czarnota, 21, of Dracut, Mass., was arrested on North Pleasant Street as the result of a report of a suspicious person. Upon arrival, the responding officer determined that Czarnota was acting in an inappropriate manner and attempted to place him under arrest. According to police reports, Czarnota resisted arrest, though was eventually subdued. Czarnota was arrested on charges of disorderly conduct and resisting arrest.

Edgar Rivera, 27, of Mansfield, Mass., was arrested on charges of driving an unregistered motor vehicle, operating a vehicle without a valid drivers license, and speeding. Upon viewing a green Jeep speed on Commonwealth Avenue, an officer signaled for the car to pull to the side of the road, at 2:40 p.m. While talking with Rivera, he could not provide valid registration or his license and was arrested.

Corey S. Baker, 20, of Westwood, Mass., was arrested and charged with possession of alcohol while under the age of 21. Baker was arrested as the result of a traffic stop at 5:16 p.m., on North Pleasant Street.

MONDAY, SEPTEMBER 13

Jaron Lewin-Berlin, 23, of Sunderland, Mass., was arrested due to an active warrant for his arrest. The arrest resulted from officers responding to a suspicious persons report in Lot 32 off Massachusetts Avenue.

TUESDAY, SEPTEMBER 14

Andrew P. Helems, 22, of Westfield, Mass., was arrested on charges of operating a motor vehicle with a suspended driver's license and speeding in a reduced speed zone. Helems was pulled over on North Pleasant Street after an officer viewed his brown Honda Civic speeding at 11:52 a.m.

Ryan D. Birchall, 19, of Dedham, Mass., Mark Iantosca, 19, of West Roxbury, Mass., and Dante DeBenedictis, 18, of Dedham, Mass., were arrested on charges of attempting to commit a crime and disorderly conduct. Officers responded to a report of suspicious activity in Hetter Hall, on Presidents Drive. No further details about the arrests were provided.

THURSDAY, SEPTEMBER 16

Stephanie Benson, 19, of Wilmington, Mass., was arrested and charged with possession of alcohol while under the age of 21. She was arrested on University Drive at 5:56 p.m. as the result of a traffic stop.

John Tyler Rivers, 19, of Braintree, Mass., was arrested on charges of false use of a liquor identification card, and possession of alcohol while under the age of 21. He was arrested on University Drive at 5:56 pm as the result of a traffic stop.

James Sascha Alach, 18, of Winchester, Mass., was arrested on charges of possession of a false identification card, delivering alcohol to an underage person, and possession of alcohol while under the age of 21. He was arrested at 9:07 p.m. as the result of a traffic stop.

Michael William Kalfopoulos, 18, of Winchester, Mass., was arrested and charged with possession of alcohol while under the age of 21. He was arrested at 9:31 p.m. as the result of a traffic stop.

Paul Mahoney Hindle, 18, of Seekonk, Mass., was arrested on the charge of possession of alcohol while under the age of 21. He was arrested at 9:31 p.m. as the result of a traffic stop.

Michael Timothy Haynes, 19, of Franklin, Mass., was arrested on the charge of possession of alcohol while under the age of 21. He was arrested at 9:31 p.m. as the result of a traffic stop.

Parks, Marching Band director, dies at age 57

PARKS from page 1

"They are a family," said Pye. "They consoled within each other. Everyone was so impressed with their maturity."

After hearing from University officials and the opinions of band members, the band took a vote and decided to pack up their instruments and head to Ann Arbor.

"We knew that we would never be the same again if we stopped now," said Pye. "It is what he would have wanted and the students wanted to do it for him."

With 110,187 people in the stands, the band ran on to the field wearing black felt armbands at halftime for a five-minute performance of a Madonna medley including "Like A Prayer." An announcement made at the stadium stated that the game had the most television viewers for a college football game in the country on Saturday.

After the game, in Big 10 tradition, the two bands split the field and alternated playing their halftime show music for the lingering stadium guests including Michigan's 'Lady Gaga medley and UMass' 'The Wind and The Lion', 'Oye Tu Conga', and 'God Bless America.'

To conclude UMass' performance in the stadium, Hoop Band director John Leonard took to the podium to lead the band in Frank Sinatra's 'My Way.'

Through the tears, band members sang with pride for their college family and love for the man who had led them until this weekend.

"And now, the end is here. And so I face the final curtain. My friend, I'll say it clear. I'll state my case, of which I'm certain," sang band members, as they performed Sinatra's hit.

The song continues: "I've lived a life that's full. I traveled each and every highway. And more, much more than this, I did it my way."

To honor Parks, the Michigan marching band learned 'Fight Mass' to perform during their pregame show. Though known for being ruthless on visiting athletic teams and bands, Michigan fans stood among Massachusetts parents and supporters to cheer for the marching band, respecting their loss.

On Friday, UMass officials held a press conference at the Fine Arts Center to discuss Parks' passing. UMass spokesperson Ed Blaguszewski said that plans are being made for a memorial to be held on campus. Details will be announced in the coming days.

"[Parks] believed that the band was the heart and soul of the campus," said Jeff Cox, chair of the Department of Music and Dance. "The faculty is in shock. George had no prior health issues that I know of."

Carol-Ann Batchelder, director of special gifts and programs, noted that two of the "biggest things" Parks wanted were a chance to play at the University of Michigan and the construction of a band building.

She added that Parks had put together the most successful grassroots campaign she had ever seen, raising $1.4 million for the band building. The building was named the George N. Parks Marching Band Building at Homecoming last year. She said it is expected to open in March, 2011.

"He leaves such a lasting legacy that it will go on forever," she said.

An email from Provost James V. Staros and Chancellor Robert Holub was sent to the campus body Saturday night, commending the marching band for playing "the ultimate tribute to their beloved leader, as they performed in Michigan, despite their grief."

The email also asked for donations to be made to the George N. Parks Memorial Fund, in lieu of flowers. A link to the fund can be found at http://umass.edu/umhome/parks.

"The outpouring of sorrow and support, both on campus and beyond, has been tremendous," the administrators said in the email. "We must all take solace in knowing that while we grieve, we do so as a community."

Professor George N. Parks led the University of Massachusetts Minuteman Marching Band for 33 years through halftime shows, parades, presidential inaugurations, marching band festivals, the Bands of America Grand Nationals, and more.

In addition to teaching students at UMass, Parks founded the Drum Major Academy, an annual summer program designed to teach nearly 3,000 high school students leadership skills and the art of being a drum major.

During his UMass career, Parks was awarded the Distinguished Teaching Award, an Award for Outstanding Accomplishments in Scholarly and Creative Activity and a Chancellor's Medal.

In 2006, Parks was inducted into the Bands of America Hall of Fame.

In 2004 and 2008, Parks led the Bands of America honor band in the Tournament of Roses Parade.

Alyssa Creamer, Matthew M. Robare and Chris Shores also contributed to this report.

Lindsey Davis can be reached at lmdavis@student.umass.edu.

University store offers ethically-made apparel

ALTA GRACIA from page 1

to be for bosses by the wary workers. Most impressive of all, the factory would now be paying a living wage.

As Martiza Vargas, leader of the Dominican Republic workers union, said in a press release, "At Alta Gracia, we have so much more space, better ventilation, extractors to make sure there's no dust in the air, properly marked exits and escape routes in case of emergencies, new bathrooms in good condition, and more importantly, we have management that treats us with a lot of respect."

Bozich has defined a living wage as one that allows, "an employee's need to meet all of life's necessities," in a teleconference organized by Fenton, a PR firm dedicated to educating the public on a variety of issues.

According to the NYT report, workers now make over three times the standard minimum wage in free trade zones, allowing the community to reinvest in infrastructure and education for their children.

Best of all, workers were afforded the right to organize into a union. Under the factory's previous owners, even suspicion of unionization could result in beatings or layoffs, reported the NYT. All of these benefits, however, come at the expense of Knights' bottom line.

At current rates, each shirt costs about $4.80 cents to produce. 20 percent more than the product would cost if the factory paid its workers minimum wage. Sold at a wholesale price of $8, Knights is taking a hit to its bottom line. However, the company accepts this as a necessity to paying its workers a living wage. "We could have given the communits a check for $25,000 or $50,000 a year and left good about that. But we wanted to make this a sustainable thing," said Don Hodge, president of Knights Apparel, to the NYT.

As of now, Barnes & Noble College Booksellers have the Alta Gracia line at 180 campuses nation-wide, including the University of Massachusetts, and the company hopes to increase the number of campuses participating in the Alta Gracia project by an additional 170 campuses by the winter. Follett Higher Education Group, another large collegiate retailer has Alta Gracia's products at approximately 85 campuses.

In addition to the wage increase, Knights plans to release a video and web documentary highlighting the benefits the new factory brings to workers' lives. Furthering awareness, T-shirt tags will feature pictures of employees and the message "Your purchase will change our lives." The brand has also recently been endorsed by the Worker Rights Consortium, which has never publicly backed a single brand name in its history.

Max Calloway can be reached at mcalloway@student.umass.edu.

Nook vs. Book

Leah Mandly

[illegible] of books, [illegible] reading [illegible] blessings. No [illegible] to go [illegible] the [illegible] clicks [illegible] available [illegible] With the [illegible] technology like [illegible] and the [illegible] A Noble print- [illegible] and buy or borrow the books I want to read.

Having to depend upon something else entirely in order to read is not worth the risks. Here at the University of Massachusetts, students now have the option of renting textbooks at a much cheaper rate than buying them.

Alternatively, e-book readers are cold and remote. Staring at a screen takes away from the experience of reading.

[illegible] to notice texture [illegible] smell of a new [illegible] of the best feelings when [illegible] to buy a book from a [illegible] that I'm about to go [illegible] Books have taken [illegible] on the globe and to other far [illegible] nothing can compare [illegible] cup of cocoa cold day with a [illegible] book. They represent [illegible] and journeys of many dif- [illegible] whether it's [illegible] or a [illegible] book in front [illegible] ingredient to [illegible] information. [illegible] readers are [illegible] losing at a screen [illegible] the experience of [illegible] bonding with the [illegible] noticing the cover [illegible] one is con- [illegible] machine [illegible] by skimming [illegible] the surface of the [illegible] absolute travesty [illegible] are taking over [illegible] out of the most [illegible] world has to [illegible] society.

[illegible] advanced as far [illegible] and gizmos like the [illegible] changed the [illegible] However, how [illegible] to change the way [illegible] a sacrilege. Sure, [illegible] to simply down- [illegible] the technologi- [illegible] are not worth it.

As with all technology, nothing is infallible. Books aren't immune either, but I'd rather have a solid copy of what I'm paying for, rather than a little icon on a screen. Computers crash all the time, and if your Kindle or Nook breaks, then what?

If it's not under warranty, and you haven't backed up your files, not only are you out a few hundred bucks, your books are gone, too. For me, it's very simple to just go out and buy or borrow the books I want to read.

Having to depend upon something else entirely in order to read is not worth the risks. Here at the University of Massachusetts, students now have the option of renting textbooks at a much cheaper rate than buying them.

School books don't have to cost a fortune anymore. For those like me who have a voracious appetite for reading, and can go through books in a few days, libraries are a wonderful resource.

You still get that personal experience with a book, and you don't even have to spend money to buy it! With the Kindle you can't rent books at all. What if you only need to read a book once for class and then don't need it anymore?

Why should you have to buy it when you can rent it and give it back later after you are done with it? The Nook has a sharing option, but only allows you to lend any particular book to one friend. After that, you can't share the book ever again.

Would you let your friend borrow your Kindle or Nook? Instead of handing out an expensive piece of equipment with possibly all your school books on it, wouldn't the smarter choice be to just give your friend the printed book?

Instead of worrying about if they are going to break or lose it, you can just simply let your friends borrow your books. If something happens to them, they are more easily replaced. The Kindle and Nook, however, are not as easily replaceable.

If you're like me and abhor the use of these "e-readers," speak out against these viruses that have wormed their way into society.

They are attempting to replace one of the most sacred pursuits in the human race. If they totally outmode printed material, we will lose so much in an attempt to save a few lousy dollars.

Leah Mandly is a Collegian columnist. She can be reached at mandly@student.umass.edu.

"TRON's" only legacy is sexism

Sophie Kaner

Do you remember the "TRON: Legacy" trailer that was playing at nearly all the big mainstream movie theaters this summer? In case you don't, here's a brief summary: Sam Flynn sits on a leather couch and emotes while an older gentleman tells him that there may be some new information regarding the mysterious disappearance of his father.

Sam whizzes through the dimly-lit city on his motorcycle and into a building so dusty it's a wonder that he doesn't have asthma. He drops a coin, discovers a hidden room, and suddenly finds himself in another world where there are blue lights and strange machinery.

Then there is Olivia Wilde wearing a cat suit as she turns her head to one side. Next the tribal drums begin to beat, and Sam throws a discus. His father appears menacingly and the sexy blonde in a cat suit takes two steps forward. Sam walks purposefully into a glaring light, and "TRON: LEGACY" flashes onto the screen.

It's just your standard action movie fare, right? Take a closer look at the difference between the men and women in the trailer. What are the men doing? Why, exciting and important things that advance the plot, of course. What are the women doing? Well... pretty much nothing at all. They just hang around and look sexually appealing.

This is a problem. Trailers are designed to pique audiences' interest. Did the trailer's producers actually edit the women's scenes so that they look like mute sex objects in order to get people to see the movie?

To give the trailer's producers the benefit of the doubt, I considered that maybe they were just accurately portraying the movie's content. Maybe the female characters in this movie really do just hang around sexily, and those were the most interesting shots they could find.

Trailers are designed to make us want to watch the movie. Thus, by definition, the makers are showing us what they think we want to see: women who are beautiful and sexy, but mute.

So I looked up "TRON", and was informed by imbd.com that Olivia Wilde's character, Quorra, is a "fearless warrior." A fearless warrior? Then why is it that the only trailer-worthy thing she does is lounge about in a cat suit while turning her head slowly to one side?

The men in this trailer are not portrayed as sex objects, and their value as characters is in no way based on their appearances. Sure, you might find Garrett Hedlund attractive, but his scenes in the trailer are not dependent upon his sex appeal.

Conversely, if Olivia Wilde wasn't widely considered to be a sex symbol, would there be a shot of her lying on the couch in a cat suit? Absolutely not.

The "TRON" trailer is hardly the only one with this glaring discrepancy. Take "Iron Man 2" as another example. Where are the women in this film? Well, we've got Gwyneth Paltrow standing around and kissing the Iron Man helmet, for one.

I suppose Scarlett Johansson does slam a man to the ground, but only after pointlessly (and sexily) getting out of a car. Johansson certainly doesn't speak. For the rest, there are a lot of bikini-clad babes shaking their butts. Silently.

Trailers are designed to make us want to watch the movie. Thus, by definition, the makers are showing us what they think we want to see: women who are beautiful and sexy, but mute.

I understand that "TRON's" production company (like those of most action movies) is clearly going after the coveted 18-35-year-old male demographic. Now, this is already a dicey issue for me, since I think that an enormous number of people outside of that demographic might well be interested in seeing an action movie too (but let's leave that notion aside for the time being).

In essence, I just don't think that this kind of advertising does 18-35 year old males any justice. I suspect that many of them do have interest in female characters who are more than just dolls, and that they would be compelled by a woman in a movie who was original, independent, and not reliant upon her sexual appeal.

I realize that about half of the University of Massachusetts campus is made up of the exact demographic to which the "TRON" trailer is trying to appeal. Therefore, I leave it to you, 18-35 year old males (and everyone else who watches action movies), Is it important to you that women in cinema be portrayed as something more than mere sex objects?

If it is, you can show that to the movie industry by not responding the way it expects you to. Next time you see a trailer that shows women doing nothing more than standing around and looking pretty, make your point by not going to see the movie. Or at the very least, wait until it comes out on DVD.

Haitian relief drying up

Alison Bowler

It has been over nine months since a magnitude 7.0 earthquake shook Haiti near its capital, Port Au Prince, destroying homes, killing tens of thousands of people and injuring even more. Yet as the world moves forward, and donations become fewer and fewer, the real question is, "What happens to Haiti now?"

CNN published an article in July citing several countries which pledged financial aid to Haiti and have come up short. The United States is among those countries that failed to follow through with assistance. The U.S. promised Haiti $1.15 billion toward relief efforts, which represents over one-fifth of the world's total pledge of $5.3 billion. While I was surprised to learn of the American government's failure to fully support the devastated island, I was shocked at what little attention the press has delegated to the matter.

In 1993, thousands of Haitians were turned away from U.S. shores under the leadership of President Clinton.

Today, nine months after the earthquake, has the Haitian relief effort simply taken a backseat to other world news?

He feared that such a large migration of Haitians would undermine its journey toward true democracy. At the time, the Haitian government was nearly overthrown in a coup. The question begs asking: "Was denying the immigrants access to the United States beneficial to Haitian democracy?" Was President Clinton unaware that Haiti is the only nation in the history of the world to boast a successful slave rebellion? If there is a people on this earth who know the vitality of freedom and democracy, it is the Haitians.

More than fifteen years later, just before the earthquake hit, Haiti was still grappling with a weak democracy, poor infrastructure, and the most severe poverty in the Western Hemisphere.

Today, nine months after the earthquake, has the Haitian relief effort simply taken a backseat to other world news? Is there a general consensus that the problem is solving itself? The truth is that while there has been a good deal of progress made in the relief efforts (mostly due to private charity) Haiti still needs a great deal of help. This help needs to come quickly, and needs to be provided by dedicated people.

The damage of the severe earthquake is magnified by the fact that it occurred in such an impoverished nation. This also means that the relief efforts in Haiti must continue far into the future. The struggling Haiti needed aid before the earthquake, making the situation afterwards even harder to fix. Simply putting up tents won't help the people of Haiti who were injured and lost their homes and their loved ones in the grand scheme of things.

The private donations of the American people and the global community at large have made an enormous impact in the recovery effort. Furthermore, the American Red Cross, Doctors Without Borders, and Oxfam are only a few of the organizations that have provided time and money and continue to do so. However, there is much more work to be done.

In addition, I think other countries have a responsibility to help Haiti. It is not that no money is going there or that the people who are helping are not doing all that they can. It is because Haiti needs financial stability to reinvigorate its government. Asking Haiti to stand up on its own two feet is like asking someone to walk with broken legs. It can't be done without therapy, rehabilitation, and most important, the help and support of others.

Looking at Haiti's situation right now shouldn't make people feel at ease. Like other natural disasters in history, the world needs to step up and lend a collective hand. Helping Haiti not only benefits the people facing these unimaginable circumstances within their own country, but also the rest of the world. Why? Getting Haiti out of poverty means it can stand on its own.

Haiti standing on its own increases the chances that the people of the country can work together, which in turn, can enable Haiti to shed its legacy as the poorest nation in the Western Hemisphere. Education, a higher GDP output, and a greater number of people above the poverty line are all entirely possible. But Haiti's people can't get there by themselves.

Donate your support to Haiti. During these tough economic times, whatever little you can offer will make all the difference. We as Americans, the most generous population in the world, must make up the shortfall our government has left. In the age of the global economy, countries are interdependent. Haiti needs its neighbors around the world to act now. Perhaps some day down the road, there will be a country that needs Haiti's help. Let's put it in a position to offer it.

Tobacco's strange sounds hit Northampton

By Garth Brody
Daily Collegian Staff

Thursday night, Tom Fec a.k.a. Tobacco brought his brand of scary dance music to the Iron Horse in Northampton.

The Iron Horse Music Hall, with its old-fashioned, hardwood pub decor, may not necessarily be the ideal location for electronic nightmare sounds. Thus, Tobacco adapted to his environment with the well-tested method of projected visuals on a white sheet.

The use of the projector and white sheet seems to have been the only connecting thread between the three performers that night. Also performing that night were ethereal rockers Dreamend and childlike beat-smiths Junk Culture.

Dreamend's guitarist and principal songwriter is Ryan Graveface, the guitarist for Tobacco's band, Black Moth Super Rainbow. During the entirety of his set, Graveface sang through an eight-eyed spider mask.

Something about the combination of Dreamend's sparse, two-man post-rock and cut up reels from an old educational film about the greenhouse effect evoked a desolate, post-apocalyptic Great Plains. With just a guitarist and a drummer, it sounded as though a good portion of the band had died just before the performance. Clearly, the music was written for a more filled out guitar instrumentation, and the sparseness of their actual sound ended up leaving something to be desired.

Dreamend easily got the most mileage out of their chaotic noise jams, but the closer they got to normal-people music, the less convincing they sounded.

Junk Culture, a rookie artist on Girl Talk's Illegal Art label, drew from slightly more eclectic visual sources. At a certain moment of dramatic beat dropping, the projection cut jarringly to over-saturated color footage of a football game.

Junk Culture is mainly comprised of sample-crafter Deepak Mantena, though he was joined on stage Thursday night by a drummer. Together, they looked suspiciously like Avey Tare and Panda Bear. Mantena's Animal Collective-inspired toddler screams balanced well with the playfully repetitive samples bouncing alongside. The samples were buoyant and catchy, but became stale too quickly as Mantena attempted to rouse the

Black Moth Super Rainbow's Tom Fec, a.k.a. Tobacco performed at Iron Horse Music Hall in Northampton this past Thursday. Tobacco combined one of a kind visuals with his eclectic dance beats for an all around out-there performance.

'The Town' brings Hollywood close to home

Ben Affleck's latest starring role as Doug MacRay in "The Town" does not disappoint. The film is set in Cambridge, Mass and features Affleck as a notorious bank robber.

Ian Winship
Collegian Correspondent

It's always exciting to see places from your day-to-day life in a Hollywood movie. Now take that excitement and add bank heists, car chases, and intense gun fights and you have the "The Town."

As a Massachusetts resident, it is hereby your job to go see this movie. It is simply oozing with Boston pride, but don't let that be the only reason you go, because this movie has a lot to offer.

The story follows Ben Affleck, an experienced bank robber, planning out his next big job. You get thrown into this movie immediately while Doug MacRay, played by Affleck, and his crew rob the Cambridge Savings Bank smack dab in the middle of Harvard Square.

In an unexpected turn of events, one of the crazier crew members, Jeremy Renner playing James Coughlin, takes a woman hostage. They end up leaving her unharmed.

After the job is done the group of robbers decide to follow the woman to make sure she has no way of identifying (and therefore giving up) any of the masked bank robbers from the job. MacRay ends up taking this duty over and, against better judgment, starts to date the hostage, Claire Keesey, who is played by Rebecca Hall. This decision is one that will change MacRay's life forever.

"The Town" is action packed. It is set in Cambridge, Mass., which has the highest level of bank robberies in America, according to the movie.

"The Town" does not upset. There are a lot of robberies in this movie. Where some movies might build up to one big job that happens after three quarters of the film is spent in planning, this movie starts with a job, ends with a job, and has plenty in between.

There were also a lot of gunfights throughout the film, and they were done well. These violent scenes are what one might imagine when one thinks of normal guys trying to fight it out with the police. There aren't any ridiculous scenes that you sometimes find in other action movies that have people asking, "What just happened?"

Now don't get me wrong, action is great, but this movie actually has a story. There is a lot of drama. There are relationship conflicts, not just between ex-lovers, but best friends and new lovers too.

Character development is also put together well. Everyone has their own story, and these stories are not simple. Everyone is important to what is going on in the film. Not only do you see thrilling and dramatic scenes, but there is also a good deal of laughs to be had.

You know those movies where you find yourself immersed in the story and it doesn't matter what is going on around you? This is one of those movies.

Now it's clear this is a quality film, but it's only fair to talk about the negatives as well. The big problem with the film is the overuse of a particular set of shots. They use a lot of aerial shots of Cambridge and Boston for transition scenes. They also use a lot of time-lapse shots of clouds above the cityscape. There is nothing wrong with these shots.

They actually look pretty cool. These particular shots were just too similar to one another and were merely overused.

Other than these minor complaints, this movie is definitely worth a watch.

Embrace boots this fall in any style, color, price

By Isa Paiva Cordle
McClatchy Newspapers

Over-the-knee, knee-high, up-to-the-calf or ankle booties at any height, boots are the fashion footwear trend for women this fall.

The range of boots is dizzying, as are the heels, from sky-high stilettos to platform wedges to flat. And the styles suit any taste from lace-up and tough to slip-on and sleek, and from military-influenced to ladies-who-lunch.

Boots are everywhere at stores. Forget that it's still summer. You'll soon want to be shopping for, buying and wearing boots pretty much nonstop, fashion experts say.

"This fall, a woman could wear a different pair of boots every day of the week," said Gregg Andrews, a fashion director for Nordstrom. "The beauty of this trend is that it goes from high to low, from tall to short there is every style imaginable for a woman."

The assortment is truly mind-boggling. There are boots in suede, leather and fabric. Boots with buckles, zippers or buttons. Boots with ruching, or studs. Boots with fur trim. Boots in animal prints. Riding boots. Wellies.

"You always see boots for the season, but I've never seen it like this," said Katherine Rubino, manager of public relations for Neiman Marcus at Merrick Park in Coral Gables, Fla.

And depending on where you shop, and how much you want to spend, boots can come in at every price, from under $50 to more than $2,000.

At the high end, behold the green felted wool, over-the-knee Christian Louboutin boot, $1,595 at Neiman Marcus. Like a work of art, it captures four fall trends in one, Rubino said: green, which is the color of the season; military influence, over-the-knee and it's a boot.

"It's a little bit Victorian, a little bit military, and all around perfect for the coming season," said Ken Downing, fashion director at Neiman Marcus.

Or take another of Downing's favorites, Christian Dior's lace stiletto booties with a satin-trimmed peep toe, $1,850.

"They look terrific during the day and add excitement for the evening with your little black dress," Downing said.

And don't forget the animal print boot, like Neiman Marcus's Christian Louboutin suede animal print lace-up booties, $1,795; or the Giuseppe Zanotti high-heeled over-the-knee black boot with the animal print top, $1,360.

"Do not fear the animal print, because it goes with everything this season," Downing said. "To me, it is beige."

For those willing to spend up to a few hundred dollars, department stores like Nordstrom, Neiman Marcus, Saks Fifth Avenue and Macy's have dozens of boots in a range of prices.

"There is not one boot. It is a wardrobe of boots," Downing said. "There is a boot for every personality, for every time of day, for every part of your lifestyle."

At the lower end, Rack Room Shoes has boots from $39.99 to $99.99. Western boots, booties, motorcycle-influenced boots with buckles or zippers, and over-the-knee boots are big this fall, said Alyson Stanley, a buyer at Rack Room, which has 42 boot styles in its inventory.

"Boots are such a trend item because they are so versatile," Stanley said. "They look great with jeans, skirts and leggings."

And while black and brown are still staples, this season boots are coming in grays, taupes, greens and russets, fashion experts say.

At Steve Madden, fold-over boots and distressed leather are top styles.

The Madden design team says the slouchy Carlsen boot, $129.95, which comes in black, burgundy, gray and taupe suede, "can go from dressy to hipster with one scrunch down."

See BOOTS on page 6

Boots provide endless options for a fall wardrobe and can fit any budget. This season, knee-highs, ankle booties, wellies, and riding boots are at the top of the fashion charts.

CocoRosie bring eclectic blend to Northampton's Pearl Street

By Sam Butterfield
Collegian Staff

Usually, listening to a band's recorded work is a good indication of how they might play live. For sisters Sierra and Bianca Casady, better known to the world as the freak-folk group CocoRosie, replicating their unique blend of vaudeville opera and modern day indie psychedelia presents something of a challenge.

As such, the duo's live set last Thursday night was livelier and more condensed than much of their studio work, with slow, dreamlike tunes from earlier albums like *Noah's Ark* and *La Maison de Mon Reve* put to live drum beats and a nearly full live band, featuring a synthesizer player and perfectly synchronized beatbox percussion from Gael Rakotondrabe.

Around 9:15 p.m., backstage crew brought out a harp and turntables to the rousing applause of the heavily female crowd, and by 9:30 the circus was in town, as a visualizer displaying neon rainbows, a carousel and oversized photos of children came up and the band came out.

The performance drew heavily from the sisters' most recent release, last May's *Grey Oceans*. The opener was no exception, as Bianca (Coco) played flute early on, while Sierra (Rosie) crooned to the crowd with her deep, operatic vocals. The opening track, "Undertaker," featured drum beats combined with Rakotondrabe's heavy vocal percussion, lending the piece a deeper, richer feel than the recorded version.

The sister-sister vibe was instantly noticeable, as the pair fed off each other throughout the night, bouncing off each others' energy and hopping around the stage in the early going. While the two are known to dress experimentally, to be mild, they appeared comparatively normal Thursday, with Coco sporting a purple dress and Rosie in an off-pink robe.

Next up was the title track to *Grey Oceans*, "Trinity's Crying." The song features sampling which waits like a siren leading into a slow, cerebral synth line and Rosie calling out in rich, theatrical tones. The song feels like it has more in common with CocoRosie's earlier work, as it progresses more slowly and crafts a more haunting, eerie ambiance.

Third was a logical progression from "Trinity's," as they followed with the next track on *Grey Oceans*, "Smokey Taboo." Featuring heavy beatbox percussion, the track came out faster and more up-beat than its recorded counterpart, as Coco broke into her singsongy hip hop tone, squeaking and cooing.

Next came an old favorite, the opening track to 2005's *Noah's Ark*, "K-Hole." This was a prime example of how the duo's tempo and rhythm changed from the studio to the stage. What is normally a sleepy, faded track featuring faint samples and an ethereal synth line built to a thumping climax, pulling together drums, beatboxing and a more energized synthesizer, all of which made the song feel more like a dance beat than a piece meant for staring out the window on a rainy day.

After "K-Hole," the duo gave the audience their first taste of 2007's *The Adventures of Ghosthorse and Stillborn*, with the double track "The Black Swan / Promise." This featured a whirring synth with prominent beatboxing and waves of sampled electric sound. Coco set the cadence and measure for the tune, with flowing breakdowns featuring Rosie crowing theatrically.

Next was an impressive, several minute beatbox breakdown from Rakotondrabe, followed by the third track to *Grey Oceans*, "Hopscotch," which features a honky-tonk synth leading into a dreamy vocal sequence from Rosie with an ominous drumbeat. The track is certainly one of the hits from *Oceans*, as it manages to harp back to CocoRosie's earlier work while still finding a more complex, nuanced identity.

The pair followed with the b-side "Turn Me On," which featured Rosie on the harp and Coco singing, rather than rhyming.

Next was "Animals" from *Ghosthorse*, a reminiscent track featuring Coco rapping to a slow keyboard and samples of birds chirping. This was one of the hits of the evening, as it perhaps reproduced best the particular fusion of the classical and the postmodern which CocoRosie represent. The lyrics are slightly grotesque, the beats fuzzy and fragmented, but somehow it is beautiful high theatre, something more transcendent and artistic than much of what is currently being produced.

They followed with another louder, quicker song from *Grey Oceans* and then segued back to *Ghosthorse* with "Rainbowarriors," a haunting, liminal work with Rosie setting a gaunt tone with an initial vocal line followed by Coco's faster chattering. Again the contrast between Rosie's theatricality and Coco's modern angst and attitude make the song.

Last in the initial set came another piece from *Grey Oceans*, the protracted, high-energy "Lemonade." The entire band was vivacious and involved on this track, as the song seemed to grow legs of its own and transitioned into a flowing, arcing track, topping off the set with an extended synth solo.

The group then took a bit of a breather and came back for a two song encore, featuring "Beautiful Boyz," from *Noah's Ark* and then a song from *Grey Oceans*.

While CocoRosie's live set felt markedly different from what some fans may have come to know them as, it was still high performance art. *Grey Oceans* is a departure from some of their gloomier, more baroque work, and perhaps their live sets have evolved with the trajectory of their recordings. One thing is for sure: CocoRosie write some incredibly nuanced, intricate material and find a way to make it compelling and astonishing to watch reproduced live.

Sam Butterfield can be reached at sbutterfield@dailycollegian.com.

This past Thursday, female freak-folk duo CocoRosie played Pearl Street, performing material from their latest release, "Grey Oceans."

Local Creperie a sweet success

By Acacia DiCiaccio
Collegian Correspondent

University of Massachusetts alumni Greg Varypatakis wasted no time starting his business after he graduated in May. Beginning renovations while he was still in school, he was able to open Amherst Creperie only a month after graduation.

Varypatakis grew up knowing restaurants, working in his family's Greek restaurant most of his life. After just one visit to the Creperie, his knowledge of the business is easily detected. This adorable little French-style bistro offers the students and residents of Amherst a tasty and affordable eatery, centrally located in Amherst.

Located on North Pleasant Street, this restaurant appeases all types of cravings. The Amherst Creperie offers a variety of both sweet and savory crepes. With fast-food counter style ordering and a friendly wait staff that brings the food to your table, it is a great place for a casual dinner date.

The wide variety of savory crepes ranges from meat to vegetarian, and all savory crepes include a small side salad served with a smooth balsamic vinaigrette. If the date goes well and you want to order some dessert, your trek will be no further than back to the counter, where you can order from a variety of sweet crepes or a selection of gelatos and smoothies.

The Creperie also serves omelets and breakfast sandwiches, so it is also the place to go if you need a boost before class. The Amherst Creperie is open daily from 9 a.m. to 11 p.m., so it's even a perfect go-to for late night cravings. The free Wi-Fi also allows students a cozy environment to do homework.

If the description of the menu hasn't already caught your eye, just take a look at the prices. Crepes range from $2.95 to $6.25, and their 99 cent coffee is both quality-made and affordable. Varypatakis knows just what it's like to be a starving UMass student, so the prices remain low to draw college kids in.

You can also alter your crepe any way you want; as long as they have the ingredients they will make it. I created my own dessert crepe when I ordered the D'Amour (made with peanut butter, Hershey's syrup, and whipped cream) and I asked them to add strawberries. If your mouth isn't already watering just thinking about that, believe me when I say it tasted absolutely heavenly.

The most popular of the Creperie's dessert crepes is the Anna, which is made with strawberries, whipped cream, and a choice of Hershey's chocolate syrup or Nutella.

The employees of the Amherst Creperie seem to all have the same friendly, upbeat attitude, and they make their jobs appear enjoyable. Varypatakis himself works at the restaurant all the time, and if you have the chance to meet him you will quickly realize how personable he is.

It is no wonder why only three months after opening, the Amherst Creperie's business is already booming. With one trip to 19 North Pleasant Street you can see for yourself why this little restaurant is already becoming a distinguished eatery in Amherst.

Acacia DiCiaccio can be reached at adiciacc@student.umass.edu

COURTESY FACEBOOK.COM

Amherst Creperie, founded by UMass Amherst alum Greg Varypatakis, caters to a variety of tastes and remains affordable to the average college student with crepes starting at just $2.95.

Tobacco combines sights, sounds

TOBACCO from page 5

audience's energy in less musical ways by taking a few aggressive dance laps amongst the audience.

When Tobacco finally took the stage, the first thing he did was pass up the opportunity to wear a mask fashioned to look like a basketball with sunglasses and bad teeth. It lay neglected atop his equipment for the duration of the set. Luckily, it reappeared within seconds of his first song, which was accompanied with the infamous visuals of the "pterodactyl porn" video clip.

A poorly cropped image of Tobacco's basketball mask hovered menacingly over at least one set of dinosaur genitalia. The surreal smut theme continued throughout his performance, with raunchy appearances by E.T. and a screaming, bloody-faced woman.

Aside from murder-porn, Tobacco also played music Thursday night. That is to say, he spoke into his vocoder, played an occasional note on the guitar (which was connected to the vocoder, Frampton-style), and carefully monitored his Macbook, which played music.

He also managed to twiddle out a few synthesizer lines ably and effectively. Most of the instrumental work being done on stage, however, was carried out by his Black Moth Super Rainbow band-mate. The Seven Fields of Aphelion on keyboards. They were also joined by Dreamend for a few songs later in the set.

The performance was relatively sterile, but the music was sufficiently danceable, dripping with Tobacco's signature funky garbage juice. That, coupled with some incredibly distracting images on display and a healthy dose of MDMA pumping through much of the audience, made Tobacco and Aphelion's lack of movement mostly forgivable.

The set included songs from both "I***ed Up Friends" and "Maniac Meat," but since the albums are nearly indistinguishable from one another, it all flowed smoothly together. Standout tracks included a big, fat, stomping rendition of "Tick the Witch," the meandering "Backwoods Altar," and the anthemic "Heavy Makeup."

The bass was a little underwhelming for an electronic music concert, and the epic synth-siren hook from "Constellation Dirtbike Head" was almost inaudible, but for the most part, Tobacco translated his obsessive, heavily effected studio sound to the stage with (very disinterested) grace and ease.

If he were only wearing the basketball face, it might have been everything we could have hoped for.

Garth Brody can be reached at gbrody@student.umass.edu

Boots are wardrobe necessity

BOOTS from page 5

And the gunmetal side zipper detail on the Linderr, at $149.95, "is just the right amount of heavy metal for a delicate dress."

Perhaps the hottest trend is over-the-knee boots, which are not to be missed, fashion experts say. They come in various incarnations, from flat or low heels to super high stilettos.

But the one must-have boot that every woman should own is a knee-high boot, said Andrews of Nordstrom.

"If you only own one boot, it should be a mid-length boot on a mid- to high-heel," he said. You can tuck jeans into it and wear it with skirts and dresses.

In fact, don't worry that boots won't look right with your wardrobe. The fashion gurus say you can wear boots this fall with everything. Even shorts. You can take a combat-style lace-up boot and team it with a lacy dress.

"One of the biggest trends is to take a very casual or flat boot and wear it with a dress," Andrews said. "It's that juxtaposition, of wearing a winter floral with a rugged boot."

Minutewomen dropped twice in Michigan

Napoli beats former team, OU scores goal late to down UM

By Michael Counos
Collegian Staff

The Massachusetts women's soccer team traveled to Ann Arbor last Friday to face Michigan in the newly unveiled UM Stadium.

However, The Minutewomen fell 5-0 to the Wolverines, and then lost to Oakland, 3-2, on Sunday, putting their record at 3-4-0 on the season.

Michigan took its first stab at the Maroon and White defense in the 35th minute. Nkem Ezurike sent a shot from 20 yards out into the far right-hand side of the net, off a throw-in by Amanda Bowery.

The UMass offense didn't threaten the Wolverine defense until the 57th minute when senior Therese Smith ringed a shot off the crossbar from just inside the 18-yard box. Just under two minutes later, Ezurike distributed the ball to Kayla Mannino with a lead pass. Mannino sprinted forward for the breakaway goal with a dribbler that snuck inside the far post.

With the deficit at two to begin the second half, the Minutewomen looked to push the tempo and get back in the game. Michigan did not let up, however, as it tacked on three more goals. Ezurike struck once again with her second goal of the game at 62:33. Meghan Toohey stole the ball at the midfield, then proceeded with a pass to Ezurike, who hit a strike from the top of the 18-yard box.

The suffering continued for UMass when Tori McComb scored off her own rebound in the 64th minute. With the game out of reach, Courtney Mercier put the icing on the cake for the Wolverines with a goal in the 87th minute. Shelby Chambers-Garcia sent a well-placed corner kick to Bowery who tipped it into the box where Mercier headed it in.

Oakland 3
UMass 2
Michigan 5
UMass 0

The Maroon and White never got it going on the offensive side of the ball as it was outshot, 20-4, by the Wolverines and only had one shot in the first half. They also held a 5-1 advantage in corner kicks over UMass, while the Minutewomen had two shots on goal produced by junior Meghan Collins and freshman Lauren Skesavage.

The Wolverines improved to 4-1-2 on the season. The win may have been a little bittersweet for Michigan coach Angela Napoli, as she enjoyed seeing many familiar faces from her team of a year ago as the Minutewomen coach of 2009.

Michigan goaltender Haley Kopmeyer had two saves in the shutout, while Emily Cota had six in the losing effort.

On Sunday, UMass had a much easier time getting on the board, but struggled to hold off the Oakland University Golden Grizzlies.

Oakland scored its first goal of the game almost nine minutes into the match when Dani Haelewyn converted from 20 yards out off a pass from Julianne Boyle. The midfielder finished the game as the team leader in shots (four).

The Minutewomen came right back later in the half with a goal from junior Deanna Colarossi, who scored her fourth of the season.

More action picked up in the second half when Sarah Lynch received a through pass from Shannon Doyle to put her team up 2-1. About 16 minutes later, senior Therese Smith retied the game after Cota booted a goal kick to freshman Jen Houtmann, who headed the ball to Smith.

Cota registered three saves in the game, but it was not enough to stop Oakland from scoring. OU narrowly outshot the Minutewomen, 17-16, but it was the last shot that made the difference in the contest.

Nicole DeLuca scored on a pass from Lynch after going around the right corner of the net from 20 yards out and tallied the game-winner.

The Golden Grizzlies improve their record to 3-4-1 on the season. Their goalkeeper, Shannon Coley, finished with six saves.

Michael Counos can be reached at mcounos@student.umass.edu

Senior Kelsey Anderson kicks the ball towards the offense during a game last year. The Minutewomen are currently on a two-game losing streak after their matches against Michigan and Oakland.

COURTESY PENN STATE ATHLETICS

Christine Nairn dribbles the ball past a defender during Penn State's 5-1 win over Bucknell on Sept. 15.

Injury not changing play from Hovington

Penn State Daily Collegian
Via College News Network

The timing was going to cut it close, but Erica Walsh knew that.

There was no way the Penn State U. women's soccer coach was going to pass up having Bri Hovington's skills in her lineup.

Through the last three games, the freshman defender has made an impression on the Nittany Lions back line as a reserve with her speed and communication. And Hovington might not be just a sub much longer.

"[She's] composed, has good pace. She's a great communicator," Walsh said. "That's why we recruited her, we thought her communication was excellent. She's coming into her own."

Hovington came into the season in the final stages of recovery from an anterior cruciate ligament (ACL) tear.

The coaches knew there was a chance the freshman wouldn't be ready to start the season but also expected a quick impact once the she was ready.

While the defense typically sees very few subs, Hovington's talents are too good to keep her off the field. The defender played in the team's Blue/White scrimmage on Aug. 22, but didn't make her regular season debut until the Aug 29 loss to William & Mary.

After she got her bulky ACL brace off in the preseason, Hovington said she injured her right patellar tendon in a tackle with Maya Hayes. Despite that, and another, smaller brace she had to wear for a few days, the freshman hasn't been hesitant since returning.

"I'm not afraid going into tackles because I've always heard if you're afraid going into tackles, you're going to get hurt again," Hovington said. "I'm excited to be back out here and it's a great feeling."

For some freshmen, coming into an established team can take some getting used to but for Hovington, fitting into the Nittany Lions back line didn't take long. Walsh said the defender easily adjusted in training and quickly started talking.

Having established defenders in senior Megan Monroig, junior Emma Thomson and sophomore Lexi Marton helped. Hovington said she's been learning a lot from practicing with Monroig and Thomson, the starting outside backs.

"She's working hard, she's very in tune to listening and learning," Monroig said. 'She asks questions all the time because she wants to be the best she can be in that position. When she comes in she works hard, gets a tackle in when she needs to."

Monroig said Hovington works well with all of the defenders and never gives up on a play. With her speed, the freshman can get up in the attack but can also track back to defend easily.

Hovington said she hasn't lost any of her speed coming off the injury and pointed to a play against Connecticut on Sunday where she and Monroig were able to [illegible] down and stop a 2-on-2 [illegible] counterattack.

Combining with Monroig and centre back Carly Nuness, the Lions have a quick back line, a benefit that Walsh enjoys having.

"It gives you a lot of confidence," Walsh said. "But can mark players down, it's actually his strength. Now that she's a bit more patient with her defending I think she's really going to come on here."

With games this weekend against Washington and No. 4 Portland, Walsh said Hovington could crack the starting line-up depending on the match-up. Whatever her role is this weekend, Hovington is happy to be back and contributing for her team.

"I've been looking forward to being out here with Penn State since I was a sophomore in high school," Hovington said.

"To finally get back out here, it was an amazing feeling, absolutely indescribable. I love it out here."

Arkansas survives vs. Georgia

The Arkansas Traveler
Via College News Network

No. 12 Arkansas beat Georgia 31-24 at Sanford Stadium in Athens, Ga. on Saturday.

Junior quarterback Ryan Mallett got his first Southeastern Conference road win, throwing for over 300 yards for the second game in a row. Mallett finished the game 21-33 for 380 yards and three touchdowns. He had been 0-4 against the SEC on the road.

"This is a really surreal feeling," Mallett said. "It's something I've never experienced before."

Mallett's first touchdown pass of the day, a 57-yard pass to sophomore tight end Chris Gragg, came with 12:27 left in the first quarter. The grab was Gragg's first catch of the day and first of the season.

The Bulldogs answered right back when freshman quarterback Aaron Murray scored from the one-yard line with 7:49 left in the first.

Georgia's next punt was returned by junior wide receiver Joe Adams for a touchdown, but a block-in-the-back penalty nullified the score.

The drive did end up in points however.

Sophomore running back Knile Davis' one-yard touchdown run capped a seven play, 71-yard drive run, putting Arkansas up 14-7.

Arkansas' last drive of the half also ended with points.

Freshman Zach Hocker's field goal with four seconds left put the Hogs up 17-7.

Coming out of halftime, Arkansas kept rolling when Murray was intercepted by junior Tramain Thomas at Georgia's 44-yard line on the first play from scrimmage.

But Arkansas was unable to take advantage of the short field. Mallett quick-kicked into Georgia's end zone for a touchback.

Three drives later, junior kicker Blair Walsh's 43-yard field goal with 2:44 left in the third made the score 17-10.

The Hogs scored on their next possession when Mallett connected with sophomore running back Ronnie Wingo for a 22-yard touchdown pass with eight seconds left in the third quarter, making it 24-10 Arkansas.

The drive was kept alive by an Adams' 34-yard screen pass on third-and-eight. Adams finished the game six catches for 130 yards.

"I thought we did real well in the third quarter," head coach Bobby Petrino said. "When they scored, we responded by scoring as well."

Georgia scored on back-to-back drives in the fourth quarter to tie the game.

The first score, a 10-yard touchdown catch by sophomore wide receiver Tavarres King, came with 7:52 left, and then with 3:55 left, sophomore running back Washaun Ealey's three-yard touchdown run tied the game 24-24.

"It was a hard football game," Petrino said. "They came back in the second half."

Both teams then traded punts, and Arkansas took over at its own 27-yard line with 47 seconds left.

The offense marched 73 yards in three plays to pull ahead 31-24. Senior tight end D.J. Williams caught Mallett's first two passes for 33 yards, then junior wide receiver Greg Childs caught the touchdown a 40-yard strike with 15 seconds left in the game.

"We were able to execute our two-minute offense and score to win the game," Petrino said.

Murray's Hail Mary with five seconds left fell incomplete in the end zone.

"This has got to be one of the greatest moments I've felt since I've played the game of football," Mallett said. "It so rarely comes down to the wire like this. It's sometimes gone the other way for us, but now I know how it feels to get the win."

Arkansas is 3-0 overall and 1-0 in conference play. Their second conference game is Saturday when no. 1 Alabama travels to Fayetteville.

"It's going to be loud in Fayetteville next week," Adams said. "We're going to come with our best game."

The last play of the game was broken up by Arkansas safety Tramain Thomas and fell just out of reach of Georgia tight end Aron White (81). Arkansas topped Georgia, 31-24.

Havens finishes with 2 touchdowns in loss

FOOTBALL from page 10

down," Morris said. "So certainly it affected the game but we had our shots in the second half and weren't able to overcome it."

The Minutemen never led again as the Wolverines tacked on two more touchdowns in the third quarter to make it 28 unanswered points. After falling into an 18-point hole on two occasions in the second half, however, UMass clawed its way back into the contest with a late surge.

With 5:15 remaining in the game, Havens found wide receiver Julian Talley for a 5-yard score to cut the deficit to 42-30. After a failed two-point conversion, the Minutemen special teams blocked a Will Hagerup punt to take over in Michigan territory.

Havens found tight end Andrew Krevis for his second touchdown of the day on a 7-yard pass to reduce the Wolverines' lead to 42-37. With 2:05 remaining and only one timeout at its disposal, UMass went for an onside kick with the hopes of getting another chance to pull off the upset. But the onside attempt by kicker Caleb Violette went out of bounds to give the possession to the Wolverines, who picked up a first down to run out the clock.

With the win, Michigan hands the Minutemen their first loss of the season as they move to 2-1.

UMass looks to rebound when it returns to action next week at Stony Brook at 6 p.m. on Saturday.

Jay Asser can be reached at jasser@student.umass.edu

Jonathan Hernandez dodges the Michigan defense during UMass' loss to the Wolverines on Saturday.

Shaw reaches career-high in rushing yards

BIG PLAYS from page 10

"They certainly emphasized that we had started zone play and gave the ball to the back," Morris said. "I guess the one thing we can take away is that we held Robinson to only about 350 yards, if that's a bonus. I don't know if it is."

Michigan rushed for 284 yards, including 80 in the first half. The Minutemen defense allowed 15 points per game and over 76 yards rushing in their first two games. Through the first two quarters against the Wolverines, they exceeded their season averages.

Although Robinson finished with more attempts, starting tailback Michael Shaw compiled more yards rushing. Shaw ended the game with a career-high 126 yards and three touchdowns on 12 carries.

"[Shaw's] a talented guy," Rodriguez said. "I thought he used his vision well today. He's got good feel. He's probably the biggest home run hitter that we have from the tailback position."

Shaw, a junior, is a two-year letterman with 460 yards rushing and three touchdowns in 21 career games at Michigan. His performance against UMass eclipsed his previous career high of 73 yards against Delaware on Oct. 17, 2009.

In fact, his total rushing yards on Saturday more than doubled his season total through two games of 60 yards (3.0 yards per carry).

After the game, Rodriguez suggested that Shaw's success was due to the Minutemen defensive scheme, and Shaw agreed.

"Offensively, we gotta take what they give us," Rodriguez said. "The first couple games, they were concentrated on plugging the wholes and giving Dénard a chance to run. We didn't run him as much, we didn't have to.

"We had an idea that [UMass] was going to try to contain Denard, but we also thought that Notre Dame would try to contain him last week," Shaw said.

"[Denard] told me on the sideline, mid second quarter that he was going to start giving the ball up a lot more because the reads were changing. I guess UMass got the memo and they tried to hone in on his speed and that allowed things to open up for me today," he added.

UMass averaged over nine plays per scoring drive. Its longest drive of the day was a 15-play, 70-yard drive taking 7:31 which cut the lead to 11 with 13:47 left in the game.

On the first play of the ensuing drive, Shaw ran for 50 yards on the next play to set up another Wolverine touchdown. That drive lasted 1:50.

Two touchdown drives in the first half combined to take 35 seconds of clock. Michigan had six scoring drives in the game, none of which exceeded four minutes.

Dan Gigliotti can be reached at dgiglio@student.umass.edu.

IU scorers too much to handle

M. SOCCER from page 10

make a good save, he'll make a good save, and we're keeping an eye on each other. At the end of the day, though, I have the utmost respect for him and he has the utmost respect for me. Obviously I want to play and he wants to play and that's what makes it good."

Following their victory, the Minutemen couldn't help but look towards hosting No. 24-ranked Indiana on Sunday.

"This first win means a lot," Cleverdon added, hoping the energy would carry over to Sunday's match against the Hoosiers. "It wasn't by any means a great win and I thought we could have played a much better game."

The energy seemed to carry over, but UMass could not overcome tough bounces and Indiana's top players as the Minutemen dropped a 2-1 decision on Sunday.

The first half was evenly-played without many scoring opportunities for either team. Indiana's Will Bruin opened the scoring during the 50th minute when he netted his team-leading fifth goal of the year – a low shot from 15 yards out to beat UMass goalkeeper Chris Piekos to the left post.

UMass freshman forward Hellah Sidibe scored his first goal in the 56th minute, which tied the score at one. Sidibe passed one defender along the right goal line and dribbled towards the goal before striking a left-footed, off-angle shot in between IU goalkeeper Luis Soffner and the right post.

"It's pretty exciting [to score my first goal] but it really doesn't mean anything if we don't win," Sidibe said. "I put the team's success first and personal glory second. It was a good goal and a confidence booster but it doesn't mean anything if we don't win."

UMass had ample opportunities to score in the game, but ran into misfortune on several shots by defender Andrew Henshaw. With 4:26 remaining, Henshaw, delivering a corner kick, struck the ball towards the back post. The ball landed and was inches away from crossing the goal line before an Indiana defender kicked it away. Henshaw came up just short again with 15 seconds left when he took a shot off Arkian's pass that hit the right post.

"That was frustrating," Koch said. "Some years the ball hits the post and goes in. Right now the ball is hitting the post and bouncing out. We just have to make sure to create more chances."

Defensively, UMass played a solid game and stuck to Koch's game plan. Both of Indiana's goals came from their top scorers, Will Bruin (five goals) and Andy Adlar (four). Bruin's goal came off a breakaway – something Koch did not want to give to one of the nation's top teams.

"Bruin at the top was a handful," Koch said. I thought we handled him pretty well except for that one time [on the breakaway]."

Adlar's goal proved to be the game-winner, when he took advantage of Piekos' aggressive charge on a loose ball. Adlar reached the loose ball first and fired a shot underneath the diving Piekos into the empty net.

The Minutemen's homestand continues Wednesday, when they host Vermont at 3:30 p.m. on Rudd Field.

"One thing we have to do is keep our heads up, because we know we're a better team than any other team that comes to our field here," Sidibe said. "We can't get in our own way because it's so early in the season. We have a big game on Wednesday against Vermont so we have to look forward to that and forget about the past."

Steve Levine can be reached at slevine@student.umass.edu.

Junior Bryant Craft follows through on a kick during the game against Central Florida on Friday. The Minutemen's win came thanks to goals from freshmen Tyler Cleverdon and Brett Canepa.

Freshmen prove value during victory over Central Florida

Canepa: [My teammates] were giving me crap about scoring

By Herb Scribner
Collegian Staff

For the Massachusetts men's soccer team to earn its first win of the season, it needed two freshmen, Tyler Cleverdon and Brett Canepa, to score their first goals of their respective collegiate careers.

When UMass faced off against Central Florida on Friday afternoon, the Minutemen found themselves down early in the second half after a scoreless opening 45 minutes. The Golden Knights (2-3) stayed on top until Canepa headed the ball into the back of the net off a cross from midfielder Ben Arikian.

"I was just trying to get the ball in the back of the net," Canepa said following the game. "I saw Ben get into the end-line and I ran to the back post and put a perfect ball at my head and I was there. [I was] just trying to get the ball in [the] frame."

Immediately after earning the goal, the other players in Maroon and White rushed the field to congratulate the freshman forward.

"They were giving me crap about scoring," Canepa said. "I was just trying to put the ball into the back of the net."

Cleverdon was just as excited over Canepa's goal as he was for his own, which he netted later in the contest.

"It was a great goal, a great header. He was right where he should have been, it was a great ball in," Cleverdon said. "He did everything technically perfect, he hooked it right into the goal and it was perfect."

With the score equal going into the final minute of play, both sides were preparing for extra time to settle the score. Sophomore Morgan Brandso thought differently as he played the ball into a soaring Cleverdon, who headed a screamer into the back of the net.

"Did that really just happen?" Cleverdon said of his initial reaction to the goal. "Morgan played a great ball in and I knew I could get on the end of it and I was happy he did so well."

An elated Cleverdon scurried around the field, overjoyed by his game-winning goal. His fellow Minutemen appeared just as psyched, as they tackled him into the grass in celebration.

"It was all pretty much a blur, I mean everyone was just so happy," Cleverdon said. "I knew I was, so I didn't hear much except congrats, nice job, and get another one for next time."

Canepa didn't hold back on his admiration for Cleverdon's goal after the game.

"That was great, that was awesome," Canepa said. "I saw the cross, I knew Tyler was going to get up because he wins every ball, and he put the ball in the net and went crazy."

Against Indiana on Sunday, Cleverdon and Canepa both competed in the contest. While Cleverdon started his fifth-straight match, Canepa came on later in the game as a substitution and had a shot on goal.

While there are still freshmen who have yet to compete for the Minutemen, Cleverdon still believes that the entire group of Class of 2014 players have depth and strength.

"I'm really happy with the freshmen this year," Cleverdon said. "We have a strong group that pushes the first team very, very hard. Everyone's very competitive and playing for that starting position and it only makes our team stronger. So we have definitely a great freshman group coming off the bench and working very hard in practice."

Canepa and Cleverdon are a part of a freshman class that UMass coach Sam Koch boasts as extremely competitive and hard working. Koch claimed that the freshmen players are getting better each week at practice.

"Yeah it's awesome, we have great team chemistry," Canepa said. "I like the freshman that came in this year, it's been awesome."

Minutemen split 1st weekend home series

Koch and Co., defeat UCF, drop to Hoosiers

By Steve Levine
Collegian Staff

If the Massachusetts men's soccer team could've started off its eight-game homestand with two wins, it would have not only given the Minutemen the momentum going into the rest of their schedule, but also given coach Sam Koch the satisfaction of beating two skillfully sound teams.

Much to Koch's disappointment, his team only managed to beat one of them.

UMass (1-2-2) opened the weekend on a good note, defeating Central Florida and its high-powered offense, 2-1. The win was the first of the season for the Minutemen, who picked up goals from freshmen Brett Canepa and Tyler Cleverdon, who both scored their first collegiate goals.

After a scoreless first half, the Knights opened the scoring on Nick Robson's goal, which was set up by a long, breakaway pass on the counter-attack. However, UCF's lead lasted just 1:35 as Canepa answered right back with a header that found the back of the net.

IU	2
UMass	1
UMass	2
UCF	1

The play started with senior Chris Vaccaro, who passed to midfielder Ben Arikian on the left goal line. Arikian then sent a cross to Canepa, who found the net.

"[My first goal] means absolutely nothing," Canepa said, smiling. "I'm still the young bird on the team and we'll just see where we go from here."

The remainder of the match featured exciting back-and-forth action without a change in score. Just as the game appeared to be headed to overtime, Morgan Brandso sent a cross from the right sideline to Cleverdon, who headed in the game-winner with 41 seconds left.

"We were running down on time and I knew we needed to start playing balls in the box," Cleverdon said. "I saw the ball get popped out to the side, so I made a run and I knew Morgan was going to put it in the box. I got a head on it and it worked out perfectly."

Shane Curran-Hays started in goal for the Minutemen, stopping five of six shots en route to a victory. Curran-Hays and fellow goalkeeper Chris Piekos are currently in a platoon situation, as neither player has assumed the starting position.

"It's been going on forever and it's great competition," Curran-Hays said regarding splitting time with Piekos. "I'll

Midfielder Ben Arikian kicks the ball past an Indiana defender during Sunday's home game. The Minutemen lost to the Hoosiers, 2-1.

Michigan tops UMass despite 20 points in 4th

By Jay Asser
Collegian Staff

ANN ARBOR, Mich. – Though the Massachusetts football team was able to keep up with a tradition-rich Michigan program until the final whistle blew, it was the big plays which ultimately cost it an upset victory at the Big House on Saturday.

The Wolverines created just enough separation to hold off the Minutemen (2-1, 1-0 Colonial Athletic Association), 42-37, in front of 110,187 fans, easily breaking the record for the highest-attended UMass sporting event ever.

Quarterback Denard Robinson led the high-powered Michigan (3-0) offense with 241 yards in the air and 120 on the ground while accounting for three touchdowns. The early Heisman Trophy favorite completed just 10-of-14 passes, but connected for big plays with wide receiver Darryl Stonum, who caught three passes for 121 yards and two scores.

In the running game, it was tailback Michael Shaw who gashed the Minutemen defense to the tune of 126 yards and three touchdowns on 12 carries, an average of 10.5 yards per rush.

"In the second half, they really emphasized the inside zone play and gave the ball to the back," UMass coach Kevin Morris said after the game. "I guess one thing to take away was that we held Robinson to only about 350 yards, if that's a bonus, I don't if it is."

UMass pounded the rock as well, with its combination of tailbacks in Jonathan Hernandez and John Griffin. Hernandez got the bulk of the work, rushing for 118 yards and two scores on 26 carries, while Griffin accounted for 99 yards on 17 chances himself.

Minutemen quarterback Kyle Havens was efficient throughout the game, going 22-for-29 passing for 222 yards and two touchdowns. The senior drove the ball consistently against the Wolverines defense and made only one mistake on his first interception of the season.

Though the overwhelming expectation was that Michigan would easily take care of UMass, Havens had a strong belief in his team heading into the contest.

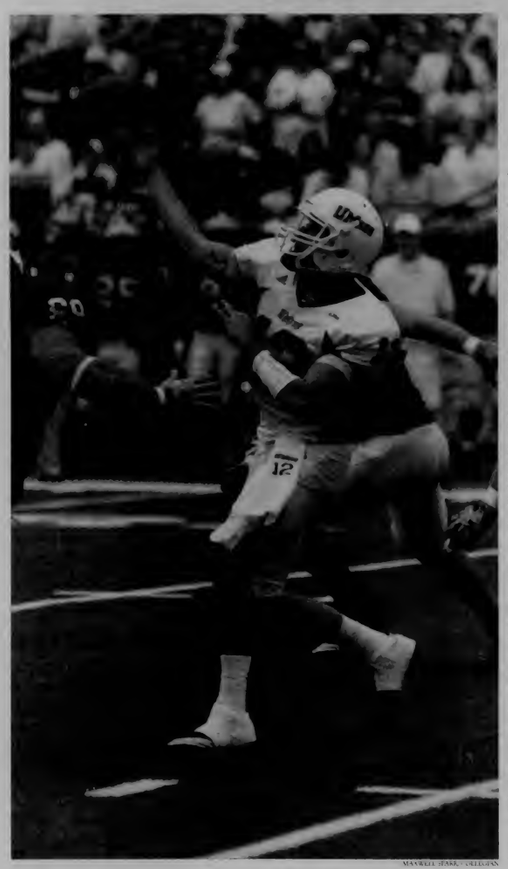
"I worked hard, we all worked hard and you don't work hard to lose," Havens said. "I don't want to lose, I know everybody thought they would come in and crush us. Never crossed my mind, I told you guys from the beginning. I thought we were going to win this game."

Despite the hostile atmosphere, UMass came out of the gate strong and seized a 17-7 lead after a 9-yard run by Hernandez with 1:17 remaining in the first half. That's when momentum shifted, as Michigan answered with a quick-strike 66-yard touchdown from Robinson to Stonum, followed by another score by Stonum after a Griffin fumble to take a 21-17 lead into the intermission.

Michigan	42
UMass	37

"That was a big swing in the game, obviously score-wise and from us potentially being in the lead at halftime to being

See FOOTBALL on page 8



Quarterback Kyle Havens attempts to throw a long pass during Saturday's game against Michigan. Despite a 20-point fourth quarter rally, the Minutemen lost, 42-37.

Big plays hinder UM's ability to stop Robinson

By Dan Gigliotti
Collegian Staff

ANN ARBOR, Mich. – As the Massachusetts football team focused its defensive efforts this weekend on tying up Michigan's "Shoelace," the Wolverines found other ways to attack.

Quarterback Denard Robinson, nicknamed for his tendency to leave his laces untied, gained 120 yards on 17 carries in Saturday's game at Ann Arbor, Mich., including one rushing touchdown. However, his passing efficiency and maturity to defer to his tailback Michael Shaw was his biggest asset.

UMass coach Kevin Morris and his staff did their best to slow down Robinson, but his presence was certainly felt as they couldn't contain the big-play ability of the Michigan offense.

"We had certain things schemed up to try and box [Robinson] in as much as possible," Morris said. "We always had to be aware of where Robinson is and so we've got to play at both ends of it and we came up short."

UMass (2-1, 1-0 Colonial Athletic Association) held the ball for over 37 minutes, nearly one full quarter more than Michigan (3-0). Despite the discrepancy in time of possession, the Wolverines used their time on offense efficiently, accruing 525 total yards on 56 plays (9.4 yards per play).

The Minutemen took a 17-7 lead with 1:17 left in the first half, after a nine-play, 78-yard drive capped off with a nine yard rushing touchdown by tailback Jonathan Hernandez.

The Wolverines then went on two scoring drives before going into the locker room, for a combined six plays and 111 yards. Their ability to strike quickly proved a detriment to UMass.

Long completions thrown by Robinson set up both scores. A 66-yard pass to junior wide receiver Darryl Stonum cut the deficit to three. Then, after a Minutemen fumble, a 36-yard completion to senior wide-receiver Junior Hemingway keyed Stonum's second touchdown of the game and a go-ahead score.

UMass allowed seven plays of 20 yards or more. Robinson was involved in five, including three throws for over 40 yards. He finished 10-of-14 for 241, two touchdowns, and one interception. Yet, his performance was not as dominant on Saturday as it was during the first two weeks of the season.

"I thought he was okay, but he wasn't as sharp as he was in the first two games," Michigan coach Rich Rodriguez said. "He was pretty sharp with his eyes and his decisions. There were probably a few that he'd like to have back. Decision-wise he was okay, just his ball-handling wasn't as sharp as it needs to be."

Morris believes that his team did well to contain Robinson, even though he ended with the most individual yards.

See BIG PLAYS on page 8

Redshirt sophomore Callie Sweigart drives to maneuver past the defense during a game last year. UMass lost both its games this weekend.

Offense limited over weekend

Minutewomen shut-out twice against American, Maryland

By Michael Wood
Collegian Staff

The No. 20 Massachusetts field hockey team dropped back-to-back games this weekend, losing 2-0 to American University on Saturday and 3-0 to Maryland on Sunday.

The first of the two matchups was a tale of two halves, dominated early on by AU. The Eagles scored two goals in the first 14 minutes of play to take a 2-0 lead and never looked back. Natalie Ellenberger tallied the first goal just three minutes into play, and Shelly Montgomery added another in the 14th minute.

AU outshot UMass, 5-0, in the first half. The Minutewomen finished the game with five shots, and didn't record a single penalty corner.

In the second half, however, UMass (3-5) held the advantage, and outshot the Eagles, 5-1, and had a 7-0 advantage in penalty corners, but couldn't find the back of the net.

Maryland	3
UMass	0
American	2
UMass	0

Goalkeeper Alesha Widdall made four saves in net. Of the five shots UMass took in the second half, only two by Katie Kelly and Makaela Potts were on goal.

The loss was a tough one for the Minutewomen, who are coming off back-to-back wins against perennial playoff opponents Connecticut and Yale.

On Sunday, the results weren't much different, as No. 2-ranked Maryland outplayed UMass and won, 3-0.

The Terrapins scored once in the first half and twice in the second half to beat the Minutewomen in convincing fashion.

The first goal came via a penalty corner 20 minutes into play when Jemma Buckley's shot got past UMass' Widdall. Megan Frazer later made the score 2-0 off another penalty corner in the second half. The last tally of the game came from defending National Player of the Year Katie O'Donnell, who scored in the 65th minute of play.

Maryland outshot the Minutewomen, 12-4, and finished with a 9-3 advantage in penalty corners. Widdall made four saves for UMass, and Potts led the team in shots, with two.

The Minutewomen will return home to face Vermont on Friday at 6 p.m. and Albany at 1 p.m. on Sunday.

Work group to examine SBS, HFA merger

Provost James Staros to chair group which will meet this fall

By Sam Butterfield
Collegian Staff

University of Massachusetts Provost James V. Staros is convening a new Provostial Working Group for the Arts, Humanities and Social Sciences to study the feasibility of merging the colleges of Humanities and Fine Arts and Social and Behavioral Sciences.

The working group, composed of the chairs of 10 departments, five from HFA and five from SBS, will meet approximately once every two weeks throughout the fall, according to Staros, who will chair the group himself.

After an initial Reorganization Committee composed of 22 members of the faculty and staff of the two colleges presented a report to then Dean of HFA Joel Martin and SBS Dean Robert Feldman last March concluding that the benefits of merging the two schools would have to greatly outweigh what that committee saw as the high cost of such a move, this year's working group will approach the potential merger with a different attitude, explained Staros.

"The committee [last year] perceived that their charge was to focus on costs, their charge was to look at the negatives," he said. "It certainly put up all of the problems without balancing it with what the advantages would be."

Staros said that he envisions a possible merger where the two schools no longer resemble their current selves, where he feels last spring's committee approached the issue believing the two colleges in their entirety needed to be preserved.

"[The report] did have embedded in it the unspoken assumption that everything we have now we need to preserve," he said, "what they were sort of saying is, if you were to merge the two, you'd need to have sort of shadow versions of existing administrative functions in the new unit," Staros explained.

This year's working group will grapple with a different set of issues, continued Staros. Rather than examining what structural and financial costs such a merger would entail, Staros' "working group" will attempt to determine a functional way to implement the administration's plan.

First proposed by Chancellor Holub in the spring of 2009, the idea to merge the two schools into one larger College of Humanities, Arts, and Social Sciences (CHASS) has gone through several examinations and faculty and staff panels, none of which have given the idea a rubber stamp. Holub and members of his administration have contended that consolidating the schools will help save on administrative overhead and will help promote cross-college interdisciplinary research and teaching.

"What I think the Chancellor and I are both interested in doing is de-siloing the campus to provide opportunities for people to work in larger units with more interplay between the units and less distinction between being in unit A, B or C, and this is one potential mechanism. It's one that people need to adopt," Staros said.

In the interim since the merger proposal, the colleges of Natural Resources and the Environment and Natural Sciences and Mathematics were merged into one larger College of Natural Sciences (CNS).

That move, some argue, has created an imbalance in amount of funding per student flowing to the respective colleges of the state university's flagship campus. As such, administrators have proposed creating a CHASS to "counterweigh" the sway of CNS.

Some faculty and staff, however, are uncomfortable with a CHASS without some element of sciences, specifically psychology.

"There's a sense I think that people have that it would have been better for a merger to have included NS, SBS and HFA into one college, an arts and sciences college, and there's some discomfort that we're sort of going with an unusual model that, if you look around the few colleges and universities that have this structure, none of them have it with psychology taken out," sociology and public policy professor Joya Misra said.

Staros was quick to point out that the move to include psychology in CNS took place before his arrival in Amherst in August 2009 from Stony Brook University in N.Y. However, he said he has been discussing with faculty and staff from numerous colleges the idea of creating individual departments which exist between colleges to promote interdisciplinary work and to allow the schools more flexibility.

"One thing I have been talking to various department chairs about is a model not currently used at UMass, but one that I'm familiar with from campuses where I've been previously," he said, "where, in certain borderline disciplines that have pieces in them that have on department in more than one college."

Staros elaborated that such a model could apply to a department like psychology.

"It's a unified department," he explained of the hypothetical structure of a cross-college department, "but some faculty have tenure in one college and some in the other."

While Staros holds that going through with the merger will help promote what administrators are calling a "binary star" model, where the two large colleges are the center of the University and other smaller departments revolve around them some members of the faculty feel that the two colleges' missions are simply different, and that rather than bolstering the schools standing a merger may ultimately hinder them.

"People have talked about it as a binary star model," said Misra, "but my sense would be that I'd actually prefer there be

Everywoman's Center receives $149K grant

By Kelly McCarthy
Collegian Staff

The Everywoman's Center at the University of Massachusetts has been awarded a state-funded grant of $149,520 over three years to continue and extend its work with teen victims of sexual assault and dating violence.

The grant was awarded by the Massachusetts Office for Victim Assistance and is segmented into annual increments of $49,840. The Massachusetts Office for Victim Assistance (MOVA) is an independent state agency which looks to increase outreach and advocacy among adolescents who have experienced sexual or dating abuse.

Recent studies show that on the national, state and local levels, teens experience the highest rates of sexual victimization in comparison to any other age group. The Everywoman's Center will attempt to utilize the incoming grant money to provide increased support to local middle and high schools.

Nina Brand, a Teen Crisis Intervention Specialist at EWC, will be offering herself as a resource to school staff and, in certain instances, taking direct referrals on cases through guidance offices. In some schools, Brand will be running support groups for teens, as well as speaking to parents and friends of victims, or referring them to counseling offered by the Everywoman's Center.

The money supplied by the grant will allow for increased advocacy for teens through EWC. Becky Longwood, the Associate Director of the Everywoman's Center said that many teens who are victimized simply don't have an adequate outlet for their needs.

"A lot of teens have experienced sexual or domestic violence but aren't getting the help they deserve," she said.

Longwood went on to point out that teens do not have the type of freedoms that adults have, even in transportation and that, "A lot of teens are very reluctant to talk to family members about the violence that they have experienced."

This lack of understanding felt by many victimized teens often leads to dire consequences, Longwood said.

UM prof looks at lunar conditions with NASA

By Michelle Altman
Collegian Correspondent

"We have to understand the planet in order to colonize the moon or Mars, and that means geology," explained University of Massachusetts assistant professor of geology Christopher Condit.

Along with over 100 scientists, geologists and NASA astronauts-in-training, Condit ventured to the middle of a high desert plateau in Arizona from Aug. 31 to Sept. 15. Condit participated in NASA's Desert RATS, or Research and Technology Studies program, which focuses on testing current and novel equipment and procedures in a volcanic field about 40 miles north of Flagstaff, Ariz.

This is NASA's 13th summer employing the DRATS program.

"[Desert RATS] is a way to test techniques, procedures and equipment in a way that models another planet, while having the safety of [the] earth and the ability to fix or add on to these problems," said NASA spokesman Michael Brakus.

"Situated in the middle of a volcanic field in the Arizona desert, DRATS effortlessly mimics the terrain and volcanism of target destinations in space, allowing scientists to see if a highly complex machine or tool can perform correctly in a situation like that of the moon or Mars," Brakus explained.

"If a Habitat Demonstration Unit Pressurized Excursion Module fails on the moon it could mean death, but if it happens on earth you can always just fix her on up and call it a day," he said. "Not only does DRATS help NASA know what they need to fix, but also what they need to invent. Maybe it's 'a different space suit that supplies oxygen more efficiently,' or, 'different kinds of tools,' that astronauts might need."

Condit said his work on DRATS was engaging and exciting.

"It gives me goose bumps, it was so cool," Condit said.

This year DRATS dragged along 150 people, 50 of whom were volunteer scientists, and, of those 50, 35 were under the age of 35, with 20 females on board. Participants would work rough-

UMass ranked 56 in world in new Times of London survey

If you attend or are affiliated with any of the campuses of the University of Massachusetts system, you are a part of the No. 56-ranked university in the world, according to the Times of London.

UMass is the only public university in New England to make the list, and joins such selective company in a highly competitive academic region as Harvard, Yale, MIT, Tufts and Brown.

The University ranked No. 14 out of all American public universities, and checked in at No. 33 of all universities in the U.S.

In a statement last week, Chancellor Robert Holub said the recognition reflects a worldwide understanding of the volume and quality of UMass' research, as well as of its other academic offerings.

"The Times of London ranking reflects an international appreciation for the outstanding research and teaching that occur every day at UMass, and as the University's flagship campus in Amherst, we're proud to play a vital role in earning such recognition for the Commonwealth," Holub said.

Massachusetts Secretary of Education Paul Reville also marked the accolade with a laudatory statement.

"This is well-deserved recognition for the students, faculty, alumni and leadership at UMass," he said. "The access to high quality academic instruction from world class faculty has long prepared UMass students for success."

The World University Rankings were based on scores in five categories: teaching and a school's learning environment, the volume, income and reputation of a school's research, the international demography of a school's faculty and student body and innovation in bringing income into the school.

The top five universities on the list were all in the United States. They included Harvard, Cal Tech, MIT, Stanford and Princeton. The next two schools, Cambridge and Oxford, represented the United Kingdom, followed by UC Berkeley, Imperial College London, and Yale.

University physicist studies sound waves emanating in space

By Lucia Panasci
Collegian Staff

UM physicist Laura Cadonati has received a grant to study sound

Laura Cadonati, a physicist here at the University of Massachusetts has recently received a $700,000 five-year grant from the National Science Foundation (NSF) to head a group of about 40 researchers from around the globe in the research of gravitational waves.

This group is only a sub-group of an 800-person scientific collaboration, with researchers hailing from the United Kingdom, China, Australia and even from Amherst. Cadonati's research team includes seven UMass graduate and undergraduate students within her group of 40.

The idea of gravitational waves was first proposed by Albert Einstein as a theoretical concept, and until now very little concrete evidence or information has been gathered on the subject. Detection of such waves is challenging, and the majority of it has been accomplished at the Laser Interferometer Gravitational Observatory or LIGO, which has two locations – one in Livingston, La., and one in Hanford, Wash.

The research of Cadonati's team is currently in its first phase at LIGO, before it stops next month to transition into Advanced LIGO. It requires hardware changes in the equipment used to detect the gravitational waves that would maximize the detection of the waves, possibly ten-fold. The Advanced LIGO phase is to continue through the year 2014.

In an Aug. 19 release, Cadonati explained the value of studying these waves of sound, some of which have been emanating throughout the universe since the big bang.

"These tiny ripples in the fabric of space-time carry information from the most catastrophic and mysterious events in our universe, such as supernova explosions, the collision of black holes and the big bang," Cadonati said. "This is an entirely new exploration for the astrophysics community; no one has ever measured these waves before, and it is really daunting."

Today, knowledge of the universe comes primarily from electromagnetic waves. Gravitational waves may hold the key to unlocking many mysteries of the universe, such as questions concerning black holes and supernovas, as well as receiving information from inside the stars themselves.

To this point, man's understanding of gravitational waves comes only indirectly, but also hails back to Amherst. In 1974, UMass physicists Russell Hulse and Joseph Taylor Jr. discovered a new type of pulsar, which the Nobel Committee that year stated "opened up new possibilities for the study of gravitation."

Cadonati hopes this long-term research will give scientists another tool in their understanding of astrophysical occurrences.

"It's as revolutionary as giving ears to someone who until now had only eyes with which to perceive the world," she explained in the Aug. 19 release.

What's in an envelope? Perhaps an enrollment

By Sam Hayes
Collegian Staff

It's the spring of your senior year of high school, and you come home every day eagerly awaiting that coveted acceptance letter from your top choice school. You visualize the bold letterhead with your school's logo on it, plan out in your head how you will tear open the manila and know your fate.

One college is seeking to exploit this paradigm to bolster enrollment, and it's using a rather unique, innovative method to make prospective students feel like it values them. The University of Dayton, in Dayton, Ohio has begun sending accepted students' admission letters using UPS and DHL express envelopes. The theory goes, according to a Sept. 10 article in the online college news magazine Inside Higher Ed, that students will feel valued by the school and therefore be more likely to enroll.

"We are saying you are not going to be junk mail to us," said University of Dayton Vice President of Enrollment Management Sundar Kumarasay in the article, "We're sending a message that you are important."

The university does not pay for priority mailing, the letters are sent through the United States Postal Service, but the envelopes are made to look just like UPS and DHL envelopes, with help and contracts from the two companies.

The Roman Catholic Liberal Arts University accepted 300 more students than it expected for this year's class, with 2,065 freshmen, and it has seen a rise in student visits and applications. Kumarasay gives the envelopes credit for enticing new students, but gives the university's programs and education credit for enrolling them.

The added cost of licensing fees for using UPS and DHL are not much in end, because although tens of thousands of letters are still sent out, the envelopes have increased Internet usage by stirring interest, explained Kumarasay.

One recent Dayton enrollee was not sold, however.

"I think the whole thing's a little cheesy," said University of Dayton freshman Shannon Lees. "They seem full of themselves, [Dayton] isn't Harvard."

The international studies major and Chicago native said Dayton is a "family school," with a lot of legacy students, and that she thinks "they would appreciate [the envelopes] more," than her.

Lees received a certificate with her acceptance letter, something she could "hang on the mantle," but she says she would rather just a plain letter, something classic and not a gimmick.

Patrick Callahan, a University of Massachusetts spokesman, said the flagship campus of the UMass system will not be looking to a Dayton-style model to attract students.

"We don't do anything like what Dayton is doing," said Callahan, "we don't have any plans to do so in the future."

Although UMass does not use or plan to use an envelope gimmick to increase campus interest, the school's admissions officers are not complete strangers to plans such as Dayton's.

In a Sept. 5 Boston Globe article, UMass Amherst Chancellor Robert Holub said that UMass sends out certificates for financial aid scholarships, calling the strategy a "marketing tool."

"Instead of just saying, 'You have a $6,000 scholarship as part of your financial aid package,' we say 'Congratulations! You've been awarded a Chancellor's Scholarship for $6,000, and you get a certificate to hang on your wall,'" said Holub in the piece.

Sam Hayes can be reached at sdhayes@student.umass.edu.

The University of Dayton is sending accepted students mail in UPS and DHL envelopes to make them feel more valued by the school. UMass, according to a spokesman, has no such plans.

New group will study consolidation proposal

PROVOST from page 1

two deans counter-weighing the natural sciences feed."

Were SBS and HFA to become a CHASS, the new college would likely have one dean, with numerous administrative assistants helping meet faculty within the new school's needs.

Last March's report, however, cautions that such a load on one dean, especially in the early going, could simply be too much. The Reorganization Committee noted that the dean would not only need to oversee the functioning of the school and tend to faculty morale, but would also be tasked with meeting potential donors, rebranding the college, determining new administrative roles, faculty course loads, and a host of other responsibilities.

Staros, however, is confident that these challenges can be overcome.

"That's part of the role of this working group that I've just convened," he said of determining how a smooth transition could be assured, "to look at what one will do to make this as smooth as possible and have least disruption on individual faculty lives."

Staros said that while members of the faculty and Faculty Senate are aware of the working group's existence, "this is an ad hoc working group," meaning he was not planning to announce publicly the group's work.

Feldman summed up some of the costs and benefits of a hypothetical merger.

"I'm certain there would be increased opportunities for interdisciplinary work," he said. "By bringing faculty and students together in the same college, I think there are opportunities that could arise for interdisciplinary work and interdisciplinary classes, a cross-pollination of the disciplines that might not occur if the merger didn't happen." Feldman also noted that a merger would help mitigate the clout of CNS.

"Because of the merger into the CNS we have a situation with one extremely large college and other colleges which are considerably smaller," he explained, "and I think that provides the opportunity for CNS to be unduly influential on campus." Feldman dsagreed, however, that consolidating the schools would create savings.

"I don't think we'd see any kind of immediate economic savings," he said.

New interim dean of HFA Julie Hayes did not return calls for comment for this story.

The chairs of the Provost's new working group will be Elizabeth Chilton, Department Chair of Anthropology, and John Kingston in the linguistics department. The working group will meet throughout the fall. Stay with the Collegian for continuing coverage of this process.

Sam Butterfield can be reached at sbutterfield@dailycollegian.com.

Geology prof helps out with space simulations

DRATS from page 1

ly a 12-hour day, and get four to five hours of sleep per night.

This year the RATS tested out Space Exploration Vehicles, or rovers, Habitat Demonstration Units, an enclosed lab to which the rovers could dock which allow for testing samples, the ATHLETE, a six-legged vehicle reminiscent of a spider, which serves as a sort of forklift for astronauts and the Portable Communication Terminal Concept, a communication device which the astronauts and geologists use to relay messages back to Earth (or a separate location in space).

This year's DRATS did not include space suit testing. Instead the astronauts-in-training would carry backpacks with cameras attached to them, while in past summers perfecting the spacesuit was a huge part of the mission. However, that did not leave this summer's RATS with nothing to do; as communication was this year's spacesuit. Many of the glitches and attention of this summer's trip focused on forms of communication: Video and picture sending, surveyor problems, time delays, bandwidth overloads and many simulations.

"When it works, it works beautifully and it's exhilarating, you feel like you're right on their back, looking over their shoulder, but it's frustrating when it doesn't work," Condit said of the DRATS trials.

During the first six days of the program, Condit and another volunteer scientist would accompany an astronaut and a geologist-in-training on their Extra Vehicular Activities, or EVAs. The four "would make three EVAS, simulating a rock collecting mission. These usually lasted 34 minutes on average, although one lasted two hours," Condit recounted.

Specifically, the astronaut and geologist-in-training practice their skills while Condit and his partner evaluate the team's work.

"I was supposed to be like a fly on the wall," Condit said.

For the next three days, he was the image acquisition advisor on the Tactile Science Operations team, and for the last three nights Condit was a part of the Strategic Science Operations Team. Working from 8 p.m. until 2 a.m., "[the SSOT would] evaluate what science came in," described Condit, "digest it, and figure out what results [we] had, and what changes to traverse plans" needed to be made.

Condit said the DRATS program could prove valuable for exploring the moon, and that, while NASA cannot know until it actually does more exploration, these simulations could ultimately help man find water on the moon. Condit said the moon's two rotational poles might contain water deposited from a comet, and that researchers would like to examine whether there would be sufficient reserves to power a lunar settlement.

"We hope there is enough water to sustain settlements," he stated.

"We need to have that go spirit, to do, and to explore," Condit emphasized, stressing that, as humans, we have an obligation to "keep the exploration spirit alive."

Michelle Altman can be reached at maltman@student.umass.edu

NASA conducts its DRATS program in the San Francisco Volcanic Field, about 40 miles north of the city of Flagstaff, Ariz. UMass professor Christopher Condit took part in DRATS this summer.

EWC receives grant to aid teen abuse victims

EWC from page 1

"When a teen has been in an abusive relationship or been sexually assaulted, they are at risk to develop more destructive health issues." These issues may include eating disorders, depression and anxiety, she explained.

A study conducted by the Hampshire Educational Collaborative in 2009 surveyed 3,439 students in five area schools. Of these students, 9.7 percent reported physical abuse by a dating partner and 8.5 percent reported having sexual contact against their will.

The grant provided by the Mass Office of Victim Assistance will seeks to allow EWC to offer approximately 90 adolescents and their family members free crisis intervention, group counseling, advocacy and support in accessing community resources.

The Everywoman's Center will continue its Pioneer Valley Youth Clothesline Project, which is a collaborative effort with the YWCA of Western Massachusetts to raise awareness about the impact of violence on teens. Students who have experienced or witnessed sexual or domestic violence paint their stories on a t-shirt, which is displayed for other teens and adults to see.

Longwood spoke of the Clothesline Project's ability to impress school staff, noting that once an opportunity for teens to share their story is presented, many who have held their trauma close to themselves come forward.

"It's amazing how many young people will come forward and tell their story. People think that things like this don't happen in our nice little towns of Hadley or Amherst, or anywhere, but we've never gone into a school and not had at least 30 students come forward and make a shirt," she said.

The Everywoman's Center offers UMass students a number of volunteer opportunities. Students may complete a 60-hour training program offered by EWC to become rape crisis counselors or violence prevention educators on campus.

Longwood said the Center is inclusive and welcoming to all different identity types, and that people of all shapes and sizes experience victimization.

"Everywoman's Center is open to people of all gender identities," she said. "We work with a fair amount of men who are worried about a friend experiencing sexual abuse, or who are themselves experiencing an abusive relationship."

THE MASSACHUSETTS DAILY COLLEGIAN

EDITORIAL OPINION

TUESDAY, SEPTEMBER 21, 2010

"If we don't believe in free expression for people we despise, we don't believe in it at all." Noam Chomsky

EDITORIAL@DAILYCOLLEGIAN.COM

In remembrance of the George N. Parks I knew

Dan Stratford

On Sept. 11, 2010, I rose early, and prepared myself for another Political Thought discussion. That evening, morning, permeated by a mixture of clouds and sunshine, had until that point, passed by unremarkably.

That abruptly changed once I perused my email [illegible]. How will cites my discussion. Within the [illegible] encapsulating everything from [illegible] to various entities jostling for my [illegible] by Twitter. I noticed an email from the [illegible] Office, with an unfathomable title: "In Death of George Parks."

"Surely this must be some kind of error," I [illegible]. However, as my eyes absorbed the wording of the email that couldn't be, I finally had become [illegible] to the unthinkable truth: that George N [illegible], the legendary director of our esteemed [illegible] Marching Band that I had counted myself as part of for two years, had passed from [illegible].

As the entire spectrum of emotional response overtook me, it was as if time had suddenly stood still and yet began to move more swiftly simultaneously. I was mourning the passing of one of my dearest professors, and also worrying about the emotional well-being of our beloved band, among those members I count some of my dearest friends. It was there I traveled that day: there were groups of people speaking in hushed whispers of Mr. Parks passing and public testaments to his indisputable greatness, both as a professor and as a human being.

The first time I saw Mr. Parks was during our band orientation. My fellow rookies and I had been driven to raucous applause by our drum majors who extolled the band's glorious past. After our applause had subsided, a man humbly entered, clad in a red "Power and Class" shirt, clapping slowly and rhythmically.

It is the nature of things that we are but mere mortals, no matter how immortal our accomplishments may seem. We must all pass from this world and leave our legacy to be tended by our friends, family and compatriots.

Though the first words he said to us slip my mind, his reception was one fit for a liberating hero, for he was liberating us from the fear and apprehension which come with beginning collegiate life.

Mr. Parks himself had a special knack for inspiring people. I saw in him all of history's most storied leaders. Cicero's charisma and oratorical adroitness, Lincoln's steadfastness and probity, Theodore Roosevelt's boisterousness, Franklin Roosevelt's propensity for relentless innovation, Winston Churchill's refusal to submit to defeat, and Niccolò Machiavelli's insight into human nature. In my eyes, there was nothing that he could not do, and similarly, there was nothing he felt that we could not do. We were bound together in musical citizenship and in our commitment to do the impossible on a regular basis. It was as if God himself had challenged the band, and we had collectively said, "I accept."

Without the discipline and pride instilled and invested in us by Mr. Parks at band camp, the band simply wouldn't have been able to endure performing in a downpour at the Intercollegiate Marching Band Festival at Allentown, Pennsylvania in September of 2008 or the bone-chilling cold of the last football game '08. When I got a call from my mother 15 minutes before we were to perform at Allentown in October of 2009 that my grandfather had passed away, I wouldn't have been able to muster the courage to perform if I had not known that all of my bandmates were unconditionally behind me.

There is an enduring debate in political science circles whether the nation creates the state, or whether the state creates the nation. In the case of the band, it can be said with confidence that the answer is both.

For years we had all participated in band, so by college we were all more than ready to be part of an inveterate musical institution. It was Mr. Parks who provided the leadership and vision to make that a reality.

It is the nature of things that we are but mere mortals, no matter how immortal our accomplishments may seem. We must all pass from this world and leave our legacy to be tended by our friends, family and compatriots.

In Mr. Parks' case, it is a legacy that encapsulates the sum of human greatness and a legacy than can only reach higher. The best way we can honor him is by mourning him respectfully, and then heralding the passage of our marching band, the epitome of musical greatness, into a new era; its best days, ahead of it. It's what Mr. Parks would want, a desire that even now rises down from the heavens, where he is so graciously ensconced.

Talk to you later, instead of never

Matthew Medney

Have you heard those kids yelling in the workrooms on the bottom floor of the W.E.B. Dubois library every night? Most likely, you are hearing the hard work of the student run organization, Project Instead.

Project Instead is a unique organization aimed at educating Americans on the dangers of texting while driving by employing a number of viral campaigns.

We, as an organization, understand that everyone 'thinks' that their text is a vital piece of information that needs to be expressed at that moment in time.

The organization utilizes Facebook, Twitter and its own website, which includes an interactive blog to express its message, today will soon be a big part of their communication arsenal.

Students in the organization have created original and compelling messages and program platforms to get young people in the words of the U.S. Department of Transportation to "Put It Down." One they call the "Talk to You Later Team or TTYLT." another is the creation of the "Designated Texter or DT." As students and admitted former offenders, members believe they really know what is needed to change the mind-set and habits of those who drive and text.

The cornerstone of their campaign has been built around the idea of "instead." An instead is an activity, person stuffed animal, it is anything that you will miss if you were to be maimed or killed in a car crash. What would you rather be doing instead of being dead? The group sees "instead" as a thought-provoking and life affirming credo for the organization.

Texting while driving is about six times more likely to result in an accident than driving while intoxicated.

The National Safety Council found that cell phone use leads to about 1.6 million car crashes a year and the average text message takes a driver's focus away from the road for 4.6 seconds – enough time to travel the length of a football field at 55 mph. Which can be a very dangerous threat to student safety.

We, as an organization, understand that everyone "thinks" that their text is a vital piece of information that needs to be expressed at that moment in time, however, here the TTYLT tries to explain that one moment in time is not worth the countless moments lost due to the senseless deaths that occur from texting while driving. This is what we are trying to teach every member of society.

We have created a movement on campus that is changing the way people view texting while driving. Companies like AT&T and State Farm are creating awareness, but this student-run organization is building a huge following. With the financial backing from Rothschild Clothing and more to come from other sources, Project Instead looks to be a nationwide cause. If you would like to learn more contact Project Instead at projectinstead@gmail.com.

Matthew Medney is the president of Project Instead. He can be reached at projectinstead@gmail.com.

THE CUBAN MODEL DOESN'T WORK ANYMORE...
CASTRO
UNFORTUNATELY, IT'S LOCKS STILL DO.
DISSIDENTS
...ONCE CHRISTINE GETS TO THE SENATE, SHE WILL PASS A LAW AGAINST OUR GREATEST EVILS, THOSE THAT HAVE RIPPED THE VERY FABRIC OF AMERICAN SOCIETY TO SHREDS!
WITCHCRAFT AND MASTURBATION!

College should be more than a dream for all U.S. residents

Adam Leader-Smith

As a child, how much influence did you have over your parents' decisions? If they decided to relocate to a new town, to find new jobs, to transfer you to another school, what degree of control did you have over the decision? Children can yell, scream and argue, but often with few favorable results. Children simply do not have the final say when it comes to making important life decisions concerning the entire family, especially when economic insecurity is the compelling force.

Like many young adults whose parents brought them to the United States illegally as children are paying the price for decisions that they did not make.

Roughly 65,000 high school students who graduate the country illegally are graduating per year. Many of them have been raised associating the U.S. as their home and are effectively barred from continuing to college of their choice. Students without legal status are unable to receive federal aid of any sort and are only offered the opportunity to take advantage of in-state tuition in ten states and Massachusetts is not one .

The Development, Relief, and Education of Alien Minors Act, or DREAM Act, will hopefully clear a path to college for these students.

If the DREAM Act is passed, it will nudge open the door for thousands of students previously denied the opportunity to receive a higher education.

If the DREAM Act is passed, it will nudge open the door for thousands of students previously denied the opportunity to receive a higher education.

The DREAM Act proposes to allow high school graduates who lack legal status a path to citizenship as long as they entered the country before the age of 16, have resided in the United States for at least five years prior to the bill's passage, and do not have a criminal record. If they qualify, they will be able to receive conditional residency, which can become permanent legal status after the completion of two years of college or military service.

As immigration legislation goes, the DREAM Act should be relatively uncontroversial. Regardless of your stance on illegal immigration, the act does not give potential illegal immigrants an extra incentive to come to the United States, and is strict in its qualifications. It seeks to rectify a situation in which high school students are torn between seeking higher education in what has been their home for many years and being separated from friends, family and opportunity.

The DREAM Act comes up to vote this week, and its passage into law is not yet assured.

Please take the time to call or write to your senators and ask them to support the DREAM Act. Other young people have dreams, aspirations and goals just like you. Support them and call 1-888-254-5085 for the switchboard. Ask to be transferred to Senator Scott Brown's office if you are from Massachusetts or your senator if you are from a different state. Sending letters is another powerful way to let your representatives know how you feel.

The demands of students is what put this legislation on the table, and hopefully it will be what carries it into law.

La Veracruzana serves freshest Mexican food

Jess Watsky
Collegian Correspondent

Fall is beginning to set in on Amherst, and the temperature is finally cool enough for eating spicy foods. As the air first becomes chilly, La Veracruzana is the subject of many a customer's search of a great selection of Mexican foods.

At 11 in the morning at the restaurant, the smell of meat and oil lay redolent in the air. Taking a seat at a table, featuring a pleasant mosaic of colors, the time comes to order. For anyone with a craving for traditional Mexican dishes utilizing ingredients difficult to find anywhere else, customers get exactly what they pay for.

The homemade drinks are a definite boon to La Veracruzana, providing a silky and obscure flavor to contrast the spices, for example, the tamarind juice and the hibiscus juice.

Both juices are cold, refreshing and very flavorful. The tamarind it the better of the two, achieving a balance between a slightly sharp tang on the tongue and a simultaneous sweetness numbing its spice. There is a pulp at the bottom, but the overall flavor and texture is consistently zesty and very unique. The hibiscus is equally as tasty, but not as innovative as the tamarind. It maintains a classic herbaceous fruitiness and a deep, sugary flavor. Both beverages are served chilled.

One of the unique aspects La Veracruzana can boast of over other area Mexican restaurants are its free salsa bar. Provided one does not fill an entire water glass with salsa, eliciting a vicious and volatile reaction, a person can happily subside on chips and dip for dinner with any of their five varieties without searing their tongue off. Of the five in the bar, two of the best are the chunky Pico de Gallo and Scotch Bonnet Diablo sauces. Both are smooth and spicy, have an impressive amount of piquant flavors for such a small portion, and taste really fresh. Their salsa verde stands up well on their chips and dishes, providing a robust flavor.

The tacos come out on plates as bright as the mosaic tables beneath them, a cheerful platter of toppings piled on a double layer of corn tortillas. The varieties of tacos are many, featuring fillings such as chorizo and egg for a breakfast appetizer and an entrée of 'lengua,' beef tongue.

Each taco is brilliantly formed, and the tortillas all are lightly grilled, tender and never gummy. The chorizo and egg is incorporated into a filling that makes it impossible to tell where the meat ends and the egg begin. It is delicious and spicy, with a cool, crispy lettuce and tomato topping to calm the tongue. The spices are not too overwhelming, and the chorizo shines through. The sausage is not greasy at all and plays nicely with the other flavors.

Another taco option consists of cactus leaf, an unfamiliar ingredient. It is enhanced with refried beans on top and the obligatory julienned lettuce and tomato. The pieces of the leaf are grilled with a slight char and firm to the touch. The texture is juicy and the flesh tastes like green beans, with a slightly pickled flavor. With the creaminess of the refried beans, the cactus leaf is different and exciting to encounter. The tortillas stand up well to both of these fillings.

The lengua taco is a spicy, saucy taco. This is the hardest to pick up and eat with one's hands, as the meat and oils seep through both layers and poke through. Nevertheless, this is the most tender and juicy beef tongue anyone's ever likely to have had the pleasure to ingest. It is flavorful and well seasoned, but not too salty and it's cut into small cubes, braised on each side. The sauce is not too thick and heavy and doesn't weigh down the overall dish, while the flavor is intense but not overwhelming.

To counteract the feat of devouring strange appetizers go for a classic Mexican comfort food as an entrée. The enfrijoladas (fried corn tortillas stuffed with cheese and covered in black bean puree, sour cream and cojita, epitomize delicious mush. In ordering these it is almost upsetting that it isn't a little chillier or rainier, because the overall comfort and warmth of this dish is enough to defrost Siberia. The soft corn tortilla is buttery, the cheese oozes out and the black beans are pureed into a decadent sauce perfect for sopping up with rice on the side or with extra chips. The cheese and beans are not heavily spiced, but can be used creatively with the above-mentioned free salsas to add as much or as little heat to the dish as one pleases – a sort of "spice your own" dish.

La Veracruzana is a staple on both sides of the bridge, and if you a traditional and bold menu for those nights when Schilo's food ain't your gig. With a bright atmosphere that mirrors the lively, sassy dishes it serves up, it's a winner on any night of the year, cold weather or not.

Jess Watsky can be reached at jwatsky@student.umass.edu

JESS WATSKY/COLLEGIAN

Among the myriad menu options at La Veracruzana, the tamarind and hibiscus juices provide a memorable flavor which complements the spices used in the restaurant's food. They also serve as a palet cleanser.

One of the most popular dishes at La Veracruzana is the taco, a classic Mexican food. The restaurant offers a wide variety of tacos, from breakfast tacos to beef tongue tacos.

'Easy A' an easy hit with high school audiences

By Kate MacDonald
Collegian Staff

Masquerading as a simple teenage comedy, "Easy A" is a film that should be recognized for exactly what it is – a hilarious satire on high school culture, something all young adults are familiar with, whether they like it or not.

Olive Penderghast's experience, however, is a little different than the average American teen's encounter. Emma Stone, of "Superbad" and "Zombieland" fame, plays the sassy and snide, yet anonymous Olive.

Olive, who barely registers as a blip on the social radar of Ojai North High School, covers up a weekend spent at home singing along to a singing card sent by her grandparents by telling her best friend she went out with a college guy. Cue the hilarious scene of Olive singing Natasha Bedingfield's "Pocket Full of Sunshine" multiple times.

Sidekick Rhiannon – Aly Michalka, a long way from her clean-cut Disney days – assumes she lost her virginity to this mystery guy. To get Rhi off her back and to avoid telling her she didn't want to go on a weekend trip with her family, Olive admits that she did. After all, hasn't everyone told a white lie to avoid talking about something?

Unfortunately, in this town of 9,000 people, rumors travel faster than the speed of light. Thanks to ultraconservative Christian Marianne, played by the amusing Amanda Bynes, straying from her normal "good girl" role, the whole school knows as soon as the first tweet hits the internet.

Olive soon decides to embrace this newfound identity in an effort to help a tormented gay friend. Dan Byrd shows his acting chops as Brandon, particularly when he pleads that Olive help him to avoid the usual beat-down he's accustomed to. He wants to remain invisible just long enough to escape this California town.

So, in a stereotypical wild party scene, thanks to the lengths they go to make peers think they're having sex from jumping on the bed to making awkward grunting noises, director Will Gluck produces what is probably one of the best "sex scenes" ever.

The only problem is: What happens when the whole school no longer looks at her with curiosity, but disdain? Who can Olive turn to when even her best friend thinks she's a "dirty skank?" To add insult to injury, other would-be suitors begin asking for her help.

Olive isn't simply a sharp-tongued strong female protagonist. She is very kind and is always thinking of others. Stone plays this part extremely well – she brings extra layers to the character, so even if viewers have never gone through anything of this magnitude, many can identify with her.

Though the one-liners and hilarious situations can be attributed to writer Bert V. Royal in his first movie writing endeavor, Stone delivers the lines such precision. A genius of deadpan delivery and sarcasm, this will not be the last we see of Stone.

One of the best things about this movie is that, unlike so many other comedies of today, the best one-liners and slapstick scenes are not all given away in the previews. Another great aspect is the cast, which is full of stars and vastly underrated comedians.

Stanley Tucci and Patricia Clarkson support as Olive's quirky parents and leave the audience wondering whether they're the best or stupidest parents ever. Also adding to the great cast are Thomas Hayden Church and Lisa Kudrow. Malcolm McDowell, of "A Clockwork Orange," though only appearing in two scenes as Principal Gibbons, leaves the viewers yearning for more.

The only real weak link is love interest Todd, played by Penn Badgley. Bagley always seems to be stuck as the good guy trying to save the misunderstood good girl. Be it as Scott in "John Tucker Must Die" or as Dan in "Gossip Girl," his professional technique never really changes. It's not that the character was played wrong; it's just an overplayed by an actor who isn't really memorable.

Finally, the cinematography wraps things up nicely, playing it safe with clean shots throughout the film. In a clever technique to show narration, Olive tells her story through a video webcast, during which the shots are grainy and believable.

"Easy A" is already being hailed as a must-see for young adults. But "Easy A" is definitely a movie that comedy fans could truly enjoy. It's no John Hughes teenage classic, but it's probably the closest we'll get to it for a while. It's not so mature that younger teens wouldn't understand, but at the same time features raunchy and cultural jokes adults also appreciate.

Though Olive, trying to explain her side of the story, admits, "I'm not proud of this," that's definitely not a sentiment that the cast of "Easy A," least of all Emma Stone, should share.

Kate MacDonald can be reached at kaitlynmacdonald@student.umass.edu

JOE MAZZA/BRAVEWORDPHOTO.COM

Emma Stone, right, stars in "Easy A" as Olive, a character not unlike Hester Prynne in "The Scarlet Letter." Like Prynne, Stone's character dons a bright red 'A' on her wardrobe, embracing her false reputation.

Live like Potter: catch the snitch with University Quidditch team

COURTESY FACEBOOK.COM

Members of the University of Massachusetts Quidditch team practice on the Metawampee Lawn outside of the Campus Center.

By Reggie Kwok
Collegian Correspondent

Ever wondered why people are running around in circles at the Metawampee Lawn? What exactly are those people doing? Is it just 'a run around with a stick' game?

Quidditch is a highly evolving sport, mostly on college campuses. According to the International Quidditch Association, there are five positions in this game: chaser, beater, keeper, seeker and snitch. Each team has seven players, which includes three chasers, two beaters, one keeper, and one seeker. Players in the game can hit other players in the upper body, which means no hits below the waist or grabbing of the neck.

The total amount of players needed for a normal game is 15. Each position has a different role. For example, the 'chaser' tries to grab the 'quaffle,' which is a volleyball, and toss it into one of the three hoops on the opposing side. Each shot made is worth ten points. The keeper is like a goalie in a soccer game. This position tries to stop enemy chasers from scoring into the allied hoops. A keeper can also act as a chaser. The 'beater' tries to hit enemy players with dodge balls, also known as 'bludgers.' If a player is hit by a bludger, that player must run back to the hoops and tap it. The 'seeker' tries to catch the 'snitch,' who is a person running away from both of the seekers. The snitch has a sock with a ball in it sticking out of their pants. In order to end the game, the seeker must grab the sock without it touching the ground.

Once the game ends, whoever caught the snitch receives 30 points. The team with the most points wins. In the case of a tie, there is a sudden death round. The first team that gets a quaffle into a hoop or that catches the snitch wins.

In order to start the game, all the players identify what position they are by raising their hands when their position is called. Once all the positions are known, all players must bow their heads and close their eyes. When the snitch runs to a reasonable position, the referee says, "Brooms up!" which signifies the start of the game.

The meetings are normally at the Metawampee Lawn, which is by the Campus Center and Student Union. Practices and drills are from 5 p.m. to 7 p.m. on Wednesdays and Thursdays. Scrimmages for casual players happen on Sundays from 2 to 4 p.m.

"Quidditch is a great sport, a great way to meet people," Chris Chan, president of the Quidditch team, said. "It's a unique sport and tons of fun."

"Quidditch is a deeper metaphor of life," said player Robert Vortherms.

Another Quidditch player, Amanda Grace, also said "You don't have to like Harry Potter to enjoy it."

Reggie Kwok can be reached at rkwok@student.umass.edu.

Correction

In an article published on Sept. 20 entitled "'The Town' brings hollywood close to home," writer Ian Winship wrote that the film was based in Cambridge, Mass. The film took place in Charlestown, Mass.

UM adds Spain native

TENNIS from page 8

doubles to produce a 5-1 record.

"Carpenter and Providence have great chemistry on the court together, and I expect them to do the same this year for us," Dixon said.

The head coach recalls Providence's A-10 tournament match against Saint Louis, where she forced a 10-point tiebreaking third set, but had to endure an hour and 45 minute tornado warning delay.

"To have that long of a delay and still go back out there under the situation, that shows me toughness to never settle for anything less than winning. That's what I want for all my players," Dixon said.

Three new additions to the squad include Jessica Podlofsky, Clara Matias and Yuliana Motyl, whom collectively Dixon calls the best recruiting class she's ever had.

"These three new players for us have a chance to step in right away and make an impact," she said. "That's how good they are."

Motyl leads the class with terrific baseline play, as well as a top 500 ranking in the International Tennis Federation world junior circuit. The freshman is expected to come in and compete right away for the No. 1 singles position.

Matias "has a calm demeanor on the court and will help make a difference for the squad as a whole," according to Dixon. The Barcelona native has been ranked as high as in the top 50 in the Spanish National Ranking.

Podlofsky comes in with a 154th ranking in the 2010 national recruiting class. The Port Washington, N.Y. native brings a gritty mentality, hard work ethic along with toughness. Podlofsky is expected to compete towards the bottom half of the order for singles and doubles.

The team, according to Dixon, must work on doubles play, as well as solidifying positions in both singles and doubles over the course of the next few weeks before conference play.

"Doubles play is so important in collegiate tennis and with only one real combination coming back this year, that's our first goal; to figure out where everyone needs to be slotted," Dixon said.

The team opens conference play against Rhode Island on Oct. 13th in Kingston, RI, which by then Dixon hopes to have a clearer outlook of where her team is compared to the rest of the conference.

"Hopefully by then we will have a real gage of where we are and where we are going," Dixon said. "We have some invitationals and matches with other schools before URI, so hopefully by then we will be in full gear."

Dixon believes that this year's crew of players has what it takes to win the A-10 title and that's become the main goal for every one of the players this season.

"We've got a chance here to not only go farther than we've ever gone, but to elevate this program to a whole new level it's never been before, and that's something to be really excited about," Dixon said.

Scott Cournoyer can be reached at scournoy@student.umass.edu.

Minutewomen recruit international athletes

RECRUIT from page 8

tain constant contact with agents from other countries because you get a good idea about players you may want to approach from eye witnesses who see them play and I trust their opinions," Dixon said.

With pipelines established in countries such as Spain, Germany and Poland, Dixon has recently expanded her recruiting trail to parts of the United States, including California and Arizona.

"This year was our first out west recruiting," she said. "You not only have a unique opportunity to see players you might have not seen back east, but also get a good sense of how other schools recruit and where they might direct their attention. That's valuable knowledge to have moving forward."

The coach has a track record of success, including notable alumnus Sasha Edelstein '05, who was a former No. 1 singles player for Dixon and is currently employed on Wall Street for Citigroup.

UMass will welcome two new international tennis players this upcoming year in Clara Matias from Barcelona and Yuliana Motyl from Toronto. They will join current international players who have found a home on campus and in the Amherst community.

"We feel that we've built a great place here for players coming from overseas," Dixon said. "We understand how difficult it may be for some players to adjust to life in America and we are there for them every step of the way."

Dixon believes the future of the program is in great shape with the ability to improve recruiting every year.

"With a great class coming in and a great year coming up, we feel that we can now recruit even better players," she said. "People know UMass for its competitive nature and quality education, and if we can take the program even higher, it will allow us go out and get players spanning the globe. It's exciting and I'm really looking forward to it."

Scott Cournoyer can be reached at scournoy@student.umass.edu.

George Washington women's soccer team won the Blue Hen classic this past weekend, defeating Delaware to earn the top prize.

COURTESY OF GEORGE WASHINGTON ATHLETICS

GW sweeps Blue Hen Classic

By Dan Lajoie
Collegian Correspondent

Freshman Alex Neal's goal in the 87th minute sealed a 2-1 victory for the George Washington women's soccer team over Delaware on Sunday afternoon in the Blue Hen Classic. The Colonials finished the week on a three game-win streak.

The Blue Hens (4-4) tallied the first goal of the match in the first half when Melissa Pennington scored off a pass from Andrea Luttio in the 34th minute.

Adriana Moya scored her second goal of the season in the 57th minute to put the game at a 1-1 tie. The Colonials (5-3) continued to put pressure on Blue Hen's goalie Breanna Stemler, taking 11 shots, eight on goal, while holding Delaware to six total shots.

Neal scored off a rebound from a shot taken by Moya that Stemler could not wrap up to win the game for George Washington.

Senior defender Jillian Morgan, as well as freshman Claire Haft joined Moya and Neal on the Blue Hen Classic All-Tournament Team.

The Colonials wrap up their non-conference schedule at home on Friday against Gardner-Webb before they open up conference play against Temple.

A-10 Women's Soccer

La Salle shut-out by Drexel

After winning the first game in the Blue Hen Classic, La Salle fell to Drexel 2-0 on Sunday. The Explorers, looking to extend their five game unbeaten streak, out-shot the Dragons, 12-9, but could not get the ball in the net.

Drexel (4-4) broke the scoreless tie in the 52nd minute as Jenna Lindsay scored her second goal of the season. Lindsay also got an assist on an Alex Vazquez goal that got by goalie Gabby Pakhtgian in the 81st minute to put the Dragons up 2-0. It was the second goal of the season for Vazquez.

Victoria Trocculi and Nicole Sinclair combined on the shutout in goal while making five stops.

Freshman forward Renee Washington, defender Jess Hopton and midfielder Courtney Niemiec earned selections for the Blue Hen Classic All-Tournament Team.

La Salle (5-3-1) will be back in action on Friday against Lehigh before it begins its conference schedule against St. Joseph's on Sunday.

Atlantic 10 names POW

Dayton's Colleen Williams and St. Bonaventure's Nicole Markert received Atlantic 10 Women's Soccer Co-Players of the Week honors.

Williams showcased her skill for the Flyers when she tallied seven points in two matches, scoring two goals and dishing out three assists. The sophomore midfielder had a hand in five of the six goals scored by Dayton this past week as the Flyers wrapped up their non-conference schedule at 8-2.

On Friday, Williams scored a long shot from 45 yards away with one second left in the first half. She then assisted on both goals scored in the second half in a 4-0 victory of Loyola-Chicago.

On Sunday, Williams closed out the weekend with a goal and an assist in a 2-1 victory over Wright State. Williams leads the entire A-10 in points, goals and assists this season.

Markert won her fifth-straight start and led the Bonnies (6-3) to a pair of wins and a first place finish at the 2010 Puma Big 4 Tournament hosted by St. Bonaventure over the weekend.

The senior goalkeeper impressed between the posts, allowing just one goal in 180 minutes of action. Markert finished the weekend with four saves, two in each game, and picked up her third shutout of the season in St. Bonaventure's 1-0 win over Niagara. Because of her outstanding performance in the tournament, Markert was selected to be on the All-Tournament Team.

This season, Markert owns a record of 5-1 and has surrendered just four goals in six starts.

Minutewomen open season at EC Invite

Depth, experience strong for similar UMass roster

By Scott Cournoyer
Collegian Staff

Behind great depth and experience, Massachusetts coach Judy Dixon believes her team will have a strong season in 2010. UMass

With nine returning players and three recruits who can create immediate impacts on the program, Dixon believes this team may be the deepest and most talented she's ever had under her reign at UMass.

"We have a group of really great ladies who can play tennis under tight pressure, and that's what it's going to take to get to where we want to go, being able to play well enough to win during crunch time," Dixon said.

Dixon is looking to put everyone on an equal playing field going into the regular season, with several talented players throughout the roster.

"It's a good problem to have, but not an easy one by any stretch," Dixon said. "We have [players] coming back who had spots set in stone last year, where this year that's not going to be the case. You have to find a way to give everyone a fair shake in the fall in order to evaluate who goes with who best in doubles, as well as who deserves to be at the top in singles. It's just the best way to go about seeing who we are as a team."

Leading the way for Dixon's squad is co-captain Candynce Boney, who ranked second on the team last year in singles wins (16), while also taking home an Atlantic 10 All-Conference first team award.

"[Boney] is one of the toughest and competitive players I've had in quite some time," Dixon said. "She never gives up a point without a fight and our younger players will definitely look to her during big matches."

Other returning players include Kaitlyn Carpenter and Jocelyn Providence, who compiled over 20 wins last year for the Minutewomen. Carpenter finished last season with a 14-11 record, teaming up with Providence at No. 3

Dixon gives Kaitlyn Carpenter advice during a game last year. Carpenter, who will return this season for the Minutewomen, went 14–11 last year including victories over Providence.

Dixon recruits foreign athletes for UM squad

By Scott Cournoyer
Collegian Staff

With five players on the current Massachusetts tennis teamroster hailing from all over the world, UMass coach Judy Dixon built an international influence on the program since her tenure began at UMass in 1982.

"I've had a number of international recruits over the years and I've come to see that their main intentions are to be able to, first and foremost receive a great education and that's what UMass provides," Dixon said.

Dixon began recruiting international players since she began her tenure, starting mostly in Canada.

"There's a lot of good young talent up north and we really tried to sell the educational aspect because most of the athletes we get here at UMass want a quality education before anything else," Dixon said. "Being able to play tennis at a high collegiate level is very important to them, but a lot of recruits come to America because of the education and what it can do for them down the road."

Maintaining a quality education is exactly what Dixon wants for her players because she knows a degree will take them farther than tennis can.

"I expect my players to maintain high grades because I have high standards for them," Dixon said. "I just want the best for them after they leave here."

Since she began coaching the Minutewomen, Dixon has built lasting relationships with both the players she recruits and the representatives who help those players make decisions on their futures.

"Over the years, I've felt it's important to main-

Seniors lead Minutemen to first, women place fourth

By Ben Lambert
Collegian Staff

The Massachusetts cross country teams had mixed results this weekend, as they hosted their only home meets of the season.

The men's team captured first place in its meet, holding off Connecticut for a close four-point victory. The women's team did not have as much success this weekend in Amherst, as it finished fourth out of five schools.

This was the fifth-straight year that the Minutemen have won their only home meet of the year. Last season, UMass placed four runners in the top seven. While they were not quite as successful this year, the team still got the job done.

Seniors Andrew Mulvaney and Daniel Barry led the way to victory for the Minutemen. Mulvaney crossed the line in 25 minutes, 48 seconds, good for a fourth overall finish and the top spot for UMass. Barry led Mulvaney for most of the race, but was passed near the end, finishing in 25:51. Last year, neither Mulvaney nor Barry placed in the home invitational.

Several other competitors also scored points for the Minutemen. Senior Scott VanderMolen was the third Minuteman to cross the finish line, placing in the top 10 with an eighth place finish in 26:04.

Other notable runners for the Minutemen include senior Sonny Gamble, who added a 13th place finish in 26:18 and senior Robert Deegan, who finished 17th overall in 26:37.

UConn finished second at the meet, earning 51 points. They were followed by Maine, Vermont and Amherst. Amherst senior Will Yochum was the first place finisher in the race, with Jason Kaake of Maine and John Little of Vermont also finishing in the top three. Mulvaney and Barry rounded out the top five.

The women's team held its own meet this weekend in Amherst, with not quite as much success. Sophomore Courtney Baldwin was the top finisher for the Minutewomen, as she finished fifth overall.

Senior Gina Perno was the second UMass competitor to cross the finish line, coming in 12th overall, while junior Karen Roa finished third for the Minutewomen and 18th overall.

Other runners scoring points for UMass include senior Elizabeth Fisk (19th place) and freshman Sarah Barrett (28th place).

Baldwin has first place finishes for the Minutewomen in each of the five times she has raced for the team, including this past competition. She was the Atlantic 10 Rookie of the Year last year, was named A-10 Performer of the Week once and was named A-10 Rookie of the Week three times. She also earned All-Conference honors at the A-10 Championships last season.

Overall, the women's meet was won by Maine, with Boston College, Vermont, UMass and Amherst rounding out the other competing schools.

The first place finisher in the race was Maine junior Corey Conner. Jordan Daniel of Maine finished second, with Morgan Powers of Vermont coming in third.

UMass' next race is Oct. 1 at the Paul Short Invitational, hosted by Lehigh in Bethlehem, PA.

Ben Lambert can be reached at wlambert@student.umass.edu.

Charlotte downs Wake Forest, Rudolph, Gomes earn POWs

A-10 Men's Soccer

By Nick Bellofatto
Collegian Correspondent

The Charlotte men's soccer team played its most impressive game of the season last Tuesday night, beating No. 11 Wake Forest in a 2-0 shutout.

When the whistle blew, and the ball came in play, the 49er squad attacked the Demon Deacons in relentless fashion. Just three minutes into the period, 49er Evan James was put in scoring position, but his strike sailed just wide of the net. Minutes later, sophomore Jennings Rex blew past a Wake Forest defender, just missing the inside post with his well-timed strike.

Charlotte had many opportunities in the early part of the game, but its first score was due to a miscommunication between WF goalkeeper Akira Fitzgerald and defender Kyle Adams. After a missed shot, Fitzgerald punched the ball out of his team's box, but the ball hit Adams' shin and bounced into The Demon Deacons' net, causing an own goal during the 32nd minute of play.

Just seven minutes later, the 49ers scored another goal, which gave Charlotte a 2-0 advantage heading into halftime. After the half, the two teams settled in, and the game became more defensive. The 49ers buckled down to seal the victory over Wake Forest and win its second-straight meeting dating back to last season. In two games, the 49ers outscored WF, 5-1, and proved that intensity is the key to beating this perennial powerhouse.

Gomes, Rudolph earn POW

George Washington's Seth Rudolph and Duquesne's Simon Gomes were honored by the Atlantic 10 when they were announced as the Player of the Week and Rookie of the Week, respectively.

Seth Rudolph led George Washington to an even 1-1 week and recorded the first hat trick in the A-10 Conference this season. The three goals came during the Colonials' match against Mount St. Mary's, with his first goal of the outing coming in the 22nd minute. He continued to strike the ball well in the second half by scoring back to back goals in the 49th and 55th minutes to tie the match at 3-3. With another goal coming in a 4-2 victory over Longwood, Rudolph finished the week with four goals and eight points.

Duquesne's Simon Gomez picked up his second straight Rookie of the Week honor after leading his team to an unbeaten week. The team, led by Gomez, tallied impressive wins over both Saint Joseph's and Army. The freshman striker scored a pair of goals against Army, helping the Dukes secure a 3-1 victory. This two goal outing was the second time that Gomez scored a pair of goals in a single game. Gomez is currently leading his Duquesne team in both goals (four) and points (nine).

The first place race

As the A-10 Conference continues to battle with teams inside and outside of the division, there is currently a four-way tie for first. Charlotte, Duquesne, Fordham and St. Bonaventure are all tied for first with nine total points.

Three of the four teams, excluding Duquesne, have 3-3 records and are holding firm on top of the division with the Conference high, nine points. Duquesne has yet to play its sixth game of the season.

Even though these four schools have possession of first place, schools such as the Flyers (2-2-1) and URI (2-3) are not far behind, having seven and six points respectively.

The A-10 conference is just about open to anyone of these schools, and a winning streak could put any of them as the sole possessors of first place. With four teams tied for first place in late September, the A-10 is starting to show its competitiveness and balance.

Incumbent Story seeks re-election, 10th term

Running against Story are two recent UMass alumni; Dan Sandell, a Republican, and Dan Melick, an Independent

By Matthew M. Robare
Collegian Staff

Democrat Ellen Story has represented the Amherst and Granby area in the state House of Representatives since 1992 and is running for re-election. Her opponents are Republican Dan Sandell, a lawyer, and Independent Dan Melick.

"My top priority is money for the University [of Massachusetts] and that is a tough sell, even in good financial years," Story said. "My background is in public higher education. My father was a professor. My grandfather on my mother's side was a professor. My brother is a professor and his wife is a professor. And they were all at public universities."

She said that Massachusetts has a poor history of supporting public higher education. "I'm not sure why that's true," she added. "Most of the state lives in the eastern part, not in western Massachusetts. Most of the legislators have never been to Amherst and most of them have not gone to public schools. We have a history of Harvard and the Massachusetts Institute of Technology."

According to Story, when Michael Dukakis was governor he questioned the need for a public university, because Massachusetts already had Harvard and MIT. "I still can't believe those words came out of his lips," Story said.

She compared the way the University of Massachusetts has been treated by the state government to the University of Texas, where she did her undergraduate work and the University of Wisconsin, where she attended graduate school.

"In Texas and Wisconsin the University is prized," Story said. "It's a jewel of the state and most of the legislature went there. They're very protective of the University. They would never have cut the University's budget the way that our state legislature has cut the budge for this [the Amherst] campus."

She continued, "When I talk about the University, I really mean the Amherst campus. I continue to think that the idea of a five campus system was a bad idea."

Story said that originally, there was the Massachusetts Agricultural College, which became UMass Amherst, then a commuter school was built—UMass Boston—and the medical school in Worcester, followed by campuses in Dartmouth and Lowell. She said that the intent was, with more of the state covered, more legislators would support the University's budget instead of just the Amherst state senator and representative. However, the process ended up being competitive, with each campus trying to get budget increases at the expense of the others.

"Amherst has often been short-changed, mostly by the president's office," Story said. "I sometimes entertain thoughts about how nice it would be if the Amherst campus were to secede to have its own board of trustees and be in charge of its own budget."

She said that she was opposed to the recent acquisition of a law school because it's located in Dartmouth. "I do think that [we need a public law school] and I think we should have had one when we got the medical school. I think that would have made a big difference."

State Rep. Ellen Story is seeking her tenth term representing Massachusetts' third Hampshire district.

Ph.D. candidate wins biomechanics award

By Tim Wallace
Collegian Staff

In August, Ross Miller, a University of Massachusetts graduate student and Ph.D candidate, received the Young Scientist Pre-Doctoral Award from the American Society of Biomechanics (ASB). The award was presented to Miller at the 34th Annual ASB Meeting in Providence, R.I. At the meeting, which lasted from Aug.18 to 21, he delivered a talk entitled "Theoretical analysis of limitations to maximum sprinting speed imposed by muscle mechanical properties," which assured his winning position.

"Within the field of biomechanics, this is a very prestigious award," said associate professor of kinesiology Graham Caldwell. Miller's doctoral advisor and co-author of the talk delivered by Miller at the ASB meeting last month. Competition for the award is also incredibly competitive.

"Many students apply for this award from around the country, it's incredibly competitive," said Miller. "The award is based on what you've done so far in the field, and most of my work has been focused on the biomechanics of running," as shown by his presentation of how muscular properties limit human sprinting possibilities.

"There are a variety of projects being done by the biomechanics lab, a section of the kinesiology department," said Professor Caldwell.

"These include projects Ross is working on, dealing with human running speed, and another ongoing project on postural control, and how mechanical properties affect postural motion and control," continued Caldwell.

Miller also has worked on a study for Iliotibial Band Syndrome, or ITBS. The Iliotibial band runs alongside the outside of the leg and is prone to strain during periods of physical activity. "It's a very common injury found in the knees of runners, with pain on top of the knee and to the outside."

Miller and a fellow student created a computerized model of the lower half of the body that focused on the strain level of the Iliotibial band of different

Does studying abroad help you back home?

By Dan Peltier
Collegian Staff

If you want to boost your GPA, graduate on time, or improve your knowledge of cultural practices, studying abroad may be the thing for you. According to a new study conducted by the University of Georgia, studying abroad can make a lasting impression on a student in a wide variety of areas. Don Rubin, professor emeritus of speech communication and language education at UGA established the Georgian Learning Outcomes of Students Studying Abroad Research Initiative (GLOSSARI) in 2000 to track how study abroad experiences affected students' academic careers across the 35-institution University of Georgia system.

In 2010, the study found that students who choose to study abroad during their college years had higher graduation rates, improved knowledge of cultural practices and context and improved academic performances than those who chose not to study abroad. Rubin, who could not be reached for comment at press time, said in a press release from Inside Higher Ed. that the age-old belief that students choose to study abroad to get away from their studies doesn't appear to be true.

"I think if there's one take-home message from this research as a whole it is that study abroad does not undermine educational outcomes, it doesn't undermine graduation rate, it doesn't undermine final semester GPA," said Rubin. "It's not a distraction."

Not all findings of the study were positive, however, such as the facts that self-reported knowledge of world geography actually decreased over time for both study abroad and for a control group and also that no significant difference in knowledge of global interdependence between the two sets of students was found. Despite these findings, Rubin said

See ABROAD on page 3

Research has found that studying abroad may have a positive effect on grades. UMass students looking to go abroad can do so through the IPO.

Extreme makeover

Communications prof details people who "willfully" unwire

By Maxwell Calloway
Collegian Staff

Meet Arthur. Arthur owns and runs one of the many street corner news stands found around Philadelphia. Everyday customers come to him for the latest news, gossip and good conversation. On Fridays, Arthur goes to his local mosque for prayer where he is an integral part of the local Muslim community. By all appearances, Arthur is average. Arthur, however, is one of a growing minority that is abandoning cell-phones and computers.

These "willfully unconnected" are the focus of University of Massachusetts communications professor Jarice Hanson's latest research and were discussed at the Center for Public Policy and Administration's (CPPA) flagship lecture for their fall colloquium series this past Monday.

The presentation, "The Digitally Divided: The New Minority and Willful Retreat from the Information Society" highlighted Hanson's findings and their relevance for public policy in a digital age.

According to Hanson, the project was an accident.

In an effort to find real world examples of individuals who have decided to "unplug" for her students, Hanson stumbled upon a hidden "network of unconnected." What was more, "there was a real pride in being unconnected," said Hanson. With each interview, Hanson was given more contacts.

But who are these "tech refugees?"

Early on, Hanson explained her focus was on those who - despite available access - willfully abstain from connectivity as opposed to those unable to secure access. She found that most tech hermits fall into three categories: self-employed working adults with no children, urban squatters and the disabled. Most participants were well educated, self-identified as readers and all had been connected at one time. Another commonality was a deep-rooted concern for privacy. "Some have real horror stories concerning privacy in their lives," said Hanson.

Despite being unconnected, all of those surveyed in Hanson's study felt that they were as, if not more, informed than the rest of the connected public. What's more, all 24 participants felt their happiness increased after unplugging.

Robin, a photographer from New York, was interviewed by Hanson, felt her decision relieved daily stress levels. "I don't want anyone interrupting me, or asking for advice every time they go to buy something new," explained Robin. According to Hanson, the stress caused by constant connectivity is also being addressed in businesses around the nation who have begun implementing e-mail free days.

Robin's response also highlights the importance those interviewed placed on their decisions being conscious and deliberate. As Hanson pointed out, this violates the common conception of those who have retreated from technology. "it is not a circumstance, but a choice."

The conscious aspect of un-

Author Anne Fadiman spoke at UMass Sept. 13, discussing her experiences in Laos following a young epileptic girl, Lia Lee.

Author addresses time in Laos in talk at UM

BY MELANIE MULLER
COLLEGIAN CORRESPONDENT

On Monday, Sept. 13, Anne Fadiman spoke at the University of Massachusetts about "The Spirit Catches You and You Fall Down," her award-winning book about the experiences of an epileptic Hmong girl, Lia Lee and the cross-cultural difficulties that arose between her family and her doctors in treating the condition. The talk was open to the public and held in Bartlett Hall.

"The Spirit Catches You and You Fall Down" tells Lee's story from birth until after she suffered the severe brain damage that caused her to enter a vegetative state at the age of four. Questions about medical ethics and cultural sensitivity are explored extensively, as misunderstandings between the Lee family and western doctors complicate her treatment. Along the way, Fadiman gives information about the history and beliefs of the Hmong, their role in fighting a proxy war in Laos for the American government and the immigration of many Hmong people to the United States after the war in Laos.

Fadiman's appearance at UMass was a part of the Commonwealth Honors College's Fine Print Program. In the Fine Print Program, all incoming freshmen in ComCol were asked to read "The Spirit Catches You and You Fall Down" over the summer. They then discussed the book in small groups during the honor college's Welcome Weekend Orientation.

After being introduced, Fadiman began by thanking those who, like herself, are procrastinators and didn't read the book until the last minute, thus forgoing a "final trip to mall" or viewing a movie to finish it.

"I applaud your sacrifice," said Fadiman.

She went on to give a brief overview of facts about the Hmong she thought many students that were eager to read more of Lia's personal story, may not have known.

Speaking for about an hour from a manuscript, Fadiman then discussed how she first became interested in the story, her interaction with Lia's family and how, eventually, she came to turn her research into a book. Originally, Fadiman wrote the story as a freelance article for the New Yorker, but after a change in editors it was not published by the magazine. Fadiman said that she was driven to write the book out of "embarrassment" and after months of interviews, she didn't have the heart to call Lia's parents and tell them nothing would come of their daughter's story.

Fadiman said that she did not attempt to be objective because she was too close to both, members of the western medical team that treated Lia, and the Lee family. Anecdotes about her time researching the story in Merced are interspersed throughout the book and Fadiman expresses her own opinions frequently. She does not, however, explicitly take the side of either the doctors or the Lee's.

Fadiman went on to describe how she felt she was personally affected by the experience. Observing how Lia's mother, Foua, raised her large family, influenced how Fadiman decided to raise her own children.

After Fadiman finished speaking, she took questions from the 70-person audience for another hour. A number of questions focused on what has happened to the Lee's in the 13 years since the book was published. Fadiman said that she has stayed in contact with the family since the publication of the book, with a number of Lia's sisters visiting her home at one point. Lia is now in her '20s and Foua is still alive, but her father has passed away.

A group from UMass' nursing program asked questions about what kinds of practices Fadiman would recommend to help avoid cross-cultural insensitivity and confusion while treating patients. Fadiman pointed to a list of questions for care providers to ask patients created by Arthur Kleinman that appear towards the end of the book. Fadiman believes them to be "brilliant" in helping to clarify a patient's point of view. She noted, however, that this approach would not have helped Lia's doctors understand the Lee family, as they mainly saw the Lees in crisis situations while Lia was having a seizure.

At the end of the evening, Fadiman was presented with a statuette commemorating the event. She stayed afterward to sign copies of her books and to answer any additional questions.

WRITERS FOR THE DAILY COLLEGIAN

Story seeks 10th term, faces Sandell, Melick

Rep. Ellen Story faces Independent Dan Melick (top) and Republican Dan Sandell this November.

STORY from page 1

"We're saying that it's not going to cost the state anything to have a law school and I find that preposterous," she said. "It is definitely going to have costs that'll come from the University budget and that will come from the Amherst campus, I fear."

Story said that the legislature passed a bill in the spring renaming the state colleges, state universities. That bill, H 4860, was signed into law by Governor Deval Patrick on July 28. The commissioner of the Department of Higher Education, Richard Freeland, said in a press release at the time that the name change was a reward.

"The proponents of that also said it would not cost any money," Story said. "I think it's highly unlikely that it will not cost any money. If I were a professor at Fitchburg [State] University, I would say 'Now that we're a university my salary needs to be higher.' So I expect there will be greater costs coming in the years to come. There's not enough money to go around as it is and this campus has been slashed repeatedly."

Public higher education has not been the only area with large cutbacks. The state's non-discretionary funding – things like pensions and interest payments which cannot be cut from the budget— has seen a continued rise while discretionary funding such as the education budget and basic human services must suffer cutbacks, even though, according to Story, the need for those services increases in bad economic times.

"My solution is a very unpopular one," she said. "Especially with legislators, we need to raise taxes. You can't assume that services are going to be there if you're cutting taxes all the time. During the last 16 years, when we had Republican governors and we had more money, we cut taxes over forty times and we can't afford to cut them that much."

Story said she opposes Question One, which would remove the sales tax from alcohol, the proceeds of which she said go to substance-abuse recovery programs and Question Three, which would reduce the sales tax back to 3 percent.

Matt Robare can be reached at mrobare@student.umass.edu.

UGA survey says study abroad may help GPA

ABROAD from page 1

that education abroad can do very little to harm a student's academic career.

"At worst, it can have relatively little impact on some students' educational careers, and at best it enhances the progress toward degree," said Rubin.

The study also found that in the more than 19,000 study abroad students and almost 18,000 control group students, 49.6 percent of those who studied abroad graduated in four years, compared to the 42.1 percent of those who didn't study abroad. The GPA's also increased in the study abroad group from the time before they left to when they returned; 3.24 and 3.30 respectively.

Laurel Foster-Moore, an education abroad advisor at the UMass International Programs Office (IPO) said that the number of students choosing to go abroad at UMass each year is dramatically increasing.

The UMass Amherst IPO announced recently that the Benjamin A. Gilman International Scholarship is now available for students who wish to study abroad. The basic requirements for applying for the scholarship are that one must be a U.S. citizen and be enrolled in a two or four year institution in the United States as an undergraduate student. For more information regarding the Gilman scholarship, visit www.iiee.org/gilman.

"We keep getting more and more interesting students each year," said Foster-Moore, "Sometimes the culture gap is tough, but if the American students persevere they will do great."

Foster-Moore, who advises students who want to study abroad in Asia, has seen interest increase in this part of the world in recent years as well. Between 20-to-30 students study in Japan each year, 12-to-15 study in China each semester, and eight-to-12 study in Thailand each year.

"China draws those students who are interested in business and economics while many students are interested to learn more about Japan's fascinating culture," said Foster-Moore.

Leslie Fisher, who graduated from the University of Kansas and works with the College Year in Athens program studied abroad in Greece for a semester in 2008 and said she had the time of her life.

"I had heard that it really changes your perspective on things and it did," said Fisher. "The greatest part was that I had mastered a foreign city and made local friends."

Jennifer McKernan, who studied abroad in Ireland, Afric, and Greece and works with the American Institute for Foreign Study (AIFS), said that her experiences helped her to get the job that she wanted to and complete her degree on time.

"Studying abroad really enhanced my career path," said McKernan. "Because I was majoring in international education, it gave me a big advantage when I wanted to get a job."

McKernan also said that no matter what a student's major is, the study abroad option should be considered.

"Studying abroad looks excellent on your resume no matter what field you want to go into," said Kernan.

Dan Pelter can be reached at dpelter@student.umass.edu

Record 16 UM students receive prestigious Gilman Scholarships

University of Massachusetts undergraduate students received the fourth-largest number of Gilman Scholarships for study abroad of campuses nationally.

This semester, 16 UMass students were awarded the scholarships for fall 2010. Last spring, 14 undergraduates at the University received Gilmans.

More than 2,900 applicants from 381 public and private universities across the nation applied for the scholarships, with around 1,000 receiving the study abroad funds. The national acceptance rate stood at 34 percent, while 42 percent of UMass students received the awards, according to a Tuesday News and Media Relations release.

"This is truly exciting news," Frank Hugus, vice provost and director of UMass' international programs office said in the release. "The campus community can be very proud of these 16 excellent students for their success in winning Gilman Scholarships. We know that they will benefit tremendously from their studies overseas," he continued.

The destinations UMass' scholarship-winning students will travel include: Thailand, Brazil, the Dominican Republic, Uganda, Morocco, the United Kingdom, Denmark, Japan, Ireland, South Africa, China, Turkey and Italy.

The Benjamin A. Gilman International Scholarships assist students who wish to study abroad with large financial need and fund students who wish to travel to non-traditional areas. Funding ranges from $3,500 to $5,000 per semester, according to the release. According to the Gilman Scholarship website, the average package is approximately $4,000.

Applicants are evaluated based on financial need, desire to travel to a non-Western region and caliber of the essays they submit with their applications.

When students return to their home campus, they are required to participate in a service project to foster enthusiasm for study abroad.

The scholarship is sponsored by the U.S. Department of State's Bureau of Educational and Cultural Affairs, and has been in existence since 2001. The program is overseen by the Institute of International Education.

In addition to the Gilman Scholarships, selected students may also apply for a Critical Need Language Supplement with funding of $3,000. Last year, 50 applicants received the supplements.

Study: over-exposure to research is baffling

University of Chicago doctors find contradictory warnings of studies confusing to general public

By Matt Rocheleau
Collegian Staff

For more than a decade, numerous studies into whether cell phones cause cancer have yielded results that cover the spectrum of possible conclusions. Even a recently released study, the largest to date on the issue which experts had hoped would provide the most decisive evidence yet, was, ironically, inconclusive. This ongoing struggle for researchers to come to a definitive consensus on the cell-phone/cancer debate highlights how scientific studies often send confusing, mixed messages to everyday consumers.

The idea that research study findings, especially when contradictory, can puzzle the average person is not new, and the factors most commonly attributed to that confusion have been identified in the past as well. However, this often-overlooked problem has not only persisted, it is growing due to more research studies being conducted, and more receiving news coverage, experts say.

In reality, there are "two or three major breakthroughs a year [and those deserve coverage] … but there's something [reported] about studies on the six o' clock news everyday," said University of Chicago Medical Center (UCMC) internist Dr Andrew M. Davis, who is also an associate professor at the university and, like many doctors, must critically review research studies on a regular basis.

Some of the seemingly contradictory, far-fetched, misreported and confusing study findings that bombard the public on a daily basis leave many at a loss for which are worth taking into consideration. And, deciphering which studies deserve attention and which to ignore is no simple task, but it is a worthwhile endeavor at a time when "more studies are being reported more often with less [journalistic] thought and scrutiny," said Gary Schwitzer, longtime journalist, professor and publisher of the acclaimed www.HealthNewsReview.org, which grades health news reporting by major U.S. news organizations.

Confusion over findings can stem from scientists improperly designing and conducting a study as well as from researchers – sometimes due to conflicts of interest – poorly communicating, exaggerating, or prematurely releasing their results either directly to the public or to reporters, who can further misreport the typically complicated information. And, even well-conducted, well-reported studies can be misunderstood by individuals, many of whom are fascinated with health-related studies in particular and may change their daily habits based on a study they heard of or read about whether that study actually warrants change or not.

"A lot of responsibility falls on the people [both scientists and journalists] reporting on studies," said Dr. Shantanu Nundy, an (UCMC) internist and author of the recently-published book "Stay Healthy At Every Age." "And, it also falls on our own education. We all kind of have to teach ourselves. As unpopular and unsexy as it is, we have to train ourselves to look at this information and process it for ourselves."

What has heightened the confusion over research findings is an ever-growing number of study-related stories being covered by news outlets online, in print and on TV.

The rise in news coverage could be due to a number of factors, most notably media companies strapped for cash and looking for quick, eye-catching stories, which press releases about studies can often provide, experts say, coupled with a decade-plus long surge in research spending.

After doubling over 10 years time to $95 billion in 2005, research spending in the medical field alone hit a record-high $101 billion in 2007 in the U.S., according to the American Medical Association.

"Consultants tell news organizations that consumers love health-related news," and consumers do, which exacerbates the problem, said Schwitzer. "We flood them everyday with this fire hose of information … [but] we are often promoting far too premature studies that far too often don't pan out. The earliest and most immature form of research news that gets covered far too often are at science talks," where study results are often announced and discussed.

Contradictory studies, like those often seen in the recently rehashed, decade-plus old debate on cell phones' potential to cause cancer, can heighten skepticism about the merit of studies in general.

In June 2002, multiple news outlets reported on a U.S.-based study which found "no increase in any type of tumour in rats exposed to mobile phone radiation," according to a BBC News article. One week prior, findings from a major study, out of Finland and conducted on humans, "suggested radiation from mobile phones caused changes in the brain," the article said.

Three years later, a different group of researchers tested humans and found that using a cell phone over a 10-year span does noticeably not increase the risk of cancer. The media also reported on two separate studies in 2006 and 2007, neither of which found a significant link between cell phone use and cancer risk, but both of which emphasized that determining possible effects from long-term mobile phone use would require further research.

One year later, another widely-reported study found "people who use a mobile phone for hours a day are 50 percent more likely to develop mouth cancer than those who do not talk on them at all," according to a story in The Daily Telegraph. And, in the most recent episode of the already-complicated cell phone-cancer saga, highly-anticipated results released on May 17 from the largest study thus far on the cell phones and cancer topic came back inconclusive – raising even more questions than answers.

Dr. Shantanu Nundy of UCMC believes people must inform themselves about what research conclusions to trust.

Though the extensive coverage of that inconclusive study may suggest otherwise, news companies tend to have a bias for publishing stories about studies with positive findings, or findings that show some sort of link between two things, Schwitzer said. Whereas studies that may be more accurate and better designed, but find no relationship, are often brushed aside by editors as boring and not reported on.

Standards for how studies are conducted are becoming stricter, but poorly designed studies are still fairly common, said Davis, and he noted that often some the most poorly designed studies garner the most public attention because of their "breakthrough" or bizarre findings.

"I think the dangerous thing is when people see a one-sentence line and change their life drastically because of it," Nundy said.

Among the most common reporting mistakes, journalists often confuse association with causation, added Schwitzer, who offers study-comprehension tips for journalists and everyday readers alike on the HealthNewsReview site.

Clinical trial studies, Nundy said, tend to offer the best results, followed by prospective and then retrospective studies. But, during a phone interview, after scanning over a news article on the recently released, inconclusive cell phone cancer study, Nundy could not immediately identify which of the three categories the study falls under. Only when he clicked a link to an online copy of the actual study conducted by the Interphone International Study Group could he determine it was a retrospective study.

"That's the problem though, you can't be expecting people to look at this stuff," and know what it all means, he said.

When analyzing newly released surveys, it's good to give reading the actual survey a shot, though that may look like "undecipherable jargon" to most, Nundy said.

"No two studies are the same. A lot of it comes down to trust. Instead of believing what you hear at the barbershop, you have to double-check your sources," he said. "Before you throw your cell phone out the window, check two or three other sources."

A reliable, free source Nundy tells his patients to use is the online Health On the Net Foundation, which allows users to search for information on various health-related topics through Web sources that must meet strict standards for ethics and trust to gain HON certification.

To assess the credibility of study results, Davis recommends consulting a set of conditions called the Bradford-Hill criteria – which he and other doctors use – that must be met in order to determine causation.

It is also important to know not only who, in detail, the subjects of the study were, but also when and where it was done, the study's size (larger generally leads to a lower margin of error), and who conducted, wrote and funded the study.

Studies about a given product are often funded by non-independent, for-profit companies within that industry, which can raise questions about whether the study and its findings were influenced by commercial motivations.

According to an article in the February issue of GQ Magazine, a biophysicist's review of 350 studies discovered about a 50/50 split between those that found reason to believe cell phone-emitted electromagnetic radiation causes adverse biological effects and the studies that found no reason to conclude mobile phone radiation can be harmful. However, when the studies were divided into those that received funding from cell phone companies and those that did not, only 25 percent of industry-funded studies showed effects, compared to 75 percent of independently-funded studies.

"The biggest dilemma in recent years has been concerns over conflict of interest," Davis said, but added that due to increased focus on the problem, the rate of such instances has been declining as most reputable journal publications now require full disclosure of any potential conflicts of interest in order to be published.

Gary Schwitzer, publisher of HealthNewsReview.com, says it is critical to be discerning in taking stock in studies.

If a drug-company funded study is released, "I look at it twice, but excellent people can do drug-company funded studies," Davis said.

Nundy agreed.

"Just because [industry-funding] is there doesn't mean you throw the study out altogether because studies can be extremely expensive," he said, adding that industry-funded studies tend to include larger samples, which could make their findings more credible.

Nonetheless, "It seems like corporations rule this country to some degree, and I wonder if there is some suppression," of information by companies worried about how certain study findings could negatively impact their bottom line.

Yet, even the most well-designed studies with the most definitive results that have backing from other, independent research do not necessarily convince people to change potentially bad habits.

For example, would a definitive 'yes' to the do-cell-phones-cause-cancer question even matter?

"The immediate ability to call people and text people is quite a pull. People that use cell phones frequently probably don't even think about putting them to their ear," said Ian Newby-Clark, associate psychology professor at the University of Guelph in Ontario, Canada, and owner of an advice blog about changing habits. Whether the routine act is cell phone use or something else, "getting around immediate positive benefits can be quite challenging."

To get over potentially bad habits, it takes more than just the "grandiose, abstract plans" many people start with, he said.

Because stopping a habit will likely leave a need unfulfilled – making it harder to ever permanently quit – Newby-Clark recommends people establish an alternative activity to meet that need and create plans for how they will meet that need when the specific situation arises. From there, repetition is key.

For doctors, it can be especially challenging, and at times disheartening.

"A lot of times, people will say 'OK, doc, I'll do that.' Then they go back home and don't do it," said Nundy. "I'd rather have people challenge me and discuss it with me than that … But, I just keep saying it over and over again and one day someone is going to walk in and say, 'you know what, I'm going to give it a try.'"

Hanson discusses the choice to pull out of digital society

CPPA from page 1

connectedness holds important implications for public policy and Hanson believes they have been overlooked.

"We think that this [connectivity] is a natural evolution and that the answer to all our problems is more technology," commented Hanson on popular public policy viewpoints on technology. "[but] sometimes we're not asking all the questions."

The CPPA and the National Center for Digital Government & Science will be hosting four additional seminars through out the semester. The next event, titled "Nanotechnology & Society: Emerging Organizations, Oversight and Public Policy Systems," will be held at 8 a.m. Friday, Sept. 24, registration is required.

Max Calloway can be reached at maxcalloway@gmail.com.

Communications professor Janice Hanson spoke Monday in the first CPPA Faculty Colloquim lecture on individuals who choose to withdraw from digital life.

UMass Ph.D. candidate Miller wins American Society of Biomechanics Young Scientist Award

AWARD from page 1

test subjects. The model helped to determine that runners with higher strain in their legs were more likely to develop ITBS later on.

Miller is currently waiting on his Ph.D. to come through while he finishes working on his dissertation, focusing on mapping out his research into a presentation format. He will also continue to work on other projects dealing with his specific focus on human physiology while running; whether an unnecessary property of movement is eliminated in the process, or trying to answer questions having to do with the workings of power and muscle in the body.

While answering a request for an interview via email, Professor Caldwell revealed what could be construed as his personal opinion on the matter of Miller's work ethic and worth. "Ross is an outstanding student and real credit to UMass," said Caldwell.

Tim Wallace can be reached at timothyw@student.umass.edu.

UM kinesiology professor Graham Caldwell advised Miller.

"If we don't believe in free expression for people we despise, we don't believe in it at all." -Noam Chomsky
WEDNESDAY, SEPTEMBER 22 , 2010 EDITORIAL@DAILYCOLLEGIAN.COM

Sept. 11 calls for action

Catherine Whelan

September 11th is a curious day. Maybe you woke up with the chilling memory, maybe you didn't realize the day of importance until you saw the flags at half-mast, or wrote the date on your notes, but the day itself haunts.

As we all take some time to reflect on the days following Sept. 11, I can't help but notice that nine years passed the whole day still rings in our collective consciousness. Although the actual events feel vague and hazy, the aftermath – the ripple effects – still wash over our daily lives, in more and more complex and subtle ways.

We all know how the president, the military and the media have imprinted their separate effects, but the fact remains that our courts still lack a legal framework to respond to the continuing threats of terrorism and the networks that support it. While it's true that neither the Bush nor the Obama administration have managed to develop a cohesive counterterrorism strategy, our nation's judiciary have basically failed to do anything at all.

Two weeks ago, the D.C. Circuit Court of Appeals rejected Ghaleb Nassar al-Bihani's petition to rehear its January decision upholding his detention at Guantanamo. The specific facts and justification for his detention aside, the decision exemplifies an emerging tradition of judicial deference to the president when America is under direct or perceived attack. Anyone who has had more experience with the law than the occasional "Law & Order" episode can tell you that the judicial process is long, arduous and not exactly suited for the kind of immediate action terrorist threats tend to require.

No one would argue that the War on Terrorism is a traditional war.

But in the 234 years since the Constitution was signed, the courts have played an imperative role in demanding that we continue to measure ourselves by the ideas and ideals imbued in that Constitution. So why, in at a time when our ideals are under attack, haven't the Courts gathered themselves to protect them?

No one would argue that the War on Terrorism is a traditional war. It isn't even a traditional name. It seems like, without the usual framework to dictate action, the courts have chosen to all but abdicate their role in the process. While Congress remains the most conspicuous example of the absence of rationale discourse and reasoned debate, the absolute silence of the judiciary is most troubling. As the one body of government that remains constant in the tumultuous political climate, the courts should be positioning to help create and standardize their new role, not run away from the possibility of it.

"Constitutionally the court plays a monumental role in checking and balancing the power of the executive and of Congress. As events like Abu Ghraib, more and more reports of torture and indefinite detention and extraordinary rendition emerge, it is clear how this abdication is corroding our value system. We hold ourselves up as a global example and advertisement for a supposed rule of law and the judiciary has an obvious and fundamental role in ensuring the protection and implementation of that rule. Without proper and fair judicial review, the executive and the legislature go unchecked to sometimes disastrous results. Just ask the 120,000 Japanese-Americans interned in the aftermath of Pearl Harbor, or the aliens unjustifiably and unconscionably deported in the aftermath of the Palmer Raids.

Courts apply our constitution and domestic law during peacetime, and they must equally apply the law of war to conduct during wartime. If the courts neglect to check executive power, even in times of national crisis, we sacrifice not only our own political value system, but more crucially our right to consider ourselves a fair and legal democracy. Without the courts, rule of law becomes rule of force.

Even wartime does not preclude a total loss of judicial responsibility. Yes, a country at war should be granted special rights and privileges, but with rights come duties; with privileges come obligations. The use of force should be used in accordance with the principles of our nation and wartime. It should be the courts that make sure we are holding ourselves up to these standards.

The consistent deference has left the executive free to exercise its Constitutional rights and privileges with no concern about the obligations. Our system of checks and balances should not falter at the first sign of conflict, and should certainly not still be faltering after nine years to get used to the idea.

Executive action in the absence of any independent checks and balances opens the door to violations of the individual rights upon which our country was founded and for which the judiciary is supposed to speak.

There's an apple for that

Matthew Robare

"Would you like to win a free iPad?" the pretty girl in the Auxiliary Services T-shirt said as I walked into Franklin Dinning Commons two Saturdays ago.

I'm going to be honest. I'm a man and I do pay attention when pretty girls offer me free high-end consumer electronics. Right now, nothing is more high-end than the iPad, unless you can cough up the dough to afford a real jet-pack. At $86,000, it's an awful lot of coughing, especially since it runs on premium gasoline at the rate of 10 gallons per hour – and its tank only holds five. Also, buying one will probably make your insurance higher.

What it amounts to is that the iPad, while comparatively cheap at $400 and pretty darn desirable, is still not an impulse purchase for most of us, so if I can get one for free I'll jump at it. As it turns out, there was a catch: I have to go to Canada and bring a parcel back across the border without customs discovering it.

No, but the catch is something of equal challenge - the Director's Challenge.

Ken Toong, Executive Director of Auxiliary Services, had a goal: to double consumption of fruits and vegetables at the University of Massachusetts. This year, he had a plan. In the Director's Challenge, students keep track of how many fruits and vegetables they eat over two different weeks with the goal of doubling the amount for the second week. The people who manage it get entered to win the iPad.

"We want to challenge students to eat more fruits and vegetables," Toong said. He said that people should be getting nine portions a day, but most people only get three or four.

Apple's latest toy is a marvelous incentive and there is nothing like an incentive to motivate people. I know that I barely signed up before I was taking a helping of roasted vegetables and a portion of rice to go along with my generic meat-like product with salt and grease.

And instead of a second helping of generic meat-like product, I had a very nice salad instead, although it wasn't as good as possible because the salad bar had run out of lettuce by that point.

I will admit that I have had trouble losing weight and eating well in recent years. I am quite a rotund journalist and even if that does put me in illustrious company, it's still not very healthy. An incentive, especially something I really want like an iPad, was a great idea to encourage me, at least, to start eating fruits and vegetables.

Toong said that before they began the promotions, Dining Services spent $1.9 million on produce and now they're spending $2.75 million.

People have an inertial quality to them, we go on doing what we do—even if we know we need to change – and we'll keep on doing it until we die or something external happens. Like an iPad contest. Or a Zumba center. Some people are definitely self-starters. I like to think of them as the kind of people who wake up at 5 a.m., don't need coffee, write best-selling self-help books and advertise fitness machines or mutant exercises like those "TaeBo" videos or infomercials. Naturally untrustworthy people, in other words.

When I talked to Toong last Thursday, he said that 788 students had registered for the Director's Challenge, so my odds of winning an iPad are one-in-788. In proportional terms the concept really hasn't attracted a lot of people. Since there are about 21,000 undergraduate students on campus, it's a bit surprising that so few students are participating.

Promoting fruits and vegetables isn't exactly a new thing for Dining Services, either. The events every year where they promote apple or blueberries or even asparagus and squash have been part of this drive to increase consumption. Toong said that before they began the promotions, Dining Services spent $1.9 million on produce and now they're spending $2.75 million.

I wonder if promoting fruits and vegetables is really worth it. Clearly they're not popular even after all the ad campaigns through all the years. Partially I think it's because most of the vegetables we're exposed to in our formative years don't taste good at all. I mean canned peas? Lima beans taste like sour and soggy cardboard.

A well-made eggplant parmesan can make a lifelong carnivore consider vegetarianism. Roasted carrots with some spices, corn on the cob and rice are all wonderful vegetables. But as side dishes, not entire meals. A chicken wrap from Sunset Strips or a Pita usually has lettuce, tomato and good stuff like that.

We get plenty of fruits and vegetables just not in the form we did when we were four. That still doesn't mean that ketchup is a vegetable, but we're not exactly being deficient in the good food department.

I'm still going for that iPad, though.

Matthew M. Robare is a Collegian columnist. He can be reached at mrobare@student.umass.edu.

What are you celebrating?

Will Syldor

In my four years at the University of Massachusetts, I have seen many instances of celebration. I have seen groups of people cheering for sports wins, political victories and people celebrating birthdays, anniversaries and so on. Yet sometimes I wonder why some people are so jovial, so accepting, of certain forms of remembrance and celebration. When people dress up as members of the Ku Klux Klan for Halloween for example, in light of the history of that organization being synonymous with the terrorism of black communities for decades, I wonder what those people in those costumes are celebrating.

When people dress up in Indian wear, with feathers and war paint on, sometimes banging drums indiscriminately - what really are these people celebrating? Do they celebrate in light of the extensive and present process of the near (and sometimes complete) genocide and colonization of hundreds of tribes and city structures all across the Americas? Or, do they celebrate a generalized image in which we don't ponder or question enough?

When a group of white men drive by me in a car, yelling the 'n' word, and then laugh as they continue to drive by – what are they celebrating?

Their actions align with the history of people who look like me being terrorized by people who look like them. These celebrations are to be questioned.

When citizens celebrate Columbus Day, immortalizing a man who succeeded in committing genocide against the island of Hispaniola, now Haiti and the Dominican Republic, a man who very intentionally enslaved and tortured that population, what are they celebrating? A sentiment, or deep-rooted history?

When students on this campus support things like: A Qur'an burning, the rejection of building an Islamic Cultural Center a block from Ground Zero, the notion that Islam is a false and terrorist religion, the notion that Palestinians are less deserving of human dignity than Israelis, subtly celebrated events, organizations, ideas, moments in history that have been moments of pain for many histories and people. Instead of critically analyzing and engaging with these reciprocal and permanently interwoven differences, many times they are downplayed and ignored. Students of color are left either tokenized, isolated or generally silenced for bringing these histories, contradictions or intersections forth.

We reside on a diverse, yet predominantly white campus, with diverse experiences, families, religions, histories and overall cultures.

I believe this culture contains great amounts of misinformation. These ideas support that while people of color are being continuously harassed by various and continued forms of racism in job settings, educational settings and personal and professional lives, it somehow the idea of women and girls with hijabs or burqas being somehow weaker than women without. What are we ultimately supporting?

I ask these questions because we reside on this campus together. We reside on a diverse, yet predominantly white, campus with diverse experiences, families, religions, histories and overall cultures. Yet there are continued acts of overtly and subtly white people perpetuating and encouraging this dynamic.

This racism only exists when people of color and very loud racist folks are in the room. The KKK costumes, blackface costumes, Indian costumes, Geisha costumes, holidays supporting mass murderers and those racist jokes every now and again are not grounded in any kind of historical pattern or malice at all, but are more a motiveless playfulness with these cultures or historical moments.

The everyday "forgetfulness" or "lack of experience" that white people feign as a reason for not talking about the very segregated and exclusionary realities that many of them live, says nothing about white people themselves but the essential nature of this campus' dominantly white culture.

There's very little talk about our differences in a way that does not minimize or ridicule the severity, richness or fullness of our respective histories and present realities.

James Baldwin wrote, "American history is longer, larger, more various, more beautiful, and more terrible than anything anyone has ever said about it." He also wrote, "I imagine one of the reasons people cling to their hates so stubbornly is because they sense, once hate is gone, they will be forced to deal with pain." What if white culture was a nice way of saying mass erasure, mass dilution and mass denial rallied around the central cause of forgetting or playing down what was and is being done? I think it's important to ask ourselves: what would that look like? What, in that type of setting, would you be celebrating?

Fritz Lang's "Metropolis": 80 years later–and still ahead of our time

By Austin Dale
Collegian Correspondent

Let's talk about a film. The story is not terribly complicated. It concerns two races. A lunatic steals the resources of a group of people for power and financial gain and his civilization comes to live off the abused.

One man, closely linked to the abusers, finds himself made into an unwilling mediator between the two groups and unexpectedly falls in love with a beautiful woman he meets from the opressed. It builds to a satisfying conelusion that destroys a lot of very expensive sets in explosions and ends with, more-or-less, a happy ending. Wrap it all up with references to antiquity and the Bible. The film is a massive critical and commercial success and will be remembered forever.

No, I'm not talking about "Avatar." I'm talking about Fritz Lang's "Metropolis," the film without which no modern science-fiction film could be made or even conceived. Lang literally invented the genre that has given us "Star Wars" and "Blade Runner," and he did it way back in 1927 Germany with a great deal of money, a singular and almost inconceivable vision and all the special effects he could invent. Over 80 years later, we're still talking about it and still marveling at it.

It's the story of an urban dystopia in the distant future. Joh Fredersen, the city's dictatorial leader and the wealthy enjoy a life of excess and privilege, living amid skyscrapers, passenger planes that fly level with the seemingly weightless elevated highways and exclusive rooftop Edens' filled with beautiful maidens for personal entertainment.

Underneath this paradise is the city of the workers, a labor camp at which thousands, who never see the sun, slave day and night at monstrous machines to keep the city running. Your wildest imagination could not possibly describe the sets that were built for these locations. Freder Fredersen, the leader's son, discovers the truth about the city and decides to trade lives with one of the workers. While below, he meets Maria, the beautiful Messiah, preaching to the workers and advocating for mediation with "our brothers from above." Freder takes up her cause and a maddening, psychotic sci-fi drama unfolds.

The entire second half of this film is chock full of revelation, action and drama, the likes of which cannot be matched by modern science fiction films. I won't say this hasn't been attempted with some great vision in the past 40 years by great filmmakers, but not even landmarks like "Star Wars" can compete.

"Metropolis", however, is a singular example in film history. Nothing of its scope had ever been attempted and nothing from its time matches it in terms of ambition, innovation or, for that matter, finances. Weimar cinema turned out many Expressionist masterpieces, but most of the films, directed by greats like Murnau and Pabst were made on fairly standard budgets. The non-realist sets, melodramatic performanees and exaggerated light and shadow of films like Lang's "Die Nibelungen" or Murnau's "Faust" were the era's greatest additions and led to the creation of entire schools of film theory.

With "Metropolis," Lang managed to mix the vast innovations of Expressionism with the epic scope of D.W. Griffith. "Metropolis" has a complicated history. The complete version was screened only once, at the Berlin premiere in 1927. Too long for commercial theaters of the era, the film was hacked to pieces and by the time it had made its way to America the next year, the film had become disjointed, illogical and important scenes were replaced with interfiles.

The original premiere version was lost and it was believed that a quarter of the film would be gone forever, ranking the film with only the lose complete cuts of Erich von Stroheim's "Greed" and Orson Welles's "The Magnificent Ambersons" as the most-searched-for incomplete films. The cut version continued to be screened, gaining a tremendous reputation and inspiring filmmakers around the world for decades. Now, for the first time since its premiere, the complete version is being released throughout the country, thanks to archivers in Buenos Aires, of all places, who discovered a complete version in fair condition. Like "Metropolis" itself, the find is an unprecedented miracle.

Austin Dale can be reached at aadale@student.umass.edu.

"Metropolis" was a meticulously conceived, painstakingly constructed masterpiece of the sci-fi genre. Since its release, its influence has not wavered for directors of both genre films and otherwise.

"Bran Nue Dae" is a musical hit

By Roger Moore
The Orlando Sentinel

Maybe the world didn't realize it needed a giddy Aussie Aboriginal High School Musical, but here it is. "Bran Nue Dae" is so cute and offkilter you may wonder how we ever got along without it.

Set in 1969 Western Australia, it's the story of Willy (Rocky McKenzie), an Aboriginal lad whose mum has this idea that he's going to make something of his life — become a priest. That's why she sends him to boarding school in far off Perth. The German-accented headmaster, Father Benedictus (Geoffrey Rush, a hoot), agrees.

But back in Broome, Willy has other thoughts — impure thoughts. Mostly about Rosie (Jessica Mauboy), his sexy, curvy not-quite-girlfriend. Willy is just about to get up the nerve to act on his impulses when A) she is seduced by a guitar player into a lead singing gig in a bar band and B) Willy's shipped back to school.

We've tasted a little sample of the music of this world up till now — a hearty hymn in church, a little dirty dancing and honky tonk crooning. But it's only when we check in on the stern surroundings of school that the magical realism kicks in. When they aren't being paddled as punishment, the boys are facing racial condescension from Father Benedictus and his staff. And they've had quite enough.

"There's nothing I would rather be, than to be an Aborigine," they sing and dance. And that's Willy cue to run away, back to Broome and home and Rosie.

Director Rachel Jenkins opens up this 1990 Aussie stage musical sensation when she takes it on the road. Willy stumbles across a hobo who happens to be his Uncle Tadpole (Ernie Dingo), who sings a little country blues (he sounds like Merle Haggard) — "Listen to the news, talkin' 'bout the blues of our people.'"

Tadpole introduces Willy to traveling on the bum — conning their way cross country with a couple of unsuspecting hippies, who do a folk-flavored number.

Oscar-winning "Lord of the Rings" cinematographer gives this journey a glossy sheen — glorious, gaudy moonlit nights in between golden sun-burnt days.

McKenzie's an appealing lead and sets off tentative sparks with the sultry Mauboy. Dingo and a way over-the-top Rush are the comic highlights here. It's not so much a sharp, riotously funny film as a rambling, silly one — with toe-tapping tunes (Rosie covers "Stand By Your Man") and impishly out of place production numbers. Aboriginal football players douse themselves in paint and break into a Greek folk dance — that sort of thing.

Yeah, it probably plays better in Australia, where the very idea of a musical in this setting with this racial backdrop is a stitch. It's a little racy for our "High School Musical" set. But "Bran Nue Dae" (say it out loud) will play anywhere fans like a musical so cute you want to pinch its cheeks.

Cast members of "Bran Nue Dae" frequently break out into joyous song-and-dance with little-to-no-warning. This film calls for a resurgence of Aboriginal pride.

Sheryl Crow tops the charts with pop-music triumph

By Kate MacDonald
Collegian Staff

"100 Miles from Memphis," the seventh studio album from rock/pop icon Sheryl Crow, takes its fans in a new direction-back home. The singer has taken a more soulful approach to her music in accordance with the music she knew growing up.

Crow was raised in Kennett, Miss., a small town approximately 100 miles from the hub of music, Memphis, Tenn. She decided to use horns, jazz pianos and the expertise of some of the biggest names in the music industry in this venture to return to her roots.

"100 Miles from Memphis," while a great album, doesn't have the mega hit status of the other albums Crow's known internationally for. It's no "Tuesday Night Music Club," her debut which unveiled "Can't Cry Anymore" and "All I Wanna Do," nor is it on the same level as her self-titled EP, where her popular singles "Home" and "If it Makes You Happy" can be found. As a result, it will probably not receive the same notoriety.

But this new album is quite good in its own right, and its chart performances have been reflective of Crow's songwriting and singing talent. "100 Miles from Memphis" was Billboard's second highest debut, beginning at No.3 in the Top 200 category.

Crow opens the album strongly with "Our Love is Fading," which sounds like it has the caliber of an old Crow hit. Although it can seem quite repetitive and overlong, it's probably the best tune on the CD.

"Sign Your Name," the first of Crow's three cover songs, provides a new take on the 1980s Terence Trent D'Arby song. Memphis native Justin Timberlake provides the solo background vocals- a lucky addition, as he happened to be in the studio at the same time as Crow and was interested in collaborating. The pair's bluesy voices intertwine to form a great R&B groove.

Crow also joins forces with Citizen Cope on his hit "Sideways," a melancholy but pretty song about unrequited love. As the two artists have similar husky voices, it sounds very close to the original. But, instead of being just another cover, the addition of a woman singer brings another side of the story into the situation. Anyone listening to this will realize that this song was always meant to be a duet between the two artists.

The last of Crow's famous cover songs is the wildly popular Jackson 5 smash "I Want You Back," done as a tribute to the late Michael Jackson. This version is currently being used by ABC to promote their fall lineup.

It's not a well-known fact, but Crow actually got her start in the music business as one of Michael Jackson's main background singers during his 1987 "Bad" tour.

Dedicated to him- the liner notes read "To Michael with Love"- Crow sings the song with a high-pitched lilt not unlike Jackson's. She probably would've done better had she

See MILES on page 7

Sheryl Crow, seen here performing at Eric Clapton's Guitar Crossroads Festival this summer, released what turned out to be Billboard's second highest debut with her new album "100 Miles from Memphis."

"100 Miles..." is Sheryl Crow's musical triumph

CROW from page 6

chosen a different Jackson 5 song, but a decent try nonetheless.

"Summer Day" is the first single off the album, and hit No.2 on Billboard's Adult Album Alternative chart. Her official website hails it as "simple and positive." It's one of those tunes you would sing along with for a lazy afternoon pick-me-up.

One of the other gems on "100 Miles from Memphis," "Peaceful Feeling," sounds like a throwback to the light-hearted Motown era. An instant mood-changer, "Peaceful Feeling" showcases Sheryl's wonderful, husky voice.

Most of the other songs on "100 Miles from Memphis" are definitely worth a listen. Thanks to her songwriting talents, production team and guest appearances by Timberlake, Citizen Cope and Keith Richards, the album has done quite well. Though unlike her other records, this album is a testament to Crow's talent- she can adapt her style, yet still produce hits.

In an interview with The Boston Globe, Crow confessed that, "It seemed like a great time to do something soulful and sexy and more driven by the music." She definitely succeeded and it currently seems that in the music business, Crow can do no wrong.

Kate MacDonald can be reached at kaitlynm@student.umass.edu.

Sheryl Crowe has dedicated her new album to Michael Jackson, and in fact included a cover of his classic "I Want You Back."

Pierce breaks school-record with 200 yards

ROBERT HANLON
COLLEGIAN CORRESPONDENT

The Delaware football team remained undefeated with its third win of the season on Saturday over Duquesne, 30-6, on the strength of a stellar performance from running back Andrew Pierce.

Pierce led the Blue Hens on their ground attack this weekend, rushing for a total of 200 yards and two touchdowns on 16 carries. His performance marks a new single-game rushing record for a Delaware freshman.

Pierce's efforts earned him the Colonial Athletic Association Offensive Player of the Week and Rookie of the Week honors.

This weekend Pierce also became the first Blue Hen to rush for at least 100 yards in his first three career games.

The majority of Delaware's 448 yards of total offense came on the ground with 373. Freshman quarterback Trevor Sasek passed for 75 yards and one touchdown on a 23-yard pass to Phillip Thaxton in the fourth quarter.

The Dukes offense put up a good effort moving the ball inside the Delaware 15-yard line on three occasions, but was unable to score any touchdowns. The Blue Hens defense has yet to allow a touchdown thus far this season.

CAA Notebook

RAMS GET COMEBACK WIN

After trailing for the majority of the game, a fumble return in the fourth quarter gave Rhode Island a 28-25 win over New Hampshire on Saturday.

The 39-yard fumble recovery for a touchdown by James Timmins came with two minutes, 11 seconds left on the clock and gave the Rams the victory. The ball fell loose after Victor Adesanya sacked quarterback R.J. Tehan late in the fourth quarter.

The Rams entered the fourth quarter trailing the Wildcats 18-13, having not led the game sine the score was 3-0 early in the first quarter.

Rams quarterback Steve Probst rushed for 98 yards and one touchdown on 17 carries while also passing for 78 yards and a score.

Toman also put up a strong performance for his team, passing for 284 yards and two touchdowns on 31-of-44 attempts.

On the final drive of the game, Toman threw an interception on third-and-11 which was picked off by Matt Urban, his only giveaway of the game that prevented him from leading his team to victory.

The leading receiver in the game was Wildcats senior Terrance Fox, who caught a personal-best 11 passes for 118 yards and two touchdowns.

NOVA FLATTENS TOWSON

Villanova's first conference game of the season on Saturday resulted in a 43-7 romping of Towson behind the leadership of quarterback Chris Whitney.

Whitney led the way for the Wildcats, completing nine of his 12 passes for 115 yards and two touchdowns while rushing 14 times for 44 yards and two scores.

The first points for Villanova came by way of its defense after forcing a safety with 7:46 remaining in the first quarter. It came shortly after Whitney scored on a 9-yard run to put his team up 9-0 through the first quarter.

The big quarter for Villanova was the second in which they scored 27 unanswered points to put themselves up 36-0 at halftime. Whitney threw both of his touchdown passes that quarter, including a 22-yard pass to Dorian Wells and a 17-yard pass to Angelo Babbaro.

The Villanova defense held the Tigers to only 180 yards of total offense throughout the game and only 17 yards on the ground.

The rushing game for the Wildcats was fairly balanced with five different players receiving at least six carries. Senior Aaron Ball racked up the most yards with 100 on eight chances.

Towson's only points of the game came with 9:36 left in the fourth quarter after a 56-yard pass from quarterback Bart Blanchard to receiver Hakeem Moore.

Robert Hanlon can be reached at rhanlon914@gmail.com

UMass looks to extend success at Rudd Field

SOCCER from page 10

UMass' counterattack offense may be in trouble when it faces off against the Catamounts as the neighbors to the north have allowed five goals on the year, four of which have come in the opening 45 minutes. The Minutemen have struggled in the opening half as of late, going scoreless in the first half of their past three games.

Nevertheless, UMass has scored six goals so far in 2010, compared to the three it scored in the first five matches of last year's campaign. In the first five games of 2008 and 2007, the Minutemen scored six and four goals, respectively.

Five players have found the back of the net for UMass, including Hellah Sidibe, Stuart Amick, Bryant Craft (two), Brett Canepa and Tyler Cleverdon. Sidibe, Canepa and Cleverdon all scored their first goals for UMass this past weekend.

While UMass bounces between Chris Piekos and Shane Curran-Hays for the starting position between the posts, Vermont goalkeeper Xan Rousselle has started the majority of the games this season. Rousselle, a graduate student who played previously at Quinnipiac, boasts a 0.52 goals-against average with 26 saves so far this season.

The Catamounts enter Rudd Field on a four-game unbeaten run since losing their opening contest of the 2010 campaign. Vermont first ousted Wisconsin-Milwaukee, 2-1, in a double-overtime affair before besting Presbyterian (2-1) and Cornell (4-0) to claim the Nike Fall Classic. The Catamounts most recent contests include a pair of draws to Colgate and Lafayette.

"As pleased as I am that our expectations now are a little bit higher, we've got to step it up," Koch said. "We've got to be ready to shut them down better than the way we shut [Indiana] down."

Historically, UMass holds a slight edge over Vermont with a series record of 8-19-5. Last season, the match between both sides produced a 1-1 draw. While former Minuteman Mark DeSantis scored for the Maroon and White, then-freshman D.J. Elder produced for the Catamounts and will return Wednesday for the match.

In its first win of the season, UMass relied on its own set of freshmen to achieve the victory in Cleverdon and Brett Canepa. Both Cleverdon and Canepa saw action on Sunday against the seven-time national champion Hoosiers and will likely see playing time in Wednesday's contest.

Herb Scribner can be reached at hscribne@student.umass.edu.

Tyler Cleverdon is one of the five UMass players who has found the back of the net this season. As a freshman, the midfielder has started all five games for the Minutemen and has two total points.

THE MASSACHUSETTS DAILY COLLEGIAN

SPORTSWEDNESDAY

WEDNESDAY, SEPTEMBER 22, 2010

SPORTS@DAILYCOLLEGIAN.COM

JEFF BRASTEIN / COLLEGIAN

Junior David Key has played well as a defender for the Minutemen this season, starting in all five games. Key and the rest of the UMass defense will try to contain Vermont's Nick O'Neill, who leads the Catamounts with four goals and two assists.

UMass attack having trouble

By Steve Levine
Collegian Staff

It's been a tough-luck kind of season for the Massachusetts soccer team up to this point.

The Minutemen record of 1-2-2 can be attributed to allowing their opponents more shots and scoring opportunities, as well as bad bounces and general misfortune.

In UMass' last game, a 2-1 loss against No. 24 Indiana, three shots could've found the net had it not been for posts and a last-second effort from a Hoosier defender to kick a ball off of the goal line.

"You have to talk to the grounds crew, they got the goals in the wrong spots," UMass coach Sam Koch said following the loss. "If you move the goals over a hair we'd have more goals."

The Minutemen have six goals in five games compared to their opponents' seven. Although not a startling difference, UMass has given its opponents many more opportunities to score with 65 shots (31 on goal) compared to its own 50 shots (22 on goal).

Last year's Minutemen followed a similar trend and their season ended without a berth into the Atlantic 10 tournament.

"We just have to make sure we create more chances and eventually some [more shots] will go in," Koch said.

Anchored with a strong defense, it's evident that once again the Minutemen's success will largely depend on its offensive capability of converting on scoring chances. Last year, UMass was 6-0-2 when scoring at least one goal. In each of the six losses and one draw, UMass failed to score.

On Sept. 6, the Minutemen fell to then-ranked No. 10 Harvard, 3-2, at Rudd Field. Koch was quick to emphasize the importance of fundamentals following the contest.

"Our ball movement has to be quicker, we get caught with the ball at our feet [too much]," Koch said. "We didn't switch the field as well as we could. We have to keep attacking the flanks. We have to believe in the things we know are successful and keep doing that. If we keep doing that, we're going to win a lot of games."

Koch is happier so far this year with his team's scoring opportunities, although he knows there is room to improve. What he can't help are bad bounces, which the Minutemen seem to be getting plenty of, whether it be balls hitting posts, unlucky deflections or even creeping along the goal line.

Luckily for the Minutemen, they have plenty of time remaining on their eight-game homestand to reverse the recent misfortune. UMass is historically successful at "Fort Rudd" with a 45-24-7 record since the facility opened in 2002.

Perhaps the biggest reason to expect more goals from UMass is the offensive surge the freshmen class has provided. In the Minutemen's last two games, they have received three goals from freshmen Brett Canepa, Tyler Cleverdon and most recently, Hellah Sidibe. Contributions from freshmen will be key throughout the remainder of the season as UMass looks to add depth to its attack.

Steve Levine can be reached at slevine@student.umass.edu

Minutemen host Catamounts

UM trying to rebound from difficult loss to ranked Indiana

By Herb Scribner
Collegian Staff

After pushing No. 24 Indiana to the limit on Sunday, the Massachusetts men's soccer team strolls into Rudd Field riding a wave of confidence as it prepares to battle Vermont.

"We've got to just regroup and get ready for Wednesday's game against Vermont," UMass coach Sam Koch said following the game against the nationally-ranked Hoosiers. "Vermont's going to be a very good opponent on Wednesday, they're going to come in fired up to play us."

When the Minutemen (1-2-2) fell to the Hoosiers (3-3) this past weekend, they were victim to forward Will Bruin's offensive pressure late in the game to seal the win for IU. UMass will have to prepare itself for another high-scorer in Nick O'Neill, who leads the Catamounts (4-1-2) with four goals and two assists.

O'Neill isn't the only one getting it done for Vermont as seven different players have combined to score the Catamounts' 11 goals on the season. The offensive pressure will certainly be there for the Minutemen to undertake.

One instrumental defender for UMass is David Key. Key has been a defensive lock so far this season, aside from a slip-up which led to Central Florida's lone goal last Friday. In the match against IU, Key was all over the ball and provided a strong effort on the backline.

See SOCCER on page 8

Gap Between FBS, FCS teams closing fast

Up until the last few years, Football Bowl Subdivision teams scheduled Football Championship Subdivision teams during their non-conference schedule in order to make the road to a bowl game that much easier.

Adam Miller

Appalachian State's 34-32 victory over Michigan on Sept. 1, 2007 certainly made the BCS stop, if not pause that line of thinking. Also, in case any teams thought that game was a fluke, the upsets have only piled on since then.

Granted, most FBS-FCS matchups usually end up in favor of the FBS school (the FCS went 4-86 against the FBS), but for teams trying to compete for a bowl game, the risk is starting to be a little too high.

This year, the FCS already has six upsets against FBS schools.

In basketball, the time for smaller schools to shine comes in March. In football, however, the postseason is essentially divided up by how many people can fit in your stadium. That's why teams like James Madison treat games against teams like Virginia Tech as if it's a championship game instead of simply being grateful for the experience and the six-figure check.

Even though the game makes no difference to JMU's chances at making the postseason (which starts in December), the game in September is the only chance it gets at being a "Cinderella."

On the other hand, the FBS schools – especially the ones trying to make a bowl game – look at these games as exhibitions and most of the time, they are.

The school with more scholarships and depth overwhelms the smaller school by halftime, which gives the bench a chance to get quality minutes in these games.

This year, the FCS schools are much more difficult to beat. The most significant win for the FCS came when JMU defeated the then-No. 13 Hokies and essentially knocked the school out of the Associated Press Top 25.

Last week, Massachusetts gave the Wolverines all they could handle with a 20-point fourth quarter rally, eventually falling short, 42-37.

FCS teams in the top 10 were already beginning to get blacklisted by FBS teams for this exact reason and this season, FBS coaches across the country are vowing never to schedule an FCS team in order to avoid getting embarrassed at home.

"The dirty little secret is the top six to eight teams at our level can play with anyone," Dukes coach Mickey Matthews said to ESPN on Sept. 13. "We struggle to find guaranteed games because no one wants to play us."

Several things are happening in the landscape of college football that is making these upsets more frequent.

Aside from FBS teams overlooking their FCS matchups, the smaller division teams themselves are beginning to produce better players.

Nineteen FCS players heard their names called during the 2010 NFL Draft. The earliest selection came in the second round when the New York Jets selected offensive lineman Vladimir Ducasse from UMass.

That number should go up over the years as the FCS continues to improve.

Another factor is playing time.

Minutemen quarterback Kyle Havens probably would've had to redshirt last year transferring from a junior college had he chosen to play for an FBS school. In fact, there's no guarantee he would've seen the field throughout the remainder of his college career.

Such is not the case with UMass, where he started right away and is now arguably the best quarterback in the Colonial Athletic Association.

In fact, the transfer rules in general encourage disgruntled players to play for an FCS school. The NCAA forces players transferring within the FBS to sit out one season, but when transferring to an FCS school, players are allowed to play immediately.

Former Michigan State running back Caulton Ray is a great example of someone who took advantage of the rule. After two seasons of very limited playing time (redshirted as a freshman and had 40 carries as a redshirt freshman), Ray transferred to Western Illinois, where he made an impact immediately.

As a sophomore, Ray has 228 yards rushing on 51 carries with three touchdowns. Had he transferred to anywhere in the FBS, he would have to sit out another season and surely wouldn't be making the impact that he is now.

The bottom line is that the margin between the FBS and the FCS is much smaller than it used to be and that difference will only continue to shrink. Villanova is currently considering an invitation to join the Big East, something that would normally be a no-brainer.

However, considering the fact that the Wildcats are probably one of the best-kept secrets in all of college football – a team that dominates the FCS every year and is good enough to at least be in the middle of the pack in any BCS conference – a move to the Big East would likely ruin their mystique and they would be wise to stay where they are now.

The days where the size of a school's checkbook dictated the success of its program are long gone. As the FBS is finding out, these so called "second-rate programs" have first-rate talent.

McCreight earns A-10 honors, leads Saint Joe's to two victories

By Stephen Hewitt
Collegian Correspondent

Following a dismal 1-4 start to its season, the Saint Joseph's field hockey team seems to be back on track, due in large part to the play of forward Nicole McCreight.

McCreight locked up the award as the Atlantic 10 Performer of the Week, leading the Hawks to victories in two of their three games.

A-10 Notebook

The senior generated six points over the three games, including a goal and two assists in SJU's 6-4 victory at Lehigh last Wednesday and both goals in its 2-1 win over Rider on Friday.

After missing much of her first three seasons due to injury, McCreight has become the main contributor for the Hawks offense, mustering 18 points, eight goals and a .89 goals per game average, all of which are league highs.

SJU is currently tied for fourth place in the A-10 with Massachusetts and Richmond with a 3-5 record.

McCreight and the Hawks will look to continue their recent success when they battle Patriot League-leading and No. 15 nationally ranked American this Sunday.

Lady Eagles sweep

The Lock Haven field hockey team got its seven-game homestand off on the right foot this past weekend, notching back-to-back victories.

The Lady Eagles started things off on Saturday afternoon, hosting and defeating Colgate 6-1. Five different players were instrumental in finding the back of the cage for LHU, with senior midfielder Tonia Marie James leading the attack with two goals on the afternoon.

It was more of the same the following day as the Lady Eagles shut out Appalachian State 6-0.

Anchoring the defense for LHU is Kelly Harsh, who was pivotal in allowing just two shots on goal from the Mountaineers.

Harsh was awarded A-10 Rookie of the Week honors for her efforts on defense, as well as recording her first career goal in LHU's 2-1 victory over Bucknell last Thursday.

The Lady Eagles will continue their homestand and put their three-game win streak on the line this Saturday when it plays host to Robert Morris.

Ohio gets revenge

Last fall, Richmond was victorious in the NCAA Play-In Game, defeating Ohio and gaining entrance into the NCAA Tournament.

On Sunday, the Bobcats got their revenge, defeating the Spiders 3-1 at Crenshaw Field.

Senior forward Dani Pycroft scored the lone goal for Richmond in the second half to narrow the deficit to 2-1, but Ohio added another goal later in the half to seal it.

Richmond has struggled to find the back of the net lately, scoring just three goals in its last four games. The lack of offensive production should come as no surprise, however, with 2009 A-10 Player of the Year Sarah-Blythe Wood absent from the roster.

The Spiders have a sense of hope though, as freshman forward Christina Amorose has burst on the scene and leads the team with four goals thus far.

Richmond will hope to start turning things around this weekend as it travels to North Carolina to take on both Davidson and Duke.

Stephen Hewitt can be reached at shewitt@student.umass.edu.

COURTESY SAINT JOSEPH'S MEDIA RELATIONS

Forward Nicole McCreight scored six points over three games for the Hawks, helping them win two games to bring their overall record to 3-5. The senior was named Atlantic 10 Performer of the Week for her efforts.

University honored for 'green' initiatives

UMass placed among list which recognizes schools that are environmentally-friendly

By William Perkins
Collegian Staff

Three colleges in the Pioneer Valley have been listed among the most environmentally friendly schools in the nation, one being the University of Massachusetts. UMass, Hampshire College and Smith College have all been included in The Princeton Review's "Guide to 286 Green Colleges," released earlier this year.

The guide was compiled in cooperation with the U.S. Green Building Council, which is a non-profit organization that promotes sustainable design and construction. It does not rank colleges in any particular order, lauds the schools for the various environmental programs that they have on their campuses.

Representatives from each of the schools say that their institutions' environmental and conservation efforts are immense.

UMass Sustainability Coordinator Josh Stoffel said that there is much activity with green initiatives on campus.

"The most important thing is that the approach we're taking here at UMass around sustainability is comprehensive," he said.

Stoffel said that, through the college's Environmental Performance Advisory Committee, UMass has been able to develop expedited design guidelines for new, eco-friendly buildings on campus. Through another program that funds projects that help to upgrade utilities and infrastructure on campus, he said, the school has reduced its greenhouse gas emissions by 29 percent over the last six years.

"We have a huge commitment to energy conservation on this campus," Stoffel said.

"On any given year we're funding between one million and three million dollars worth of projects," he said.

Stoffel said UMass is also helping to reduce waste by implementing compost programs at many dining facilities on campus.

He added that the integration of an Eco-Rep program and the start-up of a similar program for just faculty and staff have also boosted environmental efforts at the school.

At Hampshire College, efforts to sustain the environment are deeply rooted in the school's tradition, said Director of Communications Elaine Thomas.

"Sustainability and the environment have been part of the ethos of Hampshire College since its founding in 1970," Thomas said.

Besides making the cut on The Princeton Review guide, Hampshire has also been ranked No. 10 on the list of the top 100 Coolest Schools in the nation by the Sierra Club's eponymous magazine. The magazine's rankings were determined from survey results of conservation efforts at schools across the country.

The school also recently received a Leadership in Energy and Environmental Design gold certification for its eco-friendly efforts in the construction of a new wing

See GREEN on page 3

In an effort to reduce the amount of energy and supplies wasted, UMass got rid of trays in the dining commons, forcing students to only rely on their plates.

New College of Humanities and Fine Arts dean welcomed

By Sam Hayes
Collegian Staff

For the first time in 30 years, Julie Hayes will not be teaching French to college students. As of Sept. 1, she became the dean of the College of Humanities and Fine Arts at the University of Massachusetts.

Hayes, an Odessa, Texas native, was associate dean to Joel Martin last year. She took over this year as Martin assumed the role of vice provost of academic personnel.

"The college was left in magnificent shape," said Hayes, giving credit to her predecessor. "A lot of good things are going on and we want to maintain that," she continued. "We want to make sure we keep hiring and ensure the sustainability of our programs."

One of the big differences of going from associate dean to dean of the college is balancing the needs of a large department, said Hayes, but everyone is very supportive."Humanities and Fine Arts has a sense of common purpose," she said.

Aside from the busyness of her new position, Hayes also says she pays more attention to investments and infrastructure and that her schedule is much tighter.

"The scheduling here is intense. There's a meeting every hour on the hour," she said "The college deserves as much as I can give it."

As a new group of Social and Behavioral Sciences and Humanities and Fine Arts department heads are meeting to discuss the merits of a merger of the two colleges, Hayes discussed the long rumored idea.

"There have been group interdisciplinary projects for years [such as Latin American studies], a merger needs to facilitate that kind of work," she said.

"If they do it, they need to do it right. It has to be done in a way that contains all the strengths of both schools."

Hayes also mentioned last year's task force, which did not conclude that the two colleges should be combined.

"This is not a done deal," said Hayes. "But it needs to be resolved… one way or the other, both [colleges] need to decide."

Hayes, born in West Texas, began school in Paris when she was six.

"I first learned how to read in French," she explained. "It was strange and magical." When she moved back to Texas she could not read English.

"I've always been interested in French, "said Hayes, who got her Bachelor of Arts degree in French and philosophy from Austin College and her PhD in French literature at Northwestern University.

"Chicago was my first major American city," said Hayes, who calls herself a "lifelong southerner."

Before coming to UMass, Hayes spent 24

See DEAN on page 2

MATTHEW HARRISON / COLLEGIAN

Hayes' new position at the College of Humanities and Fine Arts has her overseeing the classes within the college, some of which are held in the Fine Arts Center.

SGA elections next week

While the nation's mid-term elections will not take place for over a month, the student body at the University of Massachusetts will soon vote in student government elections.

This year's Student Government Association (SGA) elections will take place next Tuesday, Wednesday and Thursday for the first time ever online via the Campus Pulse application, according to Jitesh Khushalani, Chancellor of Elections. The elections feature four referenda questions, senatorial elections and House Council elections.

The four questions include one pertaining to the creation of an SGA vice president, another question regarding the shifting of SGA presidential veto authority such that motions which have not been signed within one week of their introduction become official Acts of the SGA, a third question which would change the statute of limitation for filing with the Student Judiciary from 90 days to 30 days, and a final question which would remedy a typographical error in the SGA Constitution.

This year's field of candidates for SGA Senate include three individuals seeking election from Sylvan, one from Northeast, five from Southwest North, five from Central, 12 from Orchard Hill, eight from Southwest South, and 13 candidates for Commuter Senator.

There are 18 candidates for president of House Council, 15 candidates for vice president, 16 for treasurer and eight for secretary.

SGA Elections are next week on Tuesday, Wednesday, Thursday, Sept. 28, 29 and 30, respectively.

There will still be one polling place that'll be in Campus Center Concourse, however, since the elections are online, students can vote at any point during those 72 hours via Campus Pulse.

According to Khushalani, this year's nomination process was the same as in years past, despite the move to the online format. Election results will be available Monday, Oct. 4.

Hayes has high ambition as new dean

DEAN from page 1

years teaching and chairing the language department at the University of Richmond.

"It helped me focus on undergraduates," she said about her time at the 4,344-student university. "But it is good to be in a bigger place."

Hayes came to UMass in the fall of 2006 as the chair of the young Department of Languages, Literatures and Cultures.

"I enjoyed the past four years," said Hayes about her time as LLC chair. "UMass has a real sense of community and spirit."

MARSHA GELIN/COLLEGIAN

When not taking care of classes in the Studio Arts Building, Hayes will be taking care of the future of the college.

Hayes uses her writing as her source of meditation and comfort.

"Writing keeps my sane and happy," she said. Hayes has written about French philosophy during the enlightenment period, the question of complexity in philosophical thought, the history of translation and "the way people shape themselves."

Her most recent book was "Translation, Subjectivity, and Culture in France and England, 1600-1800."Hayes has found even more comfort in the school library.

"I love sitting in reserve rooms in libraries and looking at things no one has seen in hundreds of years," Hayes said"I will never be bored here," Hayes said. "We always will have new challenges and crises. The commitment of people to this institute is wonderful. UMass has a wealth of talent."

Sam Hayes can be reached at sdhayes@student.umass.edu.

Containers such as these can be seen in dorms and throughout the campus frequently as a way to encourage students to think twice about what they throw away.

GREEN from page 1

of the college's Jerome Liebling Film Photo Center, which has been named in honor of filmmaker Ken Burns, an alumnus of the school.

Hampshire is also working on a number of other projects to cut down on emissions and energy consumption.

Smith College is making efforts to make the campus more sustainable are occurring across a number of spectrums.

Deirdre Manning, Director of Environmental Sustainability at the women's liberal arts school, said that they have been taking steps to save energy.

"We have a very aggressive energy conservation program," said Manning.

Through cogeneration facilities, which work to recycle energy, the college has been able to cut its greenhouse gas emissions by as much as half, she said. Smith, along with many other colleges in the region, also has an effective composting program up running, and has been integrating environmental studies into its academic programs.

"We've made great strides on the energy front," Manning said. "We've got a very active sustainability committee that has a quarter-representation of students."

Stoffel and Thomas also stressed student involvement in green efforts on their campuses.

"The big take home message is that the underpinning of all of this stuff that is going-on on campus is based on student involvement," Stoffel said.

"That's really the crux of what we do."

THE MASSACHUSETTS DAILY COLLEGIAN

EDITORIAL OPINION

THURSDAY, SEPTEMBER 23, 2010

"If we don't believe in free expression for people we despise, we don't believe in it at all." - Noam Chomsky

EDITORIAL@DAILYCOLLEGIAN.COM

A real community

The phrase "UMass community" gets used pretty often around here, particularly when there is a tragic loss. But as the passing of University of Massachusetts Minuteman Marching Band Director George N. Parks showed, such a thing does exist.

Though the news of the beloved director's passing was broken to members of the band late Thursday night in Cuyahoga Falls, Ohio, it took only minutes for the news to spread. Whether it was via call, text or Facebook, those even loosely affiliated with the band likely got the news that night. Because when it came to Parks, there were rarely many degrees of separation.

For those who knew him or just saw him as he led the band, the level of intensity and heart he put into each performance was easy to see. He was a man who was at home atop a scissor lift or podium with a microphone, making a connection with every single person in the audience. Everyone who has seen the band perform has a Mr. Parks story.

It is for this reason that his passing revealed a community that surpassed the University. Within hours of the news breaking, it had spread from the grieving band in an Ohio gymnasium to alumni from decades ago and hundreds of miles away.

The next day, there was an event planned at The Kinsale bar in Boston to bring together former band members in his honor. A movement to meet the band as they returned to UMass was formed as well, though the band politely asked it not to go forward.

Profile pictures were changed, clips of his speeches at the Drum Major Academy and him leading the band surfaced on Facebook and a memorial for Parks has appeared on the west steps of the Old Chapel.

The outpour of support for the band has been remarkable and unilaterally positive.

Known for booing opposing bands when they appeared, the crowd at Michigan instead applauded the UMMB and gave them a standing ovation at the conclusion of their postgame show. Even inappropriate Internet comments have been virtually absent.

Although he was a charmingly awkward conversationalist one-on-one, Parks had unparalleled charisma and the ability to inspire not only college students, but the thousands of teenagers who attended his Drum Major Academy.

His legacy, however, lives on, in the form of the George N. Parks Band Building, the perseverance of the band to perform at Michigan and in the countless memories of Parks' 33 years at UMass – whether it was his "nature appreciation moments" – the time he dove into the campus pond or one of the countless times he dangled precariously off of a high ledge, those moments live on.

It was Parks' willingness to put everything he had into the band that made such a strong community – and it shows. Like at any school, UMass continually tries to portray itself as a tight-knit community, even with a student body of over 20,000 undergrads.

But this weekend, this reaction, this man. None of it is for show.

The tragedy of this weekend showed how great a community this University could be. Unfortunately, it took the loss of the best we had to do it.

THE S.P. SULLIVAN MEMORIAL PRIZE FOR HAIKU WRITING

S.P. Sullivan

E-mail us your haiku!
The winner each week will be published and receive a prize.

A haiku is an old form of poetry from Japan, originating from around the 17th century

In English, haikus have usually been 17 syllables on three lines: five, seven and five

S.P. Sullivan, former Collegian Managing Editor, was a major proponent of the haiku.

Public ed under attack and how to defend it

Mike Tudoreanu

The University of Massachusetts is ostensibly a public institution. Yet, only 25 percent of its revenues come from state funding – a massive decline from 40 percent as recent as 10 years ago.

The rest comes from students paying ever-increasing tuition and fees, and from private companies that attach a greater or lesser number of strings to their contributions.

With the shift from public to private funding, UMass is also becoming less of a university and more of a business. The policies of the administration are increasingly being dictated by the profit motive, instead of a desire to promote education and learning for its own sake.

There has been a drive to link department funding to the amount of money raised by each department, effectively forcing them to work like private businesses.

There have also been attempts to attract more out-of-state students simply because they pay more and the administration is gradually replacing tenure-track faculty with underpaid adjuncts.

UMass is not an isolated case. Similar things are happening at other public universities across the United States, and especially in Massachusetts.

State funding shrinks, student fees skyrocket and administrations adopt corporate business practices with varying degrees of enthusiasm.

Corporations themselves are getting in on the act, being more than happy to step in and take over the services no longer provided by universities. There is a movement to privatize state universities.

Massachusetts is further along that route than most states.

According to the Almanac of Higher Education, tuition and fees at public four-year institutions in Massachusetts are 33 percent higher than the national average.

For two-year institutions, it's even worse: 49 percent higher than the national average. Financial aid per person in Massachusetts is almost precisely half the national average and funding for the most important need-based financial aid program in the state declined 53 percent from 1988 to 2008.

The fact that students pay more for less in Massachusetts than in the majority of states is bad enough; what's worse is that costs keep going up. If this continues, it is not difficult to see the long-term consequences.

High school graduates from poor households are already unable to afford college (which is one reason why so many of them are trapped in poverty).

Increasing numbers of middle-income high school graduates will join them. The fewer and fewer middle-income students still able to afford college will have to rely more and more on loans, and graduate with ever-greater debt burdens.

Higher education will increasingly become the domain of the wealthy elite, whose children will have less competition in the job market and will therefore be able to stay rich with minimal effort. Inequality will rise to new heights and social mobility will be a fading memory.

The fact that we need to explain to our legislators why they should invest in education is a disgrace.

But it does not have to be that way. There are people fighting back.

Last year, a movement began in California to oppose the budget cuts there. Students and faculty organized protests, strikes and there was even a case where students at UC Berkeley occupied a library in order to keep it open after the administration decided to shut it down on weekends due to budget cuts.

Out of these struggles in California came a call for a National Day of Action to Defend Public Higher Education on March 4, 2010.

The call was answered by students and faculty on many campuses across the United States, and tens of thousands of people participated in actions that day – including hundreds here at UMass, who marched to the Whitmore Administration Building to demand that the university should resist the drive to privatization and stop raising tuition and fees.

That was a great step in the right direction, but more pressure is needed to make both administrations and legislators understand that higher education must be made affordable. There is a second National Day of Action called for Oct. 7.

In Massachusetts, the organizing effort is led by the Public Higher Education Network of Massachusetts (PHENOM), an organization that unites students and professors to campaign for increased public funding of higher education. PHENOM is planning a March Across the State, starting at Berkshire Community College in Western Massachusetts on Oct. 2, and ending with a rally in front of the State House in Boston on Oct. 7.

They will stop and organize events at several campuses along the way, including a stop at UMass Amherst on Oct. 3.

But the big day remains Oct. 7, when PHENOM and other groups will be in Boston to remind state legislators that cutting funding for public education means throwing away our future. There will be buses available to take people from UMass to Boston that day, and hopefully we will have a large turnout.

The fact that we need to explain to our legislators why they should invest in education is a disgrace.

The benefits of well-funded public education should be obvious: more innovation, more economic opportunities for young people, a more level playing field in the job market, less racial inequality (guess who gets hit hardest when college is expensive), less inequality in general, no more crushing debt for 20-somethings, more voters making informed decisions at the polls.

Well, ok, I can see why politicians might be worried about that last one. I can see why the wealthy would object to anything that can make it easier for ordinary people to climb up the social ladder.

Those who are privileged want to remain privileged – and they certainly don't want to share with the rest of us. But loud voices from the streets have changed their minds before, and they can do so again.

REMEMBERING GEORGE PARKS

Dear Editor,

To the the University of Massachusetts administration, students, parents, staff and members of the UMass Minuteman Marching Band, and especially to the family of George N. Parks: People across this country share in your loss today, especially your extended band family. Parks brought an element of grace, discipline and excellence to fans of music and marching bands everywhere, and will be deeply missed. And, although we never had the honor and pleasure of meeting him, he will always be part of our lives.

In May 2006, our daughter, a freshman at the time, was named drum major for the new high school opening up in our little town that fall. Her director suggested that she attend that summer's George N. Parks Drum Major Academy course, held nearby at the University of North Carolina Charlotte, to help develop her confidence and leadership skills. She took the field that fall as a sophomore rookie; the new school had no senior class, and as such over half of that first year's band was comprised of freshmen. And they proceeded to finish second in their class at state finals, an accomplishment never before achieved for a first-year school. Her junior year, the band was moved up to a larger class and still nearly managed to capture the state championship, once again finishing runner-up at finals. And finally, as a senior she led her band to a state championship, as well as to their first appearance at BOA Nationals. To cap the year, the band has been selected to march in the 2011 Macy's Thanksgiving parade.

I'd like to also add that, since middle school, she had also received recognition as an all-state musician. Unfortunately she was not able to audition as a senior due to travel conflicts; the South Carolina Band Directors Association would not allow a make-up date for her to audition, even though she had a most compelling reason for missing the audition process. You see, we were in San Antonio that week. On January 9th, 2010, her mom and dad sat in the Alamodome with tears rolling down their cheeks as Jaclyn Turner was introduced as drum major for the U.S. Army All-American Marching Band.

I'm guessing that we're hardly the only family that has had such a great experience through music and band, but I'm so very thankful that we have had the opportunity to enjoy such a great ride. And we will always owe a huge debt of gratitude to Parks for the part his program played in helping Jaclyn develop the leadership skills she never knew she had. We are so very fortunate to have been introduced to the great experience that is band, both on and off the field, and have all made lasting friendships through our collective activities. UMass, as well as the entire music world, lost a great leader today, but I can assure you that his legacy will continue on through the lives of every individual fortunate enough to have participated in his pursuit of excellence.

Our deepest condolences go out to his family, and to his band family as well.

Thank you so much for sharing him with so many of us across the country.

Steve Turner
Fort Mill, SC

NEW ENGLAND'S POWER AND CLASS

Dear Editor,

The year was 1998 and the University of Massachusetts Minuteman Marching Band won a most prestigious award, the Sudler Trophy, as the nation's best marching band. There was no better tribute to the leadership of Marching Band Director, George Parks. His excellence and creativity were unparalleled and he was beloved by thousands of students for over 30 years. Not only did he make them "The Power and Class of New England," he made it fun for all of them, and in doing so established a tremendous amount of pride in all of them. It is no secret that many people who attended home football games did so specifically to see one of the best marching bands in the country, and many stayed after the game just to see their mini-concerts.

A little known story, however, also occurred in 1998. The UMass football team was going for the National Championship in Chattanooga, TN against a powerful Georgia Southern team and they were definitely the underdog. In attendance were approximately 24,000 people, of which were only about 500 UMass fans. Prior to the game the whole mood and tone of the stadium was dominated by Georgia Southern and their fans. It was clearly a loud and one-sided atmosphere.

Then suddenly, as if from an epic movie, still yet unseen, everyone heard the sounds of trumpets blaring off in the distance. The stadium went silent wondering what it was and where the sound was coming from. Then, dramatically, down a ramp came into view the drumbeats and the powerful music of "The Power and Class of New England," The UMass Marching Band. I am telling you it sent chills down your spine. People were agape with their mouths open, seeing, watching and listening to the best marching band in the country, over 300 strong. From that moment on it turned the whole atmosphere of the stadium over to UMass. UMass owned the stadium from that moment on. I have never seen anything like it.

Make no mistake about it, the UMass football team won the national championship for their great play on the field. But also make sure not to ignore the fact that The UMass Marching Band, under the leadership of George Parks, first changed the whole atmosphere of the stadium in favor of UMass on that day. This is only one tribute to George Parks.

THE IMPORTANCE OF ENGLISH

Dear Editor,

The United States is an English speaking country, not a bi-lingual or multi-lingual speaking country. Our government conducts all business in English. Our military communicates only in English. Can you envision military commanders giving commands to attack in numerous languages? U.S. businesses typically communicate in English. One of the many strengths of this country is its outstanding communications system.

All roadside signs, instructions, business correspondence, school classes and general communications should be in English, with no references to any foreign languages.

Immigrants have to learn English and our children have to be proficient in English.

It can be beneficial for people to be fluent in a second language such as Spanish, Chinese, Arabic, etc. Our Country needs expertise in foreign languages, but this should be subservient to fluency in English. U.S. citizens who cannot speak and write English as a primary language are probably placing themselves at a disadvantage on the ladder to success in this country.

We should not promote language diversity, because it will lead to divisiveness, the same type of divisiveness we see in numerous foreign countries.

Cool enough for Back to Stool?

By Kate Evans
Collegian Correspondent

At the average collegiate age of 21, pop sensation Mike Posner is doing anything but homework. Last year, J Records discovered Posner from a series of mix tapes he produced on his own while attending Duke University. Nearly a year later, his debut album, "31 Minutes to Takeoff," was just released mid-August. Posner is teaming up with Barstool Sports to bring a three-concert series to university towns across New England.

For those of you living under a rock, BarstoolSports.com is an independently owned blog infamous for printing outlandish, hilarious and not suitable for work (NSFW) material. Other artists accompanying Posner at UMass include Wale, Paul Markham, Mac Miller and The White Panda for a show that isn't making the popular sports blog any money. The sole purpose of the concert is to acquire fans and market, said website owner Dave Portnoy.

The concert, aptly named Back to Stool, is scheduled to kick-off this Saturday, Sept. 25 at 7:30 p.m. at the Mullins Center.

Amherst is the first stop on Barstool Sports' fall tour, followed by Manchester, N.H. and Providence, R.I. next weekend.

Portnoy, admirably referred to as "El Pres" on his site, says many of the previous venues for Stoolapalooza were too small to play at again. He wanted to break out the guns for Back to Stool, pairing large venues with big names.

"We knew we wanted good talent, but talent costs good money," he said.

Good money is right, seeing as how Barstool Sports dropped a whopping $50,000 on Back to Stool star power and an additional $25,000 to produce the shows.

Fans of Posner can look forward to hearing "a lot of his old stuff. Obviously everyone knows 'Cooler than Me,' 'Drug Dealer Girl,' 'Evil Woman,' and 'Smoke and Drive.'" said Portnoy.

Although Posner is headlining the event, Wale is arguably a much more established and well-known performer. Having collaborated with Talib Kweli, Bun B and Pharrell, Wale is anything but a newcomer to the entertainment industry. Posner's headliner title is based exclusively on his consistency at Back to Stool.

"Posner was the guy who's going to every show, and we wanted the one who would be around [to headline]," Portnoy said.

Wale is unique to Amherst, which may be the direct result of El Pres' love for UMass.

"It's probably my favorite place we've ever been to," he said.

For those who prefer something different, the appetizers may strike your fancy. Paul Markham, the first act and a UMass student, also opened for Sam Adams last April.

The second opener, Mac Miller, is "the Sam Adams of what we've got right now, blowing up all over the place," said Portnoy.

The White Panda, the third opening act consisting of two male DJ's rocking panda face masks, was thrown into the mix to create a "mosh pit, dance party vibe" to break up the rap, explained Portnoy.

El Pres feels he is ahead of the game with Mac Miller and Paul Markham. He claims that both up-and-comers will make something of themselves and hopes that people remember where they first saw them.

Although Posner was born and raised in Michigan and Portnoy attended the University of Michigan, the two have yet to bond over their roots, let alone meet.

After establishing a "bromance" with Adams, the Pres is open to bonding with Posner, but he claims that "Team Barstool is much more willing to party with the people than the performers."

The Barstool representatives are certainly eager to party with UMass, indicated by their early arrival on Friday. UMass has proven to be the site's biggest college fan base, most likely due to the plentiful extra-curricular activity here.

Portnoy is not concerned with whether or not the student population loves Posner, as he just wants to promote a good time.

"We're gonna be there all weekend partying, from the second we get on campus until the second we leave," he said. "Just partying. UMass is pretty good at it."

The collegiate role model threw out an analogy between Countryfest and Back to Stool, claiming that the attendees only go to the shows for a fun time, not necessarily the music. According to Portnoy, the music is significant, but it doesn't depend on the success of the concert.

Team Barstool has already decided upon its party locations of choice for the weekend, but Portnoy won't publicly disclose this information.

Portnoy has learned his lesson, saying, "last time [at Stoolapalooza] we got contacted by the police before we even showed up, so we've gone stealth mode." Just look for the company's personalized beer pong table and dozens of attractive girls, and chances are you've struck gold.

The party specifics won't be making headlines, but that hasn't discouraged Team Barstool.

Portnoy dismisses students fears by stating, "When Barstool Sports comes, it's a party. Don't worry, we'll get you where you want to go."

YouTube sensation Jenna Mourey is also guaranteed to be in attendance, probably rocking one of her scandalous micro-outfits and funky colored locks.

With about 4,000 ticket sales from UMass alone, Back to Stool will be thickly populated. The other two venues have only sold half of that amount so far, solidifying UMass as the site's biggest concentration of fans.

Though just over a few thousand ticket sales may seem minimal in comparison to the Mullin Center's size, Portnoy's objective was never to sell out every seat.

"It's not a 15,000 person concert. The goal has always been to sell between five and six thousand," he said.

While Back to Stool has not followed in Stoolapalooza's successful financial footsteps, Stoolies can look forward to future concerts at UMass. The notorious partiers will return in the spring for the next installment of craziness, maintaining they will always do events here. Back to Stool is not promoting anything wildly different from Stoolapalooza besides the talent.

Portnoy said, "It's really night and day, concert-wise from what we did before. [We had] Sam before he blew up. We did professional music this time, much stronger lineup."

And hey, if the concert isn't your thing, at least El Pres will be in attendance. He hates being on stage, but that may change after a few drinks. One can only hope he will be sporting his purple starfish bathing suit.

Tickets are still available at the Mullins Center or online at Ticketmaster.com for $22.

Kate Evans can be reached at kvevans@student.umass.edu.

Mike Posner headlines the Bartstoolsports.com Back to Stool concert on Sept. 25 at 7:30 p.m. Posner will be supported by Wale, Paul Markham, Mac Miller, White Panda and others.

Some things should stay dead

By Andrew Sheridan
Collegian Staff

When "Resident Evil" first came out in 2002, it enjoyed a unique position in the world of video game-to-movie adaptations. Virtually every such film to date had struggled to cram half-baked and unwieldy game concepts into genres such as kung-fu and action-adventure. "Resident Evil," however, was different. It fit snugly into the category of zombie film, a genre which frequently prides itself on cheap thrills, goofy antics and a loose emphasis on plot development. In this niche, the film thrived.

After eight years and four movies, however, the series' seams are starting to show. Its latest installment, "Resident Evil: Afterlife," suffers from many of the ailments of both the video game-based movie and the over-milked sequel. Since the cross-medium synergy has worn out, the time has come to figure out "Afterlife's" real identity. Is it simply a zombie film trying to do its best to compete in the market, or a video game being crammed into another medium?

Taking the view of the first option, the film fares decently. The plot is rife with amnesia, mind control and long-dead characters coming back to life, although the latter is expected given the subject matter. On the flip side, many survival-horror staples redeem the experience, such as a host of both loveable and hateable characters to serve as zombie lunch.

If you elect to view the film as a video game come to life, it fares decidedly worse. While the "Resident Evil" movies feature a different lead character and follow a different timeline than the games, the producers vigorously attempt to shoehorn the games' plots into this new structure.

The film starts out in Tokyo where the evil Umbrella Corporation, the mainstay antagonist in the Resident Evil universe, is predictably up to no good. Four years after their deadly T-virus has all but wiped out the human race, Umbrella for some reason pushes forward with their experiments on biological warfare. In keeping with their bizarre fetish for secret underground bases, the corporation is stationed deep under the earth. While this seems to be a good defense, it is never enough to stop Alice, the series' super-weapon heroine.

For fans of the series, the rest of "Afterlife" can be summed up as such: Cut most of the major plot elements out of "Resident Evil 5," put them in a Yahtzee shaker, shake well and toss the results all over the western United States.

Albert Wesker, the games' most iconic bad guy, makes a long-awaited appearance in "Afterlife." His ice-cold demeanor and glowing red eyes make for good fan service, but the acting is stale and dialogue unconvincing.

The cast of "Resident Evil: Afterlife" reads like a "who's who" of prime-time network television. Wentworth Miller from the hit show "Prison Break" and Ali Larter of "Heroes" play Chris and Claire Redfield, respectively, and "Sons of Anarchy's" Kim Coates plays a whiny film director named Bennett.

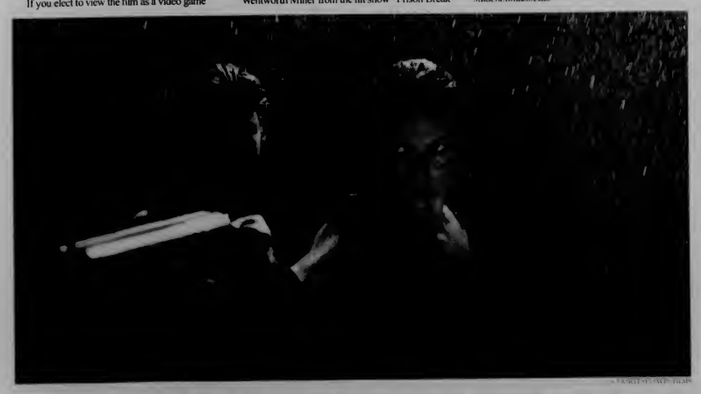
While all give mediocre performances, their presence backs up Mila Jovovich's lead, and watching a bad movie with familiar faces is somewhat more enjoyable than watching one with no-name "stars."

The one thing that distinguishes this film from its predecessors is the liberal use of 3-D effects. Predictably, the producers did not create an immersive "Avatar"-esque three-dimensional experience, but instead opted for the theme park method. Storms of shrapnel, bullets and brains assault the audience whenever the action heats up. But aside from that, the 3-D is hardly noticeable.

"Afterlife" isn't all that good, but what did you expect? The series has had as good of a run as any game-based film ever has, but any franchise stretched too thin will start to wear. The plot is unoriginal and the acting isn't great, but it manages to pack in all the hallmarks of a good zombie B-movie.

Some people get eaten, some zombies have their heads smooshed in, and unlike in the source material, the survivors never run out of bullets. And if you were thinking of seeing this movie anyway, that's probably all you wanted to see.

Andrew Sheridan can be reached at asheri1@student.umass.edu.



Ali Larter and Mila Jovovich star in "Resident Evil: Afterlife," the fifth installment in the video game-based film series. Fans will love the flying bullets, smooshed in brains and groaning undead, although the lack of plot and mind-numbing dialogue may lead to groaning of their own.

Unruly Mujeres: a play to honor the women of history

By Alissa Mesibov
Collegian Staff

Catherine the Great, Molly Pitcher, and Joan of Arc are names of famous women who defied the expectations of their gender and rose to greatness. What about all of the other women who did the same, but whose names have been lost throughout the ages? The University of Massachusetts Department of Theater will explore the lives of four of these amazing women who never garnered the fame that they deserve.

"Unruly Mujeres" (Unruly Women) is an original play by dramaturgy MFA student, Megan McClain. The play tells the story of four nuns who wrote poetry, journals, music and plays during the Spanish Renaissance.

Professor Harley Erdman, Graduate Program Director and Associate Professor of dramaturgy, proposed the idea of an original play about Spanish women from the Renaissance as the closing piece for the Grupo de Estudios sobre la Mujer en España y las Américas (Gemela) Conference. The group, translated as the Group on Women's Studies in Spain and America, focuses on cultural achievements by women from the medieval time period through 1800.

"There's a particular story there really worth telling," Erdman said about the women of that time. He has been translating such plays on and off for nearly 20 years. His translation of "Marta the Devine," another Spanish Renaissance play, premiered last year with the UMass Theater Department.

Despite input from Professor Erdman, the rest of the details were left up to McClain to decide. She found the subjects for her play in the Spanish nuns and their writings.

"I was fascinated by how these women, who were tucked away from the world come up with these writings," she said. McClain was also inspired by the encicos, or religious songs, that nuns wrote, which "celebrate strong women."

McClain also added that, even though the women were all cloistered nuns, the differences between them were astounding. While Ursula Suarez defied her family's expectations of marriage to become a nun, Catalina de Erauso escaped her convent as a teenager to live as a man.

The entire process for rehearsing the play took only a little over two weeks. The auditions for the cast took place at the end of last semester while all of the rehearsals happened this semester. Considering the amount of lines to learn, as well as the songs, poetry and dance comprising the play, this speedy production is an impressive feat for the actors.

The cast includes Brittany Costa, Kate Henoch, Becca Keohane, Delia Martinez, Robin McNamara, Julia Piker, Connie Russo, and Cassie Spadory. The production is directed by Dawn Monique Williams, assisted by Luke Reed.

The design team includes props and costumes by Faye Richards, dramaturgy by Sarah Brew, lighting by Jess Greenberg and sound design by Jonathan Hicks.

"Unruly Mujeres" will be playing September 23-25 at 8 p.m. at the Curtain Theater in the Fine Arts Center. Tickets are $8 for students and seniors, while general admission is $16 at the Fine Arts Center Box Office, online, or by phone at 545-2511 or 1-800-999-UMAS.

Alissa Mesibov can be reached at amesibov@student.umass.edu.

Hernandez off and running

UMASS from page 10

stop the run. The 2009 co-champions of the Big South rank first in the conference in rushing offense (693), yards per rush (5.5), rushing attempts (126) and rushing touchdowns with seven.

Running backs Brock Jackolski and Miguel Maysonet are both in the top six of the Big South in all-purpose yards, with Jackolski leading the conference with 813.

"It starts with their running backs offensively," Morris said to UMass media relations. "So we've got to be ready for those guys, they're going to try to pound the rock. Michael Coutler[, their quarterback,] he can throw the ball well and stretch out the play action game so we need to be ready for that as well. They're very much like us, they want to go run and complement it with some play action pass."

Stony Brook enters this weekend with a 1-2 record following a heartbreaking loss to Brown in double overtime. After dropping their opening game against South Florida, the Seawolves earned their first win over American International in Week 2, 31-14.

The game this weekend will mark the third time UMass and Stony Brook have met with the Minutemen, who won both previous matchups. It will be, however, the first occasion the two teams have played at Kenneth P. LaValle Stadium.

Last year, UMass dominated the Seawolves, 44-17, as Hernandez rushed for 140 yards and three touchdowns in his first collegiate start. Wide receiver Jeremy Horne had a 49-yard score from Havens en route to a 124-yard performance. As an offense, the Minutemen racked up 500 total yards while the defense held Stony Brook to 229 yards, including 97 in the second half.

In 2006, UMass won by an even larger margin as it defeated the Seawolves 48-7 at McGuirk Stadium. Quarterback Liam Coen connected with receiver Rasheed Rancher on an 89-yard touchdown for the third-longest play in Minutemen history. UMass was able to score on its first seven drives of the contest, as senior tailback Steve Baylark scored three touchdowns in the first half.

Following Stony Brook, the Minutemen will get into CAA play when they take on Towson on the road before returning home for Richmond.

Jay Asser can be reached at jasser@student.umass.edu.

MAXWELL SPARK COLLEGIAN

Tailback John Griffin runs behind lineman Nick Speller against Michigan. Griffin ran for 99 yards against the Wolverines and hopes to continue his success against the Seawolves Saturday.

MAXWELL SPARK COLLEGIAN

Quarterback Kyle Havens throws on the run against Michigan last Saturday. Havens was 22-for-29 with two touchdowns and will look to get the Minutemen back in the win column Saturday against Stony Brook.

UMass may not be the brand name, but sports still first rate

MORRIS from page 10

how competitive he thought they were," UMass coach Kevin Morris said, "and how hard they played and the type of team he thought we were. It's a good compliment to our guys. We talk about who we are as a team and how we want to represent UMass and based on his comments and a lot of other peoples' comments postgame. The kids represented UMass really well."

In a Boston Globe article, now notorious for recently attaching the phrase the phrase "second-tier school" to UMass, author Tracy Jan makes the point that students, when making a decision about where to attend college will be influenced by the quality of its athletic programs, name recognition and the vigor of its student body towards those sports. Ironically, she uses an example of a Massachusetts native passing up UMass to go to school at Michigan.

If Saturday was any indication, UMass athletic programs may not have the same name recognition, but they are not second-rate and the gap between FBS and FCS schools is closing.

Morris illustrated how the changing landscape of media coverage today will present more opportunities for his team to gain recruiting opportunities after playing so well against a national team like the Wolverines.

"It's always good if you get on TV and it's national," Morris said. "The Big Ten Network is all across the country, apparently based on all the messages I got of people watching it. There is a reason why those Bowl games make millions of dollars because people watch TV and pay millions of dollars into advertising. I think TV is the recruiting tool and video now. Certainly us being on that stage and getting that kind of publicity nationwide, that's where it comes into play, absolutely."

UMass might not have the name recognition of other colleges, but it does produce some of the most competitive sports programs in the country at its level.

There are plenty of examples, however, of teams that are flourishing. The men's lacrosse team climbed its way into the national rankings last season and received national televised coverage on ESPN and ESPNU on multiple occasions.

I can't count how many perfect games and no-hitters the softball team threw and I was even surprised to see the club rugby team in its run to the national championship tournament and its jump to Division I.

Of course, prospective students likely won't be swayed by the quality of a university's club sports if they are influenced at all by a school's athletics. It probably wouldn't be highlighted on the brochure, anyways.

The main sports would be the main draw for young students and the most important to garner attention.

Sure, the basketball team has fallen off of the national grid since the days of Rick Pitino, John Calipari and Marcus Camby (who was recently inducted into the UMass Hall of Fame). The hockey team is consistently amongst the top teams in the east, but competes for recruiting and coverage with the likes of Boston University, Northeastern, Vermont and tend to get left out in a lot of ways.

Football, though, has flourished in the past decade and does not get the attention it deserves from its student body. Fans don't generally flock to games and when they do, it is more for the tailgating.

The last time I met a friend in front of McGuirk Stadium for a game, he didn't even bother going in to watch the game.

In traveling to last weekend's game, I saw students, alumni and fans of Michigan flocking in droves to the Big House. There was not one person walking along State Street in Ann Arbor, Mich., that did not have navy blue and gold on, even at eight in the morning. The streets were littered with students wearing jerseys and face paint, geared up to support their football team.

A handy-man named Joe came to my apartment to fix a leaky faucet (cliché, I know, but true). We began chatting and he told me how disappointed he was that he did not get the chance to renew his season tickets this year.

Joe had been a season-ticket holder for over 30 years and he was sad that this year he wouldn't be able to take his granddaughter to the games. She enjoyed seeing the marching band perform and they would usually leave after halftime of the game.

I hope that Joe can get his hands on some tickets this season, because the Minutemen deserve to be seen not only at McGuirk, but on the national spotlight.

Minutemen take on Stony Brook

After near upset, Morris and Co. return to I-AA play Sat.

By Jay Asher
Collegian Staff

Upset win or not, the No. 11 Massachusetts football team will need to quickly turn its attention to Stony Brook this Saturday as it plays under the lights on the road.

Coming off a near-monumental victory against heavily favored Michigan, the Minutemen (2-1, 1-0 Colonial Athletic Association) will play in front of a more familiar crowd this weekend after facing a packed Big House.

"We'll be pretty settled down now," UMass coach Kevin Morris said of his team's current state. "[Michigan] seems like a year ago already. That's what happens when you play from week-to-week. You play on Saturday, come back on Tuesday."

Despite the loss, the Minutemen carry positives into their match-up with the Seawolves, mostly on offense. Tailbacks Jonathan Hernandez and John Griffin pounded the rock on the ground against the Wolverines, rushing for 118 and 99 yards, respectively. Quarterback Kyle Havens was efficient, passing for 222 yards and two touchdowns with one interception that was fumbled back to the offense.

"I talk about it all the time, it's a balanced offense," Morris said. "If you run the ball well, that's great. But, they'll gang up on the run eventually and make you pass. If you have a good compliment of run and pass, it keeps both things successful. That's what we'll continue to do with Kyle and he's done a great job. He was 22-for-29 in the Big House. That's not a bad day."

Against Stony Brook, however, the UMass defense will need to

See UMASS on page 7

MAXWELL SPARK/COLLEGIAN

Jonathan Hernandez runs hard en route to 113 yards against Michigan. The Minutemen travel to Stony Brook Saturday.

Wolverines coach Rodriquez gives UM credit where it is due

Dan Gigliotti

Following Saturday's football game against Massachusetts, Michigan coach Rich Rodriguez did something that he's not accustomed to.

In fact, he couldn't recall the last time he did.

After his team, ranked No. 22 in the Football Bowl Subdivision escaped with a victory in a 42-37 win against UMass of the Football Championship Subdivision, Rodriguez went into the opposing locker room and addressed the Minutemen.

"You've got to give credit to UMass and its coaches," Rodriguez said. "I went in the locker room and told them. They came here to play and they came here to coach and did a terrific job. I don't do that very often. But I have a great respect for that team coming in here and playing as hard as they did and executing the way they did. They had a game plan, they followed it, and they did a terrific job. Those guys played their tails off and I think they'll win a lot of games."

Rodriguez's gesture was more than just a sign of sportsmanship or goodwill. It went beyond saying, "Thanks for coming. Maybe next time, folks."

It is a testament to the quality of the football program and should be an eye-opener for fans and students of UMass to acknowledge the football team's accomplishments and to become enthusiastic for their school's athletics.

"He talked to the team about

Minutewomen wrap up 4-game road trip against Brown

By Michael Counos
Collegian Staff

The Massachusetts women's soccer team concludes its four-game road trip on Thursday when they take on Brown. UMass looks to get back to its winning ways, as they dropped their last two matches against Michigan and Oakland.

This will be the first meeting between the two schools in 20 years. The Minutewomen have dominated the all-time series, holding a 10-3-1 advantage over the Bears. The Maroon and White have won the last six contests against Brown, including their last meeting which came on Oct. 14, 1990, a game in which UMass prevailed 2-1.

UMass enters Thursday's contest at 3-4-0, while Brown sports a record of 3-2-1. This game against the Bears will wrap up the Minutewomen's non-conference opponents for the season before returning home on Sunday to begin a three-game home stretch against Harvard, before starting Atlantic 10 play against Charlotte and St. Louis.

The defense will have to deal with the Bear's leading scorer, senior forward Gina Walker, who leads the team with six points on two goals and two assists. Freshman Kiersten Berg and senior Erika Lum have also added to Brown's offense with two goals apiece.

"We aren't going to do anything different to prepare for our game against Brown," said UMass coach Ed Matz. "We've had some good practices the past few days and we are looking to go out and get a win."

UMass will face an interesting situation in net, as the Bears are running a two-goaltender rotation. Freshman Amber Bledsoe has started every game in net for the Bears this season, but has only played 270 minutes, compared to fellow rookie MC Barrett who has seen 300 minutes of action. Both have shared early success this season as Bledsoe sports a 1.00 goals against average and a .727 save percentage, while Barrett has a 1.20 goals against average and .846 save percentage.

UMass will look to get a victory as they were disappointed in their weekend trip to Michigan. The Minutewomen were shutout 5-0 last Friday against the Wolverines and then a suffered a disappointing upset to Oakland. UMass dropped the game to the Golden Grizzlies 3-2 at OU Soccer Field.

Also, lost in the road trip was sophomore defender Jess Howe, who will sit out due to an injury suffered in the Oakland game. Howe was a starter on the defensive unit that has been consistent for UMass this season.

"Certainly, the loss of Jess will do nothing but hurt us as we go forward, but this is when the season gets tough when players begin to get injured and tired as the season goes on," said Matz.

MATTHEW HARRISON/COLLEGIAN

UMass players line up to defend a free kick last season. The Minutewomen take on Brown Thursday.

Scoring on a rebound off a header attempt by freshman Brittany Moore during the Oakland game, Deanna Colorassi has been a success story as a transfer for the Minutewomen. The Golden Grizzlies regained the lead however in the 51st minute with a goal by Sarah Lynch, but senior Therese Smith knotted up the contest at two apiece. Sophomore goaltender Emily Cota booted a goal kick that was headed forward by freshman Jen Houtman to Smith for the goal in the 68th minute.

The Minutewomen lost the game dramatically in the 82nd minute with a goal in the top right corner of the net by Lynch. She was assisted by Nicole DeLuca. Cota registered three saves in the losing effort while Grizzlies' goaltender Shannon Coley turned aside six.

The game begins at 4:30 p.m.

Michael Counos can be reached at mcounos@student.umass.edu.

Offense producing for UMass, but victories still not following

By Herb Scribner
Collegian Staff

Since day one of the 2010 campaign, Massachusetts soccer coach Sam Koch has stressed the importance of incorporating offense into the Minutemen's game plan.

Thursday afternoon's match against Vermont saw the culmination of that idea.

Despite drawing, 2-2 against the Catamounts, the Minutemen played aggressively on the offensive side of the pitch throughout the entire match, taking 17 shots, four of which were on target.

"As far as getting shots, we got enough shots, [but] we just got to drop the shots against and prevent a few goals and win a few games," senior midfielder Ben Arikian said. "Hopefully if we start clicking on defense, the games will start to go our way a little bit more."

Koch was pleased at having his offensive game plan come to fruition against Vermont (4-1-3).

"I think that was the one bright side. We created chances, we did some good things," Koch said.

While normally a heavily defensive team that waits until the second half to score its opening goals, the Minutemen (1-2-3) pushed early in the contest to gain an edge on the Catamounts.

"We've been talking a lot about getting the balls in the corners and moving the ball and not holding onto it for too long," Arikian said.

Arikian led the offensive push early in the game, earning the assist on Andrew Henshaw's goal. After the ball was served in by Tyler Cleverdon, Arikian went up for a header with a Vermont defender. Unknowing that there was a player behind him, Arikian connected his head with the ball right to Henshaw who cracked it in for the goal.

"I didn't even know anyone was behind me," Arikian said. "We both got to it, the ball just redirected on the right side of the goal and Drew put it away. It wasn't really anything special, it happens, it's just hard work. That's what we're about."

Arikian took four shots in the opening half with one finding its way towards goal. With his assist in the match, the senior midfielder is one service shy of being tied for fourth all-time in assists for the Minutemen.

Recently, UMass has had trouble scoring in the opening half by going scoreless in its past three first halves. Against UVM, though, the Minutemen scored two goals coming in the opening 45 minutes, holding the lead going into halftime.

"The first half we did very well, then we got away from it in the second half," Koch said. "It's one of those things; we have a one goal lead and we don't hold on to it. Give them credit, they came back and unfortunately we didn't get it done, but the offense did well today."

Chris Vaccaro, who came on as a substitution late in the game, also provided the surging offensive side. Vaccaro was a threat on the ball in the closing moments of the game, shooting on target for both of his shots taken.

Up next for the revived Minutemen offense will be against an undefeated New Hampshire, a team that has allowed two goals thus far this season.

Herb Scribner can be reached at hscribne@student.umass.edu.

JEFF BERNSTEIN/COLLEGIAN

Andrew Henshaw goes up for a header against UVM Wednesday. Henshaw scored one of the teams' goals, but UMass tied 2-2.

JEFF BERNSTEIN/COLLEGIAN

Andrew Henshaw celebrates his goal against the Catamounts. UMass tied UVM 2-2.

After first-half goals by Key, Henshaw, team comes up with frustrating third draw of season

By Steve Levine
Collegian Staff

If anyone were to observe the Massachusetts soccer team following its game on Wednesday, they would've guessed the Minutemen lost instead of tied.

UMass coach Sam Koch was irritated and his players were equally disappointed. It was an unusual mood considering UMass tied a very formidable Vermont team, 2-2, which came into Rudd Field with a 4-1-2 record.

UMass	2
UVM	2

The Minutemen are getting a little tired of ties, though, because that has become a common theme this season as their record moved to 1-2-3.

"It's the same old record: do the things that we do well and stay away from the things we don't do well," Koch said. "We attack down the flanks well and we had opportunities to continue to do that and we got away from it. Give Vermont credit they made it difficult [for us]. We had opportunities to do more than we did and we just didn't play our best game today."

With the Minutemen up 2-1 at the half, it appeared they had all the momentum to come away with its second win of the season.

After giving up an early goal, the UMass offense came alive during the 22nd minute, when forward Bryant Craft tied the game with his third goal of the season – a shot from inside the box coming off midfielder Chris Stoker's pass from the right side. A little over two minutes later, defender Andrew Henshaw took advantage of midfielder Tyler Cleverdon's pass with a shot that beat Catamount goalkeeper David Ramada to the bottom right corner, giving UMass a 2-1 lead.

Vermont would tie the game shortly after the half with Juan Peralta's second goal of the season.

"They crossed it in and Henshaw was tracking back and slipped in," UMass goalkeeper Chris Piekos said. "[Peralta] cut in and [was left all alone]. At that point I had to take the near post so he couldn't beat me there which left a seam on the far post. He had a good strike. Unfortunately we couldn't track him down and [deflect] that shot away."

The contest remained a 2-2 tie for the remainder of the second half, thanks in large part to clutch saves from Piekos. With less than 16 minutes left in regulation, Piekos used all of his 6-foot-1, 220-pound frame to block a wide open look from the Catamounts' Dwayne Dove.

Three minutes later, Piekos found himself in another sticky situation when UVM forward D.J. Edler had a breakaway opportunity.

"[Edler] had a good breakaway so I came out, cut my angle and got set and saw that he was trying to beat me [to the] far post so I got my leg down," Piekos said. [I was hoping] it would stay right there so I could clean it up and I did."

Not one Minuteman believed the game should've reached overtime in the first place.

"We worked hard but we just didn't get it done defensively," UMass defender David Key said. "We let in too many chances and it just wasn't our strongest effort."

UMass was more effective in the first overtime period, taking four shots and having three of them denied by Catamount goalkeeper David Ramada. Vermont's lone opportunity in the period came with under two minutes left, when Piekos made an easy save on a header.

UMass seemed lifeless in the second overtime period, not registering a shot while allowing Vermont three shots.

"It was a tough game," Piekos said. "We go into the half with a 2-1 lead and with a strong back four we have, we should've kept it 2-1 or at least scored a few more goals. We let them [back into the game]. It's a little disappointing but we just have to move forward with UNH on Saturday and take it one game at a time."

UM alumni in race for State House seat

By Matthew M. Robare
Collegian Staff

Dan Sandell, an Amherst attorney and member of the University of Massachusetts' class of 2000, is a Republican vying for the Third Hampshire District seat in the state House of Representatives. Ellen Story, a Democrat who has held the seat since 1992, is seeking re-election and Independent Dan Melick, formerly on the Amherst Town Meeting, is also running.

"I'm basically running because I see that our commonwealth is slowly going downhill," Sandell said. "We have a number of huge financial issues which long-term, career politicians could have solved."

For example," he went on, "this year alone our budget was about $650 million short and the only became balanced because at the last minute the federal government had given us a check for $650 million to basically make our ends meet. Next year, unfortunately, we have a projected $2.5 billion budget deficit, which is roughly the equivalent of having to lay off 20,000 teachers in order to make ends meet. I think that our district can have somebody that better represents them than they've had in the past."

Sandell is campaigning on a platform of cutting spending, which he refers to as "common sense" solutions. He supports repealing the Pacheco Law, which regulates the state's ability to make contracts with private firms.

"[The Pacheco Law] makes it very difficult for government services to be privatized," Sandell said. "Basically, just to summarize it, they don't use the actual numbers of this government entity. They use 'In a perfect world, where you could eliminate all the waste, what is your best case scenario' number for making this government entity productive. They use this 'magic number' and they use that number to compare what it would cost to privatize something. Not exactly the truth of the real numbers."

"So by making it easier for government services to be privatized and by also making it easier for small businesses to compete with large unions in government contracts would certainly reduce a lot of our spending," he added.

Sandell also mentioned that the state government could examine selling sponsorships of government buildings, suggesting that UMass could increase its revenue by selling sponsorships of the Warren McGuirk Alumni Stadium and the state could sell sponsorships of government buildings on the main streets of Boston. Sandell also said that freezing salaries would help to balance the budget.

Sandell explained his stance on privatization as one of allowing private companies to offer competitive proposals on state contracts, without having to fulfill bureaucratic obligations, such as hiring only union workers.

"The reality is that we are spending way more money than we're taking in," Sandell said. "This has been a trend that's been going on for quite some time. If we want to deal with it responsibly now we will have a reduction in the level of services, but it will at least be a level of services we can continue into the future. The other option, which long-term politicians seem to have taken, is to ignore this and wait till it all comes crashing down, whether it be three years, five years, or ten years down the road. But when that does happen, when Massachusetts has to start writing IOU's to cover its debts, services will basically be slashed dramatically below the level that I would propose."

Sandell disputed Rep. Story's statements that a series of tax cuts under previous Republican governors have led to the current budget issues.

"Overspending has clearly been the reason why we are in such a hole," he said. "If we were not overspending we would not have had to have the federal government cover $650 million of our overspending last year. Who knows how much of the $2.5 billion overspending is going to be covered next year?"

He said that the state health care reform program passed in 2006 is unsustainable and that even Independent gubernatorial candidate Tim Cahill has said that it's "doomed to failure in four to five years."

"You can raise taxes up to one hundred percent on everybody," Sandell said, "but you still wouldn't be able to cover the overspending that Ellen Story has become accustomed to."

In addition, Sandell expressed his opposition to Question Three, which would reduce the sales tax rate back to three percent. He also opposes Question Two on the grounds that the affordable housing law is the responsibility of the legislature. He supports Question One, which would repeal the sales tax on alcohol.

After graduation from UMass, Sandell earned his law degree from the Western New England College School of Law in 2003 and now works as a criminal defense attorney. He claims to have represented over 1,500 people since being admitted to the Massachusetts Bar.

Finding the J-Spot

OSU Daily O'Collegian
College News Network

The Oklahoma State Student Union Ballroom echoed with giggles Thursday evening as sex educator Jay Friedman presented an enticing lecture known as the J-Spot.

For more than 15 years, Friedman has been touring college campuses all over the country teaching sex education the way he believes it should be taught. Many students around the country are taught only about abstinence, leaving many important questions unanswered.

"Unfortunately, we live in a sex-negative, sex-repressed, and sex-phobic society which has trouble talking about sex and which provides inadequate sex education," Friedman said in a press release. "My goal is to give a thought-provoking, conversation-creating and perhaps life-changing performance that breaks the taboos in talking about sex. If people can be more open, I'm sure we'd avoid the dangers that result from sexual ignorance, and instead enjoy healthy relationships and more pleasurable sexual lives."

Instead of lecturing about the same old topic, abstinence, Friedman shared with students how to know when they are ready to slide in to home plate with their partner. It's AAA – but not the motor club serving North America. Lovers should be able to "Affirm" with their partner by being able to make love with the lights on. They should also be able to "Accept" responsibility with this partner. Lastly, is to be able to "Assure" with their partner.

Students were shown an interesting (for lack of better words) video, which is shown in sex education classes throughout Europe. Simply, it was a cartoon version of soft porn full of the cartoon characters "exploring" one another's bodies. Friedman also showed his audience a care package he was given on the train in Europe. Inside? A condom and a nifty little handbook educating foreigners how to say: "I love you." " I want to sleep with you " "I think I may have a disease."

Chances of Amtrack handing out these travel kits in the future are probably slim.

During his lecture, Friedman revealed the deep, dark secret of the truth of "blue balls" – the secret being that there isn't such a thing. This is something some boys have pressured on women since their sexual debut. Although Friedman said it can be painful, the testicles will not explode.

"If this were true, you'd hear explosions all over campus every day," Friedman said. "We get erections all the time and live to tell."

Enticing tips were revealed throughout the lecture, but Friedman saved what he thought was the best tip for last ... However, you will have to ask those who attended the lecture what this tantalizing tip for mind blowing sex was. One hint, though: Bagels anybody?

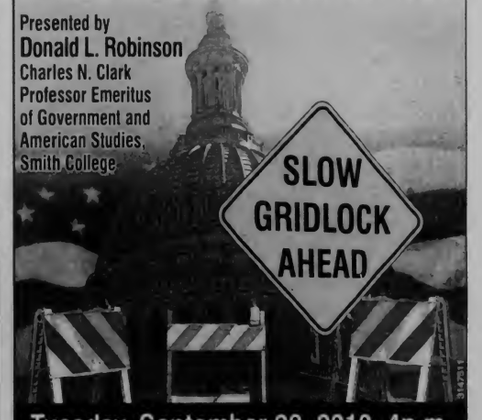
DEAN ALFANGE, JR.
LECTURE IN AMERICAN CONSTITUTIONALISM

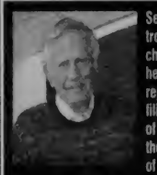
The Crisis Facing Constitutional Politics

Presented by
Donald L. Robinson
Charles N. Clark
Professor Emeritus
of Government and
American Studies,
Smith College



Tuesday, September 28, 2010, 4p.m.
Cape Cod Lounge, Student Union Building • Public reception to follow

UNIVERSITY OF MASSACHUSETTS AMHERST



Serious challenges beset U.S. politics—economic troubles, joblessness, lack of credit, global climate change, the escalating cost of medical care and health insurance. But obstacles—including distorted representation in Congress, paralysis of the Senate, filibusters real and threatened, and the toxic polarization of our politics—make it virtually impossible to address them. Professor Robinson asks if we can devise a form of government at once democratic and constitutional that embodies both liberal and conservative principles: using government to try to better the human condition while being realistic about human capability and aware of the need for restraint, patience, and civility.

This educational program, created in conjunction with Constitution Day and Citizenship Day, fulfills mandated requirements for institutions receiving U.S. Department of Education funding.

The changing value of liberal arts education

Look around your house. How many of your belongings sport a "made in the U.S.A." label? If you shop at big box stores like Wal-mart or Target, there is a good chance you're looking at labels from Sri Lanka, Thailand and of course China. Thanks

Max Calloway

to the North American Free Trade Agreement (NAFTA) and other "free trade" agreements, production of consumer goods can be orchestrated cheaper globally, so companies with a bottom line in mind have shipped industry elsewhere. The fact is, we don't "make" anything anymore.

The good news is, neither does the rest of the "developed world."

According to 2009 Bureau of Labor Statistics (BLS) data, from 1970 to 2009 manufacturing jobs have decreased from 26.4 percent to 10.2 percent of the American labor market. The BLS study also included Canada, Japan and most of Western Europe, indicating a 14.2 percent average decline in manufacturing jobs as a function of total employment for the countries surveyed.

Agricultural statistics are even more dismal, falling from 4.5 percent to 1.5 percent of the American job market. This, however, is less surprising as emphasis on industrial employment at the cost of agricultural production has been a trend since the Industrial Revolution.

While the agricultural and industrial sectors have withered, the service sector is still booming. Over the past three decades employment in service industries has increased nearly 20 percent. Today, 80.2 percent of the American job market is service based and research suggests this growth is far from over.

"Help Wanted: Projections of Jobs and Education Requirements through 2018", a new study from the Georgetown University Center on Education and the Workforce (GUCEW) predicts the creation of over 46 million new jobs, 30 million of which will be in the service sector and require a post-secondary education.

> This educational deficit could threaten the economic gains increased employment opportunities represent.

At first glance, the findings seem like a miracle, but as the report warns, if the country doesn't start producing more post-secondary graduates we will face an employment-educational gap. This educational deficit could threaten the economic gains increased employment opportunities represent. According to the report, all the nation needs to recover fully is a workforce that is willing to spend the time and of course money, for more credentials after graduating from the free public system.

Now, I'm not condemning wholly the push for us, as a nation, to stress the importance of higher education. An education is a great opportunity for those who wish to pursue it and those who do should have the support – financial or otherwise – to obtain it. However, with our domestic economy headed in a service-based direction, forget education as you've been taught to conceive of it.

In a service based economy, employers don't want personnel with well-rounded liberal arts educations. They need a workforce versed in the increasingly narrow and specialized skills characteristic of the service sector. What the study recommends is nothing short of turning the higher-education system into glorified job training.

Witnessing the economic shift from agriculture to industry firsthand, Karl Marx was alarmed at what he termed "man's alienation from his labor." Before this time, farmers could work enough to produce a mild surplus, securing sustenance for themselves and their families.

After the shift, sustenance became reliant on a wage allowing for the purchase of necessities, once the direct product of labor. As Marx expounded in The Communist Manifesto, the industrial market stripped power away from the working-class by appropriating the means of production for its continual progress. Thus, production control was to be driven by the "invisible hand" of the market rather than the hands of the workers.

As a result, we live in a society that touts mindless consumption as the highest value. Policy makers and pundits constantly refer to "consumer confidence" as a measure of financial stability. If we do not buy, we do not progress. Value is no longer placed on our work or its product, but rather on the merits of our purchases.

If the Georgetown University study is correct and its recommendations are carried out, we may bear witness to the market's attempt to appropriate education in the name of continual progress, just as it did with industry and manufacturing. Once this happens, students and faculty will no longer consciously shape their curriculum; our capacity for critical thought will have been packaged and sold back to us.

Instead, the "invisible mind" of the neo-liberal market could dictate what should be taught and to whom. The forces of economic progress would have seceded in isolating us from our very essence: our actions and thoughts.

Rising textbook prices force creativity

Ah, new school year, which surely entails move-in day, a bursting "first week" social calendar, new friends and UMass pride. With the university bill paid and summer job earnings saved, the average student has little to worry about.

Yevgeniya Lomakina

One is ready for a year of great classes, unlimited meals at the DC, exhilarating life in a dorm room and late night trips to the store to exploit the funds on the UCard. That relative financial stability is short-lived, however. There is one more expense that is seldom considered during pre-academic planning: the cost of textbooks.

Depending upon the major and the number of classes taken, textbooks can lead to a significant financial burden. Books on topics such as marketing and the sciences can easily cost over $150 per copy. To make matters worse, they are often republished or "bundled" with a CD-ROM or a work book that will rarely be used by the instructor. The option of buying without the additional materials is often inexistent.

Resourceful students have come up with numerous ways to counteract to the publishing industry. From borrowing a friend's book to photocopying, the strategies to minimize the expense are as varied as the students themselves. Sympathetic to the tribulations of undergraduates, professors have agreed to help by providing course materials on reserve in the library or scanning the text and placing it online. These alternatives, however, did little to diminish the soaring costs. Acquiring textbooks usually resembles a marathon, where the winner gets the book quicker at the lowest price.

Once purchased, a textbook depreciates in value; its retail shelf life is highly dependent on the subject and its popularity among professors. The university buy-back program does not compensate, as the books are bought back at prices that are nowhere close to the original. With each academic year, newer editions are published, preventing older versions from circulating. As a result, students are left with piles of books that they will not use and are unable to sell.

In the past, the expense of textbooks came as a surprise since students discovered what they had to buy only after stepping into the classroom. Recently, this has changed. The Higher Education Opportunity Act, originally passed in 1965 and re-authorized multiple times, lastly in 2008, required all facilities of higher education to post textbook information along with each course during course selection process. The act also abolished "bundling" practices: students should see less class materials conjoined in plastic wrapping.

> Once purchased, a textbook depreciates in value ... students are left with piles of books that they will not use and are unable to sell.

While convenient in theory, the new law puts an immense strain on both the professors and the bookstores. Class selection for the subsequent semester is done many months in advance, allowing instructors less time to choose their course materials. The bookstores must receive the orders quickly and collaborate with their information technology department to publish the information in a timely manner. This technique may prove problematic in larger universities with different departments and numerous courses. It will also terminate the printing of course selection books, as not all schools digitalized their catalogues.

As the element of textbook price-surprise is disappearing from their agenda, students are discovering new ways to obtain the necessary materials.

Well aware of the search for cheaper books, some companies are beginning to offer an innovative service, textbook renting. With textbook renting, the prices are considerably lower: renting a title as opposed to purchasing it new could yield a savings of up to 60 percent. However, the books must be returned by a set date at the end of the semester.

Web sites such as Chegg.com present students with the option of borrowing; corporations such as Follett Corp. launched Rent-a-Text, a program that in conjunction with campus book store, allows students to pay for their rented books in cash or by a credit card.

Retailers such as Barnes and Noble also let students obtain course materials, online or in store. Some even offer digital textbooks, a newer practice that is an emerging threat to the publishing industry. The new programs are all about "giving options" to knowledge-hungry students.

The savings in renting vary, and renting is not always cheaper than buying a used copy. Aside from being financially responsible for a lost, stolen or simply not promptly returned item, students are also limited in the markings they could make while borrowing – minor highlighting and note taking is permitted, while complete obstruction of text is not.

Along with the knowledge these books provide, the students are given the power to save. That power is becoming greater as an increasing number of websites pitch in to the mission of affordable textbooks. A Google search for "cheap college textbooks" provides pages of results that include the words "rentals," "textbooks" or "cheap," and any imaginable combination of these. The choices are out there for those who are willing to use them. And so are the textbooks – so let the marathon begin.

POINT-COUNTER-POINT

"I disapprove of what you say, but I will defend to the death your right to say it." - Evelyn Beatrice Hall

Twitter: time saving tool or terrible trend?

Tweeting for the birds?

In my academic career at the University of Massachusetts Amherst I've been trained to be objective, and rarely do I have such a strong opinion on things that are supposed to benefit the academics and specifically the field I'm studying – journalism. But I do have quite the long-time and contentious relationship with social media; mostly a dislike. I know one thing for certain – I won't use Twitter, and I certainly won't use it for academic purposes.

Chelsea Whitton

I admit that I am a bit unwilling to embrace change – as I still prefer the Microsoft Works Processor. But in my travels here at school and talking with fellow students it seems that this fall semester there is a large incorporation of social media use and requirements for academic classes – meaning that it is required you have accounts with social media sites and tools; Twitter being one of them and in my opinion the most overwhelming.

In this world of socialized media people lose their sensibility of what is meaningful. When everyone is able to release their own personalized press, doesn't it desensitize our ability to relate with one another, our ability to converse naturally?

The academic load typically being five courses a semester in addition to a social life, a family life, a work life and time to just chill out – offers life its woes in the balance act of a college student. Twitter and its operating system seem to invoke the sense of being caught up in a whirlwind society – like living in a city that never, ever sleeps.

For example, log onto Twitter right now. Do it! Okay, you don't even need to logon with your own individual screen name before you start being bombarded by messages from people you don't know, people who mean nothing to you and which you'll never meet. Currently it's Thursday at 6:00 p.m. and on the main Twitter page, feeds are streaming in about how Facebook is down at the moment. How will life go on?

For those who struggle with attention spans, or for those who lack focus and academic drive, Twitter may just destroy any hope. In a Dailymail.co.uk article, "Social websites harm children's brains: Chilling warning to parents from top neuroscientist," an Oxford University neuroscientist Susan Greenfield said, "It is hard to see how living this way on a daily basis will not result in brains, or rather minds, different from those of previous generations," she said.

The largest problem I have with Twitter isn't that people are willing to use it, but rather that people aren't willing to question its purpose, importance and use. My belief and understanding of why Twitter took off especially for the news media is that socialized media enforces the idea of the individual – the participant – as well as society as not a collective whole, but one of many ideas, political views and theories. As acceptance grows, so does the range and ability in which society can express individuality. We have the First Amendment protecting our right to report and say whatever we feel inclined to within the limits of the law – so why not have everyone do this under the same medium? That is what Twitter is running on – a freedom of expression monopoly. Everyone is their own news creator. Everyone has a story to tell, a narrative, a link to post and someone to reply to.

When an academic course at UMass requires you to use social media it truly is saying something else. It is inferring that the curriculum in itself isn't enough to support your experience- it may be undermining the importance of conversing with fellow classmates and peers in a certain major. Instead you have Twitter which falsely creates a community – perhaps interested in the same curriculum, but I think what people fail to realize is that these aren't real connections. You don't know the person and have a limited space in which to communicate.

It is hard to question the emerging system of which you are a part. So, instead of joining the millions of tweeters and potentially doing poorly in academics, I refuse to participate. I am essentially taking a breather. While social media users are racing to get the first word out, the first breaking news tweet, I'm interested in reading the story when the larger picture arrives, rather than a 140 character limited update every three minutes.

Journalism wasn't meant to be fragments of quick information strung together over the course of a story unfolding leaving the reader to piece the story together. Academics weren't meant to be a series of links and tweets providing the consumer bits and pieces of information. We are paying tuition and giving time to majors we are impassioned by, to course material which we are inspired by – we shouldn't be giving all of our time and money meant towards academics to Twitter.

Tweets on why I won't 'tweet':

1. Because when I first entered college a 'tweet' was something you heard outside your window as you prepared to drag yourself to class.

2. If we spent our time on more valuable things such as looking around us rather than what everyone else is spewing maybe social change and justice would be an action rather than a thought or hope.

3. Because fact is better than quick fiction.

Chelsea Whitton is a Collegian columnist and can be reached at cwhitton@student.umass.edu.

Tweets encourage discussion

I hated the idea of Twitter. When I saw a report about it on the "Today Show" one morning a few years ago, I dismissed it as a media-constructed fad. I saw politicians using it as a lame attempt to stay trendy and techno savvy, and movie studios using it as another arm of publicity. And everyone else just sending out egocentric bursts of 140 characters, or "tweets". Frankly, to me it seemed like a whole bunch of twits.

Mike Fox

And then I saw the light. At the Annual Convention of the College Democrats of America, everyone tweeted. They shared articles with each other, commented on the articles, supported each other through retweeting and overall used it in a really collaborative way. This wasn't a collection of people whining and broadcasting their frustrations to the world to satisfy some egocentric need (at least not always), it was an entirely new form of communication. At the airport on the way home, I received a crash course from two veterans and from that moment I was hooked.

I follow a series of news sites that allow me to process headlines almost instantly. I can read out the general emotions of a certain group of people or survey an overall atmosphere towards an important news event, such as the recent developments and lack thereof in the debate over repealing "Don't Ask, Don't Tell". And I can see interesting information and readings recommended by trusted friends that I would have normally never seen otherwise.

This last function shows Twitter as an entirely new way of learning. It used to be that people received a general education in all topics, which further developed into a tendency to solely study according to one's interests. Now, for the Twitter user with a variety of friends and sources that they follow, they learn from the educational passions of others.

A University of Massachusetts psychology teacher that I follow regularly, posts articles that give insight into human behavior, a favorite political blogger posts articles from both sides of the political spectrum and Roger Ebert posts a variety of insightful and whimsical articles that only a man who has suffered an illness such as his could have insight into. Its a pure distillation, without embellishment, of certain individuals' passion for sharing knowledge.

While this has done wonders for pursuing knowledge as a hobby, its possibilities in academia definitely appear interesting. Teachers at times attempt to use the online platform Spark to encourage discussion or debate over articles or current events. It is an attempt to use the fairly standard forum feature of Spark as a way to mimic the nature of an in-class debate. Let's face it, it rarely works. Frequently people post and engage in a degree of conversation to get the grade and then call it quits. Is it because people just want to do the minimum amount of work. Spark isn't always an easily accessible platform, or maybe because people simply don't like doing homework? Or maybe its all of these reasons.

Using Twitter to encourage discussion – with people sharing a list of Twitter contacts and participating in it at the same time – could prove to be much more involving. The interface is easy-to-use, you can do it from most smartphones, and you're limited to a soundbite (as would often be the case in person, for better or worse).

This is only a practical way that Twitter can be involved in academics. But I believe that its true value is an embrace of the values of open and free-flowing discussion as previously mentioned. While the topics can devolve into triteness, when used properly, it is an entirely new source of knowledge. The interactive features of it, whether it is notifying others of their possible interest in a tweet through "tagging" or adding your tweet to large scale discussions through a "hash tag", allow the closest thing possible to simulating real and honest dialogue.

Internet knowledge and social media is rapidly involving itself in more and more aspects of our life. With smart phones, we're in touch in a thousand ways constantly, with a few clicks, almost any recorded information is available. Distances have been cut and all of those cliches about globalization through technology hold incredibly true.

Further technology is coming, and to be a Luddite would simply be refusing to adapt and evolve, so the challenge is to bend the technology to our will and desired uses, rather then become subservient to it. By combining the wide-ranging discussion capabilities of Twitter with the instant access of knowledge that the Internet provides, it allows academic discussion and discussion in general to reach all new dimensions.

Mind retweeting this article on #academicuseoftwitter?

'Best Pic' writer visits Amherst College

By Jeff Mitchell
Collegian Correspondent

A speechless swarm of students and professors alike sat immobilized in the seats of the Stirn Auditorium as a clip from the academy award winning film "The Hurt Locker" played before them. The scene depicted soldiers in an intense rush to defuse a car filled with explosives as Iraqi civilians slowly gather around them. In a matter of minutes, the full theater audience was struck with awe, and Mark Boal had the Amherst College crowd won over before he even stepped on stage.

After realizing that a relative of Boal's attended the college, efforts began to bring him to town. One organizer explained that it was almost unbelievable that they actually managed to get him to attend, when months ago it was only a hope.

This screenwriter/journalist/producer is best known for his screenplay for the 2008 film "The Hurt Locker," which walked away with six academy awards, including "Best Picture." In addition to the biggest award of the night, Boal personally took home "Best Original Screenplay."

The film followed an Explosive Ordinance Disposal team during the Iraq War. This story was fueled by Boal's actual work with a bomb squad in Iraq during 2004.

Screenwriter/Producer Mark Boal took the stage with a somber and a relaxed tone. His scruffy, long-haired appearance seemed to already explain his demeanor before he even spoke. He addressed the faculty and began to explain his journey from post-college kid to accomplished screenwriter and journalist.

After college, Boal had a hard time finding a journalism position in New York City and moved to Eastern Europe where he eventually obtained a position at the Budapest Sun as a copy editor, even though he admitted he had no idea what the position meant at the time. He worked at the Sun for a year and a half and eventually returned to New York City, and landed a job writing for "The Village Voice."

Boal's first article for the "Voice" was on overpriced Christmas trees and the abuse of labor to obtain these trees. In the next few years, Boal rose through the ranks and obtained a position as a columnist, while contributing to other news organizations.

As Boal moved from topic to topic, the crowd seemed very eager to see how his journey would lead him to "The Hurt

See BOAL on page 7

Academy Award-winner Mark Boal spoke at Amherst College on Sept. 20. Boal took home "Best Picture" and "Best Original Screenplay" Oscars for his work on "The Hurt Locker."

(MCT)

After a long weekend of fun, celebrate National Pancake Day this Sunday by preparing a piping hot, buttery, syrupy and delicious pile of flapjacks.

Pile on the pancakes

By Leslie Rosenfield
Collegian Correspondent

Sunday, Sept. 26 may seem like any other day, but, in fact, it marks one of the greatest – and least known – holidays, National Pancake Day. The special occasion is an ode to all those who love breakfast. So put your bacon, eggs and cheese away, and go get some pancake ingredients.

You must be thinking, why is there a whole day dedicated to pancakes? It's time to think out of the box and really look inside yourself to dig out your deepest wishes pertaining to this treat. Everyone loves waking up Sunday morning and smelling the sweet sent of batter being whisked around in the bowl, while you sit there awaiting the time when the batter hits the griddle and begins to sizzle.

All over the world people attempt to make the perfect pancake, simple but enjoyable. Today, widen your eyes with the excitement of learning about new recipes to make your cakes much more delicious.

Whether you have lots of experience in the kitchen or are an amateur, these recipes can be prepared by anyone willing to learn.

Buy a box of Aunt Jemima, Bisquik or start from scratch. Add the appropriate amount of eggs and milk to your batter, and whisk away. To step it up a notch, take some all-natural maple syrup – none of that fake substance – and add one or two tablespoons of it to the mix. Once the cakes are cooked, your taste buds should be screaming for one more bite.

Funky Fruity Flapjacks

For those of you who want to go that extra mile and include fruit, this next concoction is right up your alley. Refer to the above instructions, and don't forget the syrup. This time one more ingredient will be added to the batter before your ready to cook. The syrup is in the blend, now include a dash of cinnamon, and poof, you now have taken your pancakes from the sweet, to the sweet and slightly spicy. The next step is simple, take some blueberries, raspberries or strawberries,

See PANCAKES on page 7

Sunday marks Pancake Day

PANCAKES from page 6

whichever you prefer and split them into two groups. Drop the first group of berries into a bowl and proceed to mash them up with a spoon or a fork. After that thrilling experience, add the fruit to the batter and cook away. Your pancakes should cook on each side not more than four minutes.

When the top of the cake is nearly covered in bubbles, turn it over carefully. Make sure that you keep track of roughly how long it took to cook the first side, and cook the second side for the same amount of time. Stack them on your plate, take a second handful of fruit and drizzle it all over your plate for a tasteful presentation. Sit back, grab your fork and knife, and enjoy the bliss.

The Anti-Crêpe

Last, but certainly not least; how to make those pancakes much fluffier. Many people think that it is all about how long you cook pancakes for. The true secret is in the steps leading up to the skillet. Whisk in one hand, bowl in the other, add the eggs and milk slowly, the combination of the wet ingredients slowly blending with the dry ingredients is the key to creating fluffiness. Keep stirring the batter. All the bubbles and bumps may be gone, but fear not, keep going.

The extra time you spend mixing will ensure optimum fluff for your cakes. After that, the hard part is done. Turn your burner on low heat, spray the pan and pour the batter. Now, you must watch them because you don't want bubbles popping up quite as soon. Be patient and before you know it, within two minutes flip that sucker and poof, golden, brown fluffy, goodness and ready for your tasting!

So go now and take a plunge into these scrumptious recipes and succeed on making your pancakes that much more fluffy in honor of National Pancake Day.

Leslie Rosenfield can be reached at lrosenfi@student.umass.edu.

Oscar winner Boal speaks at Amherst

BOAL from page 6

Locker."

Boal explained that the 9/11 attacks greatly impacted his move to more military writings.

"Debris hung over the city. I could taste the dead and remains from the building in the back of my throat for the next couple of days," he said.

Boal lost a lot of friends as a result of the attacks, one of whom was a childhood friend who was the inspiration of the film's protagonist, William James.

Boal's speech was filled with anecdotes and jokes about drinking and his mistakes through his career. His tone ranged from serious to playful quickly as he jumped from waking up with a hangover to the death of his coworkers.

After convincing his editors at "Playboy" to send him to Iraq, Boal traveled with the Explosive Ordinance Disposal teams in Iraq and observed their interactions with Baghdad citizens in 2004. He described the capital as a "city of bombs," because he saw bomb squads respond to as much as ten calls a day. He said that being a journalist is like being a child, and that "you cannot choose the events that define you."

After his journey with the team, Boal wanted to write a screenplay about the bomb squad and the effect the war had on soldiers. After multiple drafts, he and director Kathryn Bigelow worked together to find a studio that would make the movie. At first, no one wanted the script. Eventually, it all worked out, and production began in Jordan.

The crowd then asked Boal an assortment of questions when he opened the floor. The topics ranged from racial profiling to inspirations, and even the writer's opinion of the Iraq War. He answered all questions with deep thought and genuine, humorous and realistic answers.

Boal explained that he set out to avoid any left or right wing bias when making the film.

"[My goal was to] find kernels of humanity that define individuals," he said.

In response to questions about military reaction to the film, Boal said, "[The film was] made for people with no experience of war."

Freshmen Matt Debutts of Amherst College found Mark Boal to be "very personable and honest with the crowd. He didn't beat around the bush." Debutts also noted that Boal was a very compelling speaker.

Louis Sallerson, a senior at Amherst College as well as a member of the Chairs of Amherst Film Collective was one of the organizers of the event.

"I have to say it is kind of surreal and discordant," said Sallerson. "It is surreal to watch this intense film and then see this regular guy who you couldn't pick out of a crowd I have to think what meeting him actually means."

"I feel like he was quick on his feet when answering questions," said junior Akil Gibbons of Hampshire College.

In response to the question and answer section, Gibbons said, "He gave reasonable answers, and worked within the time frame given."

In a post-presentation interview, Boal described speaking at Amherst as a "terrific experience to encounter such intellectual and ambitious thought-provoking students."

In response to the recent fame he has accumulated from his success, Boal said, "[I am] still soaking it in and trying to process it."

As the Minutemen look to beat undefeated New Hampshire this weekend, senior Bryant Craft will try to add on to his team-leading three goals and six total points.

Brown shuts out UMass in second half for 3–2 victory

By Michael Counos
Collegian Staff

The troubles continued for the Massachusetts women's soccer team on Thursday against Brown in Providence, R.I. with a 3-2 loss. Despite Therese Smith's two-goal performance, UMass was shutout in the second half and a late goal sealed the deal for Brown.

The Minutewomen are currently 3-5-0 and Brown now sits at 4-2-1. The Bears went up in the 18th minute with an unassisted goal by Mika Siegelman. A UMass foul set up Siegelman for a free kick which she launched into the upper-right hand corner of the net from 35 yards out past goaltender Emily Cota. The Minutewomen knotted the score at one apiece with a Smith goal when she received the ball at the top of the six-yard mark from Ashley Hamel and booted it into the far corner just off the finger tips of goalie Amber Bledsoe.

Brown	3
UMass	2

Brown would regain the lead in the 26th minute off the foot of Gina Walker. Maddie Wiener sent a strong corner kick into the box where Walker one-timed it home to the left side of the net. Smith would strike again before the intermission with another goal to tie the game. Deanna Colorossi sent a corner which was received by Hamel and assisted to Smith for the second time.

"Both of them just work really hard and I was happy with the offense," UMass coach Ed Matz said.

The second half would go back and forth between the two clubs before Marybeth Lesbirel would fire the game-winning goal in the 87th minute from 30 yards out into the upper-right corner.

"She made a heck of a shot," Matz said. "We worked really hard and you hate to lose that way but that was a perfect shot."

UMass had much success against Bledsoe but a goaltender change at half was the difference in the game as MC Barrett came in and turned away three shots.

"I played against Brown when I was at Northeastern and that's just their coach's style, switching up goaltenders," Matz said.

The Minutewomen were outshot in both periods and overall 16-13. Brown had six corners compared to UMass' zero and the Maroon and White had eight fouls to Brown's one.

Next on the schedule for the Minutewomen is Ivey League foe Harvard. UMass holds the edge at 14-7-1 in the all-time series. The two teams have not met since Oct. 2, 2001 when UMass lost its second consecutive game to the Crimson.

Harvard sits at 2-3-1 on the season and will matchup with Pennsylvania on Friday before coming to Rudd Field on Sunday. The Crimson's wins have come against New Hampshire and Rhode Island as they are led by Katherine Sheeleigh, with six points on two goals and two assists.

Other threats for Harvard include Melanie Baskind and Patricia Yau, each with four points. Baskind has two tallies this season while Yau has one goal and two assists.

Alexandra Millet will be between the pipes as she's started four of Harvard's six games, holding opponents to a 1.76 goals against average. She also sports a .708 save percentage while the Crimson's other goaltender, Jessica Wright, has started two games and enters the weekend with a 1.79 goals against average and a .750 save percentage.

"I definitely think we are a good team at home and we are just very anxious to play on our home field," Matz said.

UMass will host the game at 1 p.m. at Rudd Field on Sunday.

UM tries to hand Wildcats first loss

By Herb Scribner
Collegian Staff

For the second straight game, the Massachusetts men's soccer team will take on a side that isn't used to losing as it faces undefeated New Hampshire on Saturday.

Other than being unbeaten, the Wildcats (3-0-2) boast a tough team that can dominate with its strength. UMass midfielder Ben Arikian doesn't deny that UNH pushes its opponent to the limit physically.

"They're usually a big strong, physical team," Arikian said. "That's one thing we lack is height and physical strength so we've got to make up for it with our soccer."

Prior to facing Central Florida a week ago, UMass coach Sam Koch compared both the Wildcats and the Golden Knights in terms of skill.

"I think in a lot of ways they're very similar," Koch said. "I think UNH is a bigger team and try and put the ball and the air more."

Any viewer of a college soccer game notices immediately the almost-chaotic pace of the ball and how possession for a team is sometimes very limited. For UNH, the game is much more possession-based.

"UNH is actually trying to possess the ball a little bit more," Koch said. "[The Wildcats] can play either way and will play the way the other team plays."

Arikian, who holds a leadership role for the Minutemen, explained that there are ways to defeat UNH even if the Wildcats put the ball in the air more often than the Maroon and White.

"We've got to play the ball around them, keep it on the ground a little bit more," Arikian said. "Hopefully play a little less direct to them and not fall into their game, and when we do that we start struggling."

The Wildcats started off their season at the Nike Fall Classic where they did not a lose a game, drawing 0-0 with Wisconsin-Milwaukee after two periods of overtime in the opening contest and then shutting out Central Connecticut, 1-0.

After the Fall Classic, the Wildcats moved on to the Smith Barney Nike Classic, hosted by UMass' most recent opponent, Vermont. Both games for UNH went into double overtime. While the Wildcats tied Cornell in their opening game, they found a lucky strike in the follow-up match against Presbyterian.

As the Minutemen played a long-winded battle against the Catamounts on Wednesday, UNH went toe-to-toe with Bryant. The Wildcats scored in the 43rd minute to open up the scoring off a very deep cross from Brad Hilton. After Hilton booted the ball up the field for Jon Harris, Harris drew out the keeper and needed a single touch for the finish.

The Bulldogs (2-4-0) forced the game into overtime, but it was not enough to stop Hilton and the rest of the UNH offense. Hilton struck the ball into the back of the net just over a minute into extra time for his second goal of the season as well as his second game-winning score. The junior midfielder also has a pair of assists on the year.

The Wildcats have pushed the game to overtime on four of their first five games this season.

Herb Scribner can be reached at hscribne@student.umass.edu.

Kelsey Anderson started at midfield and had a shot on goal in the loss to Brown on Thursday. For the season, the senior has a goal and an assist for three total points.

UM hosts Albany, Vermont in search of goal production

By Pete Vasquez
Collegian Staff

Halfway through what has been a rollercoaster of a season, the Massachusetts field hockey team hopes that coming home for two weekend games can jumpstart another uphill climb.

The Minutewomen (3-5) will square off against Vermont (4-4) on Friday night and No. 19 Albany (5-2) on Sunday afternoon, hoping to put last weekend's debacle behind them.

UMass failed to score a goal against Maryland and American en route to being swept on back-to-back days. After being outscored 5-0 in what was a draining road trip, this weekend's home games are a welcomed sight to the team.

"It was a very tiring weekend last weekend with a nine hour bus trip both ways, but we're really excited about the opportunity this weekend to play a couple of quality opponents and be back at home," UMass coach Justine Sowry said.

"Both opponents are very tough and they don't give you much space at all," she added. "Vermont is reasonably tall and they're pretty good tacklers so we're going to have to shift the ball around very well and we like to do that at home so that goes to our advantage. But hopefully we'll get some open field play and get some return."

The Minutewomen have focused most of their attention this week in practice on their circle work, including winning penalty corners and trying to create more goal scoring opportunities. Sowry, however, sees the lack of scoring as more of a mental obstacle than anything else.

"It's getting ourselves into the goal scoring positions and then also having the confidence to have a shot or win a corner," Sowry said. "Now we're getting into those positions but having the poise to execute a shot or win a penalty corner is something that comes with practice and repetition and experience. That's what we're working on this week."

That experience is still a work-in-progress, with most of the forward line being underclassmen. Katie Kelly, a senior captain on the forward line, sees these upcoming two games as an opportunity to fix any previous errors.

"We need to come out strong and ready to play," Kelly said. "With these games, because they're still non-conference, we need to focus more on what we need to continue to improve on. So these next two games are about correcting the mistakes that we've made in the past."

Kelly and the Minutewomen faced both Vermont and Albany last year on the road and took home a pair of one-goal victories. Sowry expects another tight game from both opponents this time around.

"We've defended well against [Albany] but we haven't necessarily attacked well against them," Sowry said. "They defend in numbers, very skillful team and it's very tough to penetrate. So it's going to be a good game and we're going to have to have contributors all over the field."

With UMass working hard on creating goal-scoring opportunities, this weekend presents a significant challenge. The Great Danes feature senior Christine Hoffman, a starter in goal for every Albany game, who is 2-0 with a 2.19 goals against average and a .609 save percentage.

Vermont's Brooke Crane, a junior goalkeeper, has played every minute in goal this season and boasts a 2.10 GAA and a .778 save percentage with one shutout. With a height of 5'10", Sowry calls Crane a giant and an aggressive one at that. Still, the Minutewomen want to be the ones to impose their will this weekend, something they've had trouble doing recently.

"We're letting our opponents get the better of us," Sowry said. "We've only played two solid games and that was UConn and Maryland and the rest of them we've come out really slow. So to get back home and to work on coming out of the gates quickly is something that we're trying to do this weekend. But it's in the pressure of the moment that our team has to make the right decisions."

Pete Vasquez can be reached at pvasquez@student.umass.edu.

Freshman Lindsay Bowman has scored two of the eight UMass goals this season.

International enrollment falls

New study finds foreign exchange student rates decreasing

By Ashley Berger
Collegian Staff

Though the University of Massachusetts has just recruited its largest freshmen class in history, the number of foreign students enrolling in American universities nationwide is steadily declining. While the number of international students in the United States rose by 3 percent from the fall of 2008 to the fall of 2009, the concern lies within the declining rate of annual growth.

In the 2006-2007 academic year, foreign enrollment rose by 4.3 percent, then dropped the following year to 3.7 percent, and dipped again in 2008-2009 to 3 percent, as found by a report by the National Science Foundation. The study, conducted by Dr. Joan Burrelli, found that the most drastic changes came in the fields of science and engineering. From the fall of 2008 to the fall of 2009, the study found that enrollment of new foreign students in science and engineering programs dropped 2 percent.

Burrelli attributed much of the declining rate of foreign enrollment to the global economic downturn.

"My guess is that the economic crisis is a big factor; students have less money to come here, there are fewer jobs available for those who come and want to stay, and schools have less money to support graduate students."

She added that, as other developing nations' educational systems improve, more students are likely to stay in their home countries.

"It could also be increased educational capacity in the home country and increased opportunity for post-graduation employment in the home country."

The study found that foreign student enrollment decreased in the fall of 2009 in six of the top ten contributing countries; these countries include India, Japan, Taiwan, and Thailand. Though these countries saw a decline in enrollment to American universities, countries like Saudi Arabia, China, and South Korea saw an increase in figures. Overall, students from the Middle East and Africa contributed to increased enrollment in American universities, whereas there was a decrease of students enrolling from Europe, Central and South America, and Canada.

The most recent Open Doors study published by the Institute of International Education also found a downward trend in the enrollment of foreign students, but found overall increases nonetheless. In the study, international students made up 3.7 percent of the total enrollment at universities in the United States, which was a .2 percent increase from 2007-2008. American research institutions enrolled the most foreign students, led by the University of Southern California.

There are reasons that Burrelli suggests some countries, such as India and China, send significantly larger populations than others.

"These are large countries with large populations. They are also rapidly developing, so they have a need for educated people, and although their educational capacities are increasing, capacity does not yet meet demand for higher education."

UM microbiologist finds new organisms in Indonesian seas

By Katie Landeck
Collegian Correspondent

Two thousand meters below sea level, an unmanned submarine videotaped footage of species and underwater landscapes that have never been viewed before. At the same time, University of Massachusetts microbiologist Jim Holden directed the operation from his lab in Jakarta, Indonesia.

The expedition to explore the Indonesian seas is part of a five-year collaborative program between Indonesia and the United States.

"The State Department proposed it, and wanted an Indonesian partnership because Indonesia has a Muslim majority and because we are both maritime nations," said Holden.

Little exploration has been conducted in the region before this project, which gives the research enormous potential for scientific discoveries. According to the Associated Press, the scientists involved with the research have already found 40 potential new species of plants and animals.

"My favorite was this bizarre squid that was really long with these amazing undulating fins," Holden said. "The way it glided was like nothing I have ever seen before."

COURTESY MASSTECH

UMass biologist Jim Holden researched underwater life last summer.

One of the factors of the project that attracted Holden was Indonesia's location, more specifically its position in the so-called "Ring of Fire," a circle of high-

Cranes for Cancer: Comm Coll. crafts for breast cancer awareness

By Melanie Muller
Collegian Correspondent

On Thursday, dozens of students gathered to fold, bend and create multicolored origami paper cranes to promote awareness about breast cancer. The event, which was organized by the Student Advisory Board, was held in 504 Goodell Hall.

The Student Advisory Board is an organization made up of Commonwealth Honors College students with the mission of advising Commonwealth College Dean Priscilla M. Clarkson on certain matters, developing community within the honors college, and strengthening connections with the rest of the University.

The board first initiated the crane-making effort last year, when 1000 cranes were folded and hung in the Honors College lounge and the Whitmore Administration Building. The goal this year was to produce 200 cranes to replace some of last year's in time to hang them up again this October.

Organizers were inspired by the ancient Japanese legend that, if a person folds 1000 paper cranes, that person will be granted a wish, such as to be cured of an illness. The cranes will be hung in strings of eight each, and the last crane on each string will be colored pink to symbolize the one out of every eight women who will contract breast cancer in her lifetime. Volunteers encouraged members of the University of Massachusetts community to come see the cranes once they are displayed in October.

Approximately 40 students participated Thursday, which, according to organizers, is about

UM tops Stony Brook

By Jay Asser
Collegian Staff

After allowing big play after big play last weekend, the defense for the Massachusetts football team came through when it was needed the most to preserve a 26-21 win over Stony Brook at LaValle Stadium.

The No. 11 Minutemen (3-1) forced a punt, a turnover on downs and an interception on the final three Seawolves possessions to earn their first road victory since 2008 and break a seven-game road losing streak.

UMass	26
SB	21

"It was sporadic," UMass coach Kevin Morris said of his team's play. "A lot of penalties and turnovers in the first half, and it was a dog fight in the first half. In the second half, the character of the team came through again and persevered. It was certainly not a very pretty contest from play-to-play but there's no such thing as an ugly win and we'll take it."

Linebacker Tyler Holmes sealed the win for UMass by picking off quarterback Michael Coulter with one minute, eight seconds remaining in the contest. The takeaway marked Holmes' third interception of the season in only four games.

"I guess I always seem to be in the right place at the right time," Holmes said. "I knew he was going to look for a dig or something on the back side, across the hash. I actually thought it was a complete pass. Ke'Mon Bailey did a great job knocking the ball out and it was able to fall into my hands."

Both Stony Brook (1-3) and the Minutemen relied heavily on the run, as each team eclipsed 200 rushing yards. For UMass, John Griffin ran for 132 yards and a touchdown, while Jonathan Hernandez piled up 96 yards and two scores. The Seawolves were led by Edwin Gowins, with 102 yards and a touchdown on just 13 carries.

Griffin, the senior transfer from Northeastern, had the best performance of his UMass career, topping 100 yards for the first time this season.

"I don't know if it was necessarily my best, but I just felt like today I really felt comfortable with the offense," Griffin said. "Some days, as a running back, sometimes it slows down for you, sometimes it's too fast for us. I felt like today it just really slowed down for me."

In the passing game, wide receiver Anthony Nelson led all players with a game-high 97 yards. The senior caught six passes from quarterback Kyle Havens, who threw for 255 yards and two interceptions. After not turning the ball over in the first three weeks of the season, Havens has thrown three interceptions in the last two games.

Honors college works for cancer awareness

The Commonwealth Honors College hosted a paper crane making event last week to promote breast cancer awareness.

CRANES from page 1

the same turnout as last year's event. The students folded, socialized and consumed pizza provided for the occasion for about an hour and a half. Three volunteers from the Student Advisory Board, including SAB President Dan Burke, were on hand to help students learn how to fold the cranes and to collect them at the end.

Group members expressed a need to hold the crane-making event multiple times in order to keep breast cancer awareness as a forefront issue in people's minds.

"Every UMass student at some point in their life is affected by breast cancer," said Burke. "So we're trying to reach out to everybody."

Participants learned about the event from an email sent to Commonwealth College students and through a past "Pizza and Prof Night" with Clarkson, who encouraged students to participate. Some students in attendance had been personally affected by the disease.

One student said that several members of her family had developed breast cancer, but that she hadn't had a chance to do anything to promote awareness of it before. Another factor that influenced her to participate was a crane-folding effort in her hometown to support a man who fell off his roof and was seriously injured. She considered this to have had a very positive impact on the community.

A formal count of the cranes folded had not been made as of Thursday night, but it seemed that the Student Advisory Board was well on its way to amassing the 200 cranes needed.

Those unable to attend Thursday's event who would still like to aid in the effort can drop paper cranes off at the Commonwealth Honors College office in 504 Goodell Hall.

A quite generous gift

Zuckerberg donates $100 mil. to Newark schools

MICHELLE WILLIAMS
COLLEGIAN STAFF

Mark Zuckerberg, founder and CEO of the social networking site Facebook, has agreed to donate $100 million to help improve the public schools of Newark, N.J. Test scores and graduation rates in Newark's public schools are among the lowest in the state. The school district has approximately 39,000 students, and has been controlled by the state for 15 years, due to underperformance. The donation will allow Newark Mayor Cory A. Booker a larger role in running the schools. Zuckerberg announced the donation Friday morning on "The Oprah Winfrey Show," with New Jersey Gov. Chris Christie and Booker, as well as in a press conference on Friday. "I'm putting some of my Facebook stock into a foundation," said Zuckerberg in the press conference.

"The foundation will then sell it off to raise cash, and then the cash will be used to fund the project, and the plan that the governor and the mayor are putting together, contingent on getting the results that we want to get and on getting the matching $100 million as well," he added. According to the New York Times, Zuckerberg met Booker at a conference in July about the mayor's plans for the city, and has been planning the donation since their initial meeting. The 26-year-old billionaire, who grew up in Westchester County, New York, currently resides in California. He has no personal connection to Newark.

He is the 35th-richest American, according to Forbes magazine, which estimated his fortune at $6.9 billion in August - up $4.9 billion from last year. Zuckerberg said the donation was made to help provide others with the education he was given.

"I started Facebook when I was in college, at a great university," said Zuckerberg, in an interview on Oprah. "And I have no doubt that if I hadn't had that opportunity that I wouldn't be sitting here today," he added.

Zuckerberg attended public school, then boarding school, and finally an Ivy League university. Zuckerberg founded Facebook in 2004 from his college dorm room. He started developing the social networking site with two friends while studying computer science at Harvard University.

Today, Facebook has more than 500 million active users, according Facebook's press room, with about 70 percent of users outside of the United States. The average user has 130 friends, and posts 90 pieces of content each month.

The corporation's value has been estimated at $34 billion. In August, people spent a total of 41.1 million minutes, or about 9.9 percent of their Web-surfing time for the month on Facebook, according to comScore, a research company that tracks Internet activity. In the same month, people spent 39.8 million minutes on all of Google Inc.'s sites including, YouTube, Gmail, and all other content sites. Zuckerberg continued added that Facebook was a huge risk when he founded it, but that it payed off in the end.

"Move fast, take risks. It's okay to try big things. You're better off trying something and having it not work, and learning from that than not having done anything at all," he said. The large donation was announced just days before the debut of "The Social Network," a film about the creation of Facebook that portrays the founder's story and the story of other people involved. Due to the timing of the movie's release, Zuckerberg said he considered making the donation anonymous to avoid appearing to soften the blow of "The Social Network." During the press conference, Booker said there were "some tense moments" while discussing the timing of the announcement.

"The movie actually became a complication, because Mark's team did not think that it would be good for him to make an announcement during this time," he said. Of the movie, Zuckerberg said, "It's a movie, it's fun. A lot of it is fiction, but even the filmmakers will say that. They're trying to build a good story. This is my life, so I know it's not that dramatic."

He added, "The last six years have been a lot of coding and focus and hard work. But maybe it would be fun to remember it as partying and all this crazy drama, so who knows, maybe it will be a good story."

Facebook founder Mark Zuckerberg recently donated $100 million to the Newark, N.J. public school system. The young billionaire's fortune is estimated at $6.9 billion by Forbes magazine.

How can a textbook possibly be free?

Panel discusses Open Study

By JESSICA JANKOWSKI
COLLEGIAN STAFF

There may be a way for students to save students hundreds of dollars on textbooks in the near future. Through a system Massachusetts Institute of Technology calls Open CourseWare, students, professors, and others looking for an education can view MIT's course syllabi, assignments, readings, and videos. The website grants access to open textbooks, open access journals, and the open courseware, however each of the divisions is independent of one another.

Stephen Carson, external relations director of Open CourseWare at MIT, said his group may soon synchronize its courseware with texts.

"We are likely to draw connections between courseware and textbooks, and/or open access journals in the next five years," he said last Tuesday in a presentation at the University of Massachusetts' Campus Center.

Open CourseWare hopes to broaden students' access to educational resources through information technologies as a new way to reach higher educational goals.

In 2007, there were 2,007 syllabi or readings on MIT's website, along with 17,500 lecture notes, and 9,500 assignments. The professors at MIT own the rights to the course material, but they grant the school the right to post it for the public's use.

Open content is simply resources which can be used by anyone for individual benefit, but cannot be used for profit. The site helps build connections between students and alumni, especially for users who stay within one department. The participating professors actually improve their course material, according to Carson, as he said they are unwilling to submit their work online without first proofreading it.

250 schools worldwide are involved in this program and have become part of a consortium (oswconsortium.org), including UMass Boston and Tufts University. 33 academic departments are represented on the site, such as English, math, history, and other prominent subjects, and there are over 1,000 hours worth of video which professors also use as tools in their classrooms. This website is like SPARK for UMass students - a place where everything you need for the semester's classes is right there in front of you. There are approximately 13,000 total courses on the open course ware consortium website.

Since Open CourseWare's debut, its site has received some 101 million hits by about 72 million individuals. Carson said that nine percent of viewers are educators, 42 percent are university students and 43 are what he called "independent learners." In addition, some 84 percent of professors who post to the site use it to outline their own courses, with 30 percent of students reporting that they use Open CourseWare's material to study for tests. Further, the new platform has spurred more than 100 "mirror sites," many of them offering services to those interested in open-access academia in Sub-Saharan Africa.

Beyond MIT's offerings, one UMass alum has also contributed to broadening access to free online education.

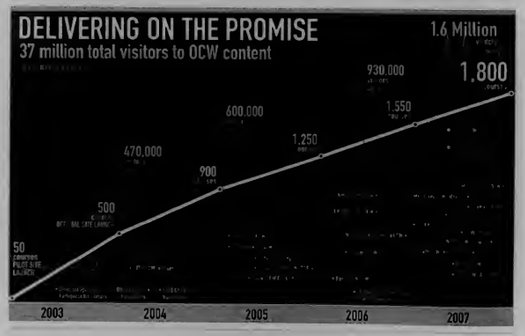
Eric Frank of the Class of 1992 has launched the upstart site Flat World Knowledge (flatworldknowledge.com), which publishes fully licensed and free college textbooks. Flat World is similar to Open CourseWare. On Flat World's website anyone can edit, copy, or view entire textbooks. It is also possible to add YouTube! or other videos to the texts. The benefits for students include easy access, affordability, learning style options, mobility, choices, and immediacy, according to Frank. Among the benefits for professors are quality of the product and complete control over the content of the textbook, which makes teaching a course much easier, Frank explained last week.

Associate Dean Marc Weinberger also spoke at Tuesday's event. As an introduction to marketing professor a few years ago, Weinburg said he fought to reduce the price of his class' textbook because he felt it was overpriced. He went so far as to have a customized, cheaper edition made just for him.

Weinberger said he believes students will take to Flat World and other open-study services.

"I think the students would embrace a textbook site like Flat World. If I was still teaching, I would use this system for my courses," he stated.

Jessica Jankowski can be reached at jjankowsk@student.umass.edu. Sam Butterfield also contributed to this report.



COURTESY WIKIMEDIA COMMONS

Thanks to a variety of new websites promoting open access to educational materials like lectures, essays and texts, students may soon be able to browse many of their texts on the Internet.

Exchange studies down

ENROLLMENT from page 1

"Recent surveys by the Institute of International Education and EducationUSA staff in India show that America remains the clear destination of choice for the vast majority of Indian students seeking higher education overseas," said Peggy Blumenthal, the executive vice president and chief operating officer at the Institute of International Education.

"However, the expansion of job opportunities at home, combined with more limited financial aid and training opportunities in the United States may have a negative impact on Indian enrollments in the United States."

The Institute of International Education cites four main reasons why students choose to study in the United States. These reasons include quality, variety of choices and environments, value, and flexibility. Accreditation and course and college flexibility also create an environment that is appealing to foreign students, according to the Institute.

UMass has seen a very minimal increase in foreign enrollment. In the 2008-2009 academic year, UMass enrolled 256 foreign students and in the 2009-2010, 262 foreign students were enrolled in undergraduate programs at the University.

Foreign exchange students gather for International Student Welcome Day at the University of Massachusetts.

Student arrested for breaking into Bertucci's Friday morning

Sometimes trying to steal bread doesn't help you make dough.

Last Friday, Sept. 24 around 3:20 a.m., officers from the Amherst Police Department responded to Bertucci's restaurant, located downtown at 51 East Pleasant Street to an alarm going off at the building.

On arrival at the scene, the officers determined that someone had forced their way into the building and noticed that the glass front door to the restaurant had been smashed in.

The officers conducted a search of the building, but found no one inside, according to a Friday release.

The officers then searched around the building and found an individual they believe to be the suspect hiding in nearby bushes. The man, 20-year-old Jamison Lapan of 5 Chatham Circle, Turners Falls, Mass., was placed under arrest for breaking and entering in the nighttime and malicious destruction of property worth over $250.

Lapan, a University of Massachusetts student, was arraigned Friday morning at Eastern Hampshire District Court in Belchertown.

Nothing was found missing from Bertucci's.

Jamison Lapan, a University of Massachusetts student, was arrested for breaking into Bertucci's last week.

Investigating the ocean's depths

MARITIME from page 1

ly active volcanoes found in the Pacific Ocean.

These underwater volcanoes create hydrothermal vents, oceanic niches home to microorganisms which can survive at temperatures greater than 100 degrees Celsius. Holden has spent his career studying these microorganisms.

"Four tectonic plates collide in Indonesia, which creates a biologically lush environment with intriguing possibilities," Holden said.

In order to better explore these hydrothermal regions, scientists used a new technology known as telepresence. This new technology allows scientists to work without actually being underwater.

Instead, scientists from the U.S. and Indonesia collaborated, some working in a command center in Seattle, while others worked in Jakarta.

Holden split two-months time between Jakarta and his office on the UMass campus.

"One of the cool things about the technology is that I participated in exploring the deep sea while in Amherst - even though I had to stay up till 3 a.m. in the morning," Holden said.

At the Seattle command center, scientists received real-time footage from the unmanned submarine via high speed Internet pathways and satellite. As "chief spokesperson for the scientists," Holden communicated between scientists and technicians on the boat.

"I could tell them to hold the camera on one thing for a minute or to go and explore just up over that hill, and they would do it," Holden said.

While working in Jakarta Holden would explain to the Indonesian scientists what they were seeing, while viewing the footage.

"It was very new to them," Holden said. "A lot of my job was explaining what they were seeing on the monitor to them. I very much wanted to explain the value to them so they could conserve and appreciate their waters."

Overall, Holden feels the mission ran smoothly.

"The weather cooperated nearly all the time. We had the usual glitches and troubleshooting, but we didn't have a lot of down time on the equipment. The biggest complication was the traffic jam between my hotel room and the command center," Holden said.

Despite time-consuming traffic on the ten mile strip between the hotel and the command center during his daily commute, Holden enjoyed his time in Indonesia.

"They were great hosts. I stayed in a four-star luxury hotel that was less expensive than an average hotel in the U.S. The people all spoke English and were really friendly," said Holden.

As part of the collaboration, some of the Indonesian scientists will travel to Amherst and work with University researchers.

Holden intends to return to Jakarta in the next few years to collect samples to further study the underwater landscapes and specimens.

Katie Landeck can be reached at klandeck@student.umass.edu.

Professor Jim Holden was part of a team of researchers who examined underground activity and wildlife in Indonesia's waters last summer.

Lectures talk sports

By SAM HAYES
COLLEGIAN STAFF

"Because you might get to meet Muhammad Ali."

It sounds like the punch line to a joke, but it was the answer to the question, "Why should we care about sports history?" during a presentation given by author Elliott Gorn Sept. 24 at the University of Massachusetts.

Gorn's speech was the opener to this year's Feinberg Family Distinguished Lecture Series, which this year will focus on the theme of sport and society in history.

Gorn spoke in front of a room filled to capacity last Friday in Campus Center. The talk began with Gorn joking that he would be "a little unusual" and "egotistical" but that his speech was part of a "personal tour."

The Brown University professor of history and American civilization began his talk by telling the audience how he met Muhammad Ali.

"I was Muhammad Ali's driver for a week and that's all I cared about" said Gorn.

Gorn drove Ali on the way to a conference and joked about how Ali relived his fights as he slept. "Ali was part of our political awakening," Gorn said, as he took the anecdote and explained why people should care about sports.

There is "cultural significance in America's sweaty games," said Gorn. He continued that it was unimportant what Jesse Owens' track records were; it was important how he represented America to Nazi Germany in the 1936 Olympics.

Gorn said that sports are among the reasons people become involved with social issues and the way many are first exposed to racial and social issues.

Gorn, the author of "Dillinger's Wild Ride: The Year That Made America's Public Enemy Number One," "The Manly Art: Bare-Knuckle Prize Fighting in America", and "Mother Jones: The Most Dangerous Woman in America," studied sport in society at Yale University.

Following Gorn's lecture will be a screening of the 2000 Denzel Washington film "Remember the Titans," with an introduction from professor Chris Appy in the history department on Thursday at 7 p.m. in 227 Herter Hall.

EDITORIAL OPINION

MONDAY, SEPTEMBER 27, 2010

"If we don't believe in free expression for people we despise, we don't believe in it at all." -Noam Chomsky

EDITORIAL@DAILYCOLLEGIAN.COM

Keeping the Jewish faith

Most people quit Jewish religious (Hebrew) school after their Bar Mitzvah, a typical Jewish rite of passage marked by reading Torah at a service and kicking your friends' asses at games conducted by overpriced DJs. However, I stayed in Hebrew school for six years after that. I attended what my synagogue called "Hebrew High School."

Mike Fox

In an attempt to mimic the idea in traditional high school of having more control over your academic pursuits, we had one class assigned about a relevant theme to our age and one class we could choose. I chose a class that analyzed the Torah with my Rabbi. I went to Hebrew High School for two hours every Wednesday.

Among Hebrew High School, attending Jewish overnight camp on and off, and being a semi-active participant in a Jewish youth organization, I would say that my level of Jewish cultural awareness is fairly high. Granted, I didn't keep kosher or attend weekly services, but I knew what Judaism looked like, and I knew how to keep it relevant in my life.

Despite this new awakening of sorts, I returned my sophomore year and still failed to seek out Jewish culture. I returned to my commitments of previous years, and showed up only for the most important holidays: the New Year and the Day of Repentance (conveniently ten days apart from each other). Yet again, I couldn't find what purpose making time for Jewish culture in my college routine would serve.

The answer finally came when I was studying abroad in Buenos Aires last fall. Soon after I started to become distanced from my American friends, on a whim I accepted an invitation to start participating in intercultural activities with Argentine Jews my age. This was run through an organization called Hillel, which operates cultural and religious programs for Jews my age all over the world.

The campus had a particularly dynamic Hillel organization. Interacting with the Argentine Jews, I saw how much they held onto every Jewish custom that they could. It was inspiring to see how their faith gave them an identity in a country that was not always hospitable to them.

Personally, I think the idea of being able to ask a higher power for grace and fortune in one's life is a difficult concept to accept.

However, once I got to college, I lost most of these structures of Jewish culture that I previously took for granted. The weekly Hebrew High School sessions weren't a mandatory part of my academics. The social function that the Jewish Youth organization fulfilled was taken up by Greek life, countless Registered Student Organizations, and my closely-knit freshman floor. Simply put, I didn't need the things that I previously relied on Judaism for, such as deep scholarly rigor and bonding experiences with peers.

The summer between freshman and sophomore years, I returned to my summer camp after a long hiatus to become a counselor. When the religious educator was looking for someone to help run the weekly mandatory services, I stepped up. I didn't know what it was. I never really felt this deep connection to the religious aspects of Judaism, nor did I feel some deep spiritual hole in my life.

However, I took up the responsibility and helped out with routine functions of conducting services, but more excitingly, I had an opportunity to critically analyze the week's reading of the Torah and deliver a sermon. Even more fulfilling, some campers started to ask me to help them write sermons. What was once the domain of people that campers perceived to be "wiser" was now accessible to anyone. I was able to break the ice and show that anyone could deliver a well thoughtout sermon.

Additionally, I started to see what prayer could bring to people.

Personally, I think the idea of being able to ask a higher power for grace and fortune in one's life is a difficult concept to accept. However, when surrounded by those that you care about, in settings that allow you to reflect and feel a connection to those around you, you can see the true meaning in prayer.

Despite my renewed faith, I found myself unwilling to go with my mom last weekend to services at my grandparents' synagogue for one of the High Holidays. I asked my mom why she went every year. What did she get out of it?

She said she enjoyed hearing the familiar songs and the routine of the service. It was a constant every year of her life to go to this synagogue. I don't blame her that this affinity for services at that particular synagogue has been built into her. Despite my visits to it for the first 18 years of my life, it's not a place to which I feel a connection.

To find spirituality appropriate to one's life, it is necessary to understand why a practice is followed. If one is just following rules blindly out of a sense of obligation, one is missing what spirituality can truly bring.

I don't normally consider myself that spiritual, but once I found prayer appropriate in my life, it became obvious to me that it wasn't about my relationship with a higher power, but to those around me.

Mike Fox is a Collegian columnist. He can be reached at michaelgfox8@gmail.com.

Suddenly a senior

Being a senior isn't easy, but it's damn fun. Being able to pick your classes first and knowing all the shortcuts through campus comes with a sense of pride and authority. We've been through the freshman fifteen and the sophomore slump, so we've earned the right to walk around the University of Massachusetts a little straighter and with our heads held a little higher.

Naychelle Lucas

However, along with the feelings of honor and achievement, I'm finding, come the feelings of sorrow and nostalgia.

I can remember freshman year like it was yesterday, back when the Pita Pit was the Pita Pit, and we had trays and plastic cups in the dining commons. Walking around campus now seems familiar and new at the same time.

I take comfort in the unmistakable towering library and the goose filled pond in the center of UMass. Simultaneously, I am shocked to learn about the tunnel underneath Herter leading to Bartlett.

I find myself often saying, "This is the last time I'll do this," or "This is the last time I'll move into a dorm," or "This is the last time I'll go to a welcome back barbecue."

Suddenly, my determination to leave is laced with a desire to stay. Walking past the cage, avoiding the circle and the curse of bad grades, I laugh to myself at the enthusiastic freshmen, wishing I knew then what I know now.

It's the beginning of first semester, and I feel like I have my whole life ahead of me, but I also feel like I'm running out of time. I've gone to a spring concert, attended a football game and watched a movie on Southwest Beach, but there is so much more I want to do. I want to go to the Big E in Springfield, volunteer in Amherst, and eat in each of the dining commons on campus. With 400-level courses, an honors thesis to write, and extracurriculars, my busy days whip by like the campus wind.

So, let's live for the nights that we won't remember with the people that we won't forget. Make some noise, Class of 2011!

I feel like May 14th will be here before I know it, and I'll be wondering where the time went. Sometimes it doesn't feel real. Sometimes I still feel like that doe-eyed naive freshman leaving home for the first time. However, the graduation tab on my SPIRE quickly reminds me of things to come. The job search, final grades, graduation parties and cap and gown are only a mere eight months away.

In 229 days I will be a UMass Amherst alumnus. The realization that this will all be over soon makes me appreciate life at UMass a little more. As seniors, we should all take time to appreciate the place where we've spent so much of our adult lives.

Take it upon yourselves to take the long route to class. Walk a little slower and enjoy the scenery.

Don't think of checking out books from the W.E.B. DuBois Library as a task, but rather as an opportunity - an opportunity to take advantage of UMass' resources while you still can.

If you think you can be any help to someone on campus, instead of turning up the volume on your iPod and pretending you don't see them, remember the times when you needed some guidance.

Make a point to help that person. Most of all, enjoy the little things. Take time away from lab reports and SPARK discussion boards to eat dinner with friends. Grab a coffee in between class at Whitmore Cafe, and read a book that hasn't been assigned by a professor. Even if you think the night is a bust, make the best of it, and party hard because you never know what memories you'll miss out on. You're only a senior in college once. You'll never have this opportunity again. We've written countless papers, sat through thousands of lectures and changed majors three times.

Now we're back again to do it all over. It's a little different this year though. This is the last time. We're never going to be UMass undergrads again. It may be hard to imagine now, but there is going to come a time after we've gotten our diplomas – after our UCards have been deactivated- when we're going to wish we had one more day to be here; one more day to be seniors.

So, let's live for the nights that we won't remember with the people that we won't forget. Make some noise, Class of 2011!

Five Reasons Why the PVTA Buses Suck...

1) Students should be made for the schedule, not the schedule for the students.

2) Some of the drivers have to pick up fish for the chancellor, capeche?

3) Being 'on time' is enslavement to the capitalist power structure

4) One wiff of those bus fumes and "Duuuude."

5) The trick is to get in front and yell "Stop in the name of love!"

ED/OP

On the war in Afghanistan

Part 1 of a 2 part series

It seems that the time when American leaders could arrogantly boast "We don't negotiate with terrorists," has passed. Despite the commitment of additional troops in the past year, the war in Afghanistan appears all but lost for the United States/International Security Assistance Force to everyone except a few who must be so delusional that they've lost all reason. Naturally, this would expectedly include some U.S. congressmen, five-star generals, and other nameless losers.

Kevin Gallagher

Even though President Obama declared an end to combat operations in Iraq (the notion is a farce), and he promised to get troops out of Afghanistan as well, the wheels of war are still turning in some places. This demands a sharp assessment of the whole picture.

On the subject of peace and reconciliation efforts, it appears that our fortunes are really worse than some thought.

In August 2009, after being appointed U.S. Commander in Afghanistan, Stanley McChrystal admitted that the Taliban was winning. He was retired within a year, supposedly because of an undermining Rolling Stone magazine interview. However, a month later, NBC reported on a "classified assessment" he authored, which estimated that a "successful counterinsurgency strategy would require 500,000 troops over five years." This figure is far beyond current capabilities. Before his sudden retirement, McChrystal warned the administration about our impending and inevitable failure in Afghanistan.

It wasn't a total surprise, because Defense Secretary Robert Gates already stated in October 2008 that, in Afghanistan, there had to be, "reconciliation as part of a political outcome." His statement was political gibberish, but basically indicated that we would have to lie down and make peace with the Taliban. The endgame has been clear for some time. Peace efforts have been ongoing. The incompetent Afghan President, Hamid Karzai has reached out to the leaders of the Taliban. Karzai was once criticized by the U.S. and its allies for cooperating with the Taliban and Pakistan, but it turns out that he was on to something.

On the subject of peace and reconciliation efforts, it appears that our fortunes are really worse than some thought. When Karzai tried to hold talks earlier this year, the Taliban declined to participate, saying they would not negotiate so long as there were foreign troops on Afghanistan's soil. The George W. Bush administration's cowboy hubris and childish warmongering after the attacks of Sept. 11 proved to be ill-advised.

They put this country in a pathetic geo-strategic position vis-à-vis the Middle East and Central Asia. The whole debacle added up to a matter of some $355 billion, which was picked up by the American taxpayers against an ailing economy and exploding deficit. Any West Point dropout could tell that the U.S. armed forces were understaffed, under-supplied and spread too thin from the very beginning. Many of our allies eventually saw fit to throw up the white flag and walk away. The best wisdom circulating post-9/11 among the anti-war left and true conservatives notes the prospect of a war of occupation against a powerful insurgency to be seriously undesirable - despite the exaggerated threat of al-Qaeda and Islamic fundamentalism. Once again, the representatives of the American people failed to listen. They gave Bush and his gang license to romp around the world for seven years, and leave this country in a sorry state in the aftermath. In some political circles, his administration is accused of war crimes. We succeeded only in making the Islamic world angrier at us, which is not a smart move considering America's insatiable lust for oil. Some observers, myself included, are forced to wonder whether we ever had a strategy to win at all.

The real people who took down the World Trade Center in New York City were mostly from Saudi Arabia. It is suspected that their leader operated from caves and safe houses deep in the unruly Waziristan border region between Afghanistan and Pakistan. Although Osama Bin Laden hadn't been seen or heard from for years, we targeted his al-Qaeda underlings and Taliban protectors with cowardly unmanned aerial drone attacks that were supported by only a fraction of the local population.

These attacks often resulted in "collateral damage." Furthermore, the generals embarrassingly failed to take into account the Afghanis' religion in determining their attitude toward death. Tired of unauthorized incursions over its borders, Pakistan's leaders announced that any U.S. forces on its soil would be shot, while members of its own Inter-Services Intelligence were documented collaborating with Taliban and Haqqani network insurgents behind our backs. The WikiLeaks stuff was ugly, and it showed conclusively how ordinary Afghan people were suffering in numerous ways under the weight of our misguided occupation and counter-insurgency.

Conditions on the ground are said to be hopeless. While U.S. television networks show hopeful videos of the training of Afghan soldiers, the real Afghan National Army deals with an absurd turnover rate, blanket illiteracy and rampant corruption and bribery. Civilians often want nothing to do with U.S. troops, and rarely want to be seen speaking to them - probably for fear of their lives. There is no more hope of a U.S.-friendly client state. In addition, opium production exceeds previous years' yields, which is the most important factor in Afghanistan's economy. Inside the country, soldiers are reportedly afraid to leave their bases in Helmand Province.

Fresh, fun fashions take center stage

By Austin Dale
Collegian Correspondent

Another New York Fashion Week has come to an end.

Twice a year, the industry revs itself back up, and the Spring-Summer 2011 season was no exception, despite its somewhat shaky transition from its Bryant Park home to Lincoln Center. This year, a few great highlights displayed continued excellence that should make most other designers drool with envy. Complete hacks - like Christian Siriano and his disastrous showing - and the insanely banal (Sorry, United Bamboo; it's just not working) were showed up by unique artistry and vision.

The best show in New York was, once again, Rodarte. Pasadena's Mulleavy sisters have now, for several seasons in a row, showed that they are doing things no one else would have the guts or the gall to attempt. Their radical reformulations of structure and silhouette and their undeniably bizarre fabric combinations have amazed the fashion world, garnering important awards left and right. Keira Knightley and Natalie Portman often wear their more sedate luxury pieces, but their more exciting, brilliant ensembles have been seen on true style innovators like Tilda Swinton and Tavi.

This collection, appearing amid rumors of a buyout by Moet Hennessy Louis Vuitton, was strangely much more commercial than was expected, but with influences as wide-ranging as the browns of 70's California and blue-and-white Ming vases. Despite the more mainstream look of some of the pieces, most notably the checkered ensembles and the distinct lack of spikes or torn knits, this might be Rodarte's most confident, wearable collection yet. It was completely brilliant.

America's other most-hyped design team is comprised of the boys behind Proenza Schouler. The downtown duo has been presenting self-assured youthfulness since day one. They hit their peak with their last two collections, mixing space-age color with radical, enthusiastic color blocking. This was somewhat more mature, but no less innovative, combining tie-dye, elaborate prints, chunky knit textures, neons and sheers to cement their status with another solid and typically from-left-field collection.

Other excellent shows were Alexander Wang's shockingly black-free collection, Y-3's wildly sexy sportswear, and Prabal Gurung's idiosyncratic neons, cut with elegance and ease.

There was no significant change in the looks of the models this season. As is normal, many of the casts consisted mostly of slender Scandinavians. Breasts seem to be out once again, but strangely, size zeros aren't as ubiquitous as in years past. Victoria Beckham's shockingly marvelous show was cast entirely with size six models.

Crystal Renn, who, at size 10, is the highest-paid plus-size model in the world and the only one to ever find success as a runway model, was a welcome and surprising addition to a number of shows, including the luscious Zac Posen. Noticeably absent was the fascinating Lara Stone, notorious for her wobbly walk, who appeared only as an exclusive at Calvin Klein. Stone, who is quite simply a Dutch alien with sumptuous curves and Satan's cheekbones as painted by a stoned Hieronymous Bosch, continues to get lovelier, more transgressive and more necessary in a world of boring, undernourished beauties. The only noticeable new trend was an occasional focus on Lolita-type adolescents with round lips and wide eyes, especially evidenced by the constant castings of Abbey Lee Kershaw, Karlie Kloss and the gorgeous gap-toothed newcomer Lindsey Wixson.

All in all, a fair season, with the regular innovators and up-and-comers showing off their enthusiasm and once again making everyone else seem more or less forgettable.

Austin Dale can be reached at aadale@student.umass.edu.

All last week, fashion took New York by storm as upcoming designers, as well as innovative regulars, showed off the latest high fashion looks for the season on the runway.

Broken Social Scene headlined a stellar show at the Calvin Theater in Northampton this past Tuesday, with opening act the Sea and Cake. The ten-piece collective traded instruments and the spotlight throughout for a powerful performance.

Rockers Ra Ra Riot: It's all in the strings

Tappan Parker
Collegian Staff

If you ever find yourself thinking that there should be more string instruments in rock bands, then you should look no further than Ra Ra Riot, an indie band known for their use of violin and cello. The string-driven group is currently touring in support of their latest album, *The Orchard*.

Ra Ra Riot will bring their rock quartet to the Pearl Street Ballroom in Northampton on Monday, September 27 at 8:30 p.m. Supporting them are the indie bands Chikita Violenta and We Barbarians.

Ra Ra Riot is best known for their largely string-driven, orchestral pop sound which they produce thanks to cellist Alexandra Lawn and violinist Rebecca Zeller. This instrumentation gives every song an urgent melancholy that is rare in music today, deceptively simple in sound, but intriguing enough to keep you coming back for more.

Lawn and Zeller play alongside vocalist Wes Miles, bassist Mathieu Santos, guitarist Milo Bonacci, and drummer Gabriel Duquette. Each member brings a distinct flavor to the band, yet they support one another like an orchestra. However, their small size allows each member's part to stand out, creating a rich atmosphere that each song draws heavily from.

The story of Ra Ra Riot is that of the little band that could. Ra Ra Riot began at Syracuse University in January 2006. There, the band became well known for their energetic live shows.

Within six months of their formation, they were invited to perform at the CMJ Music Marathon, an annual music festival in New York City. Soon, they received a favorable review from Spin.com, which commented that Ra Ra Riot was, "One of the best young bands we've heard in a really long time."

After the CMJ Music Marathon, the band went on to open for a number of bands in New York City, toured in the UK twice on their own, and toured North America with Tokyo Police Club. Ra Ra Riot began touring the U.S. on their own after supporting Tokyo Police Club, and completed a full circuit in 2007 and another in 2008.

Ra Ra Riot has released two full albums, 2008's *The Rhumb Line* and *The Orchard*, which was released in August. In addition, they have released three EPs and a number of singles.

If you have yet to hear Ra Ra Riot, check them out. Their high energy is bound to make for an incredibly exciting and fun show in Northampton this Monday, and it's something you won't want to miss.

Ra Ra Riot will be performing at the Pearl Street Ballroom in Northampton with Chikita Violenta and We Barbarians on Monday September 27 at 8:30 p.m. Tickets are available online for $15 and at the door for $18.

Tappan Parker can be reached at rtparker@student.umass.edu.

Broken Social Scene electrifies

Alyssa Creamer and Emily Felder
Collegian Staff

Seeing Broken Social Scene at the Calvin Theater in Northampton last Tuesday night left audience members with this simple fact in mind: the band likes to do things on a grand scale.

The word 'grand' should not ring any association with fancy, fine dining or upper-class experiences in any way. To anyone who has ever listened to a Broken Social Scene album, their indie sound is constantly defined by its elaborate combination of a multitude of instruments, both traditional and unusual, and its ever-expanding members' list. The band generates big sounds from big talent.

Broken Social Scene produced a spectacular and powerful energy during its live performance at the Calvin from the moment those instruments were placed into the hands of the band's talented musicians. The group's chemistry comes from years of friendship and work-relationships, including four full-length albums , which sound even better live. With so many band members, 10 of whom played on Tuesday, it's as though Broken Social Scene is at the center of a web from which all of these phenomenal artists and musicians branch away to perform their other musical endeavors, only to come back and display a massive surge of talent on one stage.

Playing at least one song from each of its four full-length albums, *Feel Good Lost* (2001), *You Forgot It In People* (2002), *Broken Social Scene* (2005) and *Forgiveness Rock Record* (2010), the set list was diversified enough to please indie rock fans of each of the band's different musical eras.

At several points during the show, audience members screamed out "I love the set list" and "the set list is awesome," proving that the majority of attendees were thrilled with the variety of songs the band chose to perform during their two hours on stage.

The band primarily played tracks off of their newest album and also leaned heavily on *You Forgot It In People*, which, along with Broken Social Scene's self-titled album, has won the Juno Award for Alternative Album of the Year.

A big kudos to the light technician for Broken Social Scene, who designed a lively, well-timed and entertaining light show that truly enhanced the atmosphere and tones of each song. With blue lights softening Lisa Lobsinger's beautifully melodic soprano during the song "All to All", everyone in the crowd was mesmerized.

The band dispersed at one point, leaving Kevin Drew, one of the founding members of BSS, alone on stage at his keyboard, playing a somber and eclectic beat. As his strong voice resonated throughout the concert hall, singing the lyrics of "Lover's Spit," a track from *You Forgot It In People*, the heads in the audience nodded to the pulse. One by one the other eight members returned to the stage quietly, picked up their instruments, fueling suspense as Drew's solo wound down. Then Drew took one breath and suddenly the collective fulfilled the audiences' anticipation by rejoining in a fury of musical fireworks.

Another fantastic element was the audibility of the vocals, which were not overwhelmed by the instruments - a delightful rarity at a live performance, especially for those fans that may not have had the opportunity to memorize the lyrics from the band's newest album.

Before Broken Social Scene took the stage, the indie rock group The Sea and Cake charmed listeners with their mechanical and jazzy beats, though it was more pretty noise than anything lyrically substantial. As opening acts go, it was fair but nothing special, and in between songs there were awkward silences and one could feel the impatience of the audience for the headliners they were really pining to see.

One of Broken Social Scene's founding members, guitarist Brendan Canning, emerged during the opening set to join The Sea and Cake, at which point his bass skills upped the mood of the satisfied listeners.

Then later, once Broken Social Scene graced the stage, The Sea and Cake's drummer John McEntire joined in to complete the two-drummer, four-guitarist, maraca-playing, saxophone-jamming, harmonica-wielding, and vocally stunning collective.

The bands' members also traded instruments, substituting flutes and keyboards, and exchanging lead vocals, which allowed the audience's attention to never be centered on any one person. This factor alone made for both a refreshing and visually stimulating experience, as well as a strengthened appreciation for this showcase of varied talents.

The songs which generated the greatest audience reactions were "Fire Eye'd Boy," "KC Accidental," which Drew may have intentionally forgotten the lyrics to twice and had the audience sing along so he could get back on track, "Guilty Cubicles," which was the only hit the band played off their debut album, and "Lover's Spit."

Ra Ra Riot are set to play Northampton's Pearl Street Night Club, complete with violin, cello, and dance-worthy indie rock.

Holmes crucial in win

FOOTBALL from page 1

"We were shaky in the first quarter, I was shaky in the first quarter," Havens said. "We were a little flat, but we came back and the offensive line started playing real good, everyone started playing better. You have to give it to Stony Brook, they're a good team. We came into this game a little light which obviously showed. We finished well though."

The Minutemen had their 12-play, 80-yard game-winning drive capped off by a one-yard Griffin run. The two-point conversion failed, however, to keep the score 26-21.

Prior to UMass' score, Stony Brook took a 21-20 lead with 5:10 left in the third quarter on a four-yard run by Jordan Gush. The only other lead the Seawolves held was 14-7 on Miguel Maysonet's two-yard touchdown early in the second quarter. There were four lead changes in total during the contest.

Minutemen kicker Caleb Violette converted both his field goal attempts from 30 and 25 yards out, accounting for eight points.

UMass looks for its second-straight road win when it travels to Towson on Saturday.

Jay Asser can be reached at jasser@student.umass.edu.

Firepower not enough for UM

By David Martin
Collegian Staff

The Massachusetts women's soccer team fell by a score of 3-2 for the third straight time on Sunday against Harvard, despite a strong two-goal rally.

The Minutewomen (3-6-0) fell just short in a game that saw them come back from a 2-0 hole midway through the first half off of goals from senior Therese Smith and freshman Kayla Austin. This marks the fourth-straight loss for the Maroon and White, a streak that started with the team's 5-0 loss to Michigan back on Sept. 17.

Harvard (3-4-1) started the game off with its first goal nine minutes into play, thanks to the efforts of Katherine Sheeleigh. She fired a shot off of a pass from teammate Melanie Baskind low and far-left to beat UMass goalkeeper Emily Cota.

The Crimson followed that up with a goal just 70 seconds later off of a chip shot from Harvard attacker Peyton Johnson that just found its way inside the left post.

The Minutewomen began their rebound off of Smith's goal at the 17 minute, 59 second mark. Her goal came off a sharp pass from teammate Ashley Hamel from 20 yards out. The goal further lengthened Smith's scoring streak, which saw all four of her tallies come within the past three matches.

The equalizing goal came off the boot of Austin in the 22nd minute. Austin took the shot due to a timely interception of a Harvard clearing attempt by teammate Lauren Sksavage. Austin's long-range shot made it past Crimson goalkeeper Jessica Wright's diving effort, and the Minutewomen again found themselves in a promising position.

Harvard	3
UMass	2

Harvard would not stand down, however, as it again took the lead in the 32nd minute. Elizabeth Weisman fired a shot from the left side that was redirected into the back of the UMass net by Melanie Baskind. The goal marked the end of the scoring in the contest.

All five of the game's goals came in a span of 22:10, the first time such an occurrence has happened all season. The Crimson also out-shot UMass, 16-15, and led in corner kicks, 8-4.

Freshman goalkeeper Emersyn Pullan saw her first game action in the season early in the second half after a collision caused Cota to leave the game. Pullan came through within her first minute of official play, making a diving save to keep the score separated by only one tally. She made three saves total on the day and did not allow a goal in her first 40:09 minutes of collegiate play. Cota has started in and played through all previous eight games this season for the Minutewomen. She made two saves on the day.

The Maroon and White seemed poised to stage another come-from-behind rally later in the game, as the ball hardly left the Harvard zone for the last 20 minutes of play.

The Minutewomen will look to end their winless streak against Charlotte at home this Friday. The match will mark the beginning of Atlantic 10 play for both teams.

David Martin can be reached at dmmartin@student.umass.edu.

Great Danes too physical for Minutewomen in loss Sunday

F. HOCKEY from page 8

JEFF BASSETT/COLLEGIAN

Forward Nicole Cordero attempts to dribble past a defender earlier this year. UMass' next game is at home against Syracuse on Oct. 9.

two-man advantage for about three minutes at the end of play.

With about 28 minutes left, Kelly stole the ball in Albany's circle and beat Great Dane goalkeeper Kristi Troch, but her shot was deflected on a sliding stop by defender Taylor Luke, who had vacated her position to help when Kelly got behind Troch.

"Our coach called timeout and praised her for her diving save," Kelly said. "She told us that was how we needed to play if we wanted to win the game. Basically Albany just outworked us today."

Alesha Widdall made four saves for UMass, and Kelly led the team in shots with four.

The Minutewomen play again on Oct. 9 at 2:00 p.m. against Syracuse for the third game of their four-game homestand.

Sowry makes example out of Albany hustle during timeout

By Pete Vasquez
Collegian Staff

One play told the story of Sunday's matchup at Garber Field.

The Massachusetts field hockey team held a scoreless tie against Albany with 29 minutes left in the game. Senior captain Katie Kelly, who has been responsible for 60 percent of the team's scoring this season, stole the ball at the top of the circle and charged towards the cage on a breakaway.

Sophomore Kristi Troch, the Great Danes' goalkeeper who had just entered the game at the start of the second half, stepped forward to meet Kelly about 15 feet from the goal. Only Albany midfielder Taylor Luke trailed the play, but she was more than 10 feet behind.

Kelly managed to get around Troch and got an off-balance shot off. It was the go-ahead shot, and it was heading straight for the left side of the goal.

Luke raced the ball to the net and with a full-out dive, crashed into the post, deflecting the ball out of bounds, and squandering the Minutewomen's best chance of the game to put up a score.

"That was a great example of a player that has the will to win," UMass coach Justine Sowry said.

Immediately following the play, Sowry called her only timeout, pulling her team aside to praise Luke's effort, and telling her team that the way she played was how the Minutewomen needed to play if they wanted to win.

"She pulled the ball off the line and we talked about it," Sowry said. "We're not diving for balls or interceptions. Balls just go by us and there's not that desperation."

Albany finally broke through in the 53rd minute, when junior forward Christina Patrick found the back of the net to give the Great Danes the lead.

In a game where UMass continually applied most of the pressure on Albany's defense, getting opportunity after opportunity to put the first goal up on the scoreboard, this one play exemplified the grit that put Albany over the top.

"Basically, Albany just outworked us today," Kelly said. "They were relentless. I don't know if the physicality that we played to was our best, though. Albany played with great energy, and we needed to play like that."

That energy also translated into numerous penalties. Six penalty cards were handed out yesterday afternoon, five charged to Albany players. Three of the cards were yellow, meaning that a player had to sit out for at least five minutes. Even the Great Danes bench received cards.

"You never go into a game thinking that so many cards are going to be thrown, but that's the way the game played," Sowry said. "I thought for the majority of the game we kept our composure, but there definitely were moments where we should have had a little bit more poise and then taken advantage of the opportunity of playing a couple of people up."

UMass had its best opportunity to answer Albany's goal with under 10 minutes to play. Within a span of three minutes, two Great Danes players received yellow cards, and the Minutewomen were playing with two extra bodies.

With three minutes remaining, UMass senior midfielder Makaela Potts took a shot that was in-line to hit the left corner of the net, but instead deflected off teammate Jaime Bourazeris. It was the last clean shot the Minutewomen would get off.

"It's extremely frustrating," Sowry said. "Give Albany a ton of credit, playing with two players down for a good portion of the game and they came out on top. I think at times we were a little bit too casual in building the ball out, thinking that we have all the time in the world.

"Later in the second half we became a little more desperate, but that's what we need every minute of the game and every minute of practice," she added. "So you have to practice how you play. We have to up the intensity and have the will to win everyday."

Pete Vasquez can be reached at pvasquez@student.umass.edu.

Offense much improved from 2009 season under new coach

Aggressive scheme gives Matz & Co. better chance of scoring

By David Martin
Collegian Staff

Last season, one of the biggest problems for the Massachusetts women's soccer team was offense. Shots were down, too much time was spent in the home end and goals were almost non-existent. Simply put, its offensive game was anemic.

This year, the team has seen a complete change of face.

Though their record may not indicate it, the Minutewomen (3-6-0) have stepped up their attacking game with coach Ed Matz's offensively-oriented game plan. From early on in the season, the team has consistently played strongly in their opponents' defensive zone, where pressure has led to lead-taking goals and comeback rallies.

Looking at the numbers, there is no doubt about it.

Last season, the Maroon and White scored 15 goals off 192 shot attempts in 19 games. Already this season, a much younger ball club has 16 goals off of 137 shot attempts. Their goals per game average is also up to 1.78, almost a full point higher than the meek .79 they finished with last season.

Their shot per game total (15.2) is also sitting much higher this season at 15.2, compared to last season's mark (10.1). Accuracy has also improved, as the team has seen its shots on goal percentage rise from 422 to .526.

Another area where the increased emphasis on offense has had a positive impact is the decrease in shutouts suffered by the Minutewomen. Last season, UMass was shut out nine times on the year, with its last five losses coming by way of the shutout. This season, it has only suffered such a fate three times.

Aside from the team's 5-0 loss to Michigan and its 3-0 loss to Washington, the club only has losses by a margin of one goal, something that both encourages and discourages Matz.

"It's good to see that they're stepping up to opponents' offensive challenges and keeping the games close," Matz said. "But these are the games that we have to win. The team has to learn that these are the games that can make the difference between a winning season and a losing season, and most importantly, a chance at the playoffs."

Matz 4-3-3 strategy is bolstering the Minutewomen's scoring successes. Last year's 5-4-1 strategy was too heavily oriented around defense, something that Matz has made sure not to overlook. With the team's increased offensive skills and abilities, more of the game is being brought to opponents' faces, and less pressure is being put on the defense.

With the defense facing less pressure in its own zone, it has been better at breaking down opposing offensive rushes and keeping the ball far enough from the net. The extra stamina and energy helps a more veteran defense complement the experience it brings to the field.

At the end of the day, practically every statistical category has improved on a team that has been revitalized by younger players, stronger offense and new coaching guidance.

David Martin can be reached at dmmartin@student.umass.edu.

SPORTS@DAILYCOLLEGIAN.COM

UNH defeats UM at Rudd in extra time

By Steve Levine
Collegian Staff

The supposed strengths of the Massachusetts men's soccer team were nowhere to be found as the Minutemen fell to New Hampshire, 1-0, in double-overtime on Saturday at Rudd Field.

UMass traditionally relies heavily on its defense and success at home to win games. Both factors, however, are currently working against the Minutemen, as they are 1-2-1 during their current eight-game homestand. With the loss, UMass falls to 1-3-3, while UNH remains undefeated at 4-0-2.

"I'm extremely disappointed. I'm not happy," UMass coach Sam Koch said. "We've been making the same sort of mistakes we've been making. We're getting caught and sometimes over-committing and giving them too much time and space."

UNH	1
UMass	0

If not for goalkeeper Chris Piekos, the game could've been over much sooner. Piekos made six saves in the loss, several coming on breakaways in overtime. The game-winner came with 85 seconds left, when UNH's Jon Harris ran in between two UMass defenders and caught up to a long pass. Piekos came out to challenge the breakaway, but was too late, as Harris cashed in on the open net.

The loss marks the halfway point of the Minutemen's homestand, who still have four consecutive games to play at Rudd Field before they leave for Rhode Island on Oct. 16.

In seven games this year, UMass has surrendered 10 goals on 100 shots compared to its own eight goals on 79 shots. Piekos hopes his team can rectify its problems on both ends of the field before conference play begins on Oct. 8 against Xavier.

"What we have to do is play 90 minutes, we can't just play 88," Piekos said. "What we've got to work on is just our through balls and the defensive back four, tracking [opponents] down and playing the ball clean and better clearances and obviously finishing. We had a lot of great opportunities, [it could have been] two, three [to] nothing. We've got to get hungry and get on the ends of the balls and finish."

Piekos is still confident the Minutemen can turn it around, and he expects this week's practices to include a lot of shooting and finishing drills.

"Our finishing isn't where it needs to be, but those are the things we come out [and work on] Monday and Tuesday," Piekos said. "It's coming … we have a great team and today's performance just didn't show it."

The Minutemen are 0-1-3 in four overtime games this season and have been seriously outplayed in the second overtime period. UMass nearly lost to Vermont in double-overtime on Friday, when they narrowly escaped multiple scoring chances from the Catamounts. On Sunday, UMass was again ineffective in the second overtime stanza as the Wildcats outshot the Minutemen, 5-1.

"We didn't defend very well at times, and sooner or later the other team is going to beat you down," Koch said.

"We gave away too many breakaways," Piekos said.

UNH goalkeeper Colin O'Donnell was not tested much by the Minutemen, recording three saves for the shutout win.

"We've got a lot of things to work on," Koch said. "Today is an example of us not doing the things we talked about as far as playing simple and making sure we combine with other teammates offensively."

UMass returns to action on Wednesday, when it hosts Dartmouth for a 3 p.m. game at Rudd Field.

Steve Levine can be reached at slevine@student.umass.edu.

MAXWELL SPARK/COLLEGIAN

Junior Mark Dangleis pursues the ball during the Minutemen's 1-0 loss to New Hampshire on Saturday. UMass is halfway through its eight-game homestand and has two games left before it starts conference play against Xavier and Dayton.

Piekos keeps UMass in games

Despite loss, goalkeeper still solid for Minutemen in net

By Herb Scribner
Collegian Staff

With less than 90 seconds to go in double-overtime, goalkeeper Chris Pickos stood on his line and watched as the Massachusetts men's soccer team's defense scrambled to get its way back towards the goal.

New Hampshire sent a long ball up the field to the attacking Jon Harris, who flew to the ball. Piekos stormed out of the box and slid to attempt to clear the ball from the oncoming Harris.

Harris beat Piekos to the ball and blasted the shot into the back of the net to add another point to the loss column for the Minutemen and keep the Wildcats' (4-0-2) undefeated streak alive.

"It's … disappointing with a minute, 27 seconds left," Piekos said of Harris' goal. "I had to come out as best I could, he got to it first and it was very unlucky."

Even though UMass coach Sam Koch wasn't thrilled to see his team lose with such little time remaining, he did find a silver-lining in Piekos.

"He made a couple of great saves to keep us in the game, and unfortunately we didn't get the job done to stop them on that last one," Koch said.

Piekos proved to be an important part of the game during the second half, as the Minutemen (1-3-3) endured a flurry of offensive attacks from UNH. Piekos recorded four of his six saves in the final 45 minutes of regulation, compared to the two saves he made in extra time.

The four saves in the second half came over a 10-minute period. The first happened just off the halftime whistle, with Pickos scooping up Josh Bronner's header to hold off the attack.

Piekos held on tightly to a pair of Robert Palumbo shots in the 54th and 56th minutes. The first of the freshman's shots came from the far right side of the box, when he blasted the ball towards the goal to try and stun the UMass defense. Luckily for the Maroon and White, Piekos was all over it.

"I saw him breakthrough; he was on my left side, so I knew he was going to take a touch and try and it take on me," Piekos said. "I closed down as fast as I could and I was able to stop that shot."

Piekos knew fully well that the defense was collapsing in the second half, as he had to come up big to keep the game level.

"[In the] second half, we got a little lackadaisical," Piekos said. "We were able to get out of some tough situations and we had great opportunities."

In overtime, Piekos earned a pair of saves to keep the Minutemen in the game until the final 90 seconds. In the first period of extra time, a break by UNH led to a shot opportunity for Dylan George, which was easily picked by Pickos.

In the 108th minute, Pickos fell victim to an attack by Jordan Thomas. With Andrew Henshaw making his way back towards goal, leaving just Pickos to defend, Thomas took his shot. Piekos cleared the ball with the back of his heel.

"I knew he was going to poke it to my right so I got my leg out when I saw it," Pickos said. "I got set when I saw him go down for the shot. I was able to get a foot on it, so I got lucky there."

Magic wouldn't strike again, however, as less than a minute later, Harris scored the game-winning ball.

"You can't ask Piekos to stop all of them," Koch said.

With the loss, Pickos falls to 0-2-3 on the season with 26 saves from the 80 shots taken against him. The senior goalkeeper has allowed six goals in his five matches played.

Herb Scribner can be reached at hscribne@student.umass.edu.

Minutewomen split vs. Albany, Vermont

Seniors score goals in win over Catamounts

By Michael Wood
Collegian Staff

The Massachusetts field hockey team returned home after back-to-back losses on the road and began a four-game home stand with a 2-0 victory over Vermont on Friday night and a 1-0 loss to Albany Sunday.

The Minutewomen did some things well in both games and could transfer what they worked on in practice into a game setting, something their coach expected to see.

"It was actually a very good weekend for us working the ball down the field," UMass coach Justine Sowry said. "With our attacking opportunities there were definitely a lot of opportunities and a lot of positives."

The weekend began with a visit from the Catamounts, who had won three of their last four games, and UMass did everything it wanted to do in the contest.

Seniors Katie Kelly and Makaela Potts each scored goals, as the Minutewomen outshot UVM, 29-4. Kelly's goal came from the top of the scoring circle with two minutes, 50 secounds left in the half, and Potts added her first of the year in the 47th minute of play.

Sowry said that winning corners and getting high-percentage shots was a priority in practice throughout last week, and her team achieved that goal by winning 13 penalty corners.

"Overall I was really pleased," Sowry said. "We generated a lot on attack and we haven't done that in a number of weeks, so it was very pleasing to see. Our focus was the first five minutes and to win a couple of corners and execute it. We definitely earned the corners and we put [Vermont] under an enormous amount of pressure."

Vermont goalkeeper Brooke Crane came up with 12 saves, many of which were in acrobatic fashion, diving or sliding to prevent a score.

On Sunday, the Minutewomen were not so fortunate, losing out to a physically superior Great Danes squad.

In a game that featured six cards given out and 11 penalty corners, the story was all about the physicality and hard-fought nature of the game. Albany lost two players in the final six minutes of play, but held off charges from the Minutewomen and hung on for the win.

"It was pretty physical," Kelly said. "They were relentless. I don't know if the physicality that we played to was our best."

Christina Patrick scored the only goal of the contest midway through the second half on a tipped ball from teammate Nina Walters, and the No. 18 Great Danes escaped with a 1-0 victory.

"It's extremely frustrating," Sowry said. "We played some really good hockey; and some of the goals that we set out in the beginning of the game, we executed very nicely, but our scoring woes continued. I think the key critical factor was that we played with two people up, and at the end of the day you've got to put more [pressure] on the cage."

Similar to Friday's game against Vermont, UMass controlled the play for much of the first half and the start of the second half, before succumbing to the Great Danes' pressure.

The Minutewomen were not without chances however, outshooting Albany, 13-10, and playing with a

Off to the polls: SGA elections 2010

Candidates compete for 42 seats, elections held Tues.-Thurs.

By Sam Butterfield
Collegian Staff

Put on your campaign pins, break out your red, white and blue signs and start canvassing: Student Government Association (SGA) elections at the University of Massachusetts are upon us.

This year, 47 students will compete for 42 spots in the SGA senate. According to Chancellor of Elections Jitesh Khushalani, 18 seats are allocated for commuters, six will go to Southwest South, four to Southwest North, three to Northeast, four to Central, two to the North Apartments, three to Orchard Hill and two to Sylvan.

The Collegian attempted to contact every Senate candidate. Following are profiles of the senate races by residence area.

Sylvan

Sylvan has three candidates vying for two spots on the SGA senate. The candidates are Kris Kilpi, a sophomore, junior Rich Tsai, and sophomore Nicholas DeChristopher. Of the three, DeChristopher was the only to respond to requests for comment about why he is seeking office.

DeChristopher said that he has little experience with legislative duties, but that he wants to make UMass a better place.

"I really have no idea what I'm getting myself into, but I really want to get involved with my school and make a difference," he said.

DeChristopher added that he would like to advocate for Sylvan, as he feels it gets an unfair reputation across campus.

"I know the rep Sylvan gets," he said, "and so far living here for me has been great."

Northeast

There is just one candidate running for senate from Northeast, Paola Ozuna. Ozuna did not respond to requests for comment.

Southwest North

The race in Southwest North features five candidates; Blaine Stillerman, Adam Baldarelli; Daniela Sanchez, Sarah Schultz and Juan Moreira will fight for the region's four spots.

Stillerman said he is seeking office primarily to advocate for his constituents in SWN, but also to bring more funding to registered student organizations (RSOs).

He said he hopes to "join the financial committee and work to allocate emergency funding for all RSOs and student groups on campus."

Stillerman was one of the many candidates from Southwest who said the area's lack of wireless connectivity is among his top priorities.

"I hope to ensure the installation of WiFi in the dorms for all Southwest residents," he said.

Freshman Juan Moreira said he hopes to address "the issues that are pressing the campus community."

Moreira said he would work to give students who may feel powerless a voice.

"People want to be heard, people don't want to be used as cash cows," he stated.

Moreira said he would also like to focus on smoothing relations between the University and the town of Amherst.

"I know the town of Amherst has recently raised the fines for noise violations," he said, referring to the town's nuisance house bylaw. "I understand that nobody wants to have a bad neighbor, but we're not cash cows either."

Moreira also said he would like to address construction in Southwest, stating that "it needs to be wrapped up as soon as possible," and added that getting wireless to residents of Southwest is a top priority.

Baldarelli, also a freshman, said he is seeking a senate seat because he wants to be a lawyer and feels he can advocate for his fellow students.

"I want to advocate for students in Southwest and just work to be a leader in my community," he said.

Baldarelli said he feels the biggest issue facing Southwest is also wireless accessibility.

"The biggest issue in my district seems to be wireless Internet," he said, "that would be the very first thing I would do would be to create a reasonable goal to get wireless Internet introduced to the general session at least by next semester."

Baldarelli also said he would like to inform fellow students about their legal rights.

"I'm already working with attorneys from the ACLU and the western Mass. area to create a pamphlet about student rights that I'm going to try to distribute to everyone here in the Southwest North district, I want to create a level playing field between campus police authority and students," he said.

Sanchez and Schultz did not respond to comment requests.

Central

Central's senate race also features five students after four slots. Candidates

Obama holds call for Prof. Thayumanavan university journalists wins Spotlight award

By Michelle Williams
Collegian Staff

At exactly noon, students across the country dialed a 1-800 number, slightly nervous and very excited.

After several rings, a teller greeted each of them, asking which teleconference they were calling for. They asked to be connected to the President.

Several minutes of waiting passed, and after a short introduction, the President took the line, "Hey, everybody. Thanks for joining me today," Barack Obama said.

On Monday, President Obama held an on-the-record teleconference with student journalists from across the nation.

Late Friday evening, 100 student journalists received invitations to participate in a conference call with the President to "discuss the steps his administration has taken to address the concerns and issues important to young Americans," said the White House Media Affairs Office.

In the teleconference, the President discussed the rising cost of higher education, healthcare, and emphasized the need for young people to head to the polls come mid-term elections.

"What I want to do is just to go speak to young people directly and remind them of what I said during the campaign, which was change is always hard in this country. It doesn't happen overnight. You take two steps forward, you take one step back. This is a big, complicated democracy," said the President.

Tomorrow, Obama will be on the University of Wisconsin-Madison campus, urging students to vote. Vice President Joe Biden will be in his home-state, speaking at the University Park campus of the Pennsylvania State University. These trips are in hopes of motivating college students to become involved in the upcoming mid-term election, as many political strategists have noted that student support was crucial to the President's election in 2008.

Obama told students to inform themselves about their local races.

"You've got to take the time to find out where does your congressional candidate stand on various issues, where does your Senate candidate stand on various issues, and make an educated decision and participate in this process -- because democracy is never a one-and-done proposition. It's something that requires sustained engagement and sustained involvement," Obama said.

"Look, back in 2008, a lot of young people got involved in my campaign because they felt like the path that we were on…was a mess -- I think people just generally felt that we needed to bring about some fundamental changes in how we operate," said the President.

In 2008, he won 66 percent of voters between the ages of 18 and 29 in his win over John McCain, according to exit polls. Those young voters comprised 18

Chemistry Professor Sankaran Thayumanavan has been named the University of Massachusetts' first Spotlight Scholar for his and his team of researchers' innovations in polymer structure and green energy development.

The Spotlight Scholar program was launched in August by the offices of Research and Engagement and University Relations. According to a News and Media Relations release, the program aims to recognize "the scholarly achievements and contributions of the campus faculty."

Thayumanavan and his team have recently developed a new method of conducting protons called "charge transport," according to a Sept. 23 University Relations release, which may increase the prevalence and accessibility of fuel cell technology.

By making use of a polymer nanostructure, Thayumanavan and colleagues Ryan Hayward in polymer science and Mark Tuominen in physics, were able to transport protons from one side of a fuel cell to another, showing how proton conductivity can be improved.

Fuel cells, according to last week's release, are an ideal power generator because they can fuel anything that runs on electricity with no environmentally detrimental emissions. Thayumanavan and his team's research also may help strengthen the durability and longevity of fuel cells, as well.

The research was published in the April 2010 issue of the scholarly journal Nature Science. After publishing his results, Thayumanavan was awarded a $40,000 grant from the Massachusetts

New study finds students shut out ideas they disagree with

By Ashley Berger
Collegian Staff

When you're in class and you hear someone speaking with what you consider an "out-there " perspective, do you really listen ?

A recent study led by Eric L. Dey at the University of Michigan and overseen by the Association of American Colleges and Universities (AACU) suggests that universities across the United States do not highlight and engage diverse viewpoints in the classroom. The data collected shows that students generally do not receive with enthusiasm or consider the perspectives of their peers.

University of Massachusetts public history Ph.D. student Dr. Margo Shea believes there may be a different way of interpreting the data.

"Argument and disagreement can be abrupt and graceless while we practice the arts of dissent or difference," she said. "Students can come off as dismissive and even rude."

The survey looked at four groups: Students, faculty, academic administrators, and student affairs professionals. Though the four groups tended to have negative views of the notion of respectful academic discourse, the differences in numbers were quite divergent between the groups. Only seven percent of campus professionals thought students were respectful of diverse perspectives when they enter college. In contrast, 63 percent of students believed that they entered college with an open mind.

Questions were posed to freshmen, sophomores, juniors, and seniors, and the general consensus was that, as students got older, their optimism for provocative, varied discourse decreased.

However, the case may be slightly different on the UMass campus.

"Older students have come to realize that this is their education and are alternately engaged or disengaged based on their perception of the value of the material to them," said Shea. "They have ideas and opinions and will talk a lot, but not always about the issue on the table."

Qualitative research from the study found that students surveyed believed that controversial topics generally stimulated classroom discussion, which they said they were more likely to participate in.

Obama talks tuition, mid-terms, in call to young reporters

In a conference call with student journalists Monday, President Obama encouraged students to get involved in the political process this election season.

OBAMA from page 1

percent of the electorate. Obama will be trying to rally the support of these voters again, to help influence the upcoming elections.

A key topic discussed was higher education. A student journalist from University of California-Los Angeles expressed his concerns about the rising cost of higher education. As a student at UCLA, he experienced a 32 percent tuition increase last year, and worried about the future rising prices. On the issue, he asked the President how he plans to combat skyrocketing student expenses.

The president expressed his desire for universities to have a renewed focus on education. "I think what we've got to examine is, are we designing our universities in a way that focuses on the primary thing, which is education."

He said that his administration will be working with university presidents to "figure out how can we get control of costs generally and refocus our priorities" on education.

Obama also advised students and parents to be savvy when considering colleges.

"You guys have to be good consumers, and your parents have to be good consumers, and we've got to offer you more information. You should know where your tuition is going.

"There should be a pie chart at every university that says, out of every dollar you spend in tuition, here's where your money is going. And you should have some good understanding of that and be able to make some better decisions as a consequence of that information."

After answering four questions, Obama announced that he was out of time, thanked the student journalists, said he hopes to meet each personally at their different colleges or universities, and hung up the phone.

Michelle Williams can be reached at mnwillia@student.umass.edu.

Hey, are you listening? Study says maybe not

TITLE from page 1

"Discussions about issues that I actually care about are the ones that I am more inclined to listen to and want to engage in," said UMass student Kelcie Sims. "I tend to tune out when all we're doing is analyzing a text or an article. When all we do in a discussion is talk about something we had to read, a few of the smart kids tend to dominate the discussion and engage with the professor. Then I just stop listening," continued Sims.

"If an average student is listening to a nonstop lecture, with no other types of content delivery or activities interspersed, it's inevitable that he or she will tune out," said one of the study's authors, Molly Ott, a doctoral candidate at the University of Michigan. "By incorporating different types of activities, professors can keep students engaged for longer and improve the chances that content is learned."

When asked for some reasons why students tend to disregard their peers' opinions, Shea continued, "Part of it might be that there is not enough access to cultural, political, economic, regional, and national differences; having dealt with differences make us better at dealing with difference. We become more relativistic as a matter of exposure."

The surveyed students also agreed that if they participated in community service outside the classroom, they tended to have an enhanced ability to appreciate the perspectives of others. Almost half the surveyed students who participated in community service believed that they had developed an ability to understand and analyze the perspectives of others, even when they disagreed with those with the perspective of those around them.

"Incorporating credit-based service learning and community-based projects or research into the curriculum is an amazing way to encourage discussion and promote meaningful learning," said Ott. "Nothing is black and white in the real world outside of the classroom, and service learning classes are a natural way to introduce the gray area in many topics that lends itself to student discussion and debate."

Ashley Berger can be reached at aberger@student.umass.edu.

UMass Ph.D. candidate Dr. Margo Shea said that students with broader world exposure tend to listen to others' views better.

Quack quack

Students spent some time on a lovely Friday last week getting in touch with their mallard side near Campus Center pond.

SGA elections 2010

SGA from page 1

include Andrew Eaton, Evan Pleasant, Zachary Broughton, Benjamin Lees and Sean Connor.

Eaton, a sophomore, said he is running because he feels the SGA has not served its full purpose in years past, and he feels he could bring better representation to the student body.

"In the past [the SGA] has not been working to its full potential for students, and I hope to increase its activity to better serve the students."

Eaton said he did not have particular goals for issues he would hope to tackle, but said his primary objective for Central would be "to improve overall life in the area."

Pleasant, a freshman, echoed Fox News' slogan in identifying his reasons for running: "I believe I am a fair and balanced voice that represents the students of Central," he said.

Though he did not specify, Pleasant said he plans to voice "many concerns Central students have about housing and dining issues."

He said he feels SGA's primary role is to "provide all that is necessary for students, not just to learn, but to have fun and live comfortably."

O'Connor said he would work to combat financial hits to the University.

"The University has seen major budget cuts since the start of the recession, and for the foreseeable future this trend is going to continue," he said. "I want a seat in the SGA senate in order to fight more effectively for our school's future; it is the flagship school, I'd like to keep it that way."

O'Connor said he would focus on bringing cohesion and unity to Central.

"I hope to bring the cohesiveness that is seen in other areas to Central," he said.

Lees and Broughton did not return comment requests.

ORCHARD HILL

O-Hill has what will likely be by far the most competitive electoral picture. Twelve candidates are seeking just three seats. The Collegian was able to reach just three of these candidates, Matthew Bonaccorsi, Jessica Jankowski and Nick Barton.

Bonaccorsi said he is running because he feels students' representation is diminishing, and that amidst financial concerns and funding cuts, he feels students need better advocates.

"I think that with rising tuition and increasingly scarce funding, it's more important than ever to have someone advocating for us at the University," said the sophomore.

Jankowski said one of her main objectives is to ameliorate students' parking situation.

"I hope to make parking less worrisome for those students on campus with cars by talking to Parking Services about how they decide who to tow and or ticket," she said.

Jankowski said she would also like to see more bike racks placed around campus.

Barton, who served as an Orchard Hill senator last year, said he believes it is important to have returning leadership in the senate.

"Only eight returning senators are running for reelection out of 42 seats, and I think it's very important to have some returning senators who can help the new senators learn the ropes," he said.

Barton said he feels the biggest issue facing campus at the moment is the school's budgetary situation.

"The biggest issues are obviously the budget cuts that we've been getting from the state and, therefore, the budget issues we're having on campus," he said. "The senate has the function of an advocate for student, I see us as a major player for communication between the stunts and the school and the state, and that goes back to our own budget, which could be cut significantly this year, which would affect RSOs."

Other candidates in Orchard Hill include Nate Richardson, Stuart Farber, Mark Borenstein, Mark Riddle, Stephen Darcy, Edward Tedesco, Balaj Rai, Nick Barton, Sheryl Klein and Chandler Hall.

SOUTHWEST SOUTH

Southwest South's race is also a contested one. Eight candidates are battling for five spots in the senate. Among them are freshman Lindsay Vitale, Nicholas Julian, senior Bonnie Woods, freshman Tyler Read, freshman Hayley Mandeville, junior Ben Johnson, junior Jarred Rose and Chare Reid Kis.

Reid Kis said she is seeking office to "have as much positive influence as I possibly can," noting her future interest in becoming involved in politics.

Reid Kis said she would work on "whatever my residents want," pertaining to her legislative goals, and that she hopes Southwest South residents would "be able to come to me with [what they want to see accomplished]."

Woods said she would like to foster in students a better understanding of the machinations of the SGA and would like to work to equip younger students with the ability to productively run the SGA in years to come.

"I'm a senior this year and have lived on campus all four years and I think it's very easy to not understand the impact the SGA can have on your student experience," she said, "so I'd like to learn to let students, especially younger students, understand what the SGA does."

Woods said two issues she would like to see addressed are bringing a greater number of PVTA buses to the areas around campus and getting later buses for students, as well as devising a campus-focused market for purchasing textbooks.

"A lot of my friends live off campus, so from a student's perspective, a lot of students have expressed frustration over this, the infrequency and early termination of the buses, not knowing if you're going to have a ride, UMass needs to address this," she said.

"I think it would be very beneficial to have some kind of online market for textbooks specific to UMass, so students could exchange books right here on campus," she added.

Julian said he would like to see the SGA improve "infrastructure and the student quality of life at UMass."

He also said he would like to improve the aesthetics of Southwest.

"I hope to achieve…an improved Southwest Beach, in fixing the dirt path/ditch and restoring it to the beach that was used and enjoyed by students of both regions of Southwest."

Julian said he would also like to help green Southwest by adding more recycling posts.

"I'd like to work with the University and Senate to make another category of recycling in proper disposal of plastics, as in containers and food trays," he said.

COMMUTER

The race for commuter senate seats is something of a nocontest, as 13 students are campaigning for 18 spots, meaning all 13 will likely serve on the senate.

These candidates include Alex Cidado, Allison Sacks, Michelle Sudan, Justin A. Thompson, Elle Ruhilly, Dan Stratford, William Cody, Josh Davidson, Ellen Moorhouse, Gregory MacDonough, Matthew Medney, Thor Tillberg and Matthew Reilly.

Thompson, who is seeking another term as a senator, said he would like to continue the work he started last year.

"I believe I served the students well in the SGA last spring when I was appointed to fill a vacancy, and want to continue to do especially in the face of some disingenuous proposals coming up," he said.

Thompson also said he feels he is well-qualified to retain his seat based on the diversity of activities in which he participates and based on his extensive connections to the campus and the community.

Davidson said he would like to see more money allocated for clubs, as opposed to what he called "agencies."

"I'd like to see us take a look at how we spend money on agencies," he said, "and I'd like to take a look and see how that is proportioned to giving that to clubs, agencies like Student Bridges, the radio station, just to take a look and see if we're giving enough to clubs."

Davidson also said he would like to address some issues regarding the Code of Student Conduct.

"I'd like to make [the CSC] a little more amenable to students," he said. "We don't want the whole campus going crazy, but specifically the alcohol violation policy and the record keeping policies," he mentioned, "if you get a drinking violation on your record your freshman year, it's on your record for seven years, so there's a lot of examples like that in the CSC."

Moorhouse, a senior, said she would like to represent commuter students, though she was unspecific as to how.

"My biggest issues would be to represent [commuters] if something comes up, maybe with the Constitution, with wording being unclear, or with people trying to enact legislation that would not be in the interest of the commuter," she said.

MacDonough said he was inspired to run by an article which ran this month in the Boston Globe calling into question UMass' reputation statewide and nationally.

"[The Globe] talked about UMass Amherst and its reputation and I was a little bit disappointed about the things they said," he said. "[The SGA] helps the school raise money and does projects on campus, so I want to help turn around the reputation of UMass," he said.

Medney, a senior, said he would like to "influence some positive changes" by creating more camps events for off-campus students.

"For the off-campus students, life can be kind of mundane," he said, "I'd like to improve commuter life for UMass students; create more activities or events that would get off-campus students to want to be on campus on a Friday or Saturday night instead of going to the bars, because we pay such a high tuition rate that would should get more activities."

Elections will be going on Tuesday, Wednesday and Thursday of this week with results announced early next week, according to Khushalani.

Chemistry professor Sankaran Thayumanavan was given the first Spotlight award for his research efforts with polymers and alternative energy sources.

Chemistry professor given Spotlight award

SPOTLIGHT from page 1

Clean Energy Center to help further his research and more broadly prove the new method of conductivity's efficacy.

"Our work should lead to a lighter, more efficient and sustainable source of clean power," said Thayumanavant, who goes by "Thai," in the release.

Thayumanavan is the co-director of the Massachusetts Center for Renewable Energy Science and Technology (MassCREST). He also teaches chemistry and runs the Thayumanavan Research Group with research assistant professor Dr. Kothandam Krishnamoorthy, postdoctoral associate Dr. Sunita Satav, postdoctoral associate Dr. Ja-Hyoung Ryu, postdoctoral associate Dr. Anupat Potsatityuenyong, postdoctoral associate Dr. Narayana Murthy Sekar, postdoctoral associate Dr. Shreedhar Bhat, postdoctoral associate Dr. R. Prakash Babu, and numerous graduate students.

Thayumanavan originally came to UMass in 2003. He previously served as an assistant professor at Tulane University in New Orleans and did his postdoctoral work at California Institute of Technology, his Ph.D. at the University of Illinois, and his undergraduate and graduate work at the American College of Madurai, India.

According to the University Relations release, he "earned high praise from Spotlight Scholar nominators for his multi-faceted work, noting that his research in molecular design is also relevant to the life sciences."

According to the Thayumanavan Group website, he and his partners' main focus is on the structure and design of two different types of macromolecules, dendrimers and polymers.

Dendrimers, the site explains, "are highly branched molecules that are built using iterative synthetic strategies." According to Thayumanavan, dendrimers are particularly valuable because they can be built as individual molecules, even at great molecular weights, making them extremely versatile as hosts for other compounds.

The group lists 11 separate articles it has published this year on its site.

In addition to the research on fuel cells, Thayumanavan and his team have been working on creating a nanoscopic gel which they hope will coat and subsequently release drug molecules inside cells. This could be applied, according to the release, to treatments like chemotherapy, where drug molecules are applied inside cancer cells. UMass' technology transfer office and Thayumanavan are currently seeking commercial sponsors for this project to bring the selected cell release gel to a clinical trial. The nanoscopic gel research was recently published in the Journal of the American Chemical Society and was applauded for being "noteworthy chemistry" by the Society on Aug. 16.

Mike Malone, vice chancellor for research and engagement, lauded Thayumanavan for his contributions to the campus' research efforts.

"Congratulations to Professor Thayumanavan for being selected the cainpus' first Spotlight Scholar," said Malone in last week's release. "Thai is not only an accomplished teacher and researcher, but also a leader and innovator in using novel molecular designs to inpact the field of clean energy science."

EDITORIAL OPINION

TUESDAY, SEPTEMBER 28, 2010

"If we don't believe in free expression for people we despise, we don't believe in it at all." -Noam Chomsky

EDITORIAL@DAILYCOLLEGIAN.COM

Citizenship and Student Gov.

Dan Stratford

It is that time of the year again: colorful foliage, cooling temperatures and the return to a fast-paced, classroom-centered college life. However, another event is upon us; the Student Government Association's fall elections. Numerous positions in the SGA Senate and House Councils are yearning to be filled. As I elucidated in a previous column, the SGA isn't exactly looked upon with amicable eyes. Its actions are often scorned by the student body.

However, participation in something as supposedly mundane and inimical as student government, especially with regards to voting and running for the myriad offices available, is not only personally fulfilling, but essential to effective citizenship and the proper functioning of that esteemed body. English philosopher Thomas Hobbes asserted in his seminal work "Leviathan" that, "The finall [sic] Cause, End, or Designe [sic] of men, in the introduction of ... restraint upon themselves, is the foresight of their own preservation, and of a more contented life thereby." "Common-Wealth," as Hobbes envisioned them, was established to liberate humanity from the "State of Nature" – One of chaos, disorder and inhumanity that would exist without a shared set of values and responsibility.

In a broader sense, participation in the SGA is the key to participation in and the effective functioning of the American Republic at large.

In a sense, this is why our very own SGA exists. It provides and advocates for students. For example, it lobbied for the textbook rental program at the UMass Textbook Annex. It allocates funds to various student groups and imbues in those groups a sense of shared responsibility and community. Humans are, by nature, communal and tribal creatures that have possessed a proclivity for community and community action since time immemorial. Student life does not diverge at all from that time-honored principle.

Our diverse and inveterate system of Registered Student Organizations, club sports teams and Greek life can attest to that. Politics is, in this sense, no different at all, for politics is an intrinsically communal enterprise in which we all are key stakeholders, and from which we are unable to extricate ourselves. Consequently, it is unequivocally important to participate in SGA: from voting in the fall elections this week to running for office in that oft-henpecked body.

In a broader sense, participation in the SGA is the key to participation in and the effective functioning of the American Republic at large. Those who are politically active at a relatively young age tend to remain so for the lion's share of their lives (even if that only means voting once a year). A thriving political culture at the UMass and at institutions of higher education across the Republic is essential to the existence of the Republic at all.

In addition to its responsibilities of allocating Student Activity Trust Fund money to student organizations and regulating its own internal Constitution and By-Laws, the SGA serves a more critical function: educating the future politicians and other public servants in the unequivocally fine art, as Edmund Burke put it, of politics and political action. The skills required to participate in America's political class are the greatest emolument that the SGA has to offer, far surpassing the dispensation of titles and financial compensation.

In this sense one of the greatest crimes that one could commit against the future of the United States is to not properly subject those who aspire to lead it to the trials and rigors of public life. The body politic is, after all, but one-half of the great equation of governance – the populace at large is the other a populace which must be filled to the brim with civic virtue in order to ensure the effective functioning of the aforementioned Republic by counterbalancing those who rule with those who are ruled.

It is for this reason in which, if there is some dissatisfaction with the allegedly termagant and mercurial nature of the SGA, it is much more effective and of far greater consequence to subject it to the asperity of the ballot box rather than the asperity of apathy.

The belief that simply not voting and not participating in politics at all will act as a panacea for our collective political woes is not the product of a virtuous citizenry seeking change, but an attempt to entreat disaster and autocracy. Perhaps this tyranny will not manifest itself so dramatically on the university level, but if the political interest and activity of our youth is nonexistent, then the prospect for a "little-r" republican future is truly bleak.

In short, do yourself a favor – go vote this week, even if you don't have much time to do research on the candidates or their platforms, and have to rely merely upon the paltry information posted on the Campus Pulse elections page, or a flier you came across. Start voting now if you haven't already, but don't just do it for your personal gratification. Do it for your fellow students, friends, and compatriots. Do it for UMass. Do it for the American Republic.

Suck it up, America

Nick O'Malley

Saturday was a big day for the Massachusetts rugby team. They were coming off a thumping of Connecticut, and were set to truly get their foray into Division 1 going against Boston College. Then the referee didn't show up. BC, irked by the refereeing provided, requested the University of Massachusetts forfeit the game. Two hours of tension later, the referee showed up – though he had to borrow a stopwatch – and the teams had everything they needed for an official Division 1 match. But the Eagles wanted none of it.

According to Minutemen coach Anthony Neverson, there were two choices offered by the Eagles: forfeit or play a friendly semi-image. With his team already hampered by injuries, Neverson didn't want to risk the friendly, choosing instead to take the forfeit and give some playing time to his B-side and C-side players. Did BC have the right to demand a forfeit? Within the rules, yes.

Was it a Bush League move to get a free win against an upstart team that put up over 60 points against the University of Connecticut the week before? Probably. But their answer is indicative of a bigger issue: what happened to honor and sportsmanship? Once upon a time, things like honor and sportsmanship weren't so cliché and tacky (I even felt pretty lame for writing that last sentence). Sportsmanship simply meant not being a butthead. Whether it's something like not weaseling a cheap win in sports, using mean-spirited personal attacks in politics or frivolous lawsuits against companies, low blows really weren't as commonplace. Now it's more about political correctness than anything. It's okay to take a cheap win when it's a fair game, but if a National Football League player makes a snow angel after a touchdown, it's a $15,000 fine. This kind of crap has been around for years. Take, for example, roughly a year ago when a coach won his team a track and field championship due to a technicality.

Once upon a time, things like honor and sportsmanship weren't so cliché and tacky (I even felt pretty lame for writing that last sentence).

South Pasadena High School pole-vaulter, Robin Laird, just finished her third and final vault. She edged herself into position to give her school enough points to beat out rival Monrovia High School, and she won. Monrovia coach Mike Knowles, though, had different plans. He walked over to the official while pointing at his wrist. Laird was wearing a braided friendship bracelet. According to Section 3, Article 3 of the National Federation of State High School Associations, "Jewelry shall not be worn during contests." Therefore, Laird was disqualified, and Monrovia was given the Rio Hondo League Title. True, Laird violated a rule and was punished. But its sketchy at best that the opposing coach waited until the final event and after her third vault to alert the judges. Congratulations to the coach, though. He won a championship on a technicality that made someone break down into tears. Go sports. A similar case occurred in Baltimore County, where the fourth-place finisher at a cross-country championship was disqualified for a uniform infraction. Although he was in proper uniform and was not wearing illegal jewelry, he was wearing banned compression shorts. The shorts were black (which is legal) with white stitching (no longer legal).

According to a new rule instituted in the Baltimore Country cross-country, "Items displaying seams stitched on the outside of a garment in a visible contrasting color to the undergarment will be illegal beginning the 2009-10 year." My friend "The J-Mann" has a saying for moments like these; "Man's game, yo." ("Woman's game, yo" is also completely acceptable).

Long gone are the days where humble defeat is accepted. Here are the days where high school students taught that championships are won not with hard work, but with whining about technicalities and being a sore loser. In today's world, Rocky doesn't accept defeat from Apollo Creed. Instead, he whines and files a formal complaint to the boxing commission about biased scoring due to his left-handed style.

The thing is, no one watches that movie. That movie sucks because Rocky's a whiney loser, like Al Gore in the 2000 election. No one necessarily likes a winner. It's the reason that everyone likes John Hodgman's character in the personal computer vs. Macintosh advertisements. It's the reason Nixon was shamed into the abyss and Al Gore has a Nobel Prize.

The latter sucked it up, did something else, and didn't get caught by Forest Gump when he sent men to break into the Watergate Hotel. That's how it happened, right? If winning was what truly mattered, no one on this planet would ever finish a game of Monopoly of Risk. The second someone took control of Boardwalk and Park Place or Asia, someone would just flip over the board and start whining about how Grandma kept getting all the good chance cards, and someone was a jerk and holed up in Australia. So, yes BC should have sucked it up and played UMass.

Why? Because that's the kind of crap politicians, Major League Baseball managers, and my little cousins pull. Most of the clichés I can toss out are sexist (grow a pair, man up, stop being a girl), so I won't use them and let someone call me out on a technicality. So I'll use a gender neutral expression; suck it up, America.

On the war in Afghanistan

This is Part 2 of a 2 part series.

Kevin Gallagher

Taliban propaganda, which can be viewed on websites like YouTube.com and MEMRITV's coverage of Al Jazeera, has proven effective. Taking cues from al-Qaeda's American-born media advisor, Adam Gadahn, Taliban-produced videos are candid and sharply delineate ideological superiority. They also feature attacks on American targets and interviews with mujahedeen (Afghani rebels) whose morale could not be higher. They are fighting a war in ideal conditions; on their own turf, with the support of a majority Muslim population against a perceived occupier. The reels showed Taliban fighters taking cover from U.S. airplanes underneath the clouds that cover mountainous regions, declaring the utter defeat and failure of the North American Treaty Organization in all its military operations. They boast of cutting off supply routes to American bases, deflect charges of killing innocent civilians back on the enemy, and present the destruction of 70-80 trucks and cars in a NATO supply convoy.

My No. 1 grievance is that the media failed to do its job to sway popular opinion against the war and represent the views of Americans to the politicians.

Not many people paid attention to the headlines when at the beginning of 2010, the Central Intelligence Agency lost some of its most trusted assets in the War on Terror to a single Pakistani suicide bomber, including at least seven officers at Forward Operating Base Chapman. The Taliban immediately claimed responsibility for a successful operation, which turned the agent double. While in America, the fallen were praised as patriots and honored for their invaluable work done close to the enemy. Unfortunately, there was a loss of high-value intelligence. This was a particularly embarrassing incidence of "blow-back." This is the same force that lays claim to the consensus that in the 1980s the CIA funded Osama Bin Laden and his training camp (originally called Maktab al-Khidamat) MAK recruited young Muslims to fight in the jihad against Soviet interests in Afghanistan. When Bin Laden turned against the U.S., there was a unit formed which tracked him for years. Clinton regretted not authorizing a chance to terminate him, which he admitted was within his scope. Compounded with suspicion that we had advance knowledge of the Sept. 11 attacks, and the vast conspiracy theories surrounding that date, the given reasons for going to war were questionable in the first place.

Pentagon insiders will tell you that the war is "hard work," and U.S. propaganda throughout the last decade has shown us hopeful images of soldiers extending help and necessities to cautious villagers. Yet not even Pakistan's leaders are willing to take the political suicide that equals collaborating with the U.S. They've already incurred a heavy cost ($35 billion) with their own efforts in the War on Terror, which is resented by the populace. Moreover, Pakistan values the Taliban as a proxy against India, which it perceives as a stronger regional influence than the U.S. One wonders why after decades of containment in the Cold War and failed misadventures like Mogadishu and Lebanon, how we still haven't learned our lesson about being the world's policeman. Internationally, America's diplomatic credibility, currency and relevance are on the decline.

Countries like China, India and Japan are poised to challenge our geopolitical economic influence. You could say we got too full of ourselves with this noble yet insane notion of exporting freedom and democracy. I was once a believer in it myself, which was easy until I was shown where the moral high ground lay.

Some spent the decade brooding on whether the West could coexist peacefully on Earth with Islam. With Afghanistan we will merely be taking our seat next to the Sviet Union in the graveyard of empires.

It's another nail in the coffin of the corpse of the American century and U.S. neo-imperial global influence. My No. 1 grievance is that the media failed to do its job to sway popular opinion against the war and represent the views of Americans to the politicians. Given our brutal reactionary need for retaliation, we bent over for the bureaucrats and war industries to take blood in the aftermath of 9/11.

We invaded a sovereign country (albeit one with a poor reputation on human rights), without any understanding of warlords and tribal affiliations, literacy or local problems. It was foolish to go to war with an unstable country, with difficult terrain, little history of effective governance, and without a formal declaration. If you were against it at the time, you were called unpatriotic and publicly shamed. Now it is taken for granted that the cause is lost.

So what does it all mean for the threat of al-Qaeda, who is supposedly at war with us and could attack within the U.S. at any minute? Well, we wouldn't have had that problem if not for various factors like: the presence of Western soldiers on the Muslim "holy lands" in the Gulf War, our massive military support of Israel and countless CIA-sponsored coups and dictatorship regimes, not to mention the very pro-Mujahedeen anti-Soviet intelligence operations that created Bin Laden. History isn't just there people, it's meant to be learned from.

Back To Stool concert attracts crowds, police

By Kate Evans
Collegian Correspondent

The Back to Stool concert at the Mullins Center certainly brought a large crowd on Saturday. The show had the Amherst Police Department threatening to arrest Barstool Sports head honcho Dave Portnoy on charges of inciting a riot. Back to Stool promoted itself as an excuse to party, which is exactly what happened on Friday night and Saturday prior to the show.

BarstoolSports.com teamed up with performers Mike Posner, Wale and openers The White Panda, Mac Miller and Paul Markham at the University of Massachusetts this weekend for the first concert on the website's fall tour. With over 4,000 ticket sales, the floor and general admission seats in the Mullins Center were packed with sweat-soaked college students.

UMass' very own Paul Markham was the first among the openers to perform promptly at 7:30 p.m. Markham started off the show rapping "Fly like a G6 Remix," which has over an astounding 40,000 hits on YouTube. Markham looked quite comfortable among his peers as he also performed "Crazy Girl," and then finished with his new song "Breaking It Up."

Mac Miller performed with a strong voice alongside a partner. Miller's biggest disappointment was that he was only given 15 minutes of stage time. The last among the openers was The White Panda. DJing remixes with hit songs "Rude Boy," "Party in the U.S.A." and "Praise You." Also dabbling in Lil Wayne's lyrical sensations, The White Panda created a grind fest on the floor much like El Pres had predicted.

Wale hit the stage shortly thereafter, kicking off his act with "The MC," a song from his most recent mixtape "More About Nothing." Rocking dreads and a self-advertising hat, Wale took a break between songs to share that he's "got love for UMass." He also pulled a "Jersey Shore" and demanded a fist-pump session, to which the audience gladly obliged. Wale's first few songs were somewhat drowned out by the loud music, many of which were from mixtapes the majority of the crowd was unfamiliar with. About halfway through his set he successfully remixed his beats with Nirvana in a surprising and pleasant twist. Wale wound down his performance with popular songs "Chillin'," "Nikk Boots" and "Pretty Girls." The audience, reeking of cigarette smoke and weed, happily sang along to Wale's well-known singles.

The Pres himself, clearly drunk, joked with the audience in between acts. He first claimed, after having caused so much trouble on Friday, the police had forbidden him from going out after the concert. Although the latter may have been true, that didn't stop Portnoy from exclaiming, "We will be out tonight!"

By the time headliner Mike Posner appeared, the floor was nearly half full with fans falling into one another in desperate attempts to get closer to the icon. Posner may have had the best stage presence of all in the lineup, engaging listeners with his enthusiastic body language. Performing alongside a live band, Posner covered most of his well-known songs, including "Drug Dealer Girl," "Bow Chicka Wow Wow," "Smoke and Drive" and "Cooler Than Me." Fans were excitedly singing along to these songs, getting exceptionally rowdy during "Drug Dealer Girl." Looking cool and sporting all black, Posner was down-to-earth when he addressed fans about recently graduating from college. He gratefully stated that his fans are the sole reason for letting him live out his dreams. Posner also admitted that if UMass were to force him to choose, his favorite song is "Save Your Goodbye."

Several attendees commented that Posner's performance ended in a somewhat awkward manner as he jumped into the crowd to surf, but was let down fairly quickly. They felt the music wasn't upbeat enough for the act, causing an abrupt end to the concert. Not many artists would jump into a crowd filled with ravenously drunk college students, which speaks for Posner's attitude.

It was nearly impossible to navigate through the floor without getting groped, shoved, elbowed or submerged in a cloud of marijuana smoke. Concert-goers were being escorted off the premises left and right for sneaking onto the floor. The most commonly uttered question of the night may very well have been, "Can I get a hit of that?"

An equally outrageous end to the weekend matched the events leading up to the show, as a male was beaten up and laying on the pavement outside the Mullins Center after the show. The two attendees who punched him ran off, leaving EMTs and passersby to attend to the wounded boy. Hopefully Barstool Sports will return in the spring for more madness after all the trouble that has ensued this past weekend.

Kate Evans can be reached at kvevans@student.umass.edu.

University of Massachusetts student Paul Markham performed as an opening act at the Back to Stool show on Saturday. The show attracted large crowds and a lot of post-concert police presence.

'Restrepo' brings life in Afghanistan war zone to the states

The recently-released documentary "Restrepo," produced by Sebastian Junger and Tim Hetherington, follows a platoon of the Airborne Brigade Combat Team for a year. Throughout the film are clips that were shot by the soldiers themselves to get an accurate view of their lives in a war zone.

By Gabe Scarbrough
Collegian Correspondent

"Restrepo" is not a feel good movie. It will not hold your hand. It will not censor itself for you. It does not offer any solid answers and it does not give you a feeling of resolution. It does not attempt to explain what is happening. There is no clear plot line. There is no objective voice telling you what to think. This is as raw as it gets. This is war. Draw your own conclusions.

"Restrepo" is a documentary created by American writer and journalist Sebastian Junger and photographer and filmmaker Tim Hetherington. The film was made during the year they spent with the Second Platoon, B Company, 2nd Battalion, 503rd Infantry Regiment of the 173rd Airborne Brigade Combat Team in the Korangal Valley. The soldiers are in one of the most dangerous places in Afghanistan and the filmmakers make no attempt to hide it. You will see shots fired. You'll witness blood dry on a man's fatigues as he walks away from his friend's lifeless body. You will experience the commotion of war and see its results.

You see all of this in a very intimate way. The film is a mix of handheld footage shot with the soldiers under any conditions they were under mixed with interviews against a black background and a little bit of self-shot footage by the soldiers. The handheld footage is raw. There is no attempt to hide when audio cuts out. The camera shakes to the point where sometimes you have no idea what you're looking at. The film crew made no attempt to add drama through shaping the experience with external lighting. The drama was already there. What you see is what you get.

The interview sections are different but just as intimate. While the professional lighting adds mood, the flat black background does not divert your eye from the subject. The camera lingers on every lip quiver and eye twitch as the soldiers describe fear, loss and triumph. While the handheld footage speaks for itself, the interview footage has the soldiers do the talking. There is no additive fluff spliced in. Viewers will find neither news footage nor official statements from military higher-ups added for "context." This is

See RESTREPO on page 6

'Wall Street' a worthy sequel

By Ian Winship
Collegian Correspondent

"Wall Street: Money Never Sleeps" follows the story of the infamous Gordon Gekko's daughter Winnie and her Wall Street fiancé Jake Moore as they struggle their way through the financial disaster that happened in late 2008.

The story mostly follows Jake Moore, who is played by Shia Lebeouf. Moore a young broker trying to succeed with his job, do the right thing and marry Winnie Gekko, the daughter of the recently released from jail Gordon Gekko, who is played by Michael Douglas. Unfortunately, Jake runs into bad luck as everything around him starts to fail in one of the biggest financial crisis of all time.

This movie is visually captivating. It has numerous metaphors that flow well with the story line and add just that little bit of extra something to the experience. The cinematography is done well. There are many shots that set the tone or setting without the need to use dialogue or subtitles.

At times it is difficult to find beauty in the big city, but this movie doesn't seem to have trouble. The majority of the cast members are upper-class, wealthy Wall Street workers, so it makes sense that the clothing and living spaces depicted were none other than top of the line.

This movie isn't one of those sequels you could easily go into without seeing the first. Much of the story comes from and builds off the original "Wall Street" of the late 1980s. Although the plot mostly follows the new school of brokers, Jake Moore and his crowd, it also delves into the past with Gordon and his people.

There are many surprising visits from the past throughout the movie that will simply make you smile as you remember the original. Although the movie builds off of the original, it has a plot of its own. This plot builds itself in a similar fashion as the first, but differs enough to keep you wondering what will happen next.

It is interesting how this film plays off of events that happened in the recent past, most specifically, the financial crisis. Of course, with the film being about brokers and bankers, it has a lot to do with what happened. You see what happened to the people who worked on Wall Street. And you see what someone thought of as happening behind the scenes within these big banks as they struggled to keep their heads above the water. Finally, you see what may have been the reason big banks got their controversial bailout. Another thing the film focuses on is the fact that green is the next big thing. This is something a lot of us can agree with at this time. Moore spends most of the film fighting for an alternative renewable energy source. He considers himself someone with a focus on the issue of renewable energy and he is rewarded for his skills in this area. Going green is a topic that a lot of people talk about, but that is all they do just talk about it.

In this film they really push towards getting money to finance these projects that people talk about. It is an exciting look into the future of what we could possibly be doing with energy by simply looking at the past.

Ian Winship can be reached at iwinship@student.umass.edu

Shia Lebeouf costars in "Wall Street: Money Never Sleeps," a longcoming sequel to the 1987 film "Wall Street." Lebeouf plays Jake Moore, a young stock broker with unfortunate luck.

Bagel bread pudding a sweet, easy-to-make dessert for fall

By Jess Watsky
Collegian Correspondent

With so many leftovers and very little time to put effort into cooking, how does a busy student prepare for a date, a surprise visit from mom and dad, or a special dinner? Classes and budgets make this an interesting challenge, but there are tips and tricks to help make blase college fare into a smashing success.

An especially decadent dessert is bread pudding, an easily adaptable recipe, made with ingredients lying around the house that can be customized and flavored to suit any occasion. It's an easy dessert to prepare, ignore and then pop in the oven to bake. It is guaranteed to impress any date or special guest!

Start by chopping your bagels into cubes or bite-sized chunks. Then place chunks in a buttered baking dish.

Microwave the butter until it's melted and let it cool. Combine the four eggs, cinnamon, nutmeg, vanilla, sour cream, milk and salt as well as half of the brown sugar and mix thoroughly.

Add the butter until it's fully incorporated into the mixture and pour it over the bagel cubes.

Place the pan in the refrigerator for three hours to an entire night and let it chill and soak up the liquid. If the bagels are still too dry, pour a little extra chai or milk over the top.

Allocate a cooking time of an hour or so before serving. Preheat your oven to 375 degrees and cook for 30-45 minutes or until it's crispy and brown on top.

Sprinkle the last three tablespoons of brown sugar evenly over the top of your bagel bread pudding, then crank your oven to its broil setting and let the sugar melt and caramelize for five to six minutes.

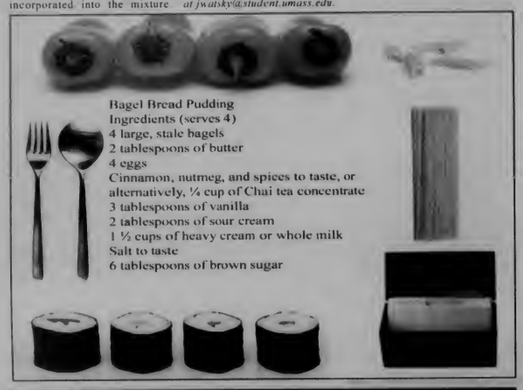
Finally, remove the dish from oven and let cool for 30 minutes. Serve the pudding with vanilla ice cream, iced or hot chai tea, or whipped cream.

This simple yet elegantly flavored dessert is a classic treat and can be easily adapted for a savory flavor profile, breakfast, or individual portions. Make your own combinations and experiment with the recipe to find a mixture of flavors that's right for you.

Jess Watsky can be reached at jwatsky@student.umass.edu.

Jess Watsky/Collegian

Bagel bread pudding is simple to make requiring minimal ingredients, many of which can be found in your pantry or kitchen cabinet. This recipe can be altered to make the dish appropriate and perfect for any occasion, formal or informal.



Bagel Bread Pudding
Ingredients (serves 4)
4 large, stale bagels
2 tablespoons of butter
4 eggs
Cinnamon, nutmeg, and spices to taste, or alternatively, ¼ cup of Chai tea concentrate
3 tablespoons of vanilla
2 tablespoons of sour cream
1 ½ cups of heavy cream or whole milk
Salt to taste
6 tablespoons of brown sugar

Documentary captures war zone

RESTREPO from page 5

the soldiers' words and that's it.

There are so many striking moments in this film. As a soldier reveals in an interview that he was never allowed to play with toy guns, we see footage of him smiling as he shoots a machine gun in battle. Two soldiers talk on radios and when one asks what the other does on his family's ranch the conversation turns to hunting. He states that it's the same thing in the Korangal.

"We're not hunting animals. We're hunting people," he says. Soldiers rave to each other about the high of combat, comparing it to crack, and the next moment they lament how they don't know how they will adjust to civilian life after the war.

But the film does not comment on any of this, and for every dark moment there are also many glimpses into the light of the human spirit. We see the troops wrestle, dance and play shooting games on the Play Station Portable. They tease each other one moment and reflect on their dead friends with the highest reverence possible in the next. These men are never portrayed as war machines or as any ideal of the American soldier. They are just men in a difficult situation.

If there is any one message that is reiterated more than any other in the film it is the importance of every single soldier. Whenever the anniversary of a death arrives, flares are shot off at the kill site – even the title of the movie is a dedication. "Restrepo" is not just the name of the base that the soldiers built but also the last name of the friend and medic they lost earlier in the campaign, Juan S. Restrepo.

You will sympathize with the soldiers, no matter what your position on the war is. When bombs go off you may literally jump and when the film goes to black at the end you may hear your own heart pumping in your chest.

UNIVERSITY OF MASSACHUSETTS AMHERST
Serious challenges beset U.S. politics—economic troubles, joblessness, lack of credit, global climate change, the escalating cost of medical care and health insurance. But obstacles—including distorted representation in Congress, paralysis of the Senate, filibusters real and threatened, and the toxic polarization of our politics—make it virtually impossible to address them. Professor Robinson asks if we can devise a form of government at once democratic and constitutional that embodies both liberal and conservative principles: using government to try to better the human condition while being realistic about human capability and aware of the need for restraint, patience, and civility.
This educational program, created in conjunction with Constitution Day and Citizenship Day, fulfills mandated requirements for institutions receiving U.S. Department of Education funding.

New coach looks to build young team

By The University News (Saint Louis)
Via College News Network

When the Saint Louis University men's soccer team squares off against Drake this Saturday, Sept. 25 at 7:30 p.m. in Robert R. Hermann Stadium, homecoming will have a different feel for the first time in a decade. The halftime fireworks will still be there—but the head coach will be different.

This time last year, Dan Donigan was still the head coach of the SLU men's soccer team. His team would eventually advance to the second round of the NCAA tournament before losing in overtime against Tulsa.

Meanwhile, Mike McGinty was an associate head coach at the University of Virginia, who finished their season with a victory over Tulsa for the national championship.

Now, as the Billikens (1-2-1) prepare for the homecoming game against Drake (3-4), Donigan is coaching at Rutgers University (3-1-1) and McGinty has taken over the reigns of the program that Donigan led to 118 victories.

"When I did my homework, SLU was I place I felt I could come and build on the work [Donigan] had done, build on the work other coaches before him had done, and I felt that I could win a national championship here. I just came off a national championship and I want to win another one," McGinty said.

But why did McGinty decide to leave the program that had just been crowned national champions and come to SLU?

"I was the associate head coach at Virginia-and here, obviously, I'm the head coach," McGinty said.

"So that was the difference for me-to go out and have complete reins of the program.

"I had been at Virginia for 11 years. I learned a lot with the coaches that were there. I was fortunate with a lot of great players there, but there was nothing left for me to do there.

"We won a national championship and an ACC championship, and if I was going leave, that's the way I wanted to be remembered-and it was perfect timing for me and my family to come out here," McGinty said.

For McGinty, coming from the University of Virginia to SLU has not changed the expectations regarding the success of the men's soccer team. At each university, the fans and alumni expect to see their team compete for a national championship. But McGinty does not consider those expectations problematic.

"I have pretty high expectations for myself, I have high expectations for my players," McGinty said.

"I like the fact that the people that support the program and are interested in the program want us to be national champions. Those are the kind of people I like having around me-alumni that want us to be national champions, an athletic director in Chris May that wants us to be national champions.A

"If I felt that this was a rebuilding 20-year, 10-year project, we're happy with where we are in life type of job, I wouldn't have taken it."

These lofty goals motivate McGinty as well as his players. Freshman Christian Briggs says McGinty emphasizes the goal of the national championship to motivate the team.

"I think every time we go to practice it's always on our mind-we are definitely a very goal-oriented team," Briggs said.

"We think about a lot of things when we train, but it's [the national championship] that everyone wants."

Briggs admits that one win out of four games to start the season was not what the team had in mind, but is confident that the team can improve.

"It's not going to be easy-but once we buy into his philosophy what he's coaching we believe that the goals that we have set will be attained. Coming from a place like Virginia, he has a lot of experience-we need to buy into his philosophy and continue to work hard every day," Briggs said.

McGinty also is blunt in acknowledging that he is not satisfied with the performances of his team so far.

"If I was 4-0 I wouldn't be satisfied, either," McGinty said.

"One thing as a coach, I don't think you're ever satisfied-you can always do something better. We talk about it every day, what could we have done better? If I was 4-0 or 0-4, it doesn't matter-I still wouldn't be satisfied."

As a head coach, McGinty will always find something for his young team to work on.

When SLU takes the field against Drake this Saturday, the team may not entirely satisfy McGinty. But after an overtime loss last year, a homecoming victory would be more than satisfactory for Billiken fans.

Terriers break losing streak against URI

Courtesy Boston University Media Relations

Ben Berube and Kelvin Madzongwe, above, were named America East award winners for this week. Boston University recently slipped out of a three-game losing streak with a 3–0 victory over Rhode Island.

By The Daily Free Press (BU)
Via College News Network

Coming off a three-game losing streak in which it was outscored 8-1, the Boston University men's soccer team was in search of a win above all else heading into a set of games last weekend.

Not only did the Terriers accomplish that, but they also snapped out of an offensive rut that plagued them in losses to No. 10 Boston College, No. 12 St. John's University and No. 22 Brown University.

Finishing up a three game homestand at Nickerson Field, the Terrier attack paved the way for a successful weekend, one in which BU took down the University of Rhode Island 3-0 on Friday night and managed a 2-1 upset of No. 21 Harvard University last night.

Ironically enough, the increase in goals actually started with the absence of some of the team's top veteran playmakers up top.

BU coach Neil Roberts opted to bench senior forward Aaron O'Neal, junior midfielder Michael Bustamante and junior forward Stephen Knox as healthy scratches for the URI game, citing an overall lack of leadership as his prime motivating factor in the decision.

This move, however, enabled Roberts to insert speedy junior midfielder Ben Berube on the front line. The decision was not without risk, seeing as Berube did not have very much experience playing forward. Roberts' decision ultimately paid serious dividends as Berube was the leading goal-scorer for the weekend, scoring two goals against URI and netting the game-winning goal against Harvard.

"He made us look good and he made himself look good," Roberts said. "He did a good job out there."

The three goals Berube scored over the weekend were his first three of the season.

Despite posting a 2-0 weekend and scoring five goals in the process, some felt that the offense could have somehow managed to do even better.

"We're getting the chances, which is good, but we do need to work on our finishing a little bit," Berube said. "We got enough to win, so I guess that's all that matters."

While Berube's three goals were certainly the highlight of the past two games, several other Terrier players got involved in the attack.

Among them was sophomore striker Ade Akinsanye, who finished a ball that deflected off the URI goalie on a shot from none other than his brother, senior midfielder Temi Akinsanye. The goal finished off the scoring for the Terriers in their 3-0 rout of the Rams.

Freshman defender Kelvin Madzongwe got in on the action as well, registering the first goal in his collegiate career against Harvard when he headed home a cross from Berube just inside the near post to give the Terriers a 1-0 lead over the Crimson.

"That's a big deal to me," Madzongwe said. "I'm gaining confidence and fitting into the system."

For Madzongwe, as well as Ade Akinsanye, the goal was his first of the season.

Equally impressive for the Terriers were the ways in which they were able to score in different situations. The first of Berube's goals against URI came off a direct free kick from about 20 yards out. Akinsanye's goal came off of a rebound when the Terriers had a several man advantage up front on a counter-attack. Madzongwe connected off of a header on a play that started as a corner kick against Harvard and Berube finished off some nice combination play among the attackers to cap off the undefeated weekend.

Statistically, the Terriers' offensive success extended beyond the goals that they were able to record. If anything, the goals came as a result of the intense pressure that they placed on the opposing defenses in the two wins. In those two games, the Terriers held an 11-2 advantage on corner kicks, and they outshot their opponents by a combined 33-13 margin.

With the non-conference portion of the season now coming to a close, BU will now face a full slate of America East games, looking to make amends for a forgettable 2009 conference campaign. For its own sake, the team is hoping the offensive momentum that it gathered this weekend is something it can take with it going forward.

"We need to keep pushing," Berube said. "We need to do what we did tonight and just keep working."

Sports Editors' Note

The sports section of the Massachusetts Daily Collegian has been making great improvements over the past year.

We are creating new content, covering club sports, using social networking tools and increasing our staff in order to bring the best UMass sports coverage to students, fans, faculty and the community.

One major way we have improved our section is by reaching out to other collegiate newspapers across the country. For instance, we used pictures from The Michigan Daily's archive in order to complete our multimedia package of the football game against Michigan.

We also gave William & Mary football photos in exchange for their help with our first podcast of the year. The result was another perspective of the game from the newspaper of a UMass opponent.

The podcast was a success and in the process, we have a great relationship with another school for years to come.

Atlantic 10 play officially begins this week, with the start of women's soccer and are part of a new A-10 network that will allow our writers to string for other schools and vice versa. Our staff will create synergy with these schools in order to improve the content of our paper.

In a changing journalism industry, we believe it's important for us to network with other students across the country and collaborate on our resources. The new A-10 network, along with plans to work with students from other newspapers across the country will help us accomplish that objective.

Most schools are in a similar situation as us and can't afford to follow the teams they cover to every game. Rather than having to rely on Media Relations to fill those gaps, we will now have the resources from students already covering their own team to help us cover ours.

David Brinch and Adam Miller are co-Sports Editors. They can be reached at sports@dailycollegian.com.

Come visit us at the Engineering & Technology Career Fair on September 29 at the Murray D. Lincoln Campus Center from 10 a.m. to 3 p.m.

Minutewomen start season against 49ers

JEFF BERNSTEIN/COLLEGIAN

In UMass' final preseason game, Harvard's senior Katherine Kuzma, above, pressured the ball. Posessing the ball is one thing that the Minutewomen will need to do during the regular season.

By Michael Counos
Collegian Staff

Despite the recent four-game slide for the Massachusetts women's soccer team, Therese Smith is having the hot foot for the Minutewomen. Smith has a goal in each of the team's last three contests.

The senior midfielder leads the team in offense with 10 points on four goals and two assists. She started all nine games for UMass and has taken 32 of the team's 137 shots. Her four goals account for 25 percent of the Minutewomen goals scored this season.

Smith's hot streak began in Rochester against Oakland when she evened the score at two in the 67th minute. UMass lost the lead and the game in the 82nd minute. Against Brown, Smith would connect for two scores off the help of senior Ashley Hamel. UMass lost the game, 3-2, with Smith scoring in the 21st minute and again in the 39th minute.

UMass Women's Soccer

Her fourth goal came against Harvard on Sunday when she opened the scoring for UMass in the 17th minute from 20 yards out. She was assisted by Hamel once again. The senior has taken 32 shots so far, with half of them being on target. Smith is averaging 3.56 shots a game with a .500 shots on goal percentage and 1.11 points per game.

UMass struggles in preseason

UMass is struggling recently after dropping its last four matches and putting its record at 3-6-0 midway through the season. The Minutewomen dropped their most recent match to Harvard, 3-2.

After a 1-3 record on their latest road trip, UMass coach Ed Matz and his team were enthusiastic to play on their own turf at Rudd Field on Sunday. Unfortunately for the Maroon and White, it did not get back on the winning side against its final non-conference opponent of the season.

The four-game slide includes losses to Michigan, Oakland, Brown and Harvard. UMass has been outscored, 14-6, over the losing-streak and lost to the Golden Grizzlies and Brown Bears in the final minutes of the contest.

"We should be winning games if the offense is able to put two goals up on the scoreboard," Matz said. "We need to do a better job on defense and finishing games."

The Minutewomen have been outplayed in all categories being outshot 69-48 and beat in corner kick attempts 24-12. Fouls have plagued UMass as they have committed 43 over four games while the opposition has 28.

Conference play begins

UMass will begin its Atlantic 10 conference schedule on Friday against Charlotte at Rudd Field. The Minutewomen play four of their nine conference games at home, including this Sunday against Saint Louis, then Temple on Oct. 22 and Saint Joseph's on Oct. 24.

UMass went 5-6-0 in 2009. The team was outscored, 22-12, in 11 contests and outshot, 194-104.

Sophomore Emily Cota will look to improve on last season when she gave up a pair of goals a game. The goalkeeper had 75 saves in 2009.

The Minutewomen look to begin the conference schedule of 2010 on the right foot. Charlotte and Saint Louis blanked UMass, 4-0, last season.

Michael Counos can be reached at mcounos@student.umass.edu.

St. Louis hopes to build off good postseason

GW continues consistent play, Xavier has best start since '97

SOCCER from page 10

La Salle

Despite the Explorers inability to make the tournament last year, they have pulled out all the stops preparing for this year's conference play.

With a 6-4 record this year, La Salle has proven to be a very dangerous team this season. The most dangerous of all the Explorers is freshman Renee Washington who has six goals this year and has 42 shots on the season.

Washington is one of three freshmen in the school's history to score five goals in her first six games. The freshman led her team to victory with her sixth goal when she scored in the first five minutes of overtime play against Delaware to lift the Explorers to a 2-1 victory.

George Washington

What GW lacks in experience, it more than makes up for in tenacity and consistency.

The Colonials enter the A-10 tallying an average 42 shots in the first half of its games and an equally impressive 45 shots in the second half.

Much of this shooting has been from the foot of junior midfielder Sierra Smidinger, who has two assists this season and 18 shots.

On the defensive front, GW has allowed eight goals this season while maintaining an impressive .88 goals-against average.

Returning keeper Lindsey Rowe has been the backbone of the Colonials' defensive success entering conference play with 27 saves under her belt.

St. Bonaventure

A Player of the Week award for St. Bonaventure's Nicole Markert has proven to be no distraction for the senior goalkeeper. With three shutouts this season and 11 saves, Markert's defensive prowess has brought the Bonnies to a 6-4 record this year.

SBU's five-game winning streak was brought to an abrupt halt after a heartbreaking loss to Siena, however the Bonnies hope to start conference play on the right foot when it faces off against Duquesne Saturday.

SBU coach Manoj Khettry will be expecting a lot from his offense, which is out-shooting (143-104) and out-scoring (16-13) its opponents.

Fordham

A third-seed ranking in last year's tournament and a loss in the semifinals to Charlotte has left a bitter taste in the mouth of the Rams.

Fordham (4-6) is having a slow start in non-conference play, taking a few hits from Hofstra and Miami.

Many of Fordham's problems stem from its lack of offensive production this season. During the Ram's six-game losing streak the offense was held to no more than one goal in every game.

This puts most of the pressure on the shoulders of goalkeeper Rachel Suther. The sophomore currently has 31 saves this season and maintained a .705 save percentage.

Temple

Temple's start to the 2010 season has the warnings of another tough year for the Owls.

Having failed to make the tournament last year, the Owls (5-5) suffered through some tough losses to Villanova and Maine. Temple heads into conference play with a full head of steam after a 2-0 victory over Wagner on Sunday.

One of the Owls strengths this year will be the depth of their roster, which includes 10 seniors. However, the real threat on this team are Kate and Allicia Yurkovic who are responsible for almost half of the team's goals.

Xavier

Xavier had its best start to a season this year since 1997 after going 2-0 at the Catamount Classic at Western Carolina.

The Musketeers dropped their next two games to Cincinnati and Evansville bringing them to 4-5 on the season.

Xavier's offensive dynamo, Jessica Brooks returns this season after a slow sophomore year where Brooks failed to produce a goal. It took little time for Brooks to get back on form however, as she has already scored four goals in the team's first nine games. Freshman Lauren Heap has also gotten off on the right foot this year scoring three goals for the Musketeers.

Duquesne

Coming off a season where they failed to make the playoff and the added pressure of entering conference play with a three-game losing streak could spell trouble for the Duquesne women's soccer team.

The Dukes should not be written off just yet, wins against Bucknell and Buffalo prove there's more kick to this team than one might think.

Senior goalkeeper Gabby Morrin currently ranks fourth with a GAA of 1.43 and third with 17 wins in the program's history.

Morrin has maintained her reputation this year by making 36 saves and maintaining a .783 save percentage.

Richmond

Coming off a win against Wilmington where they recorded a season high 19 shots, the Spiders will enter A-10 conference play against Saint Joseph's.

Spider freshman standout Becca Wann has four goals, 35 shots and is responsible for more than 50 percent of Richmond's point production this season. Goalkeeper Melissa Pacheco will be the starter this year after a strong finish last year.

She currently has two shutouts already on the season, the same amount the junior had for all of last year. Additional victories against American and Longwood have provided the Spiders with a strong foundation for a strong season in the conference, which it will open on Friday.

Saint Joseph's

A recent loss to fellow A-10 conference member could prove to be a precursor for what is to come for SJU this year.

The Hawks have struggled through the start of the 2010 season with a 3-6 record and failed to score more than one goal in any of its games this season.

Christine Neal will continue to start for SJU in goal after a top freshman season last year. Neal was ranked fourth in goals against average (1.14) and was named an A-10 All-Rookie team honoree.

Offensively, one name comes to focus for the Hawks, Jen Pfeiffer. She has eight of the team's 12 goals this season and is currently ranked fourth in program history for shots (117).

Saint Louis

Last year, SLU managed to make it past the first round of the tournament only to lose to Dayton in the semifinals. Dayton would go on to win the tournament.

This year has been a much different story for the Billikens (1-4-6), who currently reside in last place in the A-10 standings. Offense could be a key problem for the Billikens who have failed to score a goal in its last five games.

Chris Gardner can be reached at cgardner@student.umass.edu.

JEFF BERNSTEIN/COLLEGIAN

Senior Ashley Hamel prepares to pass the ball against Harvard. The Minutewomen open their regular season against current A–10 favorites, Charlotte, which came up short in last year's championship game against Dayton.

THE MASSACHUSETTS DAILY COLLEGIAN

SPORTSTUESDAY

TUESDAY, SEPTEMBER 28, 2010

SPORTS@DAILYCOLLEGIAN.COM

Minutewomen strong enough for postseason

There usually isn't anything encouraging about a sub- 500 record.

In fact, in most cases, a situation like what the Massachusetts field hockey team is dealing with would be reason for a red flag. But in this sport, how you finish really is more important than how you start.

Adam Miller

The Atlantic 10 is a one-bid conference as far as field hockey is concerned so the A-10 tournament is winner-take-all. There are no at-large bids at stake for the NCAA tournament.

The Minutewomen (4-5) are playing one of the toughest schedules in the country as they do every year, and they are running into problems early in the season.

However, UMass is no stranger to adversity.

During the 2007 season, the Minutewomen got off to a 5-6 start, then went 6-1 during the A-10 schedule, won the conference tournament, defeated Princeton during the play-in game and made the NCAA tournament.

UMass has the potential to have a similar season that it had in 2007 even if it starts play against the A-10 below .500.

For starters, the Minutewomen have already pulled off a few impressive wins, the most notable being an upset over No. 5 Connecticut, which is the Huskies' only loss of the season so far.

Another important factor is they are significantly better than anyone else in their conference. The only team with a better non-conference record at this point is Lock Haven, who is playing a much easier schedule anyway.

Richmond is the only team in the A-10 receiving votes, which is currently on a six-game losing streak and has yet to beat a ranked opponent. While the Spiders (3-7) might have an edge when they host the Minutewomen on their home field, it's unlikely they can beat them twice.

While UMass certainly won't be taking its own conference for granted after starting its schedule off 0-3 last season, it is in a much better position than it was last year, even with a more successful non-conference run.

The Minutewomen can already take comfort in beating a ranked opponent and are facing tests much earlier in the season as opposed to last year. At this point of the season, they should be more concerned with the losses, and more interested in learning from them.

UMass coach Justine Sowry made this point clear to her team on Sunday when it faced Albany.

With 29 minutes left in the game, the Minutewomen held a scoreless tie until senior Katie Kelly stole the ball, led the breakaway and got around the Great Danes' goalkeeper Kristi Troch to get a shot on an open net, but missed to the left.

Sowry's praise did not go towards Kelly, who not only stole the ball, but maneuvered past the only person who could've stopped her shot, but Taylor Luke, a midfielder for Albany who dove after the ball and deflected it out of bounds.

The UMass coach immediately called timeout to explain to her team that the only way it's going to have any success is to play with the same desperation that Luke had in playing spoiler for the Minutewomen.

"That was a great example of a player that has the will to win," Sowry said Sunday following her team's 1-0 loss to the Great Danes.

While Sowry probably would've preferred a win against Albany, that game isn't going to affect UMass in the season's long run. What is more important is that her players remember the great effort by Luke and apply the point Sowry made during her timeout when the games really start to matter against A-10 teams.

Last year, the Minutewomen peaked at the wrong time. They had arguably one of the best defenses in the country and were pretty much unstoppable in September to anyone not from Boston (both losses that month came to Boston University and Boston College).

In October, UMass suffered tough losses to Syracuse and UConn, and never recovered when A-10 play rolled around.

I'm not going to say the results would've been different had the Minutewomen faced more adversity during their non-conference schedule during the 2009 season, but considering the caliber of opponents they were beating, they should've done better than fourth place.

Aside from receiving the most votes to win the A-10, UMass is now under the radar and is fortunate that it will likely receive a shot of confidence when it faces winless Saint Louis at home to start off its conference schedule.

Until then, Sowry will have to do what she can to make sure her team peaks in October when it too can make great hustle plays that cause opponents to call timeout.

Adam Miller is a Collegian columnist. He can be reached at amiller@dailycollegian.com

UM gains experience from rivals

Sowry and co. prepare for Atlantic 10 schedule

MAXWELL SPARK/COLLEGIAN

Senior Mika Black attacks the ball in a recent UMass field hockey game. Black and the rest of the Minutewomen recently fell, 1–0, to No. 18 Albany on Friday by continuing its lack of offensive production. However, the Minutewomen have recently been playing well in the second half.

BY PETE VASQUEZ
COLLEGIAN STAFF

With half of its schedule complete and one more game to go before conference matchups begin, the Massachusetts field hockey team will draw from its experience against the nation's top teams to help drive them past its Atlantic 10 rivals.

The Minutewomen (4-6) have faced stiff competition so far this season. Their schedule included stops at No. 2 Maryland and No. 18 American while also hosting No. 4 Connecticut and just this past weekend, No. 19 Albany.

UMass Field Hockey

The lone win for UMass against its foes, and its biggest win of the season, came on Sept. 11 when it earned a hard fought 1-0 win against UConn. It was the Huskies' first loss and shutout of the season. They were coming into that game having scored seven goals in their previous three games.

However, in the other three games against ranked opponents, UMass has been outscored, 6-0, including a 3-0 defeat at Maryland, its largest defeat of the season.

Looking ahead, the Minutewomen will face a difficult stretch from Oct. 17-24, as they square off against Richmond, Temple and Saint Joseph's, all teams in the top 50 RPI rankings, as of last week.

LACK OF SCORING

As of late, the Minutewomen have struggled to put up points. They have been shut-out in three out of their last four games. In seven out its 10 games, UMass has no more than one goal and is 1-6 in those games.

This is not to say that the Minutewomen are shy about getting shots off. They are outshooting their opponents, 119-112, despite being outscored 14-10. That averages out to exactly one goal per game.

The constant rotation of first-year players along the forward line can be one reason attributed with the lack of goal scoring. Freshmen Lindsay Bowman, Mika Black, Alexa Sikalis and Molly MacDonnell have each started at different points throughout the season.

While the freshmen are still working hard to make adjustments, fourth-year forward and captain, Katie Kelly, has scored a team-high six goals. Bowman is the closest to Kelly with two goals. Bowman had goals in back-to-back games on Sept. 11 and Sept. 12, including the deciding goal against UConn. In fact, she's been very efficient, having only taken a total of three shots this season.

One category that UMass holds a distinct advantage over its opponents is penalty corners. Penalty corners are essential in creating goal-scoring opportunities and the Minutewomen have drawn 70 penalty corners, 37 more than their opponents. However, only four goals have come as a result of all those corners.

SECOND HALF SURGE

The Minutewomen seem to play their best hockey in the second half of games. Seven of their 10 goals have come in the second half. They've shot 13 more times in the second half than in the first so far this season.

The first sign of this pattern came, fittingly enough, in their first win of the season, Sept. 3 at Northeastern when the Minutewomen fell behind in the 12th minute before mounting a comeback. Senior defender Jaime Bourazeris's goal in the 55th minute capped a 2-1 victory.

However, the biggest comeback of the season for UMass came on Sept. 12 at Yale, after the Minutewomen fell behind 2-0 by the end of the first half. Kelly drew her team within one at the 54 minute, 51 second mark. Bowman followed with her second goal less than 10 minutes later, and an unassisted Kelly won the game in overtime to give UMass a 3-2 win.

Last year, the Minutewomen had four games in which they scored the winning goal in the second half.

A–10 squads prepare for '10 conference play

BY CHRIS GARDNER
COLLEGIAN CORRESPONDENT

After last year's thrilling championship between Dayton and Charlotte, many believe that the Flyers will continue to dominate in the league this year.

Just like any year, the Atlantic 10 will no doubt play host to surprises and upsets. Here's a preview of the A-10 teams and what one can look forward to as the season begins.

A—10 Women's Soccer

DAYTON

UD's 2-1 victory over Charlotte in the A-10 championship last year has proven to be no fluke. The Flyers have jumped out to an early lead in the league this year with an 8-2 record in their non-conference games.

Offensively, Dayton has been virtually unstoppable outscoring its opponents, 17-6, and outshooting them,162-106. Much of that offensive production can be credited to freshman midfielder Colleen Williams who already has eight goals and five assists in 10 games.

The Flyers defense is still without a permanent goalie with junior Lisa Rodgers and freshman Jackie Thompson splitting time in net. A problem for Dayton could be its lack of discipline and high number of fouls per game. The Flyers currently outnumber their opponent's fouls, 92-87.

CHARLOTTE

The 49ers have more than enough reasons to be considered a competitor for this year's A-10 championship. Charlotte lost in last year's championship, however the bulk of the team's top performers are back again this year and have begun its 2010 campaign for glory.

The 49er defense had six shutouts in a row last year, and the team continues to be stingy with two shutouts this year and just eight goals allowed.

The 49er's freshman goalie Alex Kubrick is having a strong start with five goals and 24 saves in her first 10 games.

CPPA awarded $40,000 grant to aid Springfield's economy

BY ALYSSA CREAMER
COLLEGIAN STAFF

The University of Massachusetts Center for Public Policy and Administration (CPPA) received a $40,000 award from the UMass President's Creative Economy Initiative for its proposed plan to aid in alleviating Springfield's current economic situation.

CPPA was awarded the funds to develop a policy center within its own policy center, which according to the CPPA's Associate Director for Research, Susan Newton, would be established to focus specifically on the socio-economic issues facing Springfield.

"The new center that CPPA is developing in collaboration with the Center for Popular Economics will bring together University and community members to collaborate around economic development research and projects, among other issues," said Fred Rose, former lead organizer for the Pioneer Valley Project, an alliance of several local organizations vying for social change in Springfield and a lecturer at CPPA.

COURTESY WIKIMEDIA COMMONS

The CPAA is developing a new center, after receiving a $40,000 grant, geared to research and aid Springfield's economy.

Rose explained that the goal of creating this center is to focus on strengthening the ways in which long-term development processes function so that they may be more effective in simultaneously strengthening community development.

"This new initiative will bring a focus on social justice, equity and broad participation as critical to revitalizing Springfield," said Rose.

"The center can bring an independent assessment of the effectiveness of development projects in Springfield," continued Rose. "It can also help to identify and implement innovative strategies based on successes in other parts of the country. And it can serve as a convener of diverse constituencies and organizations to make new development programs possible," She added. Rose earned a doctorate in city and regional planning from Cornell University.

Prior to receiving this award, the University has already been researching ways in which it, according to Newton, "could be a resource for Springfield by [partnering] with the community to help develop the city's cultural resources." Rose also mentioned in a release that the city possesses "incredible diversity," something that enables those involved with the University's Springfield initiatives to identify its existing cultural resources.

Rose also explained that the new initiative would involve seeking funding from private and public sources, and that the Creative Economy grant is seed money to develop the new CPPA's new center for Springfield.

Some of the initiatives will involve delving into how to use new techniques to decrease the unemployment rate of the city's citizens.

"The great need in Springfield is for entry level jobs that pay a living wage with benefits that enable people to develop skills and the opportunity to advance," said Rose in an interview. "The manufacturing economy provided earlier generations of Springfield residents with these opportunities, but most of those employers are gone," she added. "Our success needs to be measured in terms of our ability to help provide this generation with the same kinds of jobs and job ladders that moved earlier generations into the middle class."

According to The Republican's

Students design and develop virtual guide

BY TIM JONES
COLLEGIAN STAFF

There used to be a time where people would actually resort to atlases, compasses and even the stars to direct their lost and confused souls to their destinations.

Students at the University of Massachusetts can relate, given the sheer size of the campus, but now they have help that people of the past would only dream of.

With the click of a button, students can now access the UMass Guide application through their iPhone or iPod Touch.

Designed and developed by Daniel Stewart, a computer science student, the application is an interactive map that can help all people, both new and returning to UMass, find their way across the campus. The guide was also produced with consulting from alumnus J.J. Kelly, who is a web developer for StudentCity.

So far, the guide, which can be downloaded for free from the Apple App Store, includes a search for over 130 buildings on campus, 80 photos of specific locations on campus, as well as driving directions and links to the UMass homepage.

Stewart decided to tackle the challenge of creating the application after an email from the computer science program asked if there was anyone interested in the project.

"Needless to say I was pretty bored at the time, so I took up the offer I also thought it would

SGA elections begin, candidates talk goals

BY SAM BUTTERFIELD
COLLEGIAN STAFF

The University of Massachusetts' Student Government Association (SGA) elections commenced Tuesday, with students voting online and at the polls in the Campus Center. Elections will run through Thursday, with results announced next Monday.

Today, the Collegian profiles several more candidates from SGA senate races.

SOUTHWEST NORTH

There are five candidates for four spots in the Southwest North race. The field includes freshmen Juan Moreira, Adam Baldarelli, as well as senior Sarah Schultz, Daniela Sanchez and Blaine Stillerman.

Schultz said she is running because she feels she can represent a variety of voices as both a senior and a Resident Assistant to freshmen.

Schultz said if elected, she will work to engage students in campus happenings and events, and will attempt to be an outlet for students in her area.

"Most students [in Southwest] are freshmen and are only beginning to understand the University at large, and their place within the UMass community," she said. "My hope is that by involving students in the happenings of the University and the SGA Senate, they will become interested and involved."

Schultz also added that she feels new faces on campus could possibly use some assistance in mastering PVTA bus routes.

"Many of my fellow residents found it difficult to work the bus routes and would have appreciated a "getting around Amherst" tutorial while at orientation; it"s the small issues that prevent many students from getting involved or feeling at home," she said.

Sanchez said she would like to inform her potential constituents about ,ongoing issues around campus, and that she would like to see a tighter rapport between the SGA and the student body at large.

I'm running for a senate [seat] because I feel like the student body is not well informed about what"s going on on our campus," she said. "I want to create a tighter connection between the SGA and the student body."

Sanchez also listed securing wireless Internet for Southwest as among her top goals.

"I hope to not only keep Southwest residents informed, but to fight for commodities other residential areas have, for example wireless Internet," she said.

CENTRAL

The race in Central includes five candidates gunning for four spots in the Senate.

Yesterday, the Collegian outlined the views of three of them; Andrew Eaton, Evan Pleasant and Sean O'Connor.

The other two candidates in the field are Zachary Broughton and Benjamin Lees.

Broughton, a freshman from Salem, Mass., said he hopes to be a part of "a new student government that focuses on true student issues."

Broughton said he would like to see funding allocated for cleanup and ameliorations to Central's residence halls.

"I am hoping to fight for funding to renovate, update and remodel all of the buildings so that they can be as amazing as the new Gorman First Year Residence Hall," he said.

Broughton also said he would work to bring more sustainable washers and dryers to Central's dorms.

Further, he said he would advocate for more

Comparing 'pot,' alcohol laws

BY MATTHEW M. ROBARE
COLLEGIAN STAFF

On Election Day, in addition to voting for officials and on ballot initiatives, 5.625 percent of Massachusetts voters will be asked if their representative should support the legalization of marijuana. Amherst is one of the towns where that question will be asked.

"It's not a ballot initiative," said Adam Freed, secretary of the Cannabis Reform Coalition. "The initiative was what we had with the decriminalization. This will be a public policy question polling areas that were targeted in the hopes that there would be success.

"So if there's a large amount of support for marijuana legalization or medicalization, then we can hope for some financial backing in a similar sense to what's happening in California there are some individuals who will donate funds to a Massachusetts campaign to legalize weed and so our goal is 2012," Freed added.

The question proposes if marijuana be made similar to alcohol. "Taxed and regulated like alcohol," Freed said. "People that consumed it would have to be 21, it would have to be purchased in particular stores and areas that are designated for the sale of marijuana."

Freed said that it is important for marijuana to be in a similar situation to alcohol, both from the perspective of individual rights and from the standpoint of the government getting revenue from taxation instead of spending funds on enforcement and punishment. He said that people

Engineering and Technology Career Fair to be held today in UMass Campus Center

The Engineering and Technology Career Fair 2010 will be held today, Sept. 29, in the University of Massachusetts Campus Center Auditorium from 10 a.m. to 3 p.m.

Engineering and computer science majors, as well as math and physics majors are invited to this event, which will feature employers from various companies searching for potential employees for both full-time jobs and co-ops.

Students who attend can browse the various fields and job possibilities that the employers are presenting today at the fair.

Each of the representatives from the various companies are available to talk with students. Employees will also be answering questions fielded by students, and students should also note that the businesses will be accepting resumes from prospective students.

Such organizations as Amazon, Google and IBM have been registered for this season's career fair.

Some employers will be planning to have follow-up interviews, so students are advised to have their schedules available and handy at the fair.

The Career Center is requesting that those seeking more information e-mail ccnhelp@acad.umass.edu.

Referendum on 'weed'

COURTESY HEATHER KNOWLES/MCT CAMPUS

A ballot question in Amherst will ask voters if they support creating laws around marijuana use that are comparable to the laws currently governing alcohol consumption, with an age limit of 21 and sale restrictions.

MARIJUANA from page 1

should not be going to jail over marijuana consumption and possession.

"The point of alcohol legalization was that individuals should have the choice of whether or not they want to use or consume alcohol and we understand that while this is a potentially deadly substance, people still have the right to make that choice," Freed said.

"So as a country, as a government, we tax it and we make a great deal of money off it. On the other hand, with marijuana, which in my opinion and many professionals' opinions, not nearly as toxic as a substance like alcohol, we'd like to have the same sort of system going," he continued.

Patrick Archbald, University of Massachusetts Police Department Deputy Chief of Administration, agreed that marijuana legalization would free up police manpower and funding for dealing with other crimes. "I'm going to defer to the legislature," he said. "We enforce the laws they create."

Freed said that if the public policy question is answered in the affirmative, the next step is to push for legalization in 2012, to register voters, to get voters to go to the polls and informing people about why the CRC believes marijuana should be legalized.

"It's really important to paint a full perspective for voters," he said. "Some voters might just say 'No' based on certain fundamental reasoning that they have and other voters might be swayed in the other direction and our hope is to sway voters," said Freed.

He continued, "We know that a lot of students, a lot of individuals in the area, will vote 'Yes' for legalization, but there are a lot of people — and this is our target audience — who are going to say 'No' just out of a force of habit and we'd like to convince them to say 'Yes,' and induce them to have marijuana legalized, to have no more criminal marijuana users or offenders and to have better access outside of the black market for obtaining marijuana in safer means."

Many of the stereotypes associated with those who use, sell and grow marijuana have proved to be obstacles to the legalizaton campaign. While the reputable information today is more substantial than many years ago, when films like "Reefer Madness" were presented as being based upon true stories about marijuana users, showing people becoming violent and insane based on usage of the drug, Freed said that some misinformation is still spreading.

"The general trend of the last decade or two has been that individuals who have tried marijuana know that the propaganda against it isn't true and they're less likely to believe that propaganda," Freed said. "DARE was a wildly unsuccessful program."

The public policy question on marijuana legalization is on the ballot in legislative districts in Middlesex, Dukes, Barnstable, Hampshire, Essex and Franklin counties. A similar question, regarding legalization of marijuana for medical use, will be on the ballot in Hampden, Worcester, Plymouth, Suffolk, Bristol and Norfolk legislative districts.

Matthew M. Robare can be reached at mmbare@student.umass.edu.

UMass guide directs people about campus

APP from page 1

be a great learning experience," he said.

"Typically I'd work in intense spurts, where I'd program for many hours straight, then take a day or two off," he added.

UMass student Stephanie Cheung was responsible for the written work seen within the application.

"I did research on the different buildings on campus and outlined some of their histories," Cheung said. She also added that her research also details information about the different schools and majors that located within each building.

Stewart added that the process was actually rather pricey, but that because it was a University-funded project, the University footed-the-bill for the costs of developer software that Apple requires for its purchase, among other things.

Stewart found the real difficulty was in learning the software.

"The major obstacle was teaching myself Objective-C, the programming language used to write iPhone apps," he said. "That required a couple weeks of relatively hard work, reading and so forth."

"I was compensated, but it also meant I had obligations to fulfill. There were many deadlines that had to be met over the summer," Stewart added.

Stewart has been regularly updating the application, fixing small bugs and adding more buildings to the mix.

He says that the next update should include high-resolution icons that will better suit someone with an iPhone 4.

Users can expect the last large update to include better functionality among the menus.

In order to download the application, the device being used must have the iOS 4.0 Software Update or higher versions. Droid users can expect an application of their own set to come out in early 2011.

Stewart says that the feedback for the application has been mostly positive, and he hopes that he can keep delivering what the people want.

"I hope that feedback continues to be positive, since that's what motivates me to continue updating the app," he said.

Cheung actually used the application herself towards the beginning of the year.

"I wish they came out with this when I was a freshman so I wouldn't have been whipping out the paper map every now and then to try to figure out where I was going," she said.

Cheung may consider helping to create another application in the future.

"Do I see myself creating anymore apps in the future? Well, I never thought I'd have any help in creating an app, and I just did, so you never know," she said.

As far as future applications, Stewart says that he will maintain the guide until he graduates and then hand it over to the computer science department.

"There's also been mention of an alternative-reality app for the UMass campus, so I might grab that opportunity," Stewart added.

Tim Jones can be reached at timothyj@student.umass.edu.

COURTESY HELPDESK.RSTU.EDU

Currently only available for the iPhone and iPod Touch, Droid users will soon be able to access the UMass guide app in early 2011.

UM student injures officer, hurls rocks

By Nick Bush
Collegian Staff

Around midnight on Saturday, Sept. 25, several Amherst Police officers responded to a disturbance call on Hobart Lane. According to police, officers arrived on scene to find approximately 750 individuals gathered in the street. After determining that the multitude of individuals needed to be broken up, police began attempting to disperse the crowd. At this point, a number of individuals in the crowd began pelting the officers with rocks, beer bottles and cans. One officer at the scene was struck by a rock.

After pursuing the perpetrator who threw the rock, officers arrested University of Massachusetts student Jack Eckart, of 27 Gay Avenue, Walpole, Mass. Eckart was charged with Assault & Battery with a Dangerous Weapon, Assault & Battery on a Police Officer and Failure to Disperse and was scheduled for arraignment yesterday in Eastern Hampshire District Court.

The officer who was struck with the rock was treated for a contusion to his legs, but the injury did not require hospitalization.

This past weekend proved to be a busy period for the Amherst Police Department, with officers responding to a total of 204 calls, including 36 disturbance or fight calls. Police ultimately charged 33 people, via arrest or summons, with various crimes ranging from assault, alcohol violations and disorderly conduct.

Nick Bush is can be reached at nbush@student.umass.edu.

Online SGA elections ongoing; end Sept. 30

MATTHEW HARRISON/COLLEGIAN

In the past, University of Massachusetts students have been traditionally forced to vote with paper ballots outside of their dorms. Online elections has made this process optional, and elections are being held presently.

SGA from page 1

financial aid funds for students and to prevent increases in student fees.

Orchard Hill

The SGA senate race in Orchard Hill features 12 candidates for three seats. Yesterday, the Collegian profiled three of them; Matthew Bonaccorsi, Jessica Jankowski and Nick Barton.

Other candidates include Nate Richardson, Stuart Farber, Mark Borenstein, Mark Riddle, Stephen Darcy, Edward Tedesco, Balaj Rai, Sheryl Klein and Chandler Hall.

Sophomore Nate Richardson, a Shrewsbury, Mass., native, said he has entered the race because he built connections to the SGA senate last year while working as an elections commissioner, and that he believes with this experience he can work effectively in the senate.

Richardson said if elected, he will work to convince the University's administration to improve infrastructure between Orchard Hill and other areas of campus.

"Something I would like to achieve for O-Hill is to finally get the administration to make good on its promise to improve the path between O-Hill and Sylvan," he said. "There's no reason why it should be anything but laughable to call it the "Rape Trail," he said, "but given its current lack of development, that is not the case."

Like many other candidates, Richardson touched on what he sees as poor Internet infrastructure.

"I also stand ... in wanting to reach a better solution to Internet access on campus," he said.

Richardson also said he would like to see greater cohesion and synergy within the SGA.

"I think we need to promote a greater degree of collaboration between the Senate and the SGA presidency," he said. "Last year, there seemed to be a big gap between the two that prevented the SGA from working with one voice."

Klein, echoing a theme many candidates sounded, said she would like to help give a voice to students in her area.

"It is important for us, as students, to make sure we are heard," she said, "and that is what I want to make sure of."

Klein said she would like to promote more unity between O-Hill's separate clusters, perhaps by bringing more activities and events to the area's social scene.

"I would like to orchestrate more cluster unity," she posited. "maybe with more appealing activities like open-mic nights in the bowl."

Commuter

The Commuter Senator race is not exactly a race. There are 13 candidates in the field, with 18 slots available.

Yesterday, the Collegian profiled Justin A. Thompson, Josh Davidson, Ellen Moorhouse, Greg MacDonough and Matthew Medney.

Other candidates include Alex Cidado, Allison Sacks, Michelle Sudan, Elle Rahilly, Dan Stratford, William Cody, Thor Tillberg and Matthew Reilly.

Rahilly, a junior, said she is seeking a seat as a way to become more involved with her fellow students and to attempt to impact decisions affecting the student body.

"The main motive I have in running for a seat in the SGA senate is the aspiration of a way to become more involved not only with our campus, but our student body," said Rahilly.

Like several of her fellow candidates, Rahilly listed working with area authorities and law enforcement to depressurize relations with the town and work to promote a more hospitable, less punitive climate for students.

"My main objective would be to increase safety while decreasing the number of police within the area," she said. "I would rather allocate funds to increase the availability of transportation for students past midnight, as well as provide a sufficient number of streetlights to ensure the safety of all pedestrians," she said, "as opposed to the amount of police force, which lacks in providing a sense of security for most [commuter] students."

Stratford, a junior from Bethpage, N.Y., who is seeking a return to the Senate, said like many returning candidates that he hopes to build on his experience.

"I am running primarily upon my prior experience in the SGA Senate and politics in general," he said, noting that he last year served on the SGA's Ways & Means Committee, tasked with distributing money to student groups through the Student Activities Trust Fund.

Stratford said he will work for his fellow commuters by attempting to make getting to campus simpler.

"I hope, in part, to ease the 'transaction costs' of commuting," he said. "One of the most contentious and time-consuming activities of all off-campus students is just getting onto campus in general," he added. "I would like to work with the PVTA to erect more sheltered bus stops, and to upgrade some of the more dilapidated ones that are already built."

Stratford further stated that he would like to initiate more discourse with the PVTA and plans to consider putting into place an overhaul of the SGA election process "to allow for a more open and amiable nomination and elections process, which would include publishing things like a comprehensive 'How To Guide' for SGA elections."

Whatever the outcome, this year's SGA will certainly be a quite different body from the Senates of years past, as only eight Senators are running to return.

Sam Butterfield can be reached at sbutterfield@dailycollegian.com.

AWARD from page 1

M.V. Lee Badgett, director of the CPPA, stated in a release that the CPPA is delighted about the award from the President's Office.

Sept. 21 article by Jim Kinney, Massachusetts' Executive Office of Labor and Workforce Development, Springfield's unemployment rate stands at 13.3 percent, the fourth-highest unemployment rate in the state, despite its fall from 14 percent last month.

Rose also noted that approximately 55 percent of Springfield jobs, including its "professional jobs," are being held by commuters.

"Springfield is the sixth poorest city in the nation, which obviously hinders its development," said Rose, in a release. "In addition, Springfield lacks the kind of community-based development agencies that have played leading roles in other communities," she added.

According to Newton, approximately a dozen applications for the President's Office grant were sent in from UMass Amherst, and in previous years, an estimation of 50 to 60 applications are sent in annually from each of the five UMass campuses. The competition was open to the five universities of the UMass system.

"They only give out a handful [of awards] each year," said Newton. "We are so pleased and grateful to get one."

According to its website, the CPPA "is the hub of interdisciplinary public policy research, teaching and engagement at [UMass]." The organizations also makes mention on the site that it is "Home to a growing number of research initiatives, CPPA houses the National Center for Digital Government; the Science, Technology and Society Initiative; and the Public Engagement Project.

TaLK Teach and Learn in Korea
TEACH ENGLISH & LEARN KOREA
Korean Government invites qualified undergraduate students to apply for the Korean government scholarship to teach and learn in Korea. Selected scholars will receive Korean government scholarships and teach English in after-school classes of Korean elementary schools while enjoying cultural experience programs during their leisure time.
■ ELIGIBILITY
● Be a citizen of a country where the national language is English
● Have completed two or more years of education at a university or graduated from a community college in the aforementioned countries
■ CONTRACT TERM: 6 months or 1 year (Starting in February 2011)
■ BENEFITS
● Salary : approx. 1,291 USD per month
● Round-trip airfare, Free furnished housing, etc
* More Information on benefits & application documents on www.talk.go.kr
■ APPLICATION DEADLINE: December 10, 2010
■ CONTACT INFORMATION : Korean Consulate General in Boston
Tel: 617-641-2830, E-Mail: kcaboston@mofat.go.kr
(http://usa-boston.mofat.go.kr)

U ROCK!
BATTLE FOR THE BEST
Compete at Berkshire DC
Thursday, October 14 from 6–8 pm
Three UMass student bands perform at Berkshire DC. The best band will move on to the NATIONAL competition. The top three bands in the NATIONAL competition will then move on to the Finals in Los Angeles, CA.
Contest rules & sign up at: umassdining.com

EDITORIAL OPINION

WEDNESDAY, SEPTEMBER 29, 2010

"If we don't believe in free expression for people we despise, we don't believe in it at all." -Noam Chomsky

EDITORIAL@DAILYCOLLEGIAN.COM

56th b-day of 'A Star is Born'

Fifty-six years ago today, what was then one of the most expensive movies ever made (at a cost of approximately $5 million), "A Star Is Born" premiered at the Pantages Theater in Hollywood, Calif.

Shane Cronin

The spectacular event, comparable in scale to the Academy Awards, was also the first movie premiere to be televised in its entirety. Joan Crawford, Elizabeth Taylor, Dean Martin and scores of other megastars of the day attended.

They were all there to see one woman make her big screen comeback.

What makes "A Star Is Born" memorable is its leading lady, Judy Garland.

The actress, singer and all-around entertainer made 31 films during her 14 year tenure at MGM, including "The Wizard of Oz" and "Meet Me in St. Louis."

She enjoyed enormous popularity from an adoring public. In private, however, Garland's world was plagued by alcoholism, an addiction to prescription medication, divorce and a suicide attempt.

Frequent bouts of anxiety and depression kept Garland from appearing on set, which led to major delays and inflated production costs. (She even landed in a sanitarium in western Mass.)

In the end Cukor and Garland created a three hour and 16 minute technicolor masterpiece. Garland's highly acclaimed performance earned her an Oscar nomination for Best Actress.

Consequently, many of her pictures were critical success, but considered commercial failures. Her reputation for unreliability resulted in her firing from several staring roles and finally the termination of her contract with MGM in 1950.

After a record-breaking concert stint in the United Kingdom and a four-year absence from the box office, Garland signed a deal with Warner Bros. Her first project with the studio was "A Star Is Born." In her comeback role Garland plays Esther Blodgett, the emerging lead singer of a band. Blodgett is discovered by fictional Hollywood star, Norman Maine (played by James Mason), who helps her realize her talent and propels her into fame. Eventually Esther and Norman marry, but their relationship quickly deteriorates because of his alcoholism and subsequent fall from stardom. Ironically, Mason's despondent character closely resembles Garland's real life.

The film was scheduled to be completed in several months, but due to studio head Jack Warner's decision to re-shoot weeks worth of scenes, Garland's emotional fragility and other issues, three months turned into almost a year and the budget more than doubled.

Fortunately, director George Cukor settled for nothing less than perfection. Garland's entire career was riding on "A Star Is Born." In the end Cukor and Garland created a three hour and 16 minute technicolor masterpiece. Garland's highly acclaimed performance earned her an Oscar nomination for Best Actress.

Because of the picture's length, however, it could only show three times daily. Although ticket sales were stellar, theater owners complained because they could not squeeze in a fourth or fifth screening.

In response, Warner Bros. chopped roughly 30 minutes of footage. The film's romance was butchered, and at times, the plot seemed non-sensical. Audiences and critics were appalled at the shortened re-release made evident in lackluster ticket sales.

By the time Oscar season arrived in 1955, Judy Garland picked up a Golden Globe for "A Star Is Born" and was the favorite to take the Academy Award. When Grace Kelly beat Garland for the award, comedian Groucho Marx famously remarked that the loss was "the greatest robbery since Brinks."

Some speculate that movie executives from MGM and Warner Bros. conspired against Garland. She was, after all, essentially fired from both studios. The defeat was an enormous let down. It would be six years before Garland would appear in another picture.

Garland and Cukor were understandably discouraged by the whole ordeal. Their work of art was disembodied and never to be seen in its original length again. The two vowed never to watch the edited version.

In the early 1980s, Ron Haver, a Cukor film enthusiast who worked for the American Film Institute embarked on a months long journey to locate the lost footage from "A Star Is Born," and restore the classic to its entirety.

He was often met with disappointment, however. Warner Bros. was not a stickler for preserving deleted footage.

Haver rummaged through post-production warehouses and underground vaults from New York to California. He found sound clips and negatives as well as still shots, but even his best efforts could not uncover material that simply no longer existed.

Haver documented the arduous process in his book "A Star Is Born - The Making of the 1954 Film and its 1983 Restoration."

Thousands of dollars and weeks of dedicated efforts were poured into the restoration project once Haver completed his search.

Twenty minutes of footage (and still shots where there was only sound) was built back into the movie. Haver and his restoration team were pleased with the outcome and they organized a screening. Garland passed away of a drug overdose almost 15 years before, but Cukor was invited to be the guest of honor. Shockingly, the night before Cukor was to view the film, he died.

Today, "A Star Is Born" is a favorite among film associations including the AFI. It is available in magnificent technicolor and sound quality on DVD with hours of special features.

When you see Judy Garland belt out the words to "The Man That Got Away" in a single shot and feel the emotion she delivers in the picture's darker dramatic scenes, one can't help but wonder how even a minute of Garland's performance was omitted.

For the rest of the year, we remember her as the little girl in the ruby slippers skipping down the yellow brick road. But today, let's remember Garland for her finest role as Esther Blodgett in one of the most incredible screenplays Hollywood has ever produced.

Prohibition fails miserably

Ben Rudnick

The consensus thinking among libertarians is that the standard by which people should judge any law or government program is whether the benefits of that law or government program outweigh the costs associated with its enactment or enforcement.

With that in mind, can anybody name for me any example from history when any government of any kind has ever been able to prevent its citizens from partaking of any vice by prohibiting that behavior? No?

Then explain how the United States Federal Government intends to stop the use of a substance that can be routinely cultivated in an average person's closet.

The prohibition of marijuana can never be successful.

Knowing that there is zero possibility of success in its prohibition, the question each of us must ask is whether the benefits of limiting the use of marijuana as a drug outweigh the costs associated with combating it.

How effective has prohibition been in reducing marijuana usage? Not very effective.

The 2009 National Survey on Drug Use and Health reports that the number of people over the age of 12 who admitted to using cannabis within the past month rose from 6.2 percent in 2002 to 6.6 percent in 2009.

However, keep in mind that these numbers are survey-based and, since illegal drug use is unquantifiable in any exact sense, there is every reason to believe the real numbers are far higher. Reason.com columnist Jacob Sullum uses data from the FBI and the National Survey on Drug Use and Health in a Sept. 16 blog post to highlight the fact that while arrests for marijuana crimes have roughly tripled since the early 1990's, use has not only remained constant, but has actually risen slightly. Since the government can only ever hope to reduce usage and it hasn't even done that, then the only question left to answer is whether the costs of prohibition outweigh its nonexistent success.

Even a cursory glance at those costs indicates that they far exceed the benefits. For example, The Office of National Drug Control Policy (ONDCP) claims that in 1997 "only 1.6 percent of the state inmate population had been convicted of a marijuana only crime, including trafficking."

This was before many states began legalizing medical marijuana, which resulted in a federal crackdown on trafficking and use, but let's assume that the same percentage holds true today at both the state and federal level.

To me, this represents a minimum of 25 thousand people and $1 billion too many.

The Bureau of Justice Statistics (BJS) reported that in 2006, there were 1,569,945 federal and state prison inmates. At a rate of 1.6 percent, that means over 25,000 of them were incarcerated for marijuana crimes. BJS statistics on corrections expenditures indicate that these 25,000 inmates represent a cost of just over $1 billion that year. This is just the cost for the incarceration of these inmates, which number does not even include all those who violated other laws as a result of being involved in the criminalized economy of marijuana. To me, this represents a minimum of 25,000 people and $1 billion too many.

Then there is the cost imposed by prohibition on hemp cultivation. Hemp is one of the most useful crops mankind has ever cultivated. It was so crucial to the colonial economy that many areas, including Mass., required farmers to dedicate some portion of their acreage to its cultivation. Despite the fact that it had been criminalized in 1937, the U.S. government initiated the "Hemp for Victory" program during World War II to encourage farmers to grow the crop for use in making rope and other products for the war effort. Today, rather than cutting down trees, which remove carbon from the atmosphere and are at best a semi-renewable resource, we could be making paper (and cloth and plastic and myriad and other useful items) from a crop that generates less pollution in the manufacturing process, grows in almost any climate region and is completely renewable.

So, is there some other proven method for reducing the use of a harmful substance?

Remarkably, according to the Centers for Disease Control and Prevention (CDC), the government's own data shows that we have had far more success reducing the prevalence of smoking than we have in reducing the use of cannabis. Through aggressive education and prevention programs, not to mention increasingly heavy doses of taxation, the percentage of adults who smoke in the U.S. has declined from 24.7 percent in 1997 to 20.6 percent in 2009.

In fact, the number of adult smokers had dropped to only 19.7 percent in 2007 before the recent recession began at the end of that year, once again proving the correlation of rising vice to periods of economic distress.

Besides, I don't know about you, but I would really look forward to seeing what MTV would do with their "Shards 'O Glass" anti-smoking commercials to refocus them on reducing youth pot smoking.

I'm not going to tell you that legalization is the only solution to our marijuana issues, but as these facts prove beyond any doubt, the current situation causes more harm than good. Prohibition is not working, so let's find something that will.

I CAN'T BELIEVE STEPHEN COLBERT WAS ALLOWED TO TESTIFY BEFORE THIS DIGNIFIED, STATELY, TOWERING BODY OF LAWMAKERS!
CONGRESS

A simple sample can be the thin line between art and theft

Sampling is a way of life for some artists and for others an immense source of frustration. Should it be considered stealing for an artist to use a portion of an older song in order to create an original piece of music? The answer is not exactly clear and draws into question the age-old debate of copyright law and how it relates to creative composition in music.

Zachary Weishar

Although there are many arguments to support the sampling of music, there is something to be said in defense of the original artist if they do not receive ample credit or monetary compensation for their contribution to the new work.

In cases where entire songs are used, such as Vanilla Ice's 1989 hit "Ice Ice Baby," there is good cause to side with the original artist. Besides being a total bastardization of Queen's and David Bowie's "Under Pressure," Ice's song uses the instrumental parts without changing them at all and fails to recognize Queen for their contribution to his song. This is undoubtedly a case of theft and should be dealt with as such.

In a possibly lesser-known example of plagiary, the Red Hot Chili Peppers lifted the instrumentals from Tom Petty's "Mary Jane's Last Dance" in their hit song "Dani California." This case is much more nebulous than the previous because Anthony Kiedis, the lead singer of the Peppers was influenced in a large part by rock singers such as Petty.

As a result, there are many instances where elements of older blues and classic rock songs make their way into the bands' music in ways that are not considered plagiarism. It is entirely possible that this instance of plagiarism was accidental. After all, some say that there are no original ideas and it is almost inevitable someone else thought of it beforehand.

As a general rule, this idea could be applied to song writing as well. It seems plausible that a musician would draw on his musical influences when creating new music. Perhaps the Peppers borrowed instrumentals can be attributed as such – a creative but unintentional recapitulation of a song that influenced their musical style.

An even more uncertain form of borrowing music that has been made possible by technology and popularized by rap music, sampling is a controversial art that is a hot button issue at the moment.

Instead of copying lyrics and instrumentals to create an entire song such as Vanilla Ice and the Red Hot Chili Peppers, many groups opt to use short samples, often changed drastically from the original in order to create their own original work. There are countless examples of this in the modern era of hip-hop with popular artists such as Mos Def, Kanye West and The Roots taking samples from groups whose prominence peaked in the 70s and 80s.

Is it wrong that new material should draw upon old sources?

By incorporating older musical styles into their production, these songs become a mix of new and old that come together to create a piece totally its own.

Is it wrong that new material should draw upon old sources? After all, we as social beings can be considered a patchwork made up of the influences that have shaped our lives. Why should music be any different?

In the same way that a writer might use phrasing from past publications that influenced their thought process, musicians should be able to use samples from older music in order to improve their songs.

Those working for the Drive-in Music Company do not share this sentiment. They have initiated a string of lawsuits over the past several weeks claiming that groups Cypress Hill and Leaders of the New School are illegally making profit from songs that Drive-in owns the copyrights to. Both songs were released in 1991, raising the question of why the company waited 19 years to enforce the copyright infringement.

In Cypress Hill's hit "How I Could Just Kill a Man," the band is accused of sampling The Music Machine's "Come On In." Upon listening to both tracks, it is difficult to pinpoint any major similarities, which is possibly the reason it took Drive-in so long to figure it out. The two songs differ in almost every way, and even populate two opposite genres.

It is difficult to discern how Cypress Hill made money directly from the sample in question. Furthermore, the sample is not used in a way that leads the listener to associate it with "Come On In," which in effect makes its use in "How I Could Just Kill a Man" a part of the creative process that the band should not be penalized for.

The music industry should approach each case like this keeping in mind that if the song in question draws too heavily on an earlier work, or presents itself in any way reminiscent of the original, than the original artists should be mentioned as a contributor and possibly given monetary compensation.

However, if the song in question uses a sample subtly to make an original piece of art, there should be no controversy.

With cases like Drive-in Music Company's lawsuit of Cypress Hill, it is difficult to see how there could be a motive other than greed behind their decision to pursue a lawsuit.

Music, like any art, is free-flowing and subject to constant interpretation, making it difficult and seemingly arbitrary to place ownership on portions of sound so short or so different from the original that its use is not even intelligible to the average listener.

"All paid jobs absorb and degrade the mind" – Aristotle

ARTS@DAILYCOLLEGIAN.COM

Tallest Man on Earth to play Noho

By Angela Stasiowski
Collegian Staff

When it comes to music, size matters. The Tallest Man on Earth, a.k.a. Sweden's Kristian Matsson is one of the biggest names in the modern folk world and for good reason.

This coming Thursday, Sept. 30, The Tallest Man on Earth will make his first appearance in the Pioneer Valley at Pearl Street Night Club in Northampton. This folk phenomenon is touring in support of his most recent album, "The Wild Hunt," which has received much praise.

Touring the U.S. with Matsson is S. Carey, of Bon Iver fame. Carey has been providing the percussion for Iver's touring crew, but has recently broken away from the background with his solo debut.

Drawing from his jazz upbringing as well as folk, post rock and everything in between, Carey has created something entirely new with "All We Grow:", which is on sale now via Jagjaguar Records.

Having toured with the Tallest Man on Earth for Iver's 2008 tour, it seems Carey was a natural choice for a tour mate this time around.

Sweden may not be the first country that comes to mind when one thinks about traditional, American folk, but it was there that The Tallest Man on Earth took form with the release of a self-titled EP in 2006.

Soon after, Matsson created quite a stir with his 2008 debut "Shallow Grave". What makes an album stand out at a time when everything is a copy of a copy?

"Shallow Grave" is the perfect combination of folk-fringed vocals and acoustic simplicity. The sound is pure, American folk with the faintest twinge of foreign influence.

Matsson is a master storyteller and sets his tales to highly melodic music. "The Gardener," off of "Shallow Graves," is an example of what happens when brilliant lyrics meet infectious melody. The song tells the tale of a murderous, scorned lover, set to a solo acoustic background. The pairing is perfection. Never have such homicidal thoughts been presented so pleasantly.

Matsson does not stop with acoustic guitar, however. "The Wild Hunt" features the singer/songwriter trying his hand at banjo and keyboard as well.

"Kids on the Run" is a poignant romp through the "fields of desire," all the while fighting the natural progression of time. Matsson's masterfully simple piano takes shape against his vocals, invoking a longing for lost youth.

The album also includes singles "The King of Spain," which has become a live staple, as well as "A Lion's Heart," which was featured on the HBO series "Hung."

While he may not break any Guinness records, The Tallest Man on Earth is quite far from ordinary.

His live performances have been shocking fans with his sheer passion since Matsson was a relative unknown on tour with Iver.

If you're looking for a new sound with a classic edge, the Tallest Man on Earth will be the concert to see this fall.

No vocoder, no big band sound, just folk music at its most basic state.

Tickets for this Thursday's 8:30 p.m. show are still available online for $15 and can be purchased at the door for $18.

Angela Stasiowski can be reached at angela@dailycollegian.com.

The Tallest Man on Earth will perform at the Pearl Street Night Club this Thursday in Northampton. Christian Matsson's folk-based sound will be supported by Bon Iver alumnus S. Carey.

SNL premier disappointing

Justin Timberlake's cameo in host Amy Poehler's opening monologue to the premier of this year's season of SNL caused few sparks, despite his fantastic turns in previous sketches such as "Dick in a Box."

By Hannah Sparks
Collegian Staff

This weekend, television mainstay Saturday Night Live began its 35th season with host Amy Poehler and musical guest Katy Perry. NBC really hyped up this premiere by re-airing the already-classic Betty White episode last weekend and stressing Poehler's return to the show, this time as host. With all this fanfare, viewers were expecting great things, but unfortunately this episode in general was rather lackluster.

Poehler's monologue was less than impressive and couldn't be brought to life even by the numerous cameos from former cast mates and might-as-well-be honorary cast member Justin Timberlake. The stress-dream concept was interesting, but the lack of commitment made it fall short. Also, much of this episode seemed to be relying on the cringe factor to get laughs. The Bosley Hair Restoration advertisement illustrated this by advocating for the use of pubic hair to fill in bald spots and the recurring Maternity Matters talk show sketch in which the sensitive female host has been replaced by her brusque male producer. Though briefly humorous, in the end these sketches came off as tasteless.

Andy Samberg's Digital Short was also a disappointment in this episode. In the past, the Shorts have either been brilliant or awful. This week's Shorts flopped, but maybe that was due to the fact that Perry was singing in it. Fans probably should expect better things from Samberg as the season progresses; after all, he is the man who thought up such fantastically creative and funny classics as "Lazy Sunday," "Dick in a Box," "Iran So Far," and last year's under-appreciated "Great Day."

That's not to say that the show didn't have its upsides: the opening sketch mocking Delaware's Republican nominee for the Senate, Christine O'Donnell, was genius. Kristen Wiig portrayed O'Donnell spectacularly, poking fun at her anti-masturbation campaign by saying that when she formed her beliefs, she didn't know what masturbation was and now that she does, she does it constantly. Another success was Poehler's revival of Bronx Beat, a classic sketch from back in SNL's earlier days with former cast mate Maya Rudolph.

Perry was the guest on the show, wearing a really low cut Elmo t-shirt, mocking the controversy surrounding her recent Sesame Street guest appearance in which her appearance was edited out of the show because of her excessive cleavage. It was refreshing that Perry could mock herself and the media's obsession with her chest a little bit. This tradition of celebrity self-mockery has extended far back into SNL's past, and its nice to see it continue.

Weekend Update is usually the saving grace of an unsatisfactory SNL, and this weekend's installment was fairly decent. In a recurring sketch, the extremely versatile and hilarious Fred Armisen reprised his imitation of New York's Governor David Patterson. This week, the actual David Patterson appeared.

Although he talked a little too much politics for SNL, the banter between him and Armisen was pretty funny, and its comic effect was enhanced by Armisen's characteristic habit of drifting off stage in his rolling chair directly in front of the camera.

Newcomer Jay Pharaoh also impressed with a dead-on imitation of Will Smith. Rumors say that Pharaoh also has a killer Obama imitation that the audience should keep an eye out for.

Even though this episode was somewhat disappointing as a season opener, hopefully the cast's first day jitters have dissipated, and we can all look forward to another season as innovative and hilarious as last year's season.

Hannah Sparks can be reached at hsparks@student.umass.edu.

Classic indie band to perform at Pearl Street

By Sam Butterfield
Collegian Staff

Pioneering Northwest rockers Built to Spill will bring their waxing, winding, outright weird brand of cosmic jams to Northampton tonight, with opening act Revolt Revolt.

The five-piece band, hailing from Boise, Idaho and comprising of frontman singer/guitarist Doug Martsch, bassist Bret Nelson, guitarist Jim Roth, multi-instrumentalist Brett Nelson and drummer Scott Plouf, will likely draw from some of their most recent work, 2009's "There is No Enemy," as well as treating fans to hits from some of their seminal works, like the group's first major breakthrough "There's Nothing Wrong With Love," released in 1994 and hits from 1997's "Perfect from Now On" and 1999's "Keep it Like a Secret."

Built to Spill has taken many shapes and incarnations over their now 18-year career, but they have always been marked by their distinctly rippling, undulating guitar lines and contemplative lyrics pondering life's complexities and twists.

"There's Nothing Wrong with Love" includes many of the group's most noteworthy works, starting with the slow but burgeoning "Reasons," and progressing into the fast, choppy and enlivened "Big Dipper," before segueing into what may be their most well-known piece, the iconic, melancholy "Car."

"Perfect from Now On," their next release, is composed of long, almost epic jams incorporating new instrumentation into their sound, like the haunting violin solo on the second track "I Would Hurt a Fly."

"Perfect" is more melodic and more produced than "Love," but retains a fundamentally fuzzy, washed out sound. Listeners tomorrow may get a taste of BTS' homage to the 60s on "Perfect" and "Kicked it in the Sun."

"Keep it Like a Secret" saw the group trend back towards choppier, louder, less protracted jams and finds a way to straddle their earlier work.

Standouts from that work include "Time Trap," a five-

See PEARL on page 6

'You Again' a case of a quite fantastic cast in a mediocre film

Betty White was one of the many talented performers wasted in the new film "You Again." Other celebrated actresses that fell victim to the film included Jamie Lee Curtis, Sigourney Weaver and Kristen Bell.

By Kate MacDonald
Collegian Staff

Many college students remember their high school days fondly, but are now more concerned with their college lives, careers or significant others. That's not the case with Kristen Bell's Marnt Olsen, who seems to have not gotten over her horrible teen years in Touchstone's new flick "You Again."

Marni experienced her own living version of the film "Mean Girls," with J.J. (Odette Yustman) at the helm as the queen bee (or "the warden," as she goes on to say). She was apparently an easy target, with thick glasses, acne, greasy hair and not a bit of self-esteem. Nonetheless, she moved on to become a public relations executive.

On the very day she receives a promotion to be the vice president of her firm, she travels home for her the wedding of her older brother, Will. Back in the day, Will was Ridgefield High School's golden boy and upon arriving home, she receives very upsetting news.

Will is marrying J.J.

For someone who has supposedly moved on from her awkward high school days, Bell's character seems to need reassuring pep talks every other scene.

As J.J. (now Joanna) begins to remember who Marni was, Marni decides to sabotage the wedding festivities to protect her brother and herself. Joanna, loved by everyone in the Olsen family,

Ico's 'Shadow of the Colossus,' great game

By Nick O'Malley
Collegian Staff

Team ICO's "Shadow of the Colossus" is the Magic Hat No. 9 of video games.

Most people spend a lot of their youth playing the Budweisers and Coors' of the world with a Sam Adams every now and then. They're not bad; they're good, popular games.One day, though, at a friend's house, someone sees a Magic Hat, tries it and says, "Oh. My. God. This game is delicious."

On the greater scale of things, Magic Hat isn't the greatest beer ever created – there are better ones for specific tastes. But it always seems to be the one that introduces people to a broader spectrum of options, many of which are better than what they've tried.

This is "Shadow of the Colossus."

In many ways, "Colossus" isn't a mainstream video game. It's not very long in terms of actual gameplay, the story is quite brief, the controls and camera aren't perfect and the style of the game is quite minimalist. It's not a game you invite your friends over to play. One doesn't buy a 30 rack of "Shadow of the Colossus." You actually enjoy it.

Conceptually, "Colossus" is an action-adventure game, similar to a Legend of Zelda game featuring a sword and bow-wielding protagonist and his horse facing a number of challenges. However, instead of dungeons, towns, side quests or an engrossing story, it has the Colossi – 16 of them, in fact.

The premise is simple: A boy brings a girl on his horse (Agro) to a secluded temple in an effort to bring the girl out of a vaguely-described deep sleep. A disembodied voice tells you that, if you kill the 16 colossi roaming the land, it will revive the girl. The remainder of the game is simply you, the colossi and the world.

While it may sound boring to some, the simplicity is beautiful. There are no random enemies, no annoying grinding for leveling up and no side quests. "Shadow of the Colossus" is all killer, no filler. Unlike Zelda, which made you go through the Water Temple and jump through hoops to get through the things you really wanted, "Colossus" all goes down smooth. It's dense with flavor like a filet mignon, you don't wolf it down. One has to take the time to appreciate the grandness of it all. And how grand it is.

The box art of the game is indicative its structure: a towering colossus dwarfing your character. The colossi are the stars of the show and most everything is shoved out of the way. It's what "Transformers" would be like if Shia LaeBeouf and the other humans never showed up.

Each Colossi in itself is as much a puzzle as it is a boss fight, forcing the player to figure out how to do three things. 1. Not get killed by it. 2. How to latch onto a part of its body without getting flung off. 3. Stab it to death at its weak points.

This is accomplished through a deep use of the game's limited provided resources. Sometimes the player just hops on to the Colossi and other times they have to use the horse or bow and arrow. The more satisfying fights, though, include the environment in the puzzle. One asks you to bait a Colossus to strike the ground before sprinting up its arm before it notices.

Could the game be stretched out to, let's say, 25 Colossi to make the game longer? Sure. But it goes against the minimalist approach taken by Team ICO. Each of the 16 Colossi is unique, requires a different approach to kill and leaves an impression. Whether it's the simple first colossus, the various airborne colossi, water-based one or the behemothic end-game Colossi, each has a memorable look, feel, strategy and atmosphere.

It's in that atmosphere that the game brings it to another level. The game's setting, a vaguely forbidden valley, is filled with forests, deserts, ruins, plains and water environments that truly stretch the Playstation 2 to its limits. The graphics are certainly above "Resident Evil 4" levels, but not quite "Final Fantasy XII."

The game shows off simple environments at the outset, but slowly begins to show off truly impressive settings that are the perfect addition to inject into a fight against a colossus. Team ICO perfectly utilizes these environments to enhance each encounter, creating feelings of claustrophobia in one encounter and instill fear of heights in another.

Like everything else in the game, the story is minimalist. The game gives you everything you need to care about the events unfolding onscreen. What doesn't need to be said remains unsaid. Instead, the game uses its imagery to tell stories and instill proper moods, all leading up to a memorable ending for a plot that can be summed up in one paragraph.

The game took about 10 and a half hours to play and that was taken at a steady pace over a few days with minimal exploring. One could probably spend a few hours just looking at cool stuff.

"Shadow of the Colossus" is not a mainstream game. The player doesn't have to cram through it to get to the good parts, like how a person drinks a bunch of Natural Ices to get drunk. Try sipping a game for once. It tastes good.

Shadow of the Colossus is available for Playstation 2. It is usually available on Amazon.com for $20, but is at a reduced price of $7.23 at the time of publication.

Nick O'Malley can be reached at nomalley@student.umass.edu.

Ico's "Shadow of the Colossus" is a visually-stunning game, with few in its class. It is not the kind of game one can get through in a sitting, however.

Classic indie-rock group Built to Spill will be bringing their angular guitar-based sound to Pearl Street this Wednesday at 9 p.m. They will be playing songs from all periods of their extensive career.

Built to Spill to rock out at Pearl Street this Thursday

PEARL from page 5

minute-plus jam examining paradigm's evolution, "You Were Right," which pays tribute to the enduring truth of lines from iconic 60s songs, and "Carry the Zero," another long jam with Built to Spill's characteristically spiraling, weaving guitar lines and Martsch's surreal, almost entranced vocals.

In the last decade, the group has released three new albums, 2000's "Ancient Melodies of the Future," "You in Reverse," released in 2005 to less critical acclaim and last year's "There is No Enemy," a more mature volume which saw the band turn down the energy but stay with their now time-tested formulas.

Built to Spill ascended to prominence around the same time as several musical contemporaries like Modest Mouse and Pavement. Collectively, the three made an invaluable contribution to our current indie music sphere.

Built to Spill, however, are no relics.

The band promises to deliver Pearl Street a lively blend of their now certainly extensive volume.

You'll be right to head on down to Pearl Street tomorrow around 9 p.m. and check them out for $20.

Sam Butterfield can be reached at sbutterfield@dailycollegian.com.

'You Again' proves to be mediocre at best

AT BEST from page 5

now a selfless nurse, begins to exact revenge as well.

So with the wedding only days away, can Marni reveal Joanna's true colors before it's too late, or will she end up looking like the insensitive monster? Have the tables turned?

The matriarch of the Olsen family, Gail, played by Jamie Lee Curtis, is dealing with a similar problem. She was shoved into a pool on prom night by her former best friend. Imagine her surprise when Ramona (Sigourney Weaver) shows up at her home decades later – she's Joanna's only living relative, who happens to be footing the bill for the wedding.

At times during this movie, it seems like director Andy Fickman bit off more than he could chew.

The dueling plotlines, while meant to mesh together well, end up being completely different situations and don't really cross paths. It might have turned out better if he'd stuck to one storyline.

But the director, best known for "She's the Man," did make a great decision when he hired casting director Gail Goldberg. The female leads, Bell and Yustman, were cast perfectly. Blond versus brunette, loser versus popular girl, each play their parts perfectly. Weaver and Curtis were good for their roles as well.

The supporting cast also served to help the movie muddle along. The wildly popular Betty White plays Grandma Bunny, who dominates the scenes she appers in. Emmy Award-winning actress Kristin Chenoweth appears as the eccentric wedding coordinator, while little brother Ben (Billy Unger) steals many scenes.

Unfortunately, the writing seems to have failed the able actresscs. Joanna seems bipolar as her personality flip-flops and Marni does not come off as the strong woman she is supposed to have become. There are definitely hilarious one-liners and classic slapstick humor but not much about "You Again" is original. The storyline relies on the fact that women can be each other's biggest critics.

"You Again" goes overboard with this at times, though, using petty insults and catfights to propel the plot forward. The multiple dance numbers that trade off scenes with tear jerking moments serve to further confuse the audience.

"You Again" isn't a completely terrible movie. It is very amusing at times and a cutesy sort of film, but it's simply no on the same level as other comedies in theaters now.

It is also extremely predictable, however and is accompanied by a mundanc score and novice camera work.

It's too bad that "You Again" does not do its all-star cast justice. It's just one of those movies that you will walk out of the theaters saying "I've seen this movie dozens of times before."

Kate MacDonald can be reached at kaitlynm@student.umass.edu.

Come visit for SOM Career Day on September 30 at the Mullins Center from 12 p.m. to 5 p.m.

Mind your own business.

Because nobody else will. Nobody other than GE, that is. We invest in your training and growth at our Leadership Center in Crotonville, with online courses, and our unparalleled on-the-job training, and then back that up with great benefits and tuition reimbursement. There's no better partner in the business of you, and no better way to have a real impact on the future. So whether your interests lie in engineering, finance, manufacturing, marketing and sales, human resources or information technology, we have an opportunity for you to join GE in creating a better world for generations to come.

Delaware traveled to Richmond and defeated the Spiders 34-13 on Saturday to remain undefeated with a 4-0 record. Tailback Andrew Pierce ran the ball 26 times for 114 yards and three touchdowns to lead the Hens.

Hens victorious again to remain undefeated

Pierce helps Delaware rush past Richmond

BY ROBERT HANLON
COLLEGIAN CORRESPONDENT

After setting freshmen rushing records last weekend, Andrew Pierce continued to impress for the Delaware football team. The Blue Hens went to Richmond and handled the Spiders, 34-13, staying undefeated with their fourth win on Saturday.

Pierce was the workhorse once again for Delaware (4-0) on the ground, carrying the ball 26 times for 114 yards and three touchdowns.

Senior quarterback Pat Devlin returned to action after missing the previous week with a fractured wrist on his non-throwing arm and threw for 240 yards in the victory.

Last week's starting quarterback Trevor Sasek began the scoring in the game, recording the first touchdown with a 7-yard run, with one minute, 40 seconds remaining in the first quarter.

With 6:18 remaining in the third quarter, Richmond answered to tie the score at 13 with a 3-yard run from Tyler Kirchoff.

Less than two minutes later, Pierce gave the Blue Hens the lead with a 13-yard run, capping off a drive that started on their own 22. Pierce's score would be part of a 21 unanswered-point run to give Delaware the win.

The Blue Hens defense continued to look like a top-tier unit despite allowing their first touchdown of the season. They held Richmond to 234 yards of total offense while forcing two turnovers.

The last time Delaware got off to a 4-0 start to begin a season was in its national champion runner-up season of 2007.

TRIBE EARN FIRST CAA WIN

After trailing for the first three quarters of the game, William & Mary narrowly defeated conference foe Maine, 24-21, at Alfond Stadium on Saturday.

The Black Bears scored the first touchdown of the contest late in the first quarter with 1:59 remaining on a 1-yard run from Pushaun Brown.

The Black Bears led until quarterback Warren Smith threw his only interception, which was returned for a score by Dante Cook with 6:46 left in the game to put the Tribe up, 17-14.

A 3-yard pass from Smith to Desmond Randall four minutes later would erase the deficit for Maine with only 2:46 remaining.

Despite allowing the Black Bears to regain the lead, the Tribe went on a 70-yard drive that ended on a 21-yard pass to Chase Hill for a game-clinching score.

Brown led all running backs in the contest with a game-high 164 yards on 30 carries and two touchdowns.

Hill led all receivers with four receptions for 67 yards, including his big score late in the fourth to win the game.

CAA Notebook

TOMAN EARNS HONORS

New Hampshire quarterback R.J. Toman was named the Colonial Athletic Association Offensive Player of the Week on Monday after leading his team to a 31-10 victory over Lehigh.

Toman came up with a huge performance for the Wildcats, completing 26-of-37 attempts for a career-high 368 yards and four touchdowns.

Stephon Robertson, a linebacker for James Madison, was named the CAA Rookie of the Week after leading the defense in limiting Liberty to three points on Saturday.

Robertson racked up a game-high 13 tackles while helping the defense hold the Flames without a touchdown for the first time since 2006.

James Pitts of Villanova and Anthony Walters of Delaware each earned CAA Defensive Player of the Week awards after strong performances for their respective defenses.

Pitts played strong at defensive back, recording six tackles, breaking up two passes as well as returning an interception for 57 yards against Pennsylvania on Saturday.

Walters anchored the Delaware defense on Saturday, recording a team-high 10 tackles and intercepting an Aaron Corp pass in the fourth quarter.

The CAA Special Teams Player of the Week was JMU defensive back Taveion Cuffee, who blocked a 47-yard field goal attempt, preventing Liberty from pulling within one point in the third quarter.

Robert Hanlon can be reached at rhanlon@student.umass.edu.

Doubles team forming

TENNIS from page 10

Carpenter and sophomore Jocelyn Providence solidified their roles as a key pairing for the team. The duo defeated four opponents in the Flight B doubles bracket before losing to Amherst College's Mimi Bell and Jen Newman in the finals, 9-8, in a highly-contested, back and forth matchup.

"The both of them played great together," Dixon said. "The biggest thing I everyone to take out of this weekend was to learn to really work together. It's important, because it can decide whether you win or lose based on your communication with your partner."

The Flight A doubles pairing of senior Tanisha Hodgson and sophomore Chantel Swiszcz were bounced early on Friday, receiving a bye before losing to Bucknell's Dumitrita Iepuras and Elena Vidrascu, 8-6.

"I wish they could have played more, but from what they did do, I was pretty happy," Dixon said. "Teamwork is crucial in doubles. You can't win unless you work together, and that's just something we need to work on."

Dixon used the weekend's tournament as a "measuring stick" to gage where she sees her team now and what they need to do as they approach Atlantic 10 opponents in the near future.

"We're fall-ready right now," she said. "We've had a chance to come in and get our legs underneath us. But we're not winter-ready. We face some really tough teams coming up, and this is the time of the year where you need to get yourself into winter-ready shape. The harder we work now, the more prepared we will be for when conference teams come around.

Scott Cournoyer can be reached at scournoy@student.umass.edu

Former Bonnies defender receives D2 award

SAM KRUSZEWSKI/COLLEGIAN | FILE PHOTO

Former St. Bonaventure men's soccer player Tyler Bellamy now plays for the Rochester Rhinos.

BY CHRIS NOREIKA
COLLEGIAN CORRESPONDENT

Former St. Bonaventure men's soccer player Tyler Bellamy has been named the Rochester Rhinos Rookie of the Year in his first season as a professional soccer player in the D2 league.

The Hammonton, N.J. native was a star defenseman in his time with the Bonnies. When he joined the Rhinos in February after signing a free-agent contract, he made an immediate impact. Helping anchor the defense, Bellamy played in 22 games this season for the Rhinos, ranking seventh on the team in playing time, going the full 90 minutes in 16 games.

A-10 Notebook

The backline for Rochester has only allowed 22 goals in 28 games this year, which is good for third in the league out of 12 teams. Bellamy has been a key part in the Rhinos' push for second place in the league, just one point behind the first-place Austin Aztex with two games remaining.

As a member of the Bonnies, Bellamy made the transition from forward to defense. He impressed his sophomore season when he was named to the University at Buffalo All-Tournament team. Bellamy continued to grow as a defenseman and by his senior season was the leader of the Bonnies backline. That 2009 season, Bellamy was named Second Team All A-10 and First Team All-Region, helping St. Bonaventure record five shutout victories.

In addition to winning the Rhinos' Rookie of the Year award, Bellamy is now eligible for the United Soccer Leagues' Rookie of the Year honor. The award is given out after the first week of the postseason, which begins on Oct. 4.

SLU STAYS IN MIX

Nick Maglasang's game-winning goal with 57 seconds left propelled Saint Louis to a 1-0 victory over Drake Saturday night in a thrilling double-overtime game at Robert R. Hermann Stadium.

Teammate Alex Johnson headed a cross in the box to Maglasang who finished a one-time left-footed shot in the corner of the net. Both teams had great scoring opportunities throughout the game with the Billikens out-shooting the Bulldogs, 21-10. The goal marked Maglasang's second score of his career and first of the season.

Maglasang's clutch goal earned him the Player of the Week award as announced by the league office Monday. The 5,266 fans in attendance were the sixth-largest crowd in SLU history.

The Billikens' win moved them to a record of 2-2-1, giving the team seven points which is good for sixth place out of 14 teams. SLU is just above the middle of the pack in the league and will host Missouri State at home under the lights.

ROOKIE OF THE WEEK

Freshman midfielder Ryan Bradbury of Temple recorded five points this past week to win the Rookie of the Week award.

Bradbury scored two goals and had one assist to help lead the Owls (1-4-2) to a 1-1 record on the week. In last Wednesday's match with Rider, Bradbury assisted on the eventual game-winning goal to junior Tyler Witmer. He also tallied his first-ever goal on a ball played through the box by Max Kinderwater. Bradbury one-timed the shot into the upper left hand corner of the net.

In his next game, Bradbury scored the lone goal in a 2-1 loss to Siena in the second half off a feed from sophomore Cody Calafiore. The Exton, Penn. native now leads the team with two goals and five points.

The Owls will host Big East foe Rutgers on Wednesday at 3:30 p.m.

Chris Noreika can be reached at cnoreika@student.umass.edu.

THE MASSACHUSETTS DAILY COLLEGIAN

SPORTSWEDNESDAY

WEDNESDAY, SEPTEMBER 29, 2010 SPORTS@DAILYCOLLEGIAN.COM

Candyce Boney is one of three seniors on the Minutewomen this season along with Kaitlyn Carpenter and Tanisha Hodgson.

UMass begins fall season

By Scott Cournoyer
Collegian Staff

The Massachusetts tennis team kicked off the fall season at the Eastern Collegiate Invitational at Army in West Point, N.Y. this past weekend, making an overall positive impression on UMass coach Judy Dixon.

"I was happy to see a bunch of us get to the second day of play," Dixon said on Sunday. "This is the time of the season when you want to see them play as much as possible. It's good to get a lot in early to really evaluate where your strengths and weaknesses are."

The youth of the team posted outstanding performances, seeing sophomore Julia Comas win the Flight B singles championship, as well as freshman Jessica Podlofsky winning Flight D.

"I was very encouraged to see them both do well," Dixon said. "You want to play as much tennis as you can in the fall to prepare for winter, and it was good to see them both play deep into their brackets."

Comas won two matches each on Saturday and Sunday, before beating out West Virginia's Emily Mathis in straight sets, 6-4, 6-2 in the Sunday final.

"I'm proud of the way she played," Dixon said. "She started out of the gate well, and finished all the way through."

Podlofsky also won four matches, racking up four shutout sets along the way. The Port Washington, N.Y. native beat out WVU's Melis Tanik in straight sets, 7-5, 6-0 to take the crown.

"[Jessica's] a gamer. She really works hard at all parts of her game and I think she really loved being out there and competing," Dixon said. "It's nice to see that as a coach, and I look forward to what she can bring against every opponent."

No. 1 singles player Yuliana Motyl had a bye in the first round before losing to Hofstra's Elena Ivanova in straight sets, 6-4, 6-2.

"It was good for her to get out there and compete for the first time," Dixon said. "Maybe she didn't get enough play as she hoped for, but she knows things to look for now in her game to improve upon."

Junior Gabby Jannotta (Flight D) came out of the weekend with a victory in singles play, defeating New Jersey Institute of Technology's Megan Guidry, 6-1, 6-2 on Friday. Jannotta went on to lose in the second round to WVU's Tanik in straight sets, 6-0, 6-2.

Doubles remained a big question mark for UMass heading into the weekend until senior Kaityln

See TENNIS on page 8

Sophomore Julia Comas won two matches before defeating WVU's Emily Mathis in straight sets, 6-4, 6-2, in the final on Sunday.

UM looks to change difficult homestand

By Steve Levine
Collegian Staff

The Massachusetts men's soccer team will attempt to reverse its unsuccessful homestand on Wednesday when it hosts Dartmouth at 3 p.m. at Rudd Field.

The Minutemen (1-3-3) are underperforming as of late, going 0-2-1 in their last three games at home. They will have their hands full with Dartmouth (4-2-0), which is coming off a 1-0 victory against New Mexico.

The Big Green feature a high-powered, dynamic offense that possesses eight different goal-scorers on the young season. This could pose as a serious threat to the Minutemen defense, which has broken down lately during critical moments. Dartmouth defenders Bryan Giudicelli and Teo Larsson-Sax have given their positions surprising offense, as they share the team-lead with two goals apiece.

UMass coach Sam Koch isn't as concerned with them as he is with two of their forwards: Lucky Mkosana and Daniel Keat, who were both elected to the All-Ivy First Team last year.

"They have two guys up top that are outstanding," Koch said. "[Keat] can hit bombs from 30 yards out; he's a special player. [Lucky] up top is extremely quick and he's a handful. The two of them together up top are probably the best duo we will have faced so far. These guys are the real thing. They're very good players."

Keat made an impact on Dartmouth's squad immediately as a freshman in 2006, leading the team with 13 points on six goals and one assist. His collegiate career was marred by injuries the proceeding two years, but he found his way back last season for an incredible campaign in which he started all 16 games, registering 22 points on eight goals and six assists.

Even with Keat's impressive résumé, it is Mkosana's track record that Koch is most worried about. As a freshman in 2008, Mkosana led the Ivy League with 24 points on 11 goals and two assists en route to his unanimous selections as Ivy League Rookie of the Year and as a member of the All-Ivy First Team. Mkosana picked up where he left off last year, ranking second on the team with eight goals and four assists.

Dartmouth has 11 goals on the season, four more than its opponents. The Big Green have a strong propensity to shoot, averaging more than six shots per game over their opponents. This could mean a busy day for UMass goalkeeper Chris Piekos, whose strong play lately has earned him the majority of starts over Shane Curran-Hays.

Piekos has been between the pipes for some tough-luck losses so far this season, compiling a record of 0-2-3 despite his 1.02 goals against average and.812 save percentage.

In order to keep up with Dartmouth, UMass will have to convert on its scoring chances. Koch is content with the amount of chances the Minutemen create, but is upset with his team's ability to cash in when it counts. Over the past few weeks, UMass has seen far too many scoring opportunities go by the wayside. Koch hopes the team's weekend practices fix this.

"We had Sunday off and on [Monday] we worked on possession, playing the ball quickly, one-touch and two-touch passing, as well as finishing," he said.

UMass hopes it can gain momentum quickly and return to its traditional winning ways at home. The Minutemen play two more non-conference games at home before hosting Atlantic 10 rival Xavier on Oct. 8.

Steve Levine can be reached at slevine@student.umass.edu.

Senior Ben Arikian ranks first on the Minutemen in assists with four and second in points with four. UMass will attempt to break a three-game winless streak today against Dartmouth at Rudd Field.

En route to their 1-3-3 record so far this season, the Minutemen have struggled on offense. Despite scoring more goals than last year, UMass has scored only eight goals off of 79 shots, including 33 on goal.

Minutemen goal woes continue

By Herb Scribner
Collegian Staff

In a double overtime, golden goal, winner-takes-all scenario, finishing a scoring chance means everything on the pitch.

Even though the Massachusetts men's soccer team has scored more goals so far this year than it did in 2009, its lack of ability to finish off good-scoring chances leaves something to be desired.

"It's obviously one of the parts of our game we need to work on," UMass coach Sam Koch said. "If I knew the answer to [why we aren't finishing], then we would be finishing."

So far in 2010, the Minutemen (1-3-3) have scored eight goals off of 79 shots. However, 33 of these shots were on goal, leaving 25 missed opportunities.

"Our first objective is to create chances and we are creating chances," Koch said. "Now we have to finish the chances we're creating. We got half of it down and now we need the other half."

Even more disheartening for UMass is that it has yet to score a goal in the four double overtime matches it has played in where a goal means a victory.

In the most recent match against New Hampshire last Saturday, UMass lost in the closing minutes of the second period of extra time. Many of these chances in the second period of overtime had the fans at Rudd Field on the edge of their seats, including defender Dominic Skrajewski's header that nearly gave the Minutemen the victory towards the end of the first extra time period.

Skrajewski's header was one of eight shots taken in the two overtime periods by the Minutemen, which was half of the shots taken during the entirety of the match for UMass.

"First half, second half, overtime. [The] bottom line is we're not scoring goals so it doesn't matter," Koch said. "It doesn't matter when we're scoring goals as long as were scoring more than the other team."

Following the match against the Wildcats (4-0-2), even goalkeeper Chris Piekos commented about the lack of finishing, claiming that the team needed to work on shooting drills at practice.

According to Koch, that's exactly what the Minutemen worked on in shooting exercises during practice.

"We probably spent about 50 percent of our time on [shooting drills]," Koch said.

While Koch admits there is a problem in terms of UMass finishing its chances, he stated that there is a solution to aid the Maroon and White.

"There are two parts to the problem," Koch said. "We're doing better and better at creating opportunities. The second part is finishing and using the technique of putting the ball back into the net. It's going to happen and we're going to do it. The problem is the more pressure there is to finish the more pressure the players put on themselves. The players have to relax but also have that sense of urgency to finish on good chances."

The Minutemen will get a chance to prove if the shooting drills have paid off when they take on Dartmouth Wednesday afternoon. The Big Green (4-2-0) has allowed seven goals all season, with one score coming in overtime.

College students nationwide study less than in past decades

A UMass student spends a sunny afternoon visiting with her geese friends. Would her time be better spent studying?

By Lucia Panasci
Collegian Staff

A study by the American Enterprise Institute for Public Policy Research, entitled "Leisure College, USA" makes the claim that college students studied about 14 hours a week in 2003 in comparison to the 24 hours a week students studied in 1961.

The findings of this study also show that this decline has nothing to do with the type of institution a student attends, whether or not they work, or what they choose to study.

The study was written by two professors from the University of California, Mindy Marks and Philip Babcock. Babcock says the research was inspired by a similar survey that pertained only to students of the University of California, "The study-time numbers looked quite low to us, and we wondered if this was true across the nation and if it had always been true."

The research that followed confirmed these low numbers in current study time clocked by university students.

The data collected by Babcock and Marks includes four sets of data coming from the years 1961, 1981, 1987-1989, and 1991-2003, which involves the responses of full-time students to a survey asking the number hours each studied per week. From these surveys the researchers were able to see an obvious pattern: Study time had gone down, and drastically at that. Hoping to find the cause of the decline, the duo looked at the changes in college culture that occurred over the time span. The two major possible reasons Marks and Babcock cited in their research that may have led to the major decrease in study time were the use of technology and falling standards in universities all over the country.

The use of technology would surely make tasks that would have taken longer before the widespread use of the Internet, such as writing a paper, quicker and easier to complete. However, the study shows that most of the decline took place prior to 1981, a time in which this access to technology was impossible. This means that while technology has had an impact on the amount of time students spend studying, the impact is minimal and recent with little relevance to the study's findings.

What might be causing this trend according to the research? Universities whose standards for students have dropped in recent decades, resulting in students today who do not need to work as hard in college as students in 1961. This conclusion is problematic as there is no precise way to test the standards of universities today and so many factors affect student study time. However those who believe this theory have several explanations such as student desire for leisure time and the catering of universities to such desires in an effort to attract students.

Ben Smith, a freshman here at the University of Massachusetts who plans to major in biology agrees that there are a lot more options available to students in terms extracurricular activities, particularly club sports and other athletics. This would cause studying to be less of a priority, as today students need not be a part of their college team to have time committed to

UMass to reduce use of plastics and cans in favor of reusables

By Michelle Altman
Collegian Staff

This year the University of Massachusetts has made extensive efforts to cut the consumption of plastic water bottles and cans.

"We were averaging about 4,000 users per day at the Grab & Go, all using plastic bottles or aluminum cans, that's about 120,000 water bottles and soda cans a month and over 800,000 cans and bottles a year," said Ken Toong, Executive Director of Auxiliary Services. "So we thought, lets re-use them." This year, UMass joined in the efforts of many other colleges and universities dedicated to creating greener campuses, and eliminated plastic water bottles and aluminum soda cans at the Grab & Go. Instead of buying cans or bottles, students can fill up "compostable cups," with soda or water, and top them off, "with compostable straws and lids," said Toong.

Students can also fill up one of the "5,000 re-fillable dining common water bottles passed out this year, or the 10,000 water bottles passed out last year," at the newly installed purified tap water stations in the Grab & Go's.

This year, 60 water purifying machines were installed throughout UMass, each one costing $4,000, amounting to a grand total of $240,000. A sum Toong presumes to "make back easily within the next year, because this initiative saves the dining services a lot of money. This money can be pumped back into other areas, such as more local and sustainable foods, like the sustainable tuna that is in the tuna salad this year."

Additionally, dining services hosted a successful green barbeque this year and intends to "give out 10,000 reusable bags on Oct. 1 to be used at the Grab & Go," Toong affirmed.

However, Toong would "like to see no more plastic water bottles used on campus," in the future, but is up against the daunting fact that "Americans love convenience, and the things that are easy."

Toong realizes that convincing students to carry "their water or soda, instead of stuffing it in their backpacks, and having to wash out their refillable water bottles will take time and effort." However, he has faith that educating the students on the positive impacts will illicit reform.

This reform is already taking shape in students like Hayley Horgan, a sophmore who

Days of Dialogue discuss issues concerning the Five Colleges

By Sara Jackson
Collegian Staff

Days of Dialogue is an event that brings staff and faculty from the Five Colleges into a shared space to talk openly about topics like race, class and gender. The second event of its kind will be held on the University of Massachusetts campus from Oct. 18-21.

The event is a partnership between the Five College Training and Development Collaborative, the Diversity Directors from across the Five College campuses, the Social Justice Education Program of the UMass School of Education and the Office of Workplace Learning and Development.

The event aims to provide an atmosphere for faculty and staff to discuss social issues that take place on campus. The event is part of the ongoing work of Dr. Ximena Zúñiga, who is a national leader in diversity education and professor of education in the social justice education program at UMass. Zúñiga will continue to bring her expertise into the Days of Dialogue.

"My hope for the Five Colleges Days of Dialogue is that it will motivate us to step outside our comfort zones and continue to search for opportunities to have similar conversations in the workplace and our personal lives," said Zúñiga.

The event will offer two-and-a-half hour sessions on different topics like Race and Ethnicity, Gender Dynamics at Work and Rank and Class that will allow participants to question and learn how these issues affect them in the workplace. "The Days of Dialogue provide an atmosphere in which to grow around the differences that employees on campus focus on. The dialogues ask how we understand our peers in the workplace by looking at the issue in the broader United States," said Margaret Arsenault of the Office of Workplace Learning and Development. " Can this understanding lead to us work better with those on campus?"

When asked if she thought the majority people participating in the dialogues were aware that these issues were happening on campus, Arsenault agreed.

She said, "On campus, people think that rank plays a big part. This can result in more credibility and an employee can question whether they are being heard and the value of their own opinion.

"People are desirous to learn and that is why they sign up for this event," she added,.

See DIALOGUE on page 2

The W.E.B. DuBois Library is a tower of knowledge for the University of Massachuesetts; UMass will be one of the hosts for the Days of Dialogue.

Outside a university facility recycling bins are provided for various forms of waste. The university plans to reduce the amount of waste left by empty plastic bottles and aluminum soda cans.

Professor Don Robinson gives lecture about government woes

By Ashley Berger
Collegian Staff

On Sept. 28 the University of Massachusetts campus, brought distinguished professor and political thinker Don Robinson to speak at the sixth annual Dean Alfange lecture.

The lecture entitled "The Crisis Facing Constitutional Politics" focused on obstacles that occur within our government today; including representation in Congress, paralysis of the Senate, the use and abuse of filibusters, and the general toxicity within the American political sphere.

The central question that Robinson focused on was if it is possible to form a government that is both democratic and constitutional, both liberal and conservative – one that attempts to better the human condition at the same time.

The lecture focuses on the theory and practice of American constitutionalism and constitutional law, and invites prominent scholars, jurists and commentators to campus. The series is a tribute to Dean Alfange, Jr., a professor of political science. Robinson, a resident of Ashfield, Mass. and author of seven books, expressed that it was a great honor and privilege to speak at the event.

Robinson opened his speech addressing the idea that Americans are particularly bad at political craftsmanship. He explained that for years, Americans have been unable to create a useful democratic sphere in the Western world and that political leaders, regardless of how great they may have been, have struggle to apply useful efforts.

The professor explained that in order to fix Americans current situation, they must analyze the political situation. Political activity within a stable regime requires the implementation of stable leaders.

"A political leader must inevitably be engaged in passions," said Robinson. "He must master these passions and aim it a greater ends."

A large portion of the conversation reflected on the fact that the U.S. government does not work because politics creates huge deficits, which constitute 10 percent of the annual Gross National Product. These deficits also contribute to the three trillion dollars worth of national debt each year. "To cut spending is unrealistic," said Robinson. "Neither party shows a willingness to get spending under control. Each side has a lot of people working to make sure the other side doesn't gain control."

Part of the discussion focused on the structures that create problems within government. According to Robinson, the Senate prevents things from getting done. Much of the debate that arose during Robinson's talk had to do with the use and abuse of the filibuster. As a Senate rule, the filibuster has contributed to a stalemate in getting legislation passed. While the filibuster can perform useful jobs and prevent irrational, ruthless decisions, according to Robinson, the modern day Senate uses the filibuster to block

UMass begins fall season

By Scott Cournoyer
Collegian Staff

The Massachusetts tennis team kicked off the fall season at the Eastern Collegiate Invitational at Army in West Point, N.Y. this past weekend, making an overall positive impression on UMass coach Judy Dixon.

"I was happy to see a bunch of us get to the second day of play," Dixon said on Sunday. "This is the time of the season when you want to see them play as much as possible. It's good to get a lot in early to really evaluate where your strengths and weaknesses are."

The youth of the team posted outstanding performances, seeing sophomore Julia Comas win the Flight B singles championship, as well as freshman Jessica Podlofsky winning Flight D.

"I was very encouraged to see them both do well," Dixon said. "You want to play as much tennis as you can in the fall to prepare for winter, and it was good to see them both play deep into their brackets."

Comas won two matches each on Saturday and Sunday, before beating out West Virginia's Emily Mathis in straight sets, 6-4, 6-2 in the Sunday final.

"I'm proud of the way she played," Dixon said. "She started out of the gate well, and finished all the way through."

Podlofsky also won four matches, racking up four shut-out sets along the way. The Port Washington, N.Y. native beat out WVU's Melis Tanik in straight sets, 7-5, 6-0 to take the crown.

"[Jessica's] a gamer. She really works hard at all parts of her game and I think she really loved being out there and competing," Dixon said. "It's nice to see that as a coach, and I look forward to what she can bring against every opponent."

No. 1 singles player Yuliana Motyl had a bye in the first round before losing to Hofstra's Elena Ivanova in straight sets, 6-4, 6-2.

"It was good for her to get out there and compete for the first time," Dixon said. "Maybe she didn't get enough play as she hoped for, but she knows things to look for now in her game to improve upon."

Junior Gabby Jannotta (Flight D) came out of the weekend with a victory in singles play, defeating New Jersey Institute of Technology's Megan Gudry, 6-1, 6-2 on Friday. Jannotta went on to lose in the second round to WVU's Tanik in straight sets, 6-0, 6-2.

Doubles remained a big question mark for UMass heading into the weekend until senior Kaityln

See TENNIS on page 8

Sophomore Julia Comas won two matches before defeating WVU's Emily Mathis in straight sets, 6-4, 6-2, in the final on Sunday.

UM looks to change difficult homestand

By Steve Levine
Collegian Staff

The Massachusetts men's soccer team will attempt to reverse its unsuccessful homestand on Wednesday when it hosts Dartmouth at 3 p.m. at Rudd Field.

The Minutemen (1-3-3) are underperforming as of late, going 0-2-1 in their last three games at home. They will have their hands full with Dartmouth (4-2-0), which is coming off a 1-0 victory against New Mexico.

The Big Green feature a high-powered, dynamic offense that possesses eight different goal-scorers on the young season. This could pose as a serious threat to the Minutemen defense, which has broken down lately during critical moments. Dartmouth defenders Bryan Giudicelli and Teo Larsson-Sax have given their positions surprising offense, as they share the team-lead with two goals apiece.

UMass coach Sam Koch isn't as concerned with them as he is with two of their forwards. Lucky Mkosana and Daniel Keat, who were both elected to the All-Ivy First Team last year.

"They have two guys up top that are outstanding," Koch said. "[Keat] can hit bombs from 30 yards out; he's a special player. [Lucky] up top is extremely quick and he's a handful. The two of them together up top are probably the best duo we will have faced so far. These guys are the real thing. They're very good players."

Keat made an impact on Dartmouth's squad immediately as a freshman in 2006, leading the team with 13 points on six goals and one assist. His collegiate career was marred by injuries the proceeding two years, but he found his way back last season for an incredible campaign in which he started all 16 games, registering 22 points on eight goals and six assists.

Even with Keat's impressive résumé, it is Mkosana's track record that Koch is most worried about. As a freshman in 2008, Mkosana led the Ivy League with 24 points on 11 goals and two assists en route to his unanimous selections as Ivy League Rookie of the Year and as a member of the All-Ivy First Team. Mkosana picked up where he left off last year, ranking second on the team with eight goals and four assists.

Dartmouth has 11 goals on the season, four more than its opponents. The Big Green have a strong propensity to shoot, averaging more than six shots per game over their opponents. This could mean a busy day for UMass goalkeeper Chris Piekos, whose strong play lately has earned him the majority of starts over Shane Curran-Hays.

Piekos has been between the pipes for some tough-luck losses so far this season, compiling a record of 0-2-3 despite his 1.02 goals against average and .812 save percentage.

In order to keep up with Dartmouth, UMass will have to convert on its scoring chances. Koch is content with the amount of chances the Minutemen create, but is upset with his team's ability to cash in when it counts. Over the past few weeks, UMass has seen far too many scoring opportunities go by the wayside. Koch hopes the team's weekend practices fix this.

"We had Sunday off and on [Monday] we worked on possession, playing the ball quickly, one-touch and two-touch passing, as well as finishing," he said.

UMass hopes it can gain momentum quickly and return to its traditional winning ways at home. The Minutemen play two more non-conference games at home before hosting Atlantic 10 rival Xavier on Oct. 8.

Steve Levine can be reached at slevine@student.umass.edu.

En route to their 1-3-3 record so far this season, the Minutemen have struggled on offense. Despite scoring more goals than last year, UMass has scored only eight goals off of 79 shots, including 33 on goal.

Senior Ben Arikian ranks first on the Minutemen in assists with four and second in points with four. UMass will attempt to break a three-game winless streak today against Dartmouth at Rudd Field.

Minutemen goal woes continue

By Herb Scribner
Collegian Staff

In a double overtime, golden goal, winner-takes-all scenario, finishing a scoring chance means everything on the pitch.

Even though the Massachusetts men's soccer team has scored more goals so far this year than it did in 2009, its lack of ability to finish off good-scoring chances leaves something to be desired.

"It's obviously one of the parts of our game we need to work on," UMass coach Sam Koch said. "If I knew the answer to [why we aren't finishing], then we would be finishing."

So far in 2010, the Minutemen (1-3-3) have scored eight goals off of 79 shots. However, 33 of these shots were on goal, leaving 25 missed opportunities.

"Our first objective is to create chances and we are creating chances," Koch said. "Now we have to finish the chances we're creating. We got half of it down and now we need the other half."

Even more disheartening for UMass is that it has yet to score a goal in the four double overtime matches it has played in where a goal means a victory.

In the most recent match against New Hampshire last Saturday,

UMass lost in the closing minutes of the second period of extra time. Many of these chances in the second period of overtime had the fans at Rudd Field on the edge of their seats, including defender Dominic Skrajewski's header that nearly gave the Minutemen the victory towards the end of the first extra time period.

Skrajewski's header was one of eight shots taken in the two overtime periods by the Minutemen, which was half of the shots taken during the entirety of the match for UMass.

"First half, second half, overtime. [The] bottom line is we're not scoring goals so it doesn't matter," Koch said. "It doesn't matter when we're scoring goals as long as were scoring more than the other team."

Following the match against the Wildcats (4-0-2), even goalkeeper Chris Piekos commented about the lack of finishing, claiming that the team needed to work on shooting drills at practice.

According to Koch, that's exactly what the Minutemen worked on in shooting exercises during practice.

"We probably spent about 50 percent of our time on [shooting drills]," Koch said.

While Koch admits there is a problem in terms of UMass finishing its chances, he stated that there is a solution to aid the Maroon and White.

"There are two parts to the problem," Koch said. "We're doing better and better at creating opportunities. The second part is finishing and using the technique of putting the ball back into the net. It's going to happen and we're going to do it. The problem is the more pressure there is to finish the more pressure the players put on themselves. The players have to relax but also have that sense of urgency to finish on good chances."

The Minutemen will get a chance to prove if the shooting drills have paid off when they take on Dartmouth Wednesday afternoon. The Big Green (4-2-0) has allowed seven goals all season, with one score coming in overtime.

Herb Scribner can be reached at hscribner@student.umass.edu.

CONSTITUTION from page 1

appointments.

"The framers believed that appointment power should be in one place," said Robinson.

"When the filibuster is used to obstruct government, then it is dysfunctional," said UMass political science professor Sheldon Goldman. "But it is an all or nothing matter. It is very difficult to mount a filibuster; it is hard to stand for 60 hours and talk." Goldman also believed that in order to correct the problem with filibusters, the government must make it even harder to mount one.

Robinson further went on to explain that the War Powers Act also serves as a hinderance to progress. He argued that the war should not be left for one person to lead a nation into and the last few conflicts have not been initiated by Congress, as the framers intended. Robinson said Americans must revert back to the framer's intentions, and the reason why Congress is hesitant to restore power is because a lack of monetary incentive.

Many students who attended the lecture appreciated what Robinson had to say. "As a young, politically active person, I realize that the system has its faults," said sophomore Nate Richardson. "It's encouraging that an older political scientist recognizes that and lays out what we should do as a younger generation."

"Now more than ever, as a younger generation, we must do something to fix the situation," said sophomore Matt Bonaccorsi. "The paralysis applies to the way that young people view the government. We think that we're too far deep into the situation that we can't get ourselves out. So it was nice to see that someone wants us to use the tools we have to fix it during our lifetime."

Robinson concluded his lecture by advising young political scientists to "recognize crises and be bold about fixing them."

"Don't be timid," said Robinson.

Students utilize the new recreation center on campus. The center is free for all students and contains three floors with basketball courts, tracks, weightlifting machines, and rooms for yoga and pilates.

Five Colleges hold talks on vital issues

DIALOGUE from page 1

"The event will bring together the faculty and staff from all of the Five Colleges to talk about these crucial issues, which is positive for all the campuses," said Kevin Kennedy, the director of communications at Five Colleges, Inc.

All of those that are leading the individual dialogues were trained at the Five College Intergroup Dialogue Training Institute which is in its second year and provided facilitation training for 60 staff and faculty members from the Five Colleges. The Institute was co-led by Dr. Zúñiga who hopes to see the Days of Dialogue as a larger event.

"I am indeed hoping that we will gradually build the capacity to involve not only more a faculty and staff, but also students in one-time and sustained conversations about race/ethnicity, gender, religion, class and other important diversity issues," she said.

The Days of Dialogue that UMass will see in the next two weeks are the starting point for faculty and staff to discuss critical issues on campus. In the future, those involved in both the Days of Dialogue and the summer facilitator training would like to see the program have a longer and more sustained impact.

sports or almost any other activity.

Similarly, Kathryn Tolley, Phil McGilvary and Kit Dyer, all UMass sophomores say that college standards are not the only things that affect study time.

Tolley said that, with larger numbers of students receiving higher education, it has become the cultural norm to go to a university and thus those who do "may not be as study-orientated," but rather may be attending a university because it is expected of them.

McGilvary agrees that the expectations universities have of students may have changed in a not-so-negative way, claiming that today oftentimes students need to go to graduate school to acquire the qualifications that were once held by undergraduates in order to compete in the job market. This would mean that today the amount of work required of an undergraduate student is similar to what a high school student needed to accomplish 40 years ago.

Dyer feels as though she was more prepared for college than students in the past may have been because as she says, "Now when you are in high school the teachers are there to teach you primarily how to learn and in college you are there to learn the actual material."

However, this is all speculation and, without more in-depth research, the true reason for the decline in time spent studying by college students would need to be done for a truly accurate explanation to be found.

But in the end, no university can be held entirely responsible for the study habits of its students, who are as adults responsible for themselves, according to Professor Blaustein who works in the Center for Neuroendocrine.

"Universities really can't be harder. Some professors are demanding; some aren't," she said. "Some students rise to the challenge and try to get as much out of college as they can; some don't. The amount of time students study is determined by the student, not the universities."

EDITORIAL@DAILYCOLLEGIAN.COM

An amazing device

Eli Gottlieb

Two weekends ago I broke down and committed a shameless, sinful act of consumerist stupidity. I bought an Amazon Kindle at the mall, in the matte white model with free, perpetual 3G data access. I'd heard all about the evils of these hideous, damnable devices, but in the end I guess it just held some kind of appeal for me.

Okay, to speak seriously, I think that the Kindle and other e-readers (computerized devices based on Organic Light Emitting Diode, or "e-ink," screens for reading e-book documents) get a pretty bad rap, and they get it for the wholly inadequate reasons of sheer Luddism and a belief that they can never replace physical, paper books. I have to say, most of these critics miss the point.

I didn't get a Kindle (which I renamed "Missingno" and registered to my Amazon account) to replace my physical books. I love my physical books, and in fact I've bought a handful more of them since owning the Kindle while I've bought no books from the Kindle store whatsoever. I bought the Kindle to supplement my physical books.

If I had a sufficient set of solar panels into which to plug the charger, I could stow this thing away in case of apocalypse.

My physical books do allow me to page through them looking for a particular snippet of text, and I can lend them out to anyone I see fit (without violating any copyright laws). They require no special hardware or software other than my own eyes, brain, and knowledge of the language in which they're written. However, they also use up monetarily and environmentally valuable paper, and more importantly, they are the single heaviest things I own.

Whenever I pack for a move between home in Albany, N.Y. and UMass (or, inshallah next year, to a more permanent residence with a job), I have to use an extra 50-80 pound bag or set of boxes just to contain the books I really feel a need to bring with me — no more than a significant fraction of what I actually own and want to have available for reading. Much of that weight comes in the inescapable shape of textbooks, but in fact the greater portion of it doesn't. I just really love my books, and I want to have them with me wherever I go in the world.

That is what Missingno does for me. It carries and displays hundreds, or even possibly thousands, of my books in a volume and weight slightly less than that of a personal planner. As a secondary function, it has perpetual unlimited 3G access to the Internet if I ever find myself drunk, lost, without my netbook, and or unable to find a WiFi hotspot.

The battery lasts at least a week on a full charge even if I turn the wireless on, and Amazon brags that it will last a month if I keep the wireless off. It exposes itself to my computer as a USB key rather than requiring any special software like iTunes or in fact any connection to a computer at all (though I do choose to employ the open-source Calibre package for backup purposes), and it accepts not only Amazon's ".azw" format e-books but any ".mobi" e-book or ".pdf" document I care to load onto it.

I've already loaded up Missingno with copies of books I physically own (which is legal under a little-known provision of copyright law called Fair Use), e-books given away under Creative Commons licenses (two textbooks in my field, actually) and research papers. If I want, I can load much of history's great literature onto Missingno at any time, since nearly all e-book vendors give away public-domain e-books for free, inserting convenient copies into my pocket, should I want them, of Shakespeare, H.G. Wells, the founding documents of the United States, every non-Scientologist religious text, many, if not, most folk-tales, most older philosophical texts, most major scientific texts and however many dictionaries and encyclopedias I want.

It's not just that a decent summary of the accumulated physical, cultural and spiritual wisdom of the human race now fits in my coat pocket, but that in addition to fitting the data I can now fit the device required to make use of it. If I had a sufficient set of solar panels into which to plug the charger, I could stow this thing away in case of apocalypse.

Yes, it is true that I can't page through books on this device. It's also true that it doesn't exactly have all the kinks worked out when it comes to picture-based documents like comic books. I really can't say that I liked the price, either — though I do consider the eternal, contract-free, pay-nothing 3G data plan an amortizing factor. Still, on the overall consideration, the Kindle has made my life better in a way that I can't say for any other gadget I own, except possibly the cellular phone.

Eli Gottlieb is a Collegian columnist. He can be reached at egottlie@student.umass.edu.

Katy is well-endowed

Okay, let's get one thing straight: Katy Perry's music is cringe-worthy at its very best. I'd say that's just my opinion, but honestly it seems like a bit more of an unwritten law — I'm pretty sure it's the only thing the entirety of our bicameral legislature fully agrees on. All that being said, this rant has nothing to so with musical aesthetics so, for the moment, I am on Perry's side.

Dave Coffey

Recently, as everyone and their uncle most likely already knows, a scene in the children's show "Sesame Street" featuring Perry as a guest star was controversially pulled from airing in a future episode. The scene in question involves Perry singing a cleaned-up version of her hit song "Hot 'N Cold" with Elmo while running around in a dress-up princess gown. Apparently, the powers-that-be over at "Sesame Street" thought Perry's outfit didn't leave enough to the imagination in the cleavage department, and thus deemed it too inappropriate to air.

I won't patronize the fair readership of The Collegian here. Anyone who reads this has most likely already seen the now infamous scene on YouTube as many times as I have. Judging by the tidal waves of comments on the video, I can't be alone in thinking they sort of made a mountain out of a mole hill on this one.

Don't get me wrong; I'm glad "Sesame Street" is still keeping kids' well-being in mind with their episode content. There is undoubtedly some subject matter that is inappropriate for young children. I don't think there's a person out there who would think it a good idea to send Perry — or anyone for that matter — out there in a g-string and couple of pasties for a sing-along aimed at a pre-school demographic. But a plunging neckline on a princess dress is far from a half-nude striptease.

Believe it or not, they're not exactly concealing some sort of nuclear secret from kids. By the time children are a few years old, I'm pretty sure they grasp that males and females have a notably differing physiological structure. In laymen's terms, this isn't the first pair of breasts any given kid has seen, and this won't be the pair to turn him into a registered sex offender brought to you by the number seven.

But there was never any question of a female Power Ranger suit not leaving enough to kids' imaginations.

Allow me to take you back to a simpler time. The year is 1994, and the dankest show in town was a little production known as Mighty Morphin' Power Rangers. One of the more memorable parts of the show, besides the usual robotic dinosaur brawls between good and evil, was Kimberly, the pink ranger. Just like her male counterparts in the Power Rangers, Kimberly's suit was a snazzy number that fit her in a manner that accentuated her physique (at least as much as it possibly could for space ninja battle armor). Even a colorblind kid could tell which one was the pink Ranger. She was the one with hips and breasts. I don't remember hearing any complaints about the pink Ranger's outfit. Sure, people complained that the show made teenagers kicking people in the teeth look awesome. But there was never any question of a female Power Ranger suit not leaving enough to kids' imaginations.

Does anyone really think these basic concepts of human physicality are or should be kept above children? Perhaps a better question is this: Is this really the worst thing being spewed out at impressionable audiences? Lately I've noticed a particular commercial that seems to air more than the average ad, despite the fact that it's one of the more disturbing, in my opinion. If you've seen it before, you'll know exactly what I'm talking about. The commercial itself is advertising a drug whose closest shot to a respectable description lies in the phrase "male enhancement."

The commercial begins with several people sitting around a conference table, brainstorming how to properly advertise their "male enhancement" product. In the process, they manage to spout off enough painfully obvious sexual innuendo to make Ron Jeremy blush. All of a sudden, a young man bursts into the meeting and apologizes for arriving late. The camera pans down to reveal a young, attractive woman clenched to the man's lower leg, as the man says, "I've been trying to get her off all morning."

I realize this commercial isn't targeted at as young of a demographic as "Sesame Street," but anyone who's seen the ad can clearly tell it's targeted at a similarly impressionable demographic: elder teenagers and young adults. I haven't heard one peep of official grievance about this commercial or any of the other similar ones like it all over television.

So, according to the logic of the higher-ups who are filtering information down your throats via the boob tube, here's the consensus: If you want a fulfilling, adult relationship, you're gonna need a pill so as to sustain a four-hour superhuman erection.

But whatever you do, don't tell your kids that Katy Perry has breasts.

Dave Coffey is a Collegian columnist. He can be reached at dscoffey@student.umass.edu.

Ed/Op presents the S.P Sullivan Memorial Prize for Haiku Writing

MEMORIAL PRIZE FOR HAIKU WRITING

E-mail us your haikus! The winner each week will be published and receive a prize.

S.P. Sullivan

A haiku is an old form of poetry from Japan, originating from around the 17th century.

In English, haikus have usually been 17 syllables on three lines — five, seven and five.

S.P. Sullivan, former Collegian Managing Editor, was a major proponent of the haiku.

Our second winner!

UMass student

ANNA TON

Leaves fall like snowflakes
Amber and crisp, they float down
Onto wet asphalt

–Anna Ton

Congratulations!

Come down to the newsroom to claim your prize.

LETTERS *to the* EDITOR

Editorial@DailyCollegian.com

Letters to the editor should be no longer than 550 words and can be sent to editorial@dailycollegian.com or submitted online at dailycollegian.com. We regret that, due to space constraints, not all letters will be printed, but can be found online.

A WARNING TO ALL STUDENTS

Dear Editor,

Hi, my name is Jaron Lewin-Berlin and I'd like to warn people about something that could get them in trouble. I had been assigned court ordered community service hours to complete by May 13th. I finished them at the Northampton Trial Court Community Service Program on time and they informed me they were faxing them in to my courthouse.

I went along with my daily life until one day in the visitors' lot I got pulled over, handcuffed and told I had a warrant out for my arrest. I spent three hours in the University of Massachusetts police station and was booked, shipped out to Northampton and told I hadn't completed my community service.

The community service program had forgotten to fax my information in to court.

Due to this accident, I had to deal with being arrested on campus, going back home to court to give them papers that proved I had completed my community service on time and having my name in the police log for being arrested for having an active warrant. I've been imprisoned, inconvenienced and embarrassed because of a mistake made by an official trial court community service program.

I learned a lesson, however. Simply because something is official and they say they are going to handle your case doesn't mean that everything is going to go through as planned. I learned I have to take responsibility to make sure everything is taken care of properly because sometimes paperwork falls through the cracks.

The clerks at the courthouse told me that this kind of thing "happens sometimes." It is not an isolated incident. Anyone who has community service to do for any reason should double check and be 100 percent sure all their information goes to the right place. Don't make the same mistake I did.

Jaron Lewin-Berlin
UMass Student

A GEORGE PARKS STORY

Dear Editor,

At the 1989 Commencement, I was one of the Faculty Marshalls directing seating on the field in the stadium. My role was to help seat the faculty, with the Distinguished Teaching Awardees to occupy the front row of that section. They were to stand and be honored when called on by the chancellor later in the ceremony.

Who is this young looking guy in cap and gown about to take a seat there? I asked myself. He is obviously in the wrong place. Probably a graduating senior, I decided. He looked so young. I addressed him, "These seats," I said, as authoritatively as I could, "are reserved for Distinguished Teaching Recipients."

He replied, somewhat sheepishly I thought, "I'm one of them."

It was George N. Parks, all of 36 years old at the time and even more surprising, only 24 years of age when he took over the Band in 1977. 24-years-old. I apologized for my error. He looked so young, and in my memory of him, still does. He looked so young.

Dark Star Orchestra resurrects Dead

By Christian Paul Euvrard
Collegian Correspondent

Dark Star Orchestra has been channeling the Grateful Dead since 1997 when founding member John Kadlecik contacted keyboardist Scott Larned with a concept to perform complete Grateful Dead shows song-for-song from their extensive catalog of live performances. However, Dark Star Orchestra isn't your ordinary cover band according to one of two Dark Star drummers, Dino English.

Dark Star has been praised for their continual dedication and performances in honor of the music of the Grateful Dead. Rolling Stone hails DSO for "their fanatical attention to detail," going on to compare its performance of the Grateful Dead classics to the way an "orchestra interprets music of classical composers. The composer spirit is derived and channeled as the players capture the exctitement and innovation of the original performances and compositions."

The group has been known for playing whole Grateful Dead shows, front to back, but English said, "We make up our own set list about a quarter of the time. We will mix up the song selection by dropping in Jerry Garcia Band material and playing different styles of songs that were never played in the same show. We do them more of our own way, coming from the perspective of having learned all the different ways the Grateful approached the material."

As a result of their long career together, the group views itself as a close family, with a shared love for the Grateful Dead and music in general. English said that "playing in Dark Star Orchestra and working as a crew member — is kind of like riding a bucking bronco. You hop on and ride for dear life for as long as you can until you get thrown off — your life path takes you elsewhere."

John Kadlecik, former guitarist and part founder of Dark Star Orchestra, ended up taking a different life path when he was offered by Phil Lesh and Bob Weir to join a group now named Furthur in 2009.

Through Dark Star Orchestra's years of touring together they have had the pleasure of working with numerous artists such as Bob Weir, Billy Kreutzmann and Donna Godchaux of the Grateful Dead. Additionally, the group has performed with Warren Haynes at this past Mountain Jam Festival, Mike Gordon and Jon Fishman of Phish, as well as members of Little Feat, Keller Williams, and Yonder Mountain String band. "The list goes on and it's a ton of fun to collaborate with all these gifted musicians," English said.

English has been working on a number of projects outside of Dark Star, including "an electronic/dub/drum groove-style album," and an original rock band named "Vitamin A."

As with the other artists in the group, it is easy to see that the collective of musicians that makes up Dark Star Orchestra is more than just a group that covers Grateful Dead performances. DSO is a group that has longevity and talent that extends beyond Grateful Dead set lists. As English would put it, "we have all come together to play an interpretation of the musical parts of each Grateful Dead member, not to act like, look like, or pretend to be a Grateful Dead member. It's all about the music for each one of us."

Look for "Run Mary," a song co-written with Robert Hunter, the principal lyricist of the Grateful Dead, with the members of the Dark Star Orchestra, as well as future and present projects in the mix by all members.

When asked what to expect at the show English had this to say, "The only hint I can tell you is that we will play Grateful Dead music live to the best of our ability and that if you come to the show, you will most likely have a real good time."

Dark Star Orchestra will be performing at the Calvin Theater in Northampton on Thursday, Sept. 30 at 8 p.m.

Christian Euvrard can be reached at ceuvrard@student.umass.edu.

Grateful Dead cover band, Dark Star Orchestra, looks to play more than just covers as it promises a good time at its performance tonight at the Calvin Theater at 8 p.m.

Born Ruffians kick off 31-day US tour

COURTESY PHOTO/THIS RINGS TRUE

Canadian band Born Ruffians sweeps into Iron Horse today to kick off its first stop on its "31 shows in 33 days" US tour.

By Lauren Spano
Collegian Correspondent

In support of their brand new album, "Say It," the Born Ruffians are kicking off their 31-day tour across the United States, beginning tonight, Sept. 30, at the Iron Horse in Northampton. They will be accompanied by fellow Canadian indie-rock bands Winter Gloves and First Rate People.

Formed in 2004, in Midland, Ontario, Born Ruffians is comprised of Luke LaLonde (vocals/guitar), Mitch Derosier (bass) and Steven Hamlin (drums). After promoting a self-titled debut EP in 2006, they released their first full album in 2007, labeled "Red, Yellow & Blue."

Having toured with diverse acts such as Franz Ferdinand, Peter Bjorn and John, Caribou, Girl Talk, and Tokyo Police Club, Born Ruffians is known for its dynamic stage presence. Their music is urgent yet unpolished, like the earliest stages of many rock ensembles, giving off charmingly lo-fi, passionate, even drunken effect to every song.

After their first major tour in 2008, Born Ruffians appeared in the popular British teen drama "Skins," where they played the single "Hummingbird" in a club. Their songs have been featured in multiple British and Australian ad campaigns, and in 2009 the band appeared in an episode of "Nirvana the Band," a comedy web series, where they played themselves.

With the album "Red, Yellow & Blue" already having been nominated for the eighth Annual Independent Music Awards for Pop/Rock Album of the Year, it is clear that the Born Ruffians, while young, is a driving force to be reckoned with. Tonight is, for all intents and purposes, the beginning of Born Ruffians' first major United States Tour, boasting "31 shows in 33 days" on their website, BornRuffians.com.

The show starts at 10 p.m. and tickets are $10. For those who love a raw, ardent sound and an energetic performance, be sure to come down to the Iron Horse tonight to show the rising Born Ruffians a little Massachusetts hospitality for their first evening in the United States.

Lauren Spano can be reached at lspano@student.umass.edu.

Wii revitalizes nostalgic games

By Nick O'Malley
Collegian Staff

If there is one thing that will almost always have a market in the video game industry, it is nostalgia. There is a reason that Mario and the Final Fantasy games have been remade dozens of times with positive sales.

So with the introduction of the Virtual Console feature to the Nintendo Wii, the Xbox Live Arcade and PlayStation Network, manufacturers are starting to cash in on it.

Of the three networks, Virtual Console for the Wii certainly offers the most in terms of the nostalgia factor, particularly with its NES games, with a game library that stretches back to the late '80s. However, not all games are created equal, as a Mega Man game is certainly a better purchase than Princess Tomato in the Salad Kingdom.

The Virtual Console, which was introduced at the initial release of the Wii, allows owners to download older games from the Nintendo library, including games from the NES, SNES, Sega Genesis and arcade in exchange for Wii points, which cost $1 for 100 points. Most NES games go for 500 Wii points.

Here are the NES games for Virtual Console that are bonafide classics, quality picks and games you should avoid.

The Classics

Super Mario Bros. and Super Mario Bros. 3

Out of all the games that now constitute the behemoth that is the Mario franchise, these two remain the foundation, and are still two of the best.

Super Mario Bros. is simple and difficult, but remains one of the purest video game experiences one can find nowadays. The best part of the game is the fact that almost anyone can pick it up and just start playing immediately. It's good, even in 30-second bursts when you are bored. That, or a marathon stretch to try and finish the game.

If you are looking to play a full Mario game though, Super Mario Bros. 3 is the better buy. Pretty much everything that made the original good is improved in the third installment.

Even against today's platform standards, Mario Bros. 3 has great depth, level variety and replay factor. Eight worlds, multiple power-ups, wicked sweet levels, great mechanics, and a solid challenge. This game is universally considered one of the best of all time and has everything going for it.

The Legend of Zelda

This game is best played for the nostalgia factor and the challenge. There is no in-game map, no direction of where to go or what to do and pretty hard. It is not necessarily as good as the latter ones, but still fun to play at least once.

It is only really worth the five bucks for fans of the Zelda series. For those who are unfamiliar with the series, there's not much there.

Metroid

Very similar to Zelda. By itself and on today's standards, the game is hard and boring. It is a worthwhile ride for people craving nostalgia and fans of the series. People that like Metroid should buy Metroid.

Quality Buys

Ice Hockey

This game is everything that is good in sports and video games. The concept is simple: there are little guys, medium guys and big guys. The player picks a country, four players of any mix, gets a goalie and goes.

It's as much a pick-up-and-play sports game as there ever has been, like a Super Smash Bros. as a sports game. The gameplay is simple, the games go by quick, there are silly animations and it just plays fun.

Of all the games you can buy for five bucks, Ice Hockey is among the best. It sucks you in quickly and keeps sucking you back in like a good addictive online flash game. It also takes all the good things about hockey and makes them better. There are a lot of goals, it is fast-paced, there are as many fights as you want and there is no offsides.

Although, it still has icing. Stupid icing.

River City Ransom

A goofy mashup of simple beat-'em-up and RPG elements, River City Ransom is as funny as it is fun to play. Your character's girl has been kidnapped by "Slick" and you must fight through hordes of River City High's gangs such as "The Generic Dudes," "The Frat

See NES on page 6

Greg Giraldo dead at age 44

(MCT)

TMZ.com has reported that comedian Greg Giraldo, 44, died yesterday after being hospitalized five days earlier for a drug overdose. Giraldo, a stand-up comedian, was known as a judge on "The Last Comic Standing" and for his work on Comedy Central's roasts.

NES' best and worst

NES from page 5

Guys" and "The Home Boys."

The game's weapons list includes chains, brass knuckles, trash cans and pipes, making it a pleasure to take on each gang. While difficult, the game provides a good challenge for those looking for a solid game, even by today's standards.

What makes the game memorable, though, is its humor. Defeated enemies yell absurdities like "Barf" and "Chill out, Rambo," and most things can be picked up and thrown at other things, which is always fun.

Tecmo Bowl

Another easy-to-play sports game that anyone can jump right into. Tecmo Bowl, the game that was notorious for featuring a nigh-unstoppable Bo Jackson on the Oakland Raiders, is about as simple a football experience as there is. There's no learning of playbooks or deciding between a 4-3 and a 3-4. You just pick a play and decide whether to run it or chuck it.

It's the essential arcade football game that takes everything football games try to do nowadays and makes it simple and fun. It's harder to screw up in this game but harder to master, much akin to Ice Hockey, but not as fun.

Games to Avoid

Final Fantasy

As a big fan of the entire franchise, I personally love this game. But there's no reason to buy it on virtual console. Since the game's official release, the games been remade into the much better, easier version Final Fantasy: Dawn of Souls for the Gameboy Advance that is devoid of the number of issues that are present in the original, and also comes with a remake of Final Fantasy II.

By today's standards, the original Final Fantasy is not very playable. It's far too difficult to be much fun, except for those who enjoy random encounters for hours on end to be able to finish it.

The gameplay is sketchy, as attacks that were aimed at defeated enemies will just go as misses. Some spells in the game just don't work.

By the time you would finish this game, you could apply for job, get it and work there long enough to earn the cash to buy the remake for Gameboy Advance.

Of course, if you enjoy leveling up by killing wolves for six hours, never being able to save and buying potions one-by-one, it's great for nostalgia.

Teenage Mutant Ninja Turtles

Oh, it seems like a good idea, doesn't it? No. Don't do it. This game isn't very good.

It is too hard to be fun and it is not well designed. There is a weird world map element that is clunky, but it is not as bad as the actual platforming part of the game, which is involves constant dying.

No. Stop it. Go buy some pizza for that five bucks.

Zelda II: The Adventure of Link

Similar to the original Zelda, this game is hard. The main difference is that this game is harder, not very fun, doesn't fit in at all with the series and lacks the nostalgia that makes the original good.

Of course, there's the fact that the programmers decided that the sequel to the original needed to have RPG elements and be a side-scroller. In essence, Zelda II just is a crappy platformer that features Link. Yay.

Pac-Man

If you want to play Pac-Man, go to a computer, Google "Pac-Man" and then proceed to play Pac-Man. There is no need to pay money for this game anymore.

Nick O'Malley can be reached at nomalley@student.umass.edu.

Time's a'wastin'

Safety first: detectors are a must

KATYROSE DRIAR/COLLEGIAN

A firefighter displays how to properly use a smoke detector during a safety presentation. Students are encouraged to install both a carbon monoxide and a smoke detector in their rooms.

By Tyler Manoukian
Collegian Correspondent

As the new school year gets underway, the Canadian Standards Association International and the University of Massachusetts Police Department have provided students with some safety tips to get through the upcoming year.

"It is important for students to take safety precautions on campus to help protect themselves and those around them," said Anthony Toderian, a product safety expert of CSA International.

CSA International is an accredited certification and testing program with over 90 years of experience. Their experience allows them to update tips and suggestions continuously in order to avoid accident and injury.

Dorm Safety

CSA primarily advises students to make sure a working carbon monoxide alarm is installed near your room. Carbon monoxide is a very lethal gas, compounded by its state of being odorless and colorless. Termed the "silent killer," the gas kills 500 people annually. Symptoms are easy to misdiagnose, and include nausea, dizziness, headaches and fatigue.

Smoke alarms are equally important. They should be tested monthly and placed outside all sleeping areas. Make sure that the alarm has been certified by an accredited organization.

Electrical safety is commonly overlooked in a college setting with so many students plugging in micro-fridges, sound systems, gaming systems, and flat screen televisions. With students looking to bring the comforts of home into their dorms, electrical safety cannot be ignored.

"For many students, this is the first time they are living away from home and setting up their rooms and apartments with the electrical items they need, often in small spaces," Toderian said.

CSA suggests extension cords not be used as a permanent connection. Extension cords should be temporary and not used to link with power strips. Cords should be single use and long enough to reach without stretching.

It is important to follow all recommended safety procedures. Make sure lamps and lights and other appliances have no frayed wires. This can cause an electrical spark, which could cause a fire. Avoid hanging decorations near exit signs, sprinklers, or extinguishers - these could hinder your vision and safety.

Beware Counterfeits

Counterfeit electronics are another major detractor of student safety. These can include microwave ovens, mini-fridges, MP3 docks and other common expensive devices. Counterfeit products are usually missing certification marks.

Look for unclear labels, misspelled words and a product that is light and flimsy. If the iPod does not look like a product Apple would sell, be aware of suspected counterfeit. Products without brand labels, or trademarks with return addresses are generally items to avoid.

Campus Security

The UMass Police Department also recommends additional safety tips that could increase the chances of student safety. For those uncomfortable with the thought of walking home alone, UMPD offers a walking escort service between the hours of 7:00 p.m. and 3:00 a.m. For the escort service, you can call 413-545-2123. Students are also encouraged to take the bus after hours, when it is too dark to walk alone.

Identity theft on the college campus is a real issue. Fraudulent transactions are often a by-product of this crime. Never give out any personal information to someone who you do not know or seem suspicious. Keep important information, such as your UMass Student ID number, passwords and PINs to yourself.

Precautionary Programs

One of the most significant safety steps the UMPD have taken is the Like it, Lock it, Keep it program, which encourages students to always lock their doors when leaving their room.

Operation Identification is another program that "etches" an identification number into your personal property. In the event the item is stolen and recovered, the item can be more easily identifiable with the owner. Students can call 413-545-2121 between 7:00 a.m. and 3:00 p.m. Monday through Friday for more information about the service.

While you can not prevent bad things from happening, you can help reduce your chances by keeping your safety your priority.

Tyler Manoukian can be reached at tmanouki@student.umass.edu.

'180°' soundtrack stands out even without documentary

By Cameron Stenger
Collegian Staff

Although the film itself may have flown under your radar, the soundtrack to "180° South" has commanded attention on the indie scene with its ensemble cast of famous musicians.The lineup includes James Mercer of the Shins, Mason Jennings, Jack Johnson, and, most notably, Modest Mouse's front man Isaac Brock, under the highly-acclaimed alias Ugly Casanova.

The presence of Ugly Casanova on the album may be surprising to fans, as it has been nearly 12 years since his only release, "Sharpen Your Teeth." To find out that Brock has decided to quietly resurface this musical persona is like finding a present under the Christmas tree when it's already six months past Christmas – why the tree would still be up is beside the point.

The album starts off with a brief, but powerful, ambient instrumental piece reminiscent of "Explosions In The Sky" but with a Modest Mouse flare. The following tracks lead into a more linear song craft and are mostly contributed by Ugly Casanova. The music is familiar and easy on the auditory palette, but behind the music you can hear the turmoil and the growth that comes with being a person, which is a very fitting addition to the documentary.

The other artists enhance the moving quality of the film, emphasizing the hero's struggles on his journey to Patagonia. Particularly, Mason Jennings's song, "Machines" is the most powerful song on the album. With its swooping electric guitar, traditional folk rhythms and beautiful vocal melodies and lyrics, the song takes you on a journey of self-reflection and melancholic appreciation.

As a whole, it is a perfect soundtrack – you do not even need to see the movie to call it perfect. Just lay down, close your eyes and give it the close listen to it deserves.

Cameron Stenger can be reached at cstenger@student.umass.edu.

No. 8 UMass looks for conference win

FOOTBALL from page 10

The Tigers allow more first downs (80) than any team in the CAA and are last in the conference in rushing defense (200 yards per game).

Minutemen running backs John Griffin and Jonathan Hernandez are ranked third and fourth in the conference in rushing respectively, after combining to rush for 188 yards last Saturday. Griffin ran for 132 yards and a touchdown on 23 carries while Hernandez had 56 yards on 19 carries, scoring two touchdowns. It was the first game this season that the Minutemen have failed to reach 200 yards rushing.

The Minutemen enter Saturday's game first in the CAA in total offense (461 yards per game) and tied for second in scoring offense (30.25). They are first in the NCAA in first downs gained (100) and second in time of possession (36:43 per game).

Morris has put an emphasis on stopping unforced errors. His team is seventh in the conference in penalties, averaging eight for over 70 yards per game.

In last week's game, two touchdowns were called back on UMass penalties, as well as another which hindered a scoring opportunity.

"When you go on the road, it's going to be hard to play and you can't do things that are going to hurt," Morris said. "That's what happened on Saturday. They really get magnified and can cost [our team] a ballgame."

Kyle Havens threw two interceptions against Stony Brook after throwing only one in his previous three starts this season. He finished the game 19-for-30 for 255 yards.

The Minutemen defense, led by the opportune Tyler Holmes, has forced six takeaways (two fumbles, four interceptions). Holmes has three-of-four UMass interceptions, including one to clinch last week's win at Stony Brook and another that sealed the season opener against William & Mary. Holmes believes that his ability to make plays on defense has to do with luck and preparation.

"It has a little bit to do with both," said Holmes in an interview with UMass Media Relations after the game against Stony Brook. "I guess I always seem to be in the right place at the right time. My saying is that, 'When you work hard, you make your own luck and the good luck comes to the well-prepared.'"

The Minutemen face a Tiger offense that features a rotating quarterback system, with Chris Hart expected to be the starting signal-caller. He averages over 123 yards per game with seven touchdowns and is the team's leading rusher with over 60 yards per game.

Bart Blanchard will spell Hart under center with over 116 yards per game passing, completing almost 70 percent of his throws for an efficiency rating of 127.4 in two games.

The Tigers come off of a 24-10 loss at Columbia for their second-straight loss. Towson's leading receiver Hakeem Moore finished with five catches, 110 yards and a touchdown.

The game will be played under the lights at Johnny Unitas Stadium in Towson, Md. Kick-off is at 7:00 p.m.

Dan Giglioti can be reached at dgiglioti@student.umass.edu.

MAXWELL SPARK/COLLEGIAN

Tailback John Griffin avoides a tackle against Michigan earlier this season. Griffin has helped the UMass running game.

MAXWELL SPARK/COLLEGIAN

The Minutemen take the field in their home opener against William & Mary earlier this season. After narrowly defeating Stony Brook Saturday, UMass heads to Towson this week.

Havens controlling ball for UM

OFFENSE from page 10

the offensive line, quarterback Kyle Havens has been a significant factor in controlling the ball. The senior leads the CAA in passing (248.2) and total offense (252.2), while throwing five touchdowns. Havens hasn't forced the ball either, committing only three interceptions, all coming in the last two games.

On the receiving end, Havens' passes main target has been Anthony Nelson, who leads UMass with 25 catches.

"Anthony has been a great addition to our team and to our offense as well," Morris said. "He's a senior, very mature, very strong academically; he has a 3.8 GPA in economics. We got the full-package kid that we went out to get when Hofstra unfortunately dropped their program as we all know."

The senior transfer leads the CAA in catches and ranks second in receptions per game with 6.25 behind New Hampshire's Chris Jeannot. Nelson has at least five catches in every contest this season, with his season-high eight catches and 103 yards coming in the win against Holy Cross.

"He's a guy who's going to get the ball from here on out because he's one of those guys you can rely on," Morris said. "He's getting along great with Kyle, [as a] matter of fact, they're roommates and he's really stayed in tune with the offense and those guys have hit it off."

Heading into their matchup against Towson, the Minutemen will continue to rely on their ground game. The Tigers defense pressures the quarterback often, as defensive end Matt Morgan leads the CAA in sacks with three.

"They're very athletic on defense, they run well and they'll give you a different group of fronts with different zone pressures with it," Morris said. "They're not afraid to bring those defensive backs and the pressure is awesome."

Griffin and Hernandez will face a Towson defense which ranks last in the CAA in rushing defense, allowing 200 yards per game, and also in red zone defense, allowing 15 touchdowns and four field goals in 19 trips.

After inclement weather stalls season-opener, tennis team opens '10 campaign vs. Rams

By Scott Cournoyer
Collegian Staff

The depth of the Massachusetts tennis team will ultimately decide their future this season and UMass coach Judy Dixon expects all hands on deck now that the fall season is underway. That depth will be tested when the Minutewomen face Fordham Friday at home after their home opener was postponed Thursday against Holy Cross due to inclement weather.

"All of these girls are coming together quickly in a real positive way, and that will be necessary to compete against some of the schools we have coming up," Dixon said.

Although the fall season is still young, Dixon believes that the previous weekend's Eastern Collegiate Invitational was the perfect opportunity to evaluate how the Minutewomen will compete match-to- match for the near future, as UMass' opponents compared favorably to upcoming rival schools.

"We've got a bunch of girls here who played well and I expect to see them build on this weekend going into the matches coming up," Dixon said.

Last weekend provided insight into the projected singles lineup against upcoming opponents. UMass saw two of its younger players, last year's A-10 All-Conference first team player, sophomore Julia Comas and freshman Jessica Podlofsky come away with single's tournament championships.

"Julia and Jess played great. They never gave into the opponent during any match and played hard until the end," Dixon said.

The singles lineup starts at the top with highly-recruited freshman Yuilana Motyl, who didn't have a sufficient chance to compete at the tournament, losing in the second round of the Flight A bracket after receiving a first round bye. Comas is penciled in as the No. 2, followed by a close battle between senior Candynce Boney and freshman Clara Matias for the No.3 spot. The No. 5 spot is currently still up for consideration between a couple players, notably senior Kaitlyn Carpenter, but very soon might be closed for discussion after Podlofsky's performance over the weekend.

"We're still working on some things in terms of lineups, but I feel confident with whatever we do will be the best for everyone," Dixon said.

Doubles play, a crucial factor of collegiate tennis, is still in the process of being constructed for UMass. The weekend provided some assurance going into Fordham in terms of pairings, as Carpenter and sophomore Jocelyn Providence reached the Flight B doubles final, defeating four opponents along the way.

"It was good to see both of them work well together. They communicated all the time, and that's what it takes to be successful in doubles matches," Dixon said.

Although there are some highly-talented individual players on the UMass roster, the teamwork and cohesiveness of returning players and underclassmen will be the formula for success this year.

"You can't win a collegiate event against another school alone. It takes everyone doing their part," said Dixon. "We will make some adjustments along the way, but this is the group we're going to compete with, and it seems like things are going well so far."

Scott Cournoyer can be reached at scourney@student.umass.edu.

MAXWELL SPARK/COLLEGIAN

Members of the tennis team watch a match last season. After incliment weather postponed their season-opener against Holy Cross Thursday, the Minutewomen will host Fordham to open their 2010 campaign.

Dietz, Minutewomen open fall season

By Stephen Hewitt
Collegian Correspondent

From a casual sports fan's perspective, the Massachusetts women's rowing team doesn't receive near the amount of recognition as some of the more popular sports on campus like hockey, basketball or football.

But at a closer glance, it's hard to dispute that the Minutewomen are one of the most successful programs to represent UMass athletics in recent memory.

Winners of 13 of the last 15 Atlantic 10 championships, UMass has been guided in the waters by a slew of All-Americans and Olympians over the years, as well as National Rowing Hall of Famer, head coach Jim Dietz.

Dietz, who boasts one of the most impressive resumes in the country, has molded the Minutewomen into one of the most consistently successful crews in the nation, producing 54 gold medals in 14 league championship appearances while being honored seven times as A-10 Coach of the Year.

This year, Dietz and the rest of the Minutewomen hope to continue that storied success and build off of the team's accomplishments in the United States Rowing Collegiate Championships this past spring.

At the national regatta, which was held on Lake Mercer in N.J., the site of USRowing's National Training Center, UMass placed high in all of its races, including first in the Lightweight 8, Lightweight Single and Lightweight Double.

The Minutewomen return most of their crew members who participated on Lake Mercer, including seniors Alexandra DiMatteo, Elizabeth Euiler and Chelsea Wakeham, all of whom competed in the USRowing Under-23 World Championship Trials this past summer.

The leadership and experience of those three seniors will be instrumental in guiding UMass, not only on a surge for its 14th A-10 championship, but also for its novice crews, which are annually composed of mostly freshmen and an abundance of women with little-to-no rowing experience.

Despite a successful 2010 spring, the Minutewomen were still left with a bitter taste in their mouths after being defeated by Rhode Island by 12 points in the A-10 Championship.

UMass will be hungry to regain their crown and are hopeful that junior Amanda Doolin, senior DiMatteo and Megan Donovan, who, as a graduate student will be able to participate again this year, bring their All-Conference abilities to the table for another championship season.

The season begins this weekend as the Minutewomen host the UMass Invite in Amherst at 8 a.m. on Saturday before hitting the road to Derby, Conn. the following weekend to compete in the Head of the Housatonic.

Steve Hewitt can be reached at shewitt@student.umass.edu.

Minutemen march to Towson Sat.

Morris and Co. return to CAA play on the road against Tigers

By Dan Gigliotti
Collegian Staff

The No. 8 Massachusetts football team travels to Maryland to play Towson in its third straight road game, with a focus on remaining undefeated against Colonial Athletic Association opponents.

The Minutemen (3-1, 1-0 CAA) come off of a 26-21 win at Stony Brook last Saturday. UMass forced a late turnover to seal the win as their running backs led the way offensively.

UMass has climbed in the polls every week this season and is currently at its highest ranking since Sept. 8, 2008, when they were ranked No. 3. Five teams in the CAA join the Minutemen in the top eight.

UMass won both meetings all-time against the Tigers (1-3, 0-1 CAA), most recently in a 36-13 win at McGuirk Stadium in 2007.

After beginning the season with a win against William & Mary, then playing three out-of-conference games against Holy Cross, Michigan and Stony Brook, UMass coach Kevin Morris is noticing not only a shift in the schedule, but in his team's focus as well.

"This is back into league play and every game is critical," Morris said. "Every game in the league is going to be extremely difficult, especially on the road."

UMass' strength is its offense, which will matchup against a Towson defense ranking last in the conference in scoring defense (40.8 points per game) as well as eighth in total defense (377.2 yards per game).

Tailback Jonathan Hernandez looks to make a cut against Holy Cross this season. Hernandez and UMass take on Towson Saturday.

Hernandez and Griffin still running hard through season

By Jay Asser
Collegian Staff

If there was any doubt before the start of the 2010 season that the No. 8 Massachusetts football team would rely heavily on the run, there is none now.

The formula of being a run-first team with the ability to keep defenses honest with the play-action has fueled the Minutemen offense to an impressive start.

Through four games, UMass (3-1, 1-0 Colonial Athletic Association) has averaged 212.8 rushing yards per contest, ranking third in the CAA behind Delaware and Villanova. The duo of John Griffin and Jonathan Hernandez has bolstered the backfield, allowing the Minutemen to use fresh legs late in games.

Griffin has 383 yards and four touchdowns on 79 carries, averaging 95.8 yards per game. Hernandez's numbers are nearly identical, with the junior piling up 373 yards on 85 carries and six scores.

The only game where the Minutemen didn't gain at least 200 rushing yards was in their most recent win against Stony Brook. Griffin, however, still carried the load on the ground with 132 yards on 23 chances.

"We definitely leaned on the running backs and again it came through in fine form," UMass coach Kevin Morris said in a teleconference.

As a result of their strong running game, the Minutemen rank first in the CAA and second in the country in time of possession with an average of 36 minutes, 43 seconds per game.

Along with Griffin, Hernandez and

Draws becoming constant as UM still looks for second win

By Steve Levine
Collegian Staff

For most collegiate soccer teams, overtime periods are something of a rarity. They are exciting, tense, urgent and generally infrequent — but not for the Massachusetts soccer team.

Upon tying Dartmouth (4-2-1) at Rudd Field on Wednesday, the Minutemen have had four of their eight games decided in double overtime. With a 1-3-4 record, UMass has as many overtime ties as it does wins and losses combined.

UMass forward Chris Roswess has never seen anything like it.

"It's getting kind of frustrating now that we can't just pull out a win," Roswess said. "It's definitely the most overtimes I've been in [this early in a season]."

The overtime periods have added up to over 90 minutes — the same amount of time in a full regulation game.

"It takes a toll on our bodies, but we're pretty fit," Roswess said. "It doesn't really affect us that much, because we can run all day."

"I think it helps us get ready for the Atlantic 10," UMass coach Sam Koch said, citing his team's resilience. "It's good extra work. There's nothing like the game to face situations and to test ourselves."

The Minutemen have been tested a lot so far this season, especially in overtime. According to Roswess, UMass' game plan shifts from a standard, balanced attack to a more defensive-minded approach once overtime begins.

"Coach definitely stresses defending, because we don't want to concede a goal," Roswess said. "We'd rather have a tie than a loss. We try to stay compact, make sure we don't concede, then counter and try to get a goal that way."

For the most part, UMass will keep its outside back in a defensive position throughout overtime instead of letting him make a run into the attacking part of the field — a common practice during regulation.

"We try to do that during the regular 90 minute game," Koch said. "In overtime we let the midfielders and forwards do their jobs and make sure that we stay organized in the back with the idea that we don't want to be unbalanced and give them an easy opportunity. [In overtime], an outside back can go forward only if he has a really clear, open opportunity to do it."

In their current five-game homestand, the Minutemen are 1-2-2. UMass breeds confidence at Rudd Field, but understands that their competition has been more than challenging. Every team the Minutemen have welcomed into their complex has a winning record.

"We've had a tough run against very good teams," Koch said. "I think this team is better than their record, but that's the record we have. You can talk all you want, but bottom line is we've still won one game and have lost three [and tied four]. I think we're a good team, but we have to start proving it in the win column."

On Saturday, Siena will visit UMass for a game at 1 p.m. It is the final game the Minutemen will play before their conference schedule begins on Oct. 8 against Xavier.

"It's bizarre, but we're kind of getting used to it," Koch said. "You're certainly getting your money's worth as [the fans] get an extra 20 minutes each game."

Steve Levine can be reached at slevine@student.umass.edu.

UMass forces Dartmouth to a 1-1 tie after first-half scores

By Herb Scribner
Collegian Staff

The Massachusetts men's soccer team salvaged a point Wednesday afternoon after a tough battle with Dartmouth, tying the Big Green 1-1 in a double overtime match.

"It means another tie to our record," UMass coach Sam Koch said. "We played better. We created chances and we had opportunities. We defended better as a team. We still broke down at times, we still got stretched, which is really what we talked about, because that's when we get stretched it's really easy to move the ball on us."

From the opening whistle, the Big Green (4-2-1) proved to be the better squad with a higher amount of possession and swift passing. The Minutemen (1-3-4) struggled to find the right passes and relied on scrappy counterattacks to push up the field.

The game opened up towards the end of the first half. Off a David Key throw-in, Chris Roswess headed the ball down to the pitch where freshman Tyler Cleverdon nailed a shot into the back of the net for his second goal of the season.

UMass' celebration was short-lived however, as senior Andrew Olsen found the ball just inside the box where he sent in a screamer past goalkeeper Chris Piekos that rested nicely in the back corner of the goal for the Big Green.

The remainder of the first half was dominated by Dartmouth possession with few attacks from the Minutemen. Piekos proved his worth again by getting a hand to New Zealand native Daniel Keat's shot opportunity which was on its way into the netting.

In the second half, the UMass offense ignited for 10 shots. Ben Arikian and Roswess were key players on offense in the second half, with both nearly scoring off chip-shots that barely missed the upper 90 of the goal posts.

"We had a few offensive chances that I think we could have finished," defender Dominic Skrajewski said.

Arikian had the crowd on the edge of its seat continuously throughout the second half. A missed header with four minutes left was just one of Arikian's offensive opportunities on the day, which included seven shots with one on goal.

"Well, it's quite clear that the grounds people need to move the goals, because if he has seven shots and only one on goal, that means the goal is in the wrong place," Koch said.

All jokes aside, Koch admitted that Arikian is indeed a workhorse player and a threat to the opposition.

"He's got so much energy," Koch said. "He's a threat against any team that he goes against. They're definitely worried about him and they need to be. I think some of his passes were a little off today, where if we can tighten that up then he's going to start scoring a lot of goals, so we're looking forward to that."

While Arikian dominated the offensive side of the pitch, Skrajewski was the defensive savior late in the game. With just about two minutes left, Skrajewski blocked a shot opportunity with his shins. He also held off Lucky Mkosana in the final minute, which pushed the game to extra time.

"When we're compact as a group I think we're difficult to play against," Koch said. "Against a team like this, which [Mkosana] and [Keat] are two very good players, we can't let them have time and space to serve balls to them which they were able to do at times. I think the back four did a really good job of holding them. I just don't think they were as effect when we're able to stop those two guys."

In similar fashion as the rest of its performances this season, UMass allowed the Big Green to keep possession in the first period of extra time. Piekos came up big again for the Minutemen, stretching out on two occasions to block off close shots and force the game into a second overtime period.

"Piekos came up huge twice and we really owed Piekos a win today. I think overall we're going in the right direction," Skrajewski said.

The second overtime period saw shared possession between the two teams, with both defenses calming the offensive fire. Neither could break respective defensive units and the game ended in a draw.

Town cracking down on keg culture

Amherst imposes stiffer penalties on bylaw violators

By William Perkins
Collegian Staff

Students and residents in Amherst who choose to carry open containers, unlicensed kegs or hold raucous gatherings this year may have to open their wallets up a bit wider.

Amended regulations to the town's general by laws have increased the fines for offenses concerning unlawful noise, possession of open alcoholic containers on public ways and possession of kegs without a proper license.

These new stipulations, which were adopted at last May's Town Meeting by a majority of Amherst's roughly 260 Town Meeting members, flatline the fines to $300 per offense. Previously, fines for some of the offenses were as low as $50 and as high as $300 for repeated violations.

Amherst Chief of Police Scott Livingstone said he is hoping that the increased fines will deter residents and students from violating the regulations.

"It's a little too early to tell," Livingstone said of the desired effect of the increased fines, noting that the school year is just getting into full swing, "but time will tell."

The wording for the amended regulations, Livingstone said, was written in cooperation with the Campus and Community Coalition to Reduce High-Risk Drinking, an organization comprised of community and school members based at the University of Massachusetts. Neighboring towns Hadley and Sunderland have adopted regulations similar to those of Amherst, he added.

Before this year's changes, fines in Amherst's bylaws had remained relatively stagnant, Livingstone said. The maximum fine one previously had to pay for carrying an open container on public property was $50, and the fines for making excessive noise or carrying an unlicensed keg ranged from $100 to $300 with the latter fine only applying to repeat offenders.

Three hundred dollars, Livingstone added, is the maximum fine that municipalities in Massachusetts can charge for such offenses.

In order to remain compliant with the regulations, students and residents who intend to possess kegs must seek and be granted a license from the town. People must also refrain from making excessive noise – which includes playing loud music, shouting or yelling during the nighttime, and having a rowdy pet. Students and residents must also not possess open containers of alcohol on any public ways – which include streets, sidewalks and school grounds.

Livingstone reiterated his point that his main goal with the new stipulations is to discourage the unlawful behavior from occurring.

"We are really hopeful that [the increases in fines] will have some deterrence," Livingstone said.

While many community members agree with Livingstone's sentiment, the consensus among a handful of UMass graduate students wasn't quite as optimistic.

"I don't think it's going to stop anyone," said Jason Heuer, a first-year graduate student.

Jasmin Curtis, also a first-year graduate student, agreed with Heuer. But Curtis, who also completed her undergraduate studies at UMass, said she will wait to see if the outcome does change.

"We'll see what happens," she said.

William Perkins can be reached at wperkins@student.umass.edu.

PHENOM plans stop at UMass during six-day march toward State House

By Sam Butterfield
Collegian Staff

Students, faculty, staff and other parties supporting public higher education will leave from Berkshire Community College Saturday on a six-day, 100 mile march across the state to advocate for greater funding levels for public higher education. The protesters will stop by the University of Massachusetts campus around 6 p.m. Sunday.

The march will culminate Thursday, Oct. 7 with what a Public Higher Education Network of Massachusetts (PHENOM) release called "a huge rally" at the State House in Boston. October 7 has been designated a National Day to Defend Public Education, and similar rallies will be taking place across the country.

Marchers will hold events at Berkshire Community College and Westfield State before arriving at UMass Sunday. Upon their arrival, there will be an informal dinner held at Bartlett Hall. The next day, UMass will host a send-off party for the marchers at 8:15 a.m., with various local figures speaking on their behalf, including State Sen. Stan Rosenberg, State Rep. Ellen Story, SGA Speaker Modesto Montero, and president of the Massachusetts Society of Professors Randall Phillis.

In the Thursday release, various individuals affiliated with Massachusetts' higher educational system expressed concern about funding and support for public higher ed.

"I am walking because I'm concerned about the future of the Commonwealth as we continue to divest from public higher education," said Mickey Gallagher, Higher Education Consultant with the Massachusetts Teachers Association and an alumna of UMass Amherst. "Privatization of this essential public good results in an education system dependent upon the goals and aspirations of private entities."

"I am walking because education is very important to me," said Manuel Pintado, a student at Holyoke Community College and UMass Amherst in the release. "Seeing us marching together will show that education should be affordable for everyone no matter what color, race, creed or age."

Popular alcohol-energy drink hybrids drive school adminstrators 'Loko'

The Villanovan
College News Network

With the onset of the fall semester came the emergence of Four Loko – a new alcoholic energy drink that University administrators fear poses serious health risks for its consumers.

Produced by Phusion Products, Inc., Four Loko is sold in 24 oz. cans with an alcohol content of 12 percent. In addition, the alcoholic energy drink contains high levels of caffeine and taurine, bile that is found in the intestines of most mammals. What's more, Four Loko contains wormwood – an ingredient that is also present in absinthe.

Despite having the alcohol equivalence of three beers, the colorful cans – which correspond to one of the drink's eight fruity flavors – are often mistaken by store owners as a nonalcoholic energy drink, according to a CBS New York article, "It's Crazy Kids Can Buy 'Four Loko' Energy Drink." As a result, underage customers have been granted access to the drink. Since its launch in 2005, Four Loko has received national attention for its dangers, but only recently has the University taken action against the alcoholic energy drink.

Ryan Rost, assistant dean of Judicial Affairs, first heard of Four Loko over the summer, while listening to the radio.

"I was immediately concerned, and as soon as I understood what it was, I began looking up information on the drink," Rost said. "I then sent what I found around to Dean Pugh, Margo Matt and my colleagues in the Office of Health Promotion."

Despite being relatively new to campus, Four Loko is already being addressed by administrators, who wish to introduce students to the risks involved with drinking the alcoholic energy drink.

According to a study completed by Wake Forest University's School of Medicine, mixing alcohol with an energy drink encourages binge drinking and increases the likelihood of blacking out, injuries, sexual abuse and the need for medical attention.

However, the effects of Four Loko and other caffeinated cocktails begin at a biological level, according to Margo Matt, assistant dean of students for alcohol and drug intervention.

"When someone consumes alcohol, it is an anesthesia that slows down the respiration, heart rate, reactions and so on," Matt said. "Caffeine is a stimulant which increases the heart and respiration, and if someone has had too much, it certainly makes him or her hyper-vigilant and fidgety."

Nationally, hospitals have reported Four Loko to be the cause of some of their patients' afflictions, and according to the CBS New York Four Loko was deemed "liquid cocaine" for its serious health risks.

Such severe consequences have not been seen on campus, although the drink has begun to appear in incident reports. Because of the higher alcohol content, a fine for drinking a can of Four Loko underage is more than for a can of beer, according to Rost.

"We try to base fines and penalties on what the violation is and what the dangers associated with the violation are," Rost said. "We want students to learn from these mistakes."

The University has assumed a more proactive approach to educating students on the adverse effects of Four Loko. Rather than learning their lesson after the fact, students can discover the health risks of drinking Four Loko through upcoming events and information sessions, hosted by the Office of Health Promotions.

"Any way that we can educate students on the health risks of Four Loko is our priority," Rost said.

MATTHEW HARRISON/COLLEGIAN

Four Loko drinks have been dubbed 'liquid cocaine' due to their health hazards.

PHENOM walks for higher ed

MARCH from page 2

After next week's rally in Boston, PHENOM organizers will bring lawmakers' signed petitions calling on legislators to increase state support for public higher education to the national average and to decrease student costs to a similar national level.

The rally comes on the heels of news that Massachusetts Governor Deval Patrick has allocated $55 million of federal stimulus funds to the Commonwealth's public education system.

Sarah Nathan, a spokeswoman for the Massachusetts Teachers Association, said in a release that the state's educators were pleased with this move.

"We thank the governor for his deep and ongoing commitment to public education and to Massachusetts students. The governor could have spent this stimulus money in many worthwhile ways, but in making today's announcement he showed his understanding of the needs of our students, our community colleges, our state universities and UMass," she said Thursday.

Massachusetts spends just 3.9 percent of its state budget on public higher education, currently ranking it number 46 of 50 states in public higher education spending per capita. The state has cut funding proportionally to higher education by the largest amount of any state over the last five years, according to the PHENOM release. Among states which spend more per citizen on public higher education are Mississippi, Alabama and Alaska.

Collective of individuals as 'we' is a fallacy

Harrison Searles

In the moral and political climate of not only today, but also throughout human history, it is all too common that the possibility of action and moral duty is attributed to collectives in society without any thought given to the possibility of this being true. The first person plural is thrown around liberally throughout social discourse in catchy slogans like "We must protect American jobs", and "We must help the poor," but almost never the author or speakers actually define what this "We" is. Of course it is easy to become numb to this use of "We" due to how innocent it appears, but this complacency is dangerous since it downplays the importance of the individual in society. Indeed, this error, the fallacy of we, is false because it ignores the fact that only individuals can act, be the objects of duty, and are therefore the sole unit of human society.

The foundation of the fallacy of we is the failure to properly understand the individual nature of the human being, and the failure to realize that collectives are not actors, but are nothing but an agglomeration of the actions of individuals.

Of all the branches of human knowledge, economics has, not surprisingly, been the one to most poignantly elucidate this fundamental fact through the concept of methodological individualism. In his magnum opus, Human Action, Ludwig von Mises provides a seminal defense of individualism by arguing that it is tautologically true that only individuals can act (the formalized the definition of action to mean the application of means to acquire desired ends), and that a collective operates always through the intermediary of the actions of more than one individual. Since collectives, whether it be a corporation or the state that may be given recognition as a single entity in day-to-day affairs, cannot apply means to ends, but only individuals can it follows that it cannot be true that collectives exist outside of their actions.

Despite how simply this truth may appear, there has never been a shortage of politicians, public intellectuals and scholars throughout history who have challenged the soundness of individualism. Whether they claim that it is false because the human being is a social animal who is born into a society or that society is merely a battleground of classes in which the individual is bound to his interests as a member of a certain class, the arguments against the individualist absurd to assert that individualism is false, and therefore it follows that the fallacy of we is indeed a fallacy.

However, not only is the fallacy of we a misrepresentation of the nature of society, but it is also contrary to the values of a free society because not only does it erroneously attribute reality to collectives outside of the actions of its constituent individuals, but it also encourages the centralization of moral duty to this entity, hence reducing the role of the individual in society. By claiming that there is a social unit above the individual, it is natural for the collectivist to assert that it is only right for the higher unit should take as much responsibility for society as possible in representation of those

> An individual who is not responsible for his actions, whether positive or negative, is not a meaningful member of society.

understanding of the social order are manifold.

Nevertheless, it is certainly peculiar that the case for a collectivist view of society is always made by individuals who have been able to formulate arguments by the creative process of their own interpretations of the world. Never has der Volk ever dictated a diatribe that asserts individuals are nothing but citizens of a state, never has the Proletariat ever written a polemical that proclaims it has discovered that history can be boiled down to class conflict in which individuals are little more than puppets of machines. To the contrary, it was always an individual to do each, and it is only an individual who can ever create a new idea or put pen to paper in order to record it. Ergo, just as it would be absurd to say that a collective could do either of those actions, so it is below it. Indeed, it is impossible to speak of so many social duties today without invoking the fallacy of "we".

For instance, take the widely-accepted duty that one should help the less fortunate, it seems that whenever individuals' exercise of this duty is perceived as lacking that the question is posed as "What can *I*/ one individual do more to help the less fortunate?" Instead, the question seems to be always be posed as "What can we do to help the less fortunate," and what this implies is not individuals' redoubling of their efforts in respect of this obligation, but always what can be done to centralize more of this moral obligation in the government without much regard for how can individuals act in order to fulfill their duty.

Indeed, there is even support these days for centralizing much of the individual's responsibilities for their own health and well-bring to the government with the government regulating indoor smoking, and voices heard asserting that it should also regulate the nutritional content of certain foods and outright banning certain sweeteners like corn-syrup. While much of this may seem innocuous, the tendency towards the centralization of social responsibility brought on by the conception of society and the depreciation of the individual by the alienation of responsibility from him.

An individual who is not responsible for his actions, whether positive or negative, is not a meaningful member of society because their actions have no effect therefore they play no social role and the non-existence of these individuals would scarcely be noticed. A society where the individual is nil can be given no other name than totalitarian, and therefore it must be concluded that the fallacy of we encourages a totalitarian perspective of society in which collectives, the "We", is held above that of the individual.

In the end, the fallacy of "we" is false because it wrongly characterizes the nature of the social order by implying that collectively, the "we" can be an actor while in reality it is nothing more than an aggregate of all the individual actions within it. Furthermore, by encouraging such collectivist thinking, it is anathema to a society of free individuals because it encourages the centralization of responsibility from the individual to a higher entity within a fictional social hierarchy hence reducing his role, and therefore vs. .e in society.

"I disapprove of what you say, but I will defend to the death your right to say it." - Evelyn Beatrice Hall

Hipsters: Too cool for a definition?

Hipsters may not exist

Dave Coffey

Hipster is perhaps one of the most divisive words frequently uttered in contemporary pop culture. One can hear its utterance nearly anywhere, in any context. "That's so hipster." "You're such a hipster." "Leave Thom Yorke alone, you relentless hipsters." Its use as an adjective or noun (or in rare cases an adverb, hence the term "hipsterly") in our modern day English language has become nearly second nature to many. However, as much as the term crosses our lips, many of us are left wondering – what exactly is a hipster?

Everywhere a hipster looks, "official" definitions abound. Urbandictionary.com suggests a hipster is one who, "…rejects 'mainstream' culture, and embraces and contributes to independent culture…" A singular, overlapping definition is hard to stick to, however, because of the various fragments of culture people identify hipsters within.

For instance, you've got your film hipsters who worship film noir almost as much as they cherish their half-dozen-count black beret collection. You've also got your music hipsters who constantly look like they're trying to win a Rivers Cuomo look-alike contest while exclusively listening to dance-punk, underground hip-hop and Lady Gaga (the latter only ironically, of course). And then there are your just-in-it-for-the-fashion hipsters who walk around fully bearded in derby hats and plaid button-down shirts. To the naked eye, it would seem that hipsters abound, to say the least.

I have recently come to a somewhat startling conclusion regarding hipsterdom (a word I just made up, no less). I don't want to go all M. Night Shyamalan on this article, so I'll spill the twist in the middle: Hipsters don't exist.

The way I see it, the concept of someone being a "hipster" is similar to the concept of the existence of "race" in human society. It's a purely social construct, in that there is no empirically appropriate way to determine who is what and who is not. Is there some sort of formula or reasoning for where we draw the line between "hipster" and "not-hipster?" And even if we could draw said line, would it be anything but arbitrary in nature?

Notions of obscurity concerning cultural trends and individualism in thought and deed will always be on a sliding scale. For every self-proclaimed or otherwise accused hipster who thinks the most recent neo-folk artist on the music scene is the bee's knees, there's some Norwegian teenager recording black metal on an analog tape deck deep in the forests of Nordmarka. Yet you still can't refer to him as a hipster, because there's one important hipster element amiss: the conscious necessity of obscurity and social divergence merely for its own sake.

Of course, some may say that even though it's impossible to scientifically determine the "hipster meridian," one can still know a hipster when they see one. Once again, I would beg to differ. Take, as an example, the author of this article: I can say with 100 percent honesty that I was asked to write this article solely based on the fact that I have a beard. Apparently my unshaven face led my editor to believe I'd have a good first-hand account of the hipster situation. I won't lie; my shaggy hair, plaid jacket and frequent use of over-the-ear headphones might lead some to think, at first glance, that I am what one might call a hipster. But anyone who's ever conversed with me can be pretty sure I'm no hipster. I wouldn't drink Pabst Blue Ribbon if someone paid me by the can, and I'd rather take a railroad spike to the septum than listen to more than two or three tracks of "indie rock."

Even if we strip back the various specific and cosmetic attributes of what the average person considers to be hipster, the main idea itself seems inherently contradictory in a way. Whenever one points out someone they think is a hipster, they group them into this collective "group" of hipsters with at least some of the various attributes noted to be shared by most hipsters. Yet a hipster is supposedly someone whose mindset, behavior and lifestyle, by definition are based on individuality. They are a group who all similarly think individually. Am I the only one that finds this to be wildly contradictory?

In short, the hipster phenomenon is nothing more than a cultural existential crisis. As Sartre would put it, it's bad faith in its purest form; it's a clever myth just annoying enough to survive, just vague enough to defy actual, factual analysis. And we swallow it because it's slightly less bitter than the truth. We want to believe PBR is some social trend instead of realizing the ugly truth: college students are willing to drink the alcoholic equivalent of sewage as long as they can get enough of it to kill a bull elephant for the price of a matinee movie ticket. We want to believe Ke$ha is listened to in irony instead of facing the cold hard facts: people genuinely enjoy this tripe.

So in lieu of the misleading term "hipster," what alternate phrase should we use to describe this current cultural phenomenon? I have a pretty good idea, but it's a really obscure term, and you've probably never heard of it.

Irony and individuality

Eli Gottlieb

Once upon a time, I walked up to the entrance of the hottest, latest nightclub to open in our area. I needed to get in there. The bouncer, however, far from caring about my ID, demanded a password. "Whatever," I sighed, and quite bizarrely, he let me straight through. Then I arrived, for no apparent reason, to yet another bouncer, who demanded a second password. "Ugh," I groaned, and luckily enough this appeared to be the password. I finally walked into the club, feeling my bones begin to tremble with the sound of that obscure underground song constantly playing everywhere, like the ones in the iPod commercials.

What sort of club have I just walked into? A hipster club, of course. I lifted that parable straight from the cult film (and by cult I mean they pulled it from theaters too early) "Scott Pilgrim vs the World", but I believe it makes the point quite clearly enough. Hipsters often seem like the living avatars of chagrin, narcissism, cynicism and of course "irony"; they have inspired in the rest of us everything from depression to incoherent rage as they march around in their hipster clothes, condescending to the rest of us about their hipster music, and…

But wait. Can we ever really place what they're like? What is this irksome creature, the hipster? Urban Dictionary.com gave it to me best in a joke: "Q: How many hipsters does it take to change a light bulb? A: What, you don't know?" Further hints included, "A person with cultivated eccentricities which are treated very seriously yet at the same time as an inside joke" and the fashion-based, "A hipster is male or female that wears tight jeans, v-neck sweaters, cop shades, scarves and old worn out flats." So now we at least have a few hints.

Why, though, does anyone behave like this? What drives these people, who so vehemently deny any label, to all conform to a recognizable stereotype? Desperate for further information, I consulted a profile on hipsters published in the anarchist magazine Adbusters. From there I learned that, "The American Apparel V-neck shirt, Pabst Blue Ribbon beer and Parliament cigarettes are symbols and icons of working or revolutionary classes that have been appropriated by hipster-dom and drained of meaning," and that as, "An amalgamation of its own history, the youth of the West are left with consuming cool rather that creating it. The cultural zeitgeists of the past have always been sparked by furious indignation and arc reactionary movements. But the hipster's self-involved and isolated maintenance does nothing to feed cultural evolution."

Seriously speaking, who the hell are these "hipster" people and why should I feel such total hatred for them? If their fashions change so ultra-quickly, can we at least pinpoint what they think?

Here, I think, we have a much clearer and easier ground to cross. As much as hipster culture seems deliberately impenetrable, hipster fashion changes each month, and hipster self-conception fails to exist, these accumulated pieces of evidence all point towards a relatively simple psychological impulse: to become "cool" by keeping oneself out or "ahead" of mainstream culture.

Let us try this hypothesis on for size and see how it explains the known facts about hipsters. Hipsters live in gentrifying urban areas because it makes them a part of the "progressive" and "cultural" future. Hipsters look androgynous and keep themselves ultra-thin as an attempt to deliberately subvert the mainstream aesthetics, and damn if it means they just end up looking as ugly as a dog turd. Hipsters think of themselves as progressive for their apathetic cynicism because, like all self-satisfied cynics before them, they think that jaded ignorance of virtue and public life can never be proven wrong and will therefore always remain "ahead" of those among us so insufficiently bitter that we still believe in things. Hipsters wear keffiyeh because someone in the fashion magazine GQ convinced them that doing so made a political statement of solidarity, ironically (pun not intended) destroying the meaning of the keffiyah as a symbol of solidarity.

In this spirit, I must note that Mr. Douglas Haddow writing for Adbusters is a complete and total hipster, right down to his denial of hipster-dom. He too looks down on everyone else for failing to live up to his isolated, self-satisfied standards of counterculture.

So now that we understand hipsters, let us have compassion for them, and try to show them the light. It's really quite OK to have beliefs, preferences, likes and dislikes. A person doesn't need the approval of a bunch of smug hipsters, and we'll all be better off if we just come out and be who we are.

Mirman 'Thrives' to bring laughter

Hampshire alum to perform in Turners Falls

By Ellie Rulon-Miller
Collegian Staff

Comedian Eugene Mirman will be performing a stand-up comedy show at the Montague Elks Lodge in Turners Falls, Mass. tomorrow night. Performing with him will be Michael Showalter, A.D. Miles, and Leo Allen.

The show will be put on by the non-profit organization The Thrive Project. The organization helps adults change their lives for the better after previous hardships may have left them dissatisfied with their path. The show is one part of the organization's Thrive Fest, a weekend of fundraising events which began yesterday and will continue through Sunday.

Mirman is on the advisory board for The Thrive Project, which is based in Turners Falls. "There are so many organizations that try to help kids," but not many that try to help adults, he said. The organization helps people find the resources they need in order to improve their lives.

Although Mirman lives in New York, he is happy to help out by setting up events such as this weekend's comedy show. Despite the fact that he can't be in Turners Falls and work directly with the adults who come to The Thrive Project for assistance, Mirman said that he "[helps] out where I can in any capacity."

He has performed for a number of fundraisers and benefits in various cities, including 826 National, a program set up in part by writer Dave Eggers to help students up to the age of 18 to improve their writing skills.

Though he has done stand-up for fundraising events before and in clubs both big and small for over a decade, Mirman said that he has never performed in an Elks lodge. He has toured with a number of bands, including Modest Mouse, The Shins, and Cake.

"Opening for a band is generally harder," he said, adding that he prefers to do straight-up comedy or variety shows. He began touring with bands when he had a booking agent who primarily booked rock bands.

The biggest show he has ever performed was during a tour on which he opened for Flight of the Conchords. The performance at the Hollywood Bowl drew between 15,000 and 16,000 people. Though he says that the large crowds associated with a rock band can sometimes be intimidating, the Hollywood Bowl show was "oddly totally fine."

Even though the audience at the Montague Elks Lodge will be considerably smaller, Mirman has experience performing in smaller, more intimate atmospheres. A graduate of Hampshire College ("[It was] sort of a war between hippies and indie rockers," he said), he created his own major, studying comedy. He took classes on the history of comedy and the physiology of laughter, amongst other classes. He performed regularly in the basement of his dorm. His thesis was a one-hour comedy act.

In the weeks leading up to his thesis performance, Mirman was interviewed and subsequently misquoted by the Daily Collegian. While the Collegian was unable to dig up that article, Mirman stated that he found the misquote to be "interestingly inaccurate" and "my favorite misquote, though in a sense that it's also dear to me."

When asked if he still finds farting funny as a professional comedian, Mirman referenced Showalter, who did an entire commentary track for the film "Wet Hot American Summer" consisting only of strategically-timed fart noises.

"Is it funny for grown men to make fart noises for an hour and then release it? Absolutely," he said.

Tickets for The Thrive Project's comedy show must be paid for in cash and are available at the Montague Bookmill, the Rendezvous, and at the door. The performance begins at 8 p.m.

Ra Ra Riot's fans scream for more

By Tappan Parker
Collegian Staff

Ra Ra Riot, the up-and-coming indie rock band from New York, played at the Pearl Street Ballroom Monday night to an enthusiastic Northampton crowd.

The show kicked off with a short half hour set from the California-based. We Barbarians, the first of two opening bands. The three-piece band is similar to the headliners, however its music is much heavier than Ra Ra Riot's. The sound was a bit muddled making it hard to hear the lead singer, but the band still managed to keep a rocking beat going throughout their set.

The next band to take the stage was Mexico City's Chikita Violenta. The band had a lot of energy in their first show of the tour and they were an absolute delight to watch. The lead singer was all smiles and the entire band seemed ecstatic to be opening for Ra Ra Riot. Their music had a distinct upbeat feel to it and got the crowd swaying.

Finally, it was time for the main act to take the stage, and boy, did they rock the house. The fans of the band immediately got as close as they could to stage, forming a crowd that moved in sync with the sweet melodies that poured from the bands speakers.

Wes Miles, the singer gave a great performance, crooning into the microphone with his melancholic lyrics. Bassist Mathieu Santos and guitarist Milo Bonacci got really into the show and were constantly walking around the small stage. Cellist Alexandra Lawn and violinist Rebecca Zeller gave very moving performances, rocking and swaying in time with the music.

The band played a number of songs from both their albums, going back and forth between hits like "Boy," "Dying is Fine," "Ghost Under Rocks," and "Shadowcasting." At one point a fan even yelled out a request for "Foolish," a song off the band's recently released album, and Miles enthusiastically obliged, despite no apparent plan to play the song that night.

The highly-polished energy the band had on stage was amazing. Every member remained animated throughout the band's short, but sweet set, which ended with Miles high-fiving fans who found their way to the front of the stage.

After departing, the antsy crowd began shouting for more from the band, and they happily returned with a special performance of their song "Massachusetts" off of their newest album. They had been saving this song to bid off their Massachusetts fans with a fond farewell.

Ra Ra Riot lit the stage with their powerful performance. Despite only playing for a little over an hour, each member put their heart into the performance and it was clear that they were enjoying themselves.

Tappan Parker can be reached at rtparker@student.umass.edu.

Indie rockers Ra Ra Riot wowed their faithful fans at Pearl Street on Sept. 27. The New York-based band didn't waste a single second of their set, which was just over an hour long.

Dress to impress for succesful interviews

By Joanna Guberow
Collegian Correspondent

Résumés and cover letters aside, making a good first impression at a job interview is essential to landing that job or internship position. Being the best dressed candidate will make you stand out and the interviewer may even remember you better after you leave. Your appearance should make you look and feel confident, motivated and impressive.

Every college student should own at least one good suit, especially those nearing graduation.

For men, the suit jacket should rest neatly across your shoulders. With your arms at your side, the sleeves should be straight down. You should be able to bring your arms up before you. Keep in mind that suits aren't going to be always comfortable, so it may be a little snug when you do this. The sleeve of the jacket should go no further than the knuckle of your thumb. When you buttoned, there should be just enough room to put your hand into the jacket between the buttons.

Pants should touch the floor when you stand without shoes on. There are pleated and flat front options. Flat front suit pants are a more youthful option compared to your dad's pleats. For guys who want a little more comfort, though, pleats may be for you.

A white shirt is traditional, but other colors such as blues will help make you stand out. Don't bust out the purples or greens until at least your second interview. You want to look professional.

If white is a little too boring for you, try a black shirt with a gray suit or a gray shirt with a black suit. It's a little understated, but clean. Whether or not you should keep it basic depends on what company you are interviewing for. A corporation will appreciate traditional, while a design company might be looking for some creativity.

Now before you get overwhelmed with the all of the shirt options, remember that a tie is going to make a difference. Depending on the collar of your shirt, there are three knots to consider: the Windsor knot, the half-Windsor knot, and the four-in-hand knot. Most standard shirts will have the "traditional" collar, with which the four-in-hand knot fits best. This is a very common style amongst American executives, so if you're interviewing for a big corporation or firm, this is most likely what will be expected of you.

The four-in-hand knot is the simplest of tie knots. Start with the wide end of your right, and extend it a foot past the narrow end. Cross the wide end over the narrow end and underneath, and over once again. Then slip the tie end through the neck loop, and tuck into the small loop you have just formed. Tighten until it rests just below the first button or your shirt. If you want a little more movement in your neck, leave the first button undone, and then tighten and adjust the tie. You usually can't tell whether you have the first button done or not this way.

The Windsor knot and the half-Windsor knot are a variation on the four-in-hand knot. The half-Windsor knot is slightly more even-looking than the four-in-hand knot, and some guys prefer it. It is a little more professional looking. Opt for this one to impress. If you are a broader guy, try the Windsor knot. It is a bigger knot that will balance out better with your body. Go to www.tieanecktie.com to practice all of these knots.

Remember, having an exceptional résumé and cover letter is just as important as the suit you'll be wearing the day of your interview. Don't forget to shake hands with everyone you meet, smile, and bring questions to your interview. Dressing well, and impressing them with your charm might just land you the job of your dreams.

Joanna Guberow can be reached at jguberow@student.umass.edu.

Editor's Note:

On Thursday, Sept. 30, 2010, the Collegian Arts Section ran a photo that accompanied a preview for the Dark Star Orchestra concert at the Calvin Theater in Northampton that night. The photo was of guitarist John Kadlecik, who is no longer with the band. He is now with a different Grateful Dead cover band called Further.

Orange head to Garber Sunday

By Michael Wood
Collegian Staff

The Massachusetts field hockey team has not beaten Syracuse in over 10 years, but the Minutewomen will be looking for their first victory in recent memory Sunday when the Orange head to Garber Field for a 2 p.m. match-up.

Syracuse coach Ange Bradley is 12-2 all-time against the Minutewomen and in last year's contest, the Orange outplayed UMass and won 5-2.

"Syracuse is a team that puts you under an enormous amount of pressure," UMass coach Justine Sowry said. "They really press you hard and force turnovers. When we played UConn, we tried to knock them off their flow, and this time it will be more about us being composed while Syracuse is pressuring us."

If there is one area that UMass needs work in, it's the offensive attack, something Sowry said the team has been working on all week.

"We've been working on scoring," Sowry said. "The last couple of days we've been working on having purpose in the scoring circle, whether that be winning corners or getting good shots or even rebounds in the circle."

UMass has averaged just a goal per game through 10 games this season compared to the 26 goals the Orange have recorded. Even against Vermont, a team which gives its opponents plenty of chances to score, the Minutewomen have not found the back of the net. Only four players have scored this year, with senior forward Katie Kelly accounting for 60 percent of the offense.

"We're having a lot of fun throwing more [scoring] drills at [the players] and giving them more repetitions to get confidence on the ball" Sowry said.

Syracuse enters the game with a high-powered offense, having tallied their scores from 10 different players. Two-time All-American Lindsey Conrad leads the team with six and is followed closely by Martina Loncarica, who has four.

The ninth-ranked Orange are 3-1 in away games, something that can be attributed to how well they start games. Sowry said her team has to be ready from the beginning and set the tempo early.

"The big thing for us is composure under pressure and the start of the game," Sowry said. "In at least two out of the last three years, they've scored three to four goals within 12-to-14 minutes against us. They come out really hard and set the tone and that's something we've struggled with so far."

Where the Minutewomen excel is on defense.

They have held high-powered opponents to a .125 shooting percentage, giving up just 14 goals on 112 shots all season. The veteran leadership of senior defender Makaela Potts and junior goalkeeper Alesha Widdall has paid dividends for UMass.

"When you compare our strength of schedule with others in the conference we probably have the toughest schedule," Sowry said. "To concede so few goals says a lot about our defense. Makaela [Potts] moving back has been great and Alesha [Widdall] is leading it back there. We demand greatness from them and we'll keep pushing. They're doing their job and they're doing it well. Hopefully we can keep it going."

The Minutewomen are coming off a tough 1-0 loss to Albany despite controlling the pace of play and recording a 13-11 shot advantage. Widdall made four saves in the contest while Kelly led the offense with four shots.

The Orange will play Providence on Saturday before coming to Amherst to take on UMass. In its last contest, Syracuse defeated then-No. 10, Louisville 4-3 in overtime. Loncarica scored the game-winning goal off a pass from freshman Leonie Geyer and found the back of the net for the win. Conrad also scored twice, becoming the school's all-time leading goal scorer in the process.

"It's going to be an amazing battle," Sowry said. "Our girls are going to be ready from minute one."

Michael Wood can be reached at mewood@student.umass.edu.

MAXWELL SPARR/COLLEGIAN

UMass huddles up earlier this season. The Minutewomen host Syracuse Sunday.

MAXWELL SPARR/COLLEGIAN

Senior midfielder Makaela Potts winds up for a shot earlier this season. Potts and the rest of the Minutewomen take on the Orange Sunday at Garber Field.

Sowry and Co. want to play composed, poised

By Pete Vasquez
Collegian Staff

Although the Massachusetts field hockey team faces only one opponent this weekend and is one opponent away from the start of Atlantic 10 play, Sunday's battle against No. 5 Syracuse in Amherst will provide perhaps the greatest test of character for the Minutewomen this season.

"This weekend is going to be just completely different because Syracuse is a quality side that puts an enormous amount of pressure on you to be able to execute your skills," UMass coach Justine Sowry said. "It's going to be a very different sort of game, so we just have to remain composed and poised on the ball and play our tempo and not let them knock us off our flow, but try to do the opposite toward them."

Composure against the Orange's press will be vital.

In the last two matchups, Syracuse has jumped all over UMass, scoring three goals in the first 15 minutes of each game. On the contrary, the Minutewomen have had trouble this year starting their games strong and setting the tone.

"We know what to expect, it's just that we have to react on the field to that," Sowry said. "Where we've made mistakes in the past it's because we've been flustered on the ball so we've given the ball up quite a lot. We know it's going to be tough and we know it's going to be another great opportunity. I think the motivation is definitely going to be there, it's just that our actions will have to show that we are ready for it."

And how does one work to improve one's composure?

"Repetition," Sowry said. "We have to get out there, whether it [is] extra work before practice or other individual work. Get out there and get some repetition on the ball and eventually that will breed confidence and then repetition under pressure when we're fatigued, that we'll be able to execute."

The 'will to win' is something that Sowry stresses to her young players. She uses words like tenacity and desperation. Last week she saw an Albany team that was consistently diving to keep balls in play, diving to save goals and diving to intercept balls. She only saw that desperation in her team in the final 10 minutes of the game, as the Minutewomen frantically tried to erase their 1-0 deficit.

UMass hasn't beaten Syracuse once this decade with an 0-9 record. But persistence might give the Minutewomen a chance on Sunday, perhaps taking the place of the recent lack of scoring.

UMass took 40 shots last weekend, however, the Minutewomen came away with only two goals to show for it.

"It will come, it will happen," Sowry said. "It's just a belief in the process and trying to stay focused and poised and composed on the ball and not get too frustrated that it's not coming but just believe that that repetition and experience will get us a little more confident and it will happen."

Pete Vasquez can be reached at pvasquez@student.umass.edu.

Minutemen host Siena before conference play

By Steve Levine
Collegian Staff

A soft spot in the schedule has finally arrived for the Massachusetts soccer team as Siena comes into Rudd Field for a 1 p.m. match on Saturday.

Historically, UMass (1-3-3) owns a 14-1-2 record against Siena. However, the Minutemen are 1-2-2 in their previous five games due to inconsistent play and a tough stretch of games in which each of UMass' opponents owned a record above .500.

UMass coach Sam Koch believes that the tough stretch has been beneficial for his team, but he won't take anything away from the Saints, who have a 3-5-0 record this season.

"[We've] had a tough run with Central Florida, Indiana, Vermont and New Hampshire," Koch said. "It's hard to play that many games against very good teams in that short amount of time. We've got to get back to work for Saturday's game against another really good team. That's a real positive [aspect] of the string of games we've had – it's good experience."

One reason Koch does not believe Siena's record is reflective of their team is that they've had two of their key players injured: sophomore forward Emery Welshman and freshman defender Falko Friedrichs.

"They have a few really good players who are injured," Koch said. "[We don't know] if they're back. We have to find out [if they are or aren't] so we know exactly what we're facing."

Friedrichs made an impact right away for the Saints, scoring twice in their season-opening 5-1 victory over Syracuse. He was injured shortly after and missed the proceeding six games in which Siena went 2-4. Friedrichs received limited playing time in their most recent contest, a 2-0 loss against Vermont.

Welshman's presence on the team proved to be invaluable last year, as he lead the Saints with six goals and 15 points as a rookie. His totals placed him in the Metro Atlantic Athletic Conference's top-10 in both goals and points, earning him MAAC Rookie of the Year honors. He hasn't played in Siena's last three games, but still managed three goals and five points in the Saints' previous five games. Whether he will play on Saturday is yet to be determined.

Joining Welshman on the MAAC's All-Rookie Team last year was Sindre Ek. Now a sophomore, Ek is currently leads Siena with four goals. With Welshman out, Ek stands as Siena's most dangerous offensive weapon.

If both Friedrichs and Welshman return for Saturday's matinee, UMass' defense needs to buckle down – something Koch has not seen consistently enough from his back four.

"I think we can play better as a unit," Koch said. [I think] defending we can keep shape better than we [have been]."

In addition to his defenders, Koch would like to see his midfielders play with more urgency when it comes to transitioning on defense.

Before their most recent shutout loss, the Saints were rolling as they won consecutive contests, 5-3 and 2-1 against Central Connecticut and Temple, respectively. Siena will look to get back on track against UMass as its conference schedule begins a week later against Marist.

Like the Saints, Sunday's game represents the Minutemen's last game before their conference schedule begins against Xavier on Oct. 8. With UMass' busy schedule in full-swing, it will have to make the most of Sunday's game as inclement weather and time restraints have kept the Minutemen off the practice field.

Steve Levine can be reached at slevine@student.umass.edu.

GEOFF KING/COLLEGIAN

Therese Smith looks to control the ball earlier this season. The Minutewomen welcome back Sydney Stoll and host the Bonnies and 49ers this weekend.

MAXWELL SPARR/COLLEGIAN

Junior defender Michael Doherty looks to clear the ball against Vermont this week. The Minutemen host the Saints this Sunday at Rudd Field.

Stoll to return for UMass for A–10 weekend slate

By Michael Counos
Collegian Staff

The Massachusetts women's soccer team begins Atlantic 10 play this weekend, opening up at home with Charlotte on Friday and St. Bonaventure on Sunday at Rudd Field.

Despite their recent struggles, UMass coach Ed Matz and company look to get back on track with a pair of conference victories.

The 49ers will be a tough test for UMass, who currently sit at 3-6-0 overall while boasting a 2-2-0 record at home.

Charlotte is 7-3-0 with and sits in second in the A-10 overall standings with 21 points. St. Bonaventure is not far behind with a 6-4-0 record and currently fifth in the A-10 overall.

The Minutewomen did not fare well against the two schools in last season, getting shut out 4-0 by both teams and will be tested defensively against both programs.

Charlotte is led offensively by Macky Wingo and Whitney Weinraub. Each has eight points on three goals and two assists in 2010. While the Minutewomen have had no trouble scoring this season, they face a talented goaltender between the pipes for the 49ers in Alex Kubrick. Kubrick sports a .839 save percentage to go along with 26 saves and three shutouts so far this season.

The Bonnies are coming off a loss to unbeaten, non-conference opponent Siena, but their offense brings a strong trio to the table with Anna Cunningham at the helm. Cunningham has been the main goal producer with five on the season, while Courtney Bosse and Tori Burchett each have three. The contest should be physical, as they have committed ninety penalties this season in ten games.

"We just need to defend better collectively as a team," Matz said. "You can not win games if you're letting up three goals a game."

Positive outlooks for the Minutewomen include the return of Co-captain Sydney Stoll, who has been plagued by injury all season and will play limited minutes against Charlotte. While the Bonnies are undefeated at home they have a record of 1-4-0 on the road, which UMass will look to capitalize on at Rudd Field.

The Minutewomen lost their fourth-consecutive game the last time out, falling to Harvard by a count of 3-2. While the defense did manage to shut out the Crimson in the second half, they had already allowed three goals in the first stanza which ultimately cost them the game.

UMass will look to continue to feed the ball to senior Therese Smith. Smith has announced her presence as the offensive workhorse of the Minutewomen with four goals in the last three games, including one that cut the deficit in half against the Crimson with a tally in the 17th minute and was assisted by senior Ashley Harnel. Smith leads the UMass roster with four goals and 10 points scored.

Kayla Austin connected for her second goal of the fall in the 21st minute against Harvard and was assisted by Lauren Skeesvage.

Despite the valiant efforts of the Minutewomen to battle back from being down early, the momentum was shattered with the Crimson's third goal of the contest off the foot of Melanie Basking in the 31st minute, her fifth of the season. Neither team would produce another score for the rest of the match.

Friday's game against the 49ers begins at 4:00 pm, while Sunday's match will kick off at 1:00 pm.

Michael Counos can be reached at mcounos@student.umass.edu.

Donations to schools across country down over last 2 fiscal years

By Dan Peltier
Collegian Correspondent

The economic recession has caused institutions of higher learning across the country to lose donations and gifts over the past two years, and the University of Massachusetts is no exception.

Though giving was back up in fiscal 2010 year for UMass, with 33,119 donors totaling over $57 million in gifts to the University, donations and gifts saw a swift decline in both fiscal years 2008 and 2009, with 35,571 donors totaling $30 million and and 32,159 donors totaling $23 million, respectively. Based on the 2010 numbers, Ed Blaguszewski, executive director of news and media relations at UMass, said that alumni and friends continue to put their support behind the University because of the goals set forth by Chancellor Robert C. Holub and other administration officials.

"Alumni continue to express their belief in the institution through their involvement in other ways and willingness to visit with us even if they had to delay or downsize their gifts," said Blaguszewski. He added, "They, too, want to see UMass Amherst remain accessible and affordable as it provides an outstanding education for our student body through our exceptional faculty, who are conducting cutting-edge research involving undergraduates as well as graduate students."

According to the 2010 Giving USA report, released by The Center on Philanthropy at the University of Indiana, education at all levels received just over $40 billion in gifts in 2009 of the $303.75 billion donated to all non-profits, down 3.6 percent from 2008. Giving to education has dropped by nearly 12 percent in inflation-adjusted dollars over the last two years. Education did, however, received 13 percent of gifts in 2009, making it the second-highest category behind religion-based gifts, which took 33 percent of the total.

Blaguszewski also said UMass fared better than many other colleges and universities during the recession in terms of giving.

Swinford new campus planner

By Nancy Pierce
Collegian Correspondent

Dennis Swinford, previously the principal project planner for Harvard University Allston Development Group, was recently named director for campus planning at the University of Massachusetts.

Swinford began work Sept. 20 and will be responsible for the oversight, development, and implementation of the University's project plans. He will be a new addition to an already existing master plan and will use his expertise to contribute in consolidating the visions of the stakeholders and campus community.

Having just recently started his work in Amherst, Swinford said he is just getting a grasp of the campus' dynamics, and that he is only now becoming nuanced about preexisting plans for major developments. So far, he has taken note of the spaces which allow for "opportunity to create a good future for campus."

Swinford said a large part of a successful plan is the process and people involved with development.

Swinford said that while he is not fully acclimated to his role here at the Commonwealth's flagship university campus, he is excited to get down to brass tacks.

"I look forward to working with [the University community] to create a physical plan for their future," he said.

Part of Swinford's contribution is providing a framework for an already developing project. One goal is to make sure that the steps the campus is taking today with the resources available gets the campus to where it wants to be.

When referring to accommodating students' needs, Swinford

Student Government Association senators have been chosen

By Sam Butterfield
Collegian Staff

After three days of voting last week, results for the University of Massachusetts' Student Government Association (SGA) elections were announced Sunday.

All three ballot referenda passed handily, with students throwing their support behind all three measures by a factor of more than two to one.

The first question asked students if they supported changing SGA Constitution language so that bills which had not been signed or vetoed would become Acts of the SGA. It passed by a tally of 1093 in favor to 290 opposed.

The second dealt with changing the statute of limitation on filing with the Student Judiciary from 90 to 30 days. It passed 1160 to 494.

The third question also pertained to Constitutional language. It proposed changing a clause of Article V of the SGA Constitution from reading "decide tie" to "decide tied," and passed by a figure of 1533 to 153.

Most races for SGA Senate were not all that competitive, although several had tightly-contested outcomes.

In the Central race, four out of five candidates won seats. Zachary Jaymes Broughton won the most votes, with 132, followed by Evan James Pleasant, with 124, Andrew Eaton, with 117, and Benjamin Lees, with 115. Those four edged out Sean T. O'Connor.

North's Senate race saw limited participation. Just two candidates, Edward Keefe and Patrick Curley, won spots on the SGA Senate. The two received three votes apiece, narrowly topping all other candidates, who received one or two.

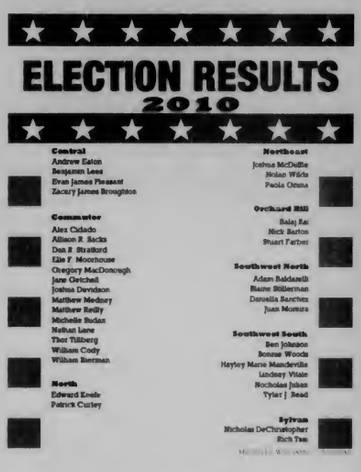
Northeast's race appears to have been something of a no-contest. Paola Ozuna led Northeast's vote-getters with 138 students choosing him, while write-ins Joshua McDuffie and Nolan Wilds won seats with eight and seven votes, respectively.

Sylvan's Senate race was closer. Candidates Nicholas DeChristopher and Rich Tsai won spots, receiving 33 and 26 votes apiece. The two topped Kris Kilpi, who took 13 votes.

Orchard Hill saw perhaps the stiffest electoral competition. 11 candidates fought for three seats, with Nick Barton leading the field, receiving 153 votes, followed by Stuart Farber, with 124 and Balaj Rai with 104.

The Commuter race is mostly decided, with 16 candidates seated for 18 spots, and four others tied for two remaining positions. Of the commuters, Matthew Reilly led the way, winning 94 votes. He was followed by incumbent Dan Stratford, who received 85 votes, and then by Allison R. Sacks, who got 80 nods, Ellen Moorhouse, who received 78, Justin A. Thompson, who got 75 votes, Elle F. Rahilly, who took 74, Gregory MacDonough, who got 71, Alex Cidado, who had 70 votes, Michelle Sudan and Thor Tillberg each received 69 votes, Joshua Davidson took 68, William Cody took 59, Matthew Medney 52, and write-ins Nathan Lamb, who received 21 votes, Jane Getchell, who was given five votes, and Nathan Bierman, who received four votes.

The four remaining candidates Amanda Jusino, Ben Thompson, Tucker Raney and Cassia Covollo, each received three votes. SGA commissioner of elections Jitesh Khushalani said the current members of the Senate will vote on which two of those four will be seated soon.



Southwest North's race saw five candidates gunning for four seats. Blaine Stillerman led the pack, winning 140 votes, with Juan Moreira following him at 123, Adam Baldarelli winning 120 and Daniela Sanchez also winning a spot with 102 votes. The four defeated Sarah Schultz, who received 60 votes.

The Southwest South race saw some competition, as eight candidates fought for six positions. Lindsay Vitale led the field, taking 215 votes. She was followed by Ben Johnson, who won 190, Bonnie Woods, who took 188, Hayley Mandeville, who won 166, Nicholas Julian, who took 158, and Tyler J. Read, who received 137 votes. Southwest South's race saw the tightest margin of victory, as Read narrowly grabbed more votes than Jarred Rose, who received 136. The eighth candidate was Claire Reid Kiss.

The house cluster officer races were a bit more contentious, as some spots remain deadlocked and to be determined.

Washington cluster's president will be George Perez, who ran unopposed and received 35 votes. Its vice president will be Ricardo Morales, who also ran without opposition and also took

See SGA on page 3

Edwards dons a smile for Smith

By Lily Hicks
Collegian Correspondent

Congresswoman Donna Edwards, of Maryland's Fourth District, lectured Sunday to a crowded hall of students and local residents at Smith College. The congresswoman spoke on a wide range of issues, including money in politics and military spending.

Edwards, accompanied by John Bonifaz, the founder of the National Voting Rights Institute, focused part of her lecture on her efforts to amend the Constitution and reverse the effects of the Supreme Court's 2010 ruling on "Citizens United v. Federal Election Commission," which waived restrictions on the amount of money corporations can use to endorse political candidates.

"Are any of you guys corporations?" Edwards asked the audience, after presenting Judge John Paul Stevens' dissenting opinion, in which he stated that the framers of the Constitution, unlike his judicial opponents, "had little trouble distinguishing corporations from human beings." There were no affirmative responses but plenty of laughs.

Lecture attendee Richard DeVoe of Great Barrington agreed with Edwards' distinction, though not with her methodology.

"We need to do a lot more than we can depend on Congress for," said DeVoe, a community division organizer for Common Good Finance, a project which aims to create local democratic economies with banks that involve depositors more directly in their investments.

DeVoe said he is a firm proponent of direct democracy and would prefer that - rather than introducing a Constitutional amendment for Congress and the states to approve, as Edwards did with House Joint Resolution 74 - a constitutional convention to address campaign financing and other issues.

On the topic of war, Edwards' first reason as to why she opposes military spending was, "Well, it's not working."

Having been to Afghanistan twice over the span of the war, Edwards described the situation on the ground as "so much worse than it was a year ago." She added that the question of how to disengage was "far more complicated," but that she wouldn't be "drawn into the question as to whether you support the troops or not depending on your support for supplemental funding [of the war]." Her support for the troops and her support for the war are two different things, she said.

Near the end of the lecture, Edwards told audience members, "you'd better care that the majority that's in place right now holds." Many in the audience applauded.

Included among Edwards' supporters were Smith College students Yasmine Evans of Fort Washington, Md. and Galya Metanova of Gaithersburg, Md., both constituents in Edwards' district.

Evans said she and Edwards were "very much on the same page," and Metanova said there is a need to "continue the majority" in order to "allow the President to fulfill his four-year term."

COURTESY HICKS/COLLEGIAN STAFF PHOTOS

Congresswoman Donna Edwards spoke at Smith College on Sunday. She represents Maryland's Fourth Congressional District as a democrat.

Amidst praise of Edwards and her work, one voice of dissent was that of Emily Odgers, a homeschooled student from Northampton.

Odgers, who is in grade 10, told Edwards in the discussion that she was "insulted" by Edwards' instruction that audience members not "waste their vote" by supporting a third party in the upcoming elections. Odgers voiced her support for a Green Party candidate and stated that people like Deval Patrick, the Massachusetts gubernatorial incumbent who Edwards endorsed in the lecture, "take money from test companies."

After the lecture, Odgers said that "it's not about two political parties, it's about your political beliefs" and voiced her resentment of "the idea that you can't vote for a third party."

In response to Odgers' criticisms, Edwards said she was proud to be a Democrat and that "we [the Democratic Party] have done some damn good things for the American people." She also said that she did not fully support all of Democratic President Barack Obama's policies, but that her task was to "push this president to be better."

Swinford takes over planning

SWINFORD from page 1

said a goal is to "create an environment in which they can do their best."

Swinford said he believes the campus has already seen a great deal of improvement, listing the completion of the new Integrated Sciences Building as one of the school's premier accomplishments.

He is enthusiastic about "adding to an environment that supports research and learning."

Prior to working for UMass, Swinford has experience helping to create master plans for large institutions on a national, local, and global level.

Most recently, he worked for the Harvard University Allston Development Group. Prior to his work in Cambridge, Swinford worked at other local schools, including Holyoke Community College and Westfield State University.

On a national scale, he has helped in campus planning for the University of Illinois, the University of Memphis, and Ohio State University. Swinford also has global experience working with the American University of Beirut, and the American University in Cairo.

Juanita Holler, associate vice chancellor for facilities and campus services, said that creating cohesive plans for campus development can be a challenge, given varying parties' conflicting wishes for new projects. However, she said she hopes working with Swinford will help centralize the campus' planning and coordination needs.

"He likes what he does," she said. "His enthusiasm and knowledge will make it a smooth process."

Swinford will work with a small staff, which is beneficial from a financial standpoint. Due to his almost 30-year background in landscape architecture and urban planning, Swinford will also help determine how much development projects will require in funding dollars.

The main purpose of the master plan for the University is to meet the needs of the facilities to accommodate a growing staff and student population.

Another goal that the stakeholders in the plan for campus development would like to see, is for the campus to be admired not only for academics, but also for aesthetics.

"I love the master plan process, theUniversity can focus on what it wants to be not only academically but visually," said Holler.

Bonnie Woods, a senior majoring in political science, thinks that staying within budget is crucial for the plans.

As far as renovations and new buildings go, Woods said she feels "overall space utilization is really important."

Woods also thinks more housing is a top priority. "Students living in lounges is not okay. All students that want to live on campus, especially underclassmen, should have that ability."

Woods also believes that the aesthetic aspects of the school should not be a top priority in the plans right now. "Yes, UMass should look better, but if it comes at the expense of students not being able to attend the University, then it shouldn't."

As far as time goes, the plans stretch across a time period of 20 years into the future. While these plans have end results, the steps along the way needed to get the most value in making campus a better place are vital as well.

Three teens arrested on trafficking charges

The Amherst Police Department was busy last week. Since Wednesday, Sept. 29, APD officers have arrested three teens in two separate incidents on drug trafficking charges.

The first arrest took place last Wednesday at about 4:19 p.m., when an officer attempted to stop a car traveling above the speed limit on East Hadley Road. After a short pursuit, the officer stopped the driver at The Boulders apartment complex. The driver, Somrathonak J. Som, 17, of 296 Daniel Shays Highway in Pelham, Mass., was found to have packaged narcotics in his possession. He was arrested and charged with failure to stop for a police officer, possession with intent to distribute a Class D substance, marijuana, possession with intent to distribute a Class

Giving down SGA elections results tallied

GIVING from page 1

"Practically every college's endowment has declined in the past two years," said Blaguszewski. "While we did lose money, we didn't lose as much as other colleges and universities did."

The Council for Advancement and Support of Education (CASE) recently conducted a survey which projected that donations for the fiscal 2010 year will be 4.3 percent higher than the previous year, and that the next academic year will see gains of 5.7 percent.Based on these figures, a turnaround for colleges and universities which experienced difficulty raising money during the recession could be on the horizon if these numbers are realized.

"The survey results are an encouraging sign that we may return to pre-recession giving levels in roughly two years," said John Lippincott, president of CASE, in a press release.

Rae Goldsmith, vice president of advancement resources at CASE, said public institutions are expecting to be favored over private institutions, as donors will look to help their relatively smaller endowments.

"Generally, looking back to anticipated results for 2009-10, private institutions were slightly more optimistic about their fundraising results than public institutions," said Goldsmith. "Looking ahead to 2010-11, both private and public institutions were optimistic about increasing private donations, with public institutions being the most optimistic."

As giving is starting to increase again in higher education, Goldsmith attributes several reasons as to why donors want to give, despite the economy still being somewhat uncertain.

"People want to help people overcome the economic emergency," said Goldsmith. "Right now scholarship programs are getting more support than building because of a scholarship's direct impact on a student."

Goldsmith also cited the 2009 Voluntary Support of Education Survey (VSE) which found that private contributions to America's higher education institutions declined by 11.9 percent to $27.85 billion in fiscal 2009.

"Even people who have the capacity to give have taken a deep breath," said Goldsmith. "I think that confidence is growing among donors, but we'll just have to wait and see."

Dan Peltier can be reached at djpeltie@student.umass.edu.

B substance, cocaine, and a school zone violation.

Som was held overnight at the Hampshire County House of Corrections in Northampton and was arraigned Thursday morning at Eastern Hampshire District Court in Belchertown.

A second traffic stop which occurred early Thursday also resulted in possession with intent to distribute charges being filed. Officers spotted a vehicle also traveling on East Hadley Road with expired inspection stickers, and, after pulling the vehicle over, found packaged marijuana inside.

Two of the car's occupants were arrested. They were Caleb Y. Satterfield, 17 of 63 Dyce's Head, Castine, Maine, and Jack M. Ryan-Ackerman, 18, of 151 Rolling Ridge Road in Amherst.

Satterfield was charged with possession with intent to distribute a Class D substance, marijuana, and possession with intent to distribute a Class B substance, oxycodone and Ritalin. Ryan-Ackerman was charged with possession with intent to distribute a Class D substance, marijuana.

The two were arraigned at Eastern Hampshire District Court last Thursday morning. None of the three individuals arrested are Five College students.

SGA from page 1

35 votes. The cluster's treasurer and secretary positions remain in limbo, as a slew of candidates in each race all received just one vote.

Pierpont-Moore's president is Marc Boyd, who rousingly defeated Chris Davis and Greg Olson, receiving 114 votes to the latter two candidates' one apiece. Ashley Prinz will be the cluster's vice president, as she took 65 votes to Daniel Dovev's 40, Jenkin Solanki's nine and Greg Olson's one. The cluster's treasurer will be Noah Z. Lurie, who received 50 votes to Allison Avajo's 31 and Tony Cecchini's 28. Navid Nia, who won 109 votes to two other candidates' one, will be Pierpont-Moore's secretary. John Quincy Adams' cabinet will include Rebecca Ukaegbu as president, Yogini Patel at vice president, Cheng Zong at treasurer, and Alex Karkos at secretary. All four ran unopposed.

Grayson-Field's new leadership is comprised of Amanda Dickinson, who heartily trounced Kevin Carnevale, as president. Brian Rucki as VP, Rebecca J. Ellie at treasurer, and, in a tighter contest, Phil Sesay, who defeated Anthony Cuoco seven votes to six, as secretary.

Cance's race saw reasonably substantive turnout. Alex Ledoux took the presidency by a vote of nearly two to one, topping Jaclyn Barzvi, 46 votes to 26 votes. Morgan Sax won the vice presidency, receiving 49 votes to Lauren Duffy's four. Aaron Araujo won treasurer, defeating Ilyeji Cho 48 votes to 24. Krista Coufos will serve as secretary, as she topped Duffy 49 to four.

Webster-Dickinson will be represented by Alfredo Mesit as president, Lily Fitzgerald as VP, George Lee as treasurer, and Jennifer O'Brien as secretary.

The Crabtree-Mary Lyon-Knowlton cluster also saw limited competition. Alex David Shaffer will serve as president, Chloe Piccola will be vice president, Eric Koegler edged out Chelsea Hutchinson for treasurer, and Robert Donadio handily won the secretary spot.

Leach-Hamlin-Dwight saw extremely low turnout. Joseph Kalinowski won the presidency with 11 votes to Allysa Nadera's two. Edialie Ikhariale will serve as VP. Nadera won the treasurer spot with two votes, and she also won the secretary spot, also with two votes.

Thatcher-Lewis-Johnson cluster also saw light participation. Laura Summers will be president, taking seven votes. Nesrin Sengul will be vice president, taking six nods. Katharine Sansbury will be treasurer, taking five votes to all other candidates' one or two, and Dia Majumdar will be secretary.

The council race in James was not terribly fierce. Alina Bahtavouni will be president, Blake Foster will be vice president, and Jordan Schneider will be treasurer No secretary candidates were listed.

Emerson, reflecting a trend in the house council races, also saw limited voting. Kristina Zoto won the presidency, receiving 23 votes, Russell Hochman won the vice presidency with two votes, and the treasurer race was still undetermined, with three candidates tied with one vote each.

Kennedy's race saw Sandy Joseph win the presidency and the vice presidency, while no winners were indicated in the race for treasurer or secretary.

In Coolidge, Piro Cani won the presidency, Alexander Berry took the vice presidency, and Amanda Hemphill defeated Blaine Stillerman for the treasurer spot. The secretary race was ongoing, as two candidates, Amanda Hemphill and Andrew Czuczwa, each had two votes.

Melville-Thoreau's race saw better turnout, though still little competition. Jennifer Kokotis won the presidency unopposed, Jared Antman took 84 votes for VP, Mitchell Lipinan won 82 votes for treasurer, and Samantha Dubner defeated nine other candidates for the secretary spot.

Prince-Crampton's council election also saw heartier participation than others. Alexandra Laczay pushed away a challenge from Ben Denmark, taking 42 votes to his 29. The race for VP was as close as any, as Amanda Shafu bested Albert Lee 33 votes to 30. The treasurer's race was less contested, as Megan Colwell glided to victory with 57 votes. Cale J. McSweeney easily won the secretary seat.

Baker-Chadborne-Greenough's race was more like the rest of campus. Emily Moreira easily won the presidency with 32 votes, Zahava Stern defeated a bevy of write-in candidates with eight votes, the race for treasurer was undecided, with seven candidates receiving one vote, and Elisa Ungaro won the secretary position.

Van Meter-Butterfield's race was similarly uncontested. Matthew Criscuolo won 63 votes for president, Samuel Warton took 64 to win the vice presidency, Alexandra Case won seven votes for treasurer, and Sarah Arnell won eight nods for the secretary seat.

The race in Brett-Brooks saw almost unparalleled low turnout. Michael Shi will be president, receiving three votes to seven other candidates' one. Lauren Ma won three votes for vice president, good enough to win, Donald Loch also took three votes to win the treasurer spot, and Johanna Brophy also took three votes for the secretary position.

Gorman-Wheeler had no presidential candidates, a strange element of an election with fairly sizeable participation. Michael Spahr won at vice president, Regina Morovo will be treasurer, and Emily Hajjar will serve as secretary.

Cashin had perhaps the strangest outcome. Just one candidate, Jeffrey Landry, entered any race. He won the presidency with one vote.

McNamara saw a similarly bizarre pattern. No candidates can be called winners there, as several candidates received one vote each in each election.

Brown cluster saw four candidates win unopposed. Gregory Porcaro will be president, Frederline Thomson will be vice president, Courtney Blanken will be treasurer, and Arber Doci will be secretary. In Patterson-Mackimmie, Kelly Ransom defeated Rahul Garg for the presidency. Lyndsey Davis won the VP spot unopposed, Amelia Feinstein edged Laurel Schmidt, 43 to 29, for treasurer, and Aymbre Paige and Feinstein tied for the secretary seat, receiving five votes each.

Khushalani, the elections commissioner, said this fall's elections saw turnout twice as high as last fall semester's. He attributed the spike in participation to the accessibility of online voting, as well as sending out emails encouraging participation and help from residence directors in communicating information about the elections to residents of the campus' dormitories.

SUPPORT AND THERAPY GROUP MEETINGS
FALL, 2010

HILLS HOUSE GROUPS

RELAXATION AND STRESS MANAGEMENT
Mondays, 4:30 – 6 p.m., beginning in October.
Open to new members each month. Learn and practice a variety of relaxation skills to help deal more effectively with stress.

WOMEN'S THERAPY GROUP FOR GRADUATE STUDENTS
Mondays, 6:30 – 8 p.m. beginning in October.
Focus on issues such as self-acceptance, self-expression, relationships, family, anxiety and academic demands in this group just for women.

MEN'S THERAPY GROUP FOR GRADUATE STUDENTS
Tuesdays, 5 – 6:30 p.m. beginning in October.
Closed to new members after first session. Addressing issues including male identity, self-acceptance, isolation and forging more satisfying relationships.

MINDFULNESS-BASED STRESS REDUCTION (MBSR)
Wednesdays, 2 – 3:30 p.m. beginning Oct. 13.
Closed to new members after first session. Mindfulness is a way of paying attention with intention, in the moment and without judgment. With regular practice, MBSR has the potential to lower stress, anxiety and depression, promote relaxation, improve concentration, raise self-awareness and enhance the immune system.

INTERNATIONAL STUDENTS' SUPPORT GROUP
Wednesdays, 6 – 7:15 p.m. from Oct. 6 – Dec. 1.
Open to new members throughout the semester. Talk about home, cultural adjustments, language issues and more, with undergraduate and graduate students from all over the world. Meetings take place in the International Programs Office, Hills South.

MAKING CONNECTIONS
Thursdays, 3:30 – 5 p.m. beginning in October.
Closed to new members after first session. Join undergraduates in exploring topics including self-esteem, relationships and school adjustment.

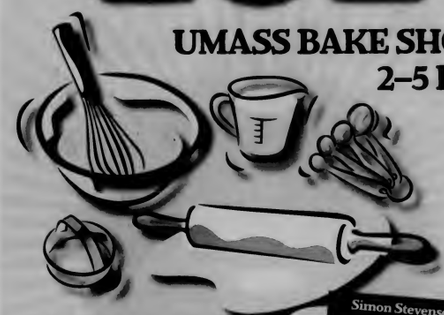
BERKSHIRE HOUSE GROUPS

LIVING WITH LOSS
Thursdays, 4 – 5:15 p.m. beginning in October.
Closed to new members after first session. A support group for undergraduate and graduate students dealing with the loss of someone close to them.

MEN, TALKING
Fridays, 3:30 – 5 p.m. beginning in October.
Open to new members throughout the semester. A small, safe group of undergraduate men committed to building community, supporting each other and discussing issues including romantic relationships, satisfying friendships, academic stress and masculine identity.

Pre-registration is required; call weekdays, 8 a.m. – 5 p.m.
For groups meeting at Hills House, call (413) 545-2337;
for groups at Berkshire House, call (413) 545-0333.

Cooking Baking 101
UMASS BAKE SHOP
2–5 PM



Hands on class making fresh fruit strips, hand rolled truffles, chocolate lava cake and more!

October 8 ..... Baking 101
October 15 ..... Baking 101
November 5 ..... Chocolate 101
November 12 ..... Chocolate 101
November 19 ..... Chocolate 101
December 3 ..... Chocolate 101

- Must be on a meal plan
- Registration is on a first come first serve basis

THE MASSACHUSETTS DAILY COLLEGIAN

EDITORIAL OPINION

MONDAY, OCTOBER 4, 2010

"If we don't believe in free expression for people we despise, we don't believe in it at all." Noam Chomsky

EDITORIAL@DAILYCOLLEGIAN.COM

Does Levi Johnston have mayoral potential?

Posing in Playgirl magazine, becoming the satirical love of Kathy Griffin on her reality show and agreeing to do a music video with pop star Brittani Senver are just some of Levi Johnston's recent accomplishments, all beginning with his most famous "accomplishment:" getting former Alaska Governor Sarah Palin's 17-year old daughter pregnant.

Alison Bowler

Levi Johnston, now 20 and tightly holding on to his celebrity status, has announced his latest plan for the future: running for mayor of Wasilla, Alaska, his hometown, in 2011. When "Tonight Show" host Jay Leno asked Johnston's former fiancé Bristol Palin in a recent interview whether or not she would vote for her ex, her response was, "Well he needs to move to Wasilla, to the city limits. He needs to get his GED." Levi's response to this comment in an interview on MSNBC with Lawrence O'Donnell was that he was "working on it."

Johnston's sit-down with Lawrence O'Donnell struck a resemblance to Sarah Palin's interview with Katie Couric. Like his almost-mother-in law, Johnston struggled when asked certain questions. In fact, O'Donnell mentioned to Johnston the similarities between the two interviews, making him aware that he was not alone in his struggles with "tough" questions. Johnston admitted he did not watch a lot of television or read many newspapers besides the local Mat-Su Valley Frontiersman.

Still, we give a surprising amount of attention to celebrities that run for office. In fact, some of the time they win local, state and in one case a presidential title.

Do people like Levi Johnston really want to make a difference in the world? Or is this simply a stepping-stone to even more fame? It is hard not to pick the second choice, simply based on the fact that Johnston's responses seemed all but informed, and his previous engagements in the public eye appear to be driven by a thirst for popularity.

It's very possible that no one will vote for Johnston in Wasilla, despite his popularity and connections to the former mayor, Palin, but it seems as if everyone else in the country doesn't want this to happen. Public Policy Polling found that about 6 percent of America views Johnston in a positive way. Johnston's favorability in Wasilla is also extremely low.

Still, we give a surprising amount of attention to celebrities who run for office. In fact, some of the time they win local, state and, in one case, presidential positions. Arnold Schwarzenegger and Ronald Reagan are two of the more famous examples. To their credit, they've made a positive impact in the areas they've governed.

Why does Levi Johnston get different treatment? So he never dressed up as the Terminator and no, he hasn't been in any movies, but he's in the public eye nonetheless. He has been on magazine covers, interviewed on talk shows, and has made plenty of public appearances. He has ties to a famous politician, though little experience in politics himself.

The people of Wasilla are the only ones who can elect him, even if the rest of the country is yelling "No!" Should we give Johnston more credit than he has now? Is there any chance he might end up doing a great job for his city?

Most likely though, it seems as if Johnston really has no clue. His interview on MSNBC was quite representative of the fact that maybe he should stick to some of his other talents to sustain his popularity. Yet there is no doubt that he will continue to rally for his own success both in Wasilla and in a way, the entire country. Will the country ever see him as a viable candidate to hold any type of position in office?

While people may feel Johnston should receive more credit or could somehow manage to leap over his own ignorance and appear a more polished politician, I struggle with the fact that an ignorant and barely famous person could run for mayor simply to get another article written about them by TMZ, the incredibly critical and somewhat exploitative tabloid.

What is happening to public office in the United States? Is it just a catapult to even more fame and maybe the possibility of writing a book or two? Or maybe it has always been this way. Maybe the entirety of politics has been a publicity stunt marked by people seeking personal fame and a book opportunity. In that way, sadly, Levi Johnston is no different, no worse, no less qualified. His flaws are just more obvious.

France to Muslims: uncover-up

Freedom of religion is a fundamental American right. However, it may be hard to notice these days. That is why I am glad I live in the United States, rather than France.

Yaroslav Mikhaylov

Several weeks ago the French legislature banned burqas - traditional head scarves - and a number of other facial coverings worn by Muslim women. The proponents of the bill argued the practice of forcing women to wear veils was oppressive and infringed upon their civil rights. It also argued that such a visible display of religion did not correspond with the secular values of French society. France had already banned burqas and hijabs – scarves that cover the head but not the face – from public schools. The many problems with this law are particularly concerning to classical liberals.

Religion is a choice. Likewise, performing the rituals and wearing the identifying marks of a religion are also choices people should be free to make, as long as they don't affect others around them negatively. Wearing a scarf around your head is much the same as wearing a yarmulke or a cross around your neck.

Forcing someone to stop their religious practices because some perceive them to be unfair or oppressive is simply wrong...What the law truly does want to enforce is conformity.

Forcing someone to stop their religious practices because some perceive them to be unfair or oppressive is simply wrong. Our culture considers Muslim fashion choices to be peculiar, but that is no reason for us to make them illegal. I consider wearing pants around your ankles peculiar and silly, but I will not be lobbying for a law against it. Furthermore, this is not a general application law. It is targeted at a specific religious group. If that is not religious discrimination, I don't know what is.

A key provision of the bill is a very heavy fine and prison sentence for forcing someone to wear the head scarf. Abusive relationships happen to people of every religious denomination. There also exist plenty of legal and social means of addressing abusive relationships in French law and society. When a man forces his wife to dress a certain way under threats, it needs to be addressed regardless of the religious context. This provision of the burqa ban is therefore redundant, unless it was designed specifically to prosecute Muslims more harshly for the same offense as non-Muslims committing the same crime.

This can be somewhat equated to harsher punishments for crack cocaine offenses over powder cocaine offenses that were a vessel for economic and racial discrimination in fines and prison sentences in the United States.

The French decision to become a more secular state is laudable. In a world that is increasingly globalized and cosmopolitan, nations can't pretend they are religiously uniform anymore. Even the smallest nations now have hundreds of religious groups, sects, and denominations among their population. In that context, the ideal of a secularized state that doesn't discriminate against any particular religion is a good one. However, this bill sends France into a completely different direction. It explicitly targets a completely innocent behavior by Muslims. The only real issue that the bill addresses is already taken care of by a multitude of other laws.

What the law truly does want to enforce is conformity. This law was created to force French Muslims to look more like white, Gallic Frenchmen. It is not simply religious discrimination, but also an attempt at slowly dismantling the culture of the Muslim immigrants into France.

As a cosmopolitan nation, France should embrace the differences among its population, not attempt to repress them. How would many of us feel if the government in Washington decided to ban Irish pubs because they don't represent "real America," or try to demolish the nation's Chinatowns because they don't fit in with the architecture around them? Liberalism celebrates diversity. This law seeks to stamp it out.

France's ban on a harmless aspect of Muslim religious observance is completely misguided and unnecessary. A scarf can't harm anyone. Some argue that it harms women, but those women choose what they wear. This law does not liberate them, but rather takes away their freedom of religious observance.

A Muslim husband who controls his wife's wardrobe should be considered just as liable under the law as a Christian, Jew or Hindu husband who does the same. Muslims are not special – they deserve to be subject to the same laws as members of any other religion. That is why I am glad I live in the United States of America, where I am free to choose what religious practices I subscribe to and the state can't judge them as right or wrong.

Weight matters: "skinny" and "fat" are empty critiques

The other day I overheard a girl coo to a friend, "Oh my God, you look so skinny!" The friend seemed pleased and flattered, but all I could think of was the fact that the girl had just lied. Her friend wasn't skinny at all: as a matter of fact, she was rather chubby.

Sophie Kaner

Does it sound like I'm being cruel? I'm not. I happened to notice that the friend in question was also very pretty and well-dressed, but these qualities weren't what the first girl had chosen to comment on – she'd used the word "skinny," which simply was not objectively accurate.

How did "skinny" get to be a compliment on its own? Skinniness says nothing about a person. It doesn't mean they're kind or intelligent or funny. It doesn't even necessarily mean they're attractive.

At the same time, "fat" is so overused as an insult that it has become a cliché. Somehow, "skinny" and "fat" have become intensely polarized words, and have even reached the point where they actually function as a code for value judgments.

Many people justify their use of these words by saying it's unhealthy to be fat, but that's not really the case. There's much more to health than that - it's completely impossible to gauge the relative health of a person merely by looking at them.

Weight has a lot to do with genetics, not just diet and exercise. Yes, it is true that America has a problem with obesity. It is also true that that a healthy diet and a good exercise regimen are very important to one's physical well-being - but that still doesn't mean you can determine someone's level of health based on the way she looks.

But "skinny" and "fat" shouldn't be compliments or insults, because these words are merely neutral descriptors.

Given any two people of differing sizes, you can't assume that the skinnier one is healthier. Being fat doesn't automatically mean that you're lazy and don't take care of yourself. Being skinny doesn't mean that you're in peak physical condition. There are healthy and unhealthy people of varying shapes and sizes; health is not directly related to weight. In fact, a 2005 study showed that the mortality risk for overweight people (as measured by BMI) was not significantly different from that of people at a normal weight.

The concept of "unhealthiness," though, is only half of the problem. An essential part of the issue is that the appearance of fat people goes against the current mainstream ideal of beauty.

The idea of thinness and beauty being inextricably connected is so pervasive that those who are attracted to fat people are called "chubby chasers." Finding a fat person sexually desirable is so unlikely, our culture tells us, that it can only be a fetish.

It's the conflation of the "health" and "beauty" ideas that gives such incredible power to the stigmatization of fat people. In other words, fat people are considered to be intrinsically ugly, sexually unattractive, and lazy - and worse yet, culpable for all these things. What could be worse?

This street, of course, goes both ways. Tired of being told that fat was bad and skinny was good, many people decided to respond with the cry, "Real women have curves!" Unfortunately, this is merely another facet of the same problem. In actuality, some women are curvy, some are fat and not curvy, some are skinny, etc. It doesn't mean that any are less "real" than others. Although the "real women have curves" movement is understandable, it is equally harmful: For every heavy woman who can't lose weight, there is a thin woman who can't develop larger breasts and hips. It's terrible to be called a "fat slob," but it is no less wounding to be called "sickly thin."

But "skinny" and "fat" shouldn't be compliments or insults, because these words are merely neutral descriptors. There's no need for euphemisms for fat, like "big," or "curvy," or "not fat." Fatness is not subjective (although, like tallness, it is relative), but being fat doesn't mean anything is inherently wrong with you, just as being skinny doesn't mean you're not "real."

In the end, we really need to stop ganging up on each other and belittling the differences in our sizes and shapes. Those of us who are unhealthy - whether we are skinny or fat - may well stand to gain from a healthier diet and more exercise, although that's really not anybody's business but our own. More importantly, we can all benefit from doing our best to stop throwing around the words "skinny" and "fat" to hurt one another - particularly when it's just as nonsensical as using the words "brown-eyed" or "blonde."

Yorn to make Pioneer Valley debut

By Andrew Cogan
Collegian Staff

Rock and pop singer-songwriter Pete Yorn is on his way to Northampton for the first time in support of his new, self-titled album. Yorn will be performing at 8 p.m. this Monday, Oct. 4 at the Pearl Street Ballroom in Northampton.

As far as popular rock is concerned, Yorn is exceptional. The veteran musician combines the intimacy of folk with the sweeping grandeur of rock and roll. His expertly crafted songs are hook laden and accessible enough to maintain popular appeal, yet retain a rough and rugged edge that sets them apart. He has distinguished himself time and time again in a genre inundated with bland and formulaic music. Yorn is genuine, and he also happens to be really good.

Yorn's latest album was released Sept. 28 on Vagrant Records, marking his fifth major studio release. Produced by Black Francis of the Pixies, it has been described as "his most self-conscious" and "introspective" record to date, receiving highly favorably reviews.

According to Spin.com, "From the bracing opener 'Precious Stone' to the chugging fan appreciation 'Rock Crowd' to a heartfelt version of Gram Parson's 'Wheels,' Yorn emerges with his most purposeful, affecting album yet."

This recent record marks the tenth year of Yorn's career. Over the past decade he has worked with some of the biggest names in music, including R.E.M. guitarist Peter Buck, Dave Grohl of the Foo Fighters, Martie Maguire and Natalie Maines of the Dixie Chicks, and Bright Eyes Producer Mike Mogis. He has even recorded an album titled "Break Up," with actress and singer Scarlett Johansson in 2009. Yorn has also toured extensively with the likes of the Dave Matthews Band, R.E.M., Foo Fighters, Weezer, Coldplay, the Dixie Chicks and Semisonic.

A New Jersey native, Yorn moved to Los Angeles in 2000, where he began writing music for film and television. He got his big break when he was asked to score the Farrelly Brothers' movie "Me, Myself, and Irene," starring Jim Carrey. His first single, "Strange Condition" was released on the soundtrack.

Following a record deal with Columbia, Yorn released his first full-length album, "Musicforthemorningafter," in 2001. The album later went gold with the help of the hit single, "Life on a Chain," one of his most famous songs to date. He followed with a second album, "Day 1 Forgot" in 2003, which features several contributions from Buck.

Yorn's third studio album, "Nightcrawler," (2006) saw the emergence of a more rock-oriented sound. The record was named one of the top 20 of 2006 by Paste Magazine. His next album, "Back and Forth," was released in 2009 with Mogis at the helm.

Yorn is now on tour supporting his recent release. According to Spin.com, Yorn is "fronting a tight, four-piece band." The lineup includes, Mark Noseworthy on guitar, Zak Shaffer on bass, and Scott Seiver on drums.

Don't miss Yorn's first Pioneer Valley performance this Monday at Pearl Street. The concert starts at 8 p.m., and tickets are $20 in advance, $25 at the door. Pete Yorn is sure to have a spectacular Northampton debut.

Andrew Cogan can be reached at acogan@student.umass.edu.

Alternative singer and songwriter Pete Yorn will make an appearance this Monday at Pearl Street. Yorn is touring in support of his latest, self-titled album, which was produced by Black Francis of the Pixies.

COURTESY THE BOOK — TM

Dark Star Orchestra performed this past Friday at the Calvin theater in Northampton. The band recreated a 1977 Grateful Dead show from Portland, Ore. in its entirety.

DSO bring back Dead

By David Kincaid
Collegian Correspondent

This past Thursday, the illustrious Dark Star Orchestra did not disappoint fans at the Calvin Theatre. In the seating section and the pit, the fans trickling in appeared to be surprisingly diverse for a Grateful Dead cover band.

The pit was full of not only a great deal of older fans, but also a wider spectrum of the younger fans. Instead of the expected tie-dye and bandanas, a great deal of the college-age crowd was wearing street clothes, such as jeans and t-shirts, certainly not what would commonly be labeled as "hippie" clothes. This was rather curious since, as one could imagine, The Dark Star Orchestra has a reputation for drawing a crowd similar to that of the Grateful Dead.

Dark Star Orchestra strolled on stage at around 8:15 p.m., and got right to work making final adjustments and tuning up. They didn't waste any time with an opening band, and didn't say much before diving into their first set.

The groove of the two drummers together immediately laid down a foundation for the rest of the band. As the performance went on, they seemed to synch up even more, with tighter and longer jam sessions. Each song spilled further and further out into improvisation, only to recede back into a familiar chorus such as "Don't murder me, oh I beg you, please don't murder me," from "Dire Wolf," or, "Tennessee, Tennessee, there ain't no place I'd rather be," from "Tennessee Jed."

The improvisation bubble finally appeared to pop as the jam in "New Minglewood Blues" erupted with some serious shredding from lead guitarist Jeff Mattson into a terrific climax by the entire band before they came in one last time to finish the song.

Then, just when it looked like the band couldn't take it any higher, they burst into "The Music Never Stopped" and rode it out for what seemed like an eternity. They effortlessly switched the rhythm into three-four time and then back to four-four time without missing a beat. DSO raged harder and harder with every note until they reached the very end. After that, they left for a set break, which gave the crowd a chance to take a rest and recover from the powerful performance.

At this point, anyone would be sufficiently convinced of this band's precision and skill in not only their art, but also in recreating an atmosphere comparable to that of the Grateful Dead themselves. At around 9:30 p.m., Dark Star Orchestra returned for a second and final set and were met by the eager and energized audience. Sure enough, the band got right back to work building on each others' playing and closing in on some terrific sounds.

They branched farther out with each song and blew the crowd away with their persistent groove. At times these jams would get a little off track or seem to float off course for a little too long, but the crowd never stopped dancing. DSO always rewarded their loyal fans with something even better than before. Towards the end of the set, the band played "Dancing in the Street" for one of the longest jams of the night, which led into a duet from the two drummers, who kept a furious pace throughout the show.

To the dismay of the audience, DSO eventually had to bring the night to a close. Euphoric yet exhausted, fans sluggishly walked away from the Calvin, excited to have added another show to their growing list. DSO later announced they had played the Grateful Dead set from the Paramount Theater in Portland, Ore. on Oct. 1, 1977, exactly 33 years ago. In a sense, the audience came as close to experiencing the real Grateful Dead as anyone could possibly hope for.

David Kincaid can be reached at dkincaid@student.umass.edu.

Tallest Man in Noho

By Angela Stasiowski
Collegian Staff

Americana can come from anywhere, even thousands of miles away. This past Thursday, folk aficionado The Tallest Man on Earth brought his brand of straight-up American folk all the way from Sweden to the Pearl Street Nightclub in Northampton.

The journey was well worth it for Kristian Matsson, more commonly known as The Tallest Man on Earth. The folk star has been on tour in support of his latest release, "The Wild Hunt," as well as a recent five-song E.P. "Sometimes the Blues is Just a Passing Bird."

The performance last Thursday night featured the talents of S. Carey to open the show, followed by The Tallest Man on Earth's one-man act. Both musicians would have made for encore-worthy performances on their own, but the combination was simply unforgettable.

S. Carey, a supporting drummer for Bon Iver and classically trained jazz musician, opened the show in style. Throughout his performance it became less and less clear why he has remained in the background for so many years. Carey's vocals were strong and his percussive skills were stronger. When he stood up for a drum solo, the murmuring audience grew completely silent, and only broke their trance to erupt into cheers.

For the rest of his set, however, the Pearl Street crowd was particularly loud. Waves of murmurs were a constant, particularly during the quieter songs.

Regardless of noise, Carey played a brilliant but short set of tunes from his recent release, "All We Grow," as well as a cover of the David Bazan song "Lost My Shape." Carey confessed that Bazan is one of his musical heroes of this generation.

By the time The Tallest Man on Earth took the stage, the Pearl Street Ballroom was filled to the brim with flannel-clad folk fans, rearing for a good show. The chatter died down immediately at the first glimpse of Matsson.

Matsson's setup was modest; an array of guitars, a microphone, and a chair. He only took to the chair when emotions overwhelmed him during the set, which happened quite frequently.

Around the performance's midpoint, there was a lull between songs as Matsson tuned one of his many guitars. Suddenly, a voice rose above the others, in a language that was foreign to the American ears of the crowd. The Swede, however, recognized it immediately as Norwegian and prompted the rest of the room to hush so he could hear more clearly.

"That's close to my home," proclaimed the fast-talking folk star, as he toned down for a homework ballad, "I like the Wheel" off his recent LP.

Few musicians are able to connect with their audiences as well as Matsson, and certainly not at such a physical level. Several times during the night, Matsson bent down to hug and nuzzle fans, proving The Tallest Man on Earth is not nearly as intimidating as one might assume.

The most heartbreaking moment of the evening came in the form of a broken string during the tuning session for the song "Where Do My Bluebird Fly," a favorite off of "Shallow Grave." Matsson begged for the audience's patience as he tuned for the song, only to break an essential string just as he finished preparing. However, the veteran performer soldiered on, playing a bit quieter than the recorded version, but singing with the confidence of a professional. The tune was certainly a highlight.

Matsson performed another song off "Sometimes the Blues is Just a Passing Bird," "Thrown Right at Me," with the help of guest and fellow Swedish folk singer Amanda Bergman. The duet was heartbreakingly beautiful, even with the occasional loss of composure. Laughter in such a serious song came across as endearing.

The Tallest Man on Earth returned for a brief, one song encore, though fans stuck around, seemingly expecting more. Perhaps one or two more songs would have been ideal to round out the set.

For a folk singer with a well-developed soft side, The Tallest Man on Earth knows how to capture an audience. The evening will be one to remember, particularly for those who were lucky enough to get a hug from the Tallest Man himself.

Angela Stasiowski can be reached at angelas@dailycollegian.com.

Last Friday night, Sweden's Tallest Man On Earth played the Pearl Street Ballroom in Northampton. Opening the show was S. Carey of Bon Iver fame, promoting his debut, "All We Grow."

Sowry pleased with team effort

F. HOCKEY from page 8

ing against then-No. 4 Connecticut on Sept. 11.

"We constantly said to them, 'Win the battle,'" Sowry said. "When we had the ball, we were trying to get in front of their players, because most games they'll step in front and pick off the ball time and time again. But we stepped in front, we competed, we contested those 50-50 balls, and then in the course of flow of the game we did come up with plays. I think our defensive organization, our communication, we were all there on key as an entire team."

Sunday's win was the first against Syracuse in 12 years for the Minutewomen.

"It really proves when you can play against a UConn and a Syracuse that we can play at that level," Sowry said. "At the same time, we have to keep learning lessons because when we play other teams we don't come out as strong. We're not as sharp on the ball or sticking to our game plan. As we go forward into the A-10s, we've got to take moments like these and make sure that you play at that intensity and that level no matter who the opponent."

Senior defender Jamie Bourazeris gave UMass a 1-0 lead in the 30th minute off a tip in. It was her second goal of the season. Forward Molly MacDonnell, a freshman who had still been looking for her first goal of her UMass career, broke away in the 52nd minute to give the Minutewomen an insurance goal early in the second half.

Sophomore forward Nicole Cordero assisted on both goals for her first two assists of the season.

Syracuse more than doubled the amount of shots taken by UMass, 23-11, but came away with no goals. In recent games, that would normally be an outcome facing the Minutewomen.

Last weekend UMass took 40 shots, outshooting both Vermont and Albany by 25, and only scored twice. On Sunday, the Minutewomen made the most of their 11 shots. Widdall made a diving stop on an Orange penalty stroke with just over two minutes remaining in the game to keep the shutout intact. The play was a clear example in Sowry's mind of the intensity that she had been preaching about since the way Albany played last Sunday to preserve a 1-0 victory over UMass.

"Alesha, along with the rest of the defenders, incredible composure and just undeniable," Sowry said. "They wanted to keep the ball out of the back of the net. It was fabulous. We should take a lot of confidence moving into the Atlantic 10 conference play."

Pete Vasquez can be reached at pvasquez@student.umass.edu.

Widdall gives team confidence going into conference play

WIDDALL from page 8

showed incredible composure and she specifically was undeniable. She really wanted to keep the ball out of the back of the net. It was a fabulous effort."

Widdall has been the most consistent player on the squad all season long. Eleven games into her junior year, she is already on pace to record personal records in saves, shutouts and save percentage. Her coach believes she plays and leads like a true senior veteran.

"[Alesha] is always outstanding," Sowry said. "With a quality goalkeeper back there, we can play more aggressive, and having her back there really gives the team great confidence."

Widdall has a laundry list of accomplishments and it is difficult to argue with the numbers she has put up during her third year in goal.

She is currently 10th in the nation in season save percentage (.785), and fourth among active goalkeepers with a career save percentage of .779. She is 18th in goals-against average (1.38), and also ranks seventh in minutes played, the only non-senior player on that list.

Against the juggernaut that is Syracuse's offense, Widdall knew it would take all of her efforts to keep her team in the game.

"I try to keep my feet under me as much as possible," Widdall said. "In past years they've scored early on, so I tried to stop them early. I gave everything, everything, everything I had to stop the ball today."

It's not easy being the anchor of a defensive scheme, but Widdall takes it all in stride. She prepares for every game the same way, and doesn't let herself get too ahead in her pregame thoughts.

"At first it's a weird process," Widdall said. "I try to get really pumped up for the game and psyched, but I also try to stay very composed because if I get too psyched up, I let in dumb goals."

UM halts 5-game losing skid

By David Martin
Collegian Staff

The Massachusetts women's soccer team ended its five-game losing streak with a strong 1-0 win over Saint Louis on Sunday.

The Minutewomen (4-7, 1-1 Atlantic 10) picked up their first A-10 win of the season against the Billikens (1-6-5, 0-2 A-10) off of strong performances from junior attacker Meghan Collins and freshman goalkeeper Emersyn Pullan.

After a scoreless first half, Collins picked up the lone tally on the day in the game's 74th minute off of a redirected corner kick from freshman Lauren Skesavage. The goal marks Collins' third of the season.

"We really proved ourselves today," Collins said. "That goal was great, especially since it would end our losing streak. Both our offense and our defense were really good today, and we proved it by coming out hard from the first whistle."

Pullman proved to be just as instrumental in the Maroon and White's home win. She made two saves in her second start of the season in the absence of injured starter Emily Cota.

The team accomplished UMass coach Ed Matz's goal of earning three points on the weekend to advance themselves further in the A-10 standings.

"We played great all weekend," Matz said. "We were strong against two tough conference opponents. We played great, were composed, distinguished our skills, and our players fought hard with confidence. We got our three points on the weekend and will look to do the same on the road next weekend."

UMass out-shot SLU, 14-5, on the day, while also leading the game in fouls, 11-9. The two teams were even with three corner kicks apiece.

UMass	1
SLU	0

The win against SLU on Sunday also marks the first ever win for UMass against the Billikens in six total matches, while the squad from the Show Me State rides a two-game losing streak.

On Friday, the Minutewomen fell to conference rival Charlotte, 2-1, despite a strong effort in less than perfect weather.

The 49ers (8-3-0, 2-0 A-10) proved why they will likely once again be one of the elite teams in the conference with a strong performance on Rudd field. Charlotte opened up the scoring in the 24th minute of the first half with a goal by attacker Macky Wingo. Just 32 seconds later, Charlotte doubled its lead with a timely tally off the boot of attacker Oni Bernard.

Charlotte	2
UMass	1

Though the opposition seemed daunting . the Maroon and White came back strong in the second half.

Right off the starting whistle, the Minutewomen moved their offense into the scoring threat it has been all season. After several minutes in the 49ers' defensive end, UMass would cut the lead in half with a tally by junior Deanna Colarossi.

The goal, which came at 54 minutes, 17 seconds, is a team-leading fifth for Colarossi on the season.

The offensive surge would end there, however, as UMass just could not come up with the equalizing goal. Matz, though upset over the loss, saw it as a good game.

"We played well the whole game," Matz said. "We came out from the beginning and responded well to the pressure. We were pretty even in the stats and didn't give them much to work with. The thing is, we really only made two mistakes, and they were able to capitalize on them. They're a strong group of players that fed off of costly turnovers. We played them dead even, but they proved why they're one of the best teams in the A-10."

Colarossi's lone goal was the first scored by UMass against Charlotte in five years, dating back to the team's 2-0 win on Oct. 28, 2005.

David Martin can be reached at dmmartin@student.umass.edu.

Freshman goalkeeper fills big shoes during Cota's absence

Poise, comfort helps Pullan survive weekend during split

By David Martin
Collegian Staff

It's never easy coming into a game to fill-in for a starting player. It's even more difficult when you're expected to fill the shoes of a key piece to an offensive rush, or a defensive line or any other critical element to a team's success.

Now, just imagine that you're a freshman goalkeeper on a collegiate soccer team and you're called upon to step into those shoes and be the backbone of your team's defensive end.

Once you fathom that, you can understand what Emersyn Pullan is experiencing playing for the Massachusetts women's soccer team.

Pullan, one of nine freshmen to come to UMass to play for coach Ed Matz, has earned the spot of starting goalkeeper in place of the injured regular Emily Cota. The sophomore missed the past two games after suffering a head injury in a collision against Harvard.

Pullman saw her first start against Atlantic 10 powerhouse Charlotte, where she proved herself capable of holding her own in making four saves off of six shots on goal. Though the game ended in a 2-1 loss, Matz was pleased with her performance.

"She looked very good out there today," Matz said after Friday's game. "She looked comfortable and didn't give up any rebounds. She played a great game."

What proved to be a good performance on Friday progressed into a fantastic performance in net Sunday against another tough conference rival.

In the Minutewomen's game against Saint Louis Sunday, Pullan pushed aside two saves in a fantastic effort to help lead the team to a tight 1-0 win. The win is Pullan's first of the season, along with her first shutout, and she could not be more pleased with the results.

"It was a great game," Pullan said. "It feels great to get my first collegiate win as a shutout against a strong A-10 opponent like Saint Louis. I was really nervous, but I just tried to take it one shot at a time. It shows that I can really compete, both individually and on a team level, against other tough teams."

Although Pullan doesn't know her fate with the team, she said she'll be supportive of her coach no matter what she decides.

"I don't know if I'll start or not," Pullan said. "That is up to coach to decide. If it is in the best interest of the team, then I will. If not, I won't. I can only do what I'm asked to do, the best I can."

Sporting an icepack around her left ankle after the game, Matz could only look at her and smile.

"She looks and plays like a badass," he said.

Dave Martin can be reached at dmmartin@student.umass.edu.

FUN EXPERIMENTS TO DO AT HOME
Attention, youths of today! Did you know that there are several fun experiments you can do at home?
For example, add vinegar to baking soda!
The resulting mixture will make a lot of bubbles and it's pretty cool. I'm serious: it's pretty cool! You can add food colouring to make it look like cartoon lava too. Right?
...Normally at this point you'd talk about the science behind the experiment, T-Rex.
Hah! PLEASE.
Another fun experiment is to wrap copper wire around an iron nail!
And then attach the wire to a battery.
Yep! Do that and now your nail can pick up tiny metal paperclips, as if by MAGIC. Heck, it may actually BE magic, for all you know! Is it magic? Let's all decide that it is.
T-Rex you're my friend, but you're -
you're ruining science

UMass upsets No. 8 Syracuse on home turf

By Pete Vasquez
Collegian Staff

The Massachusetts field hockey team bested another Top 10 team by shutting out No. 8 Syracuse, 2-0, Sunday afternoon at Garber Field.

"[I'm] thrilled," UMass coach Justine Sowry said. "It was a huge game for us. We've had all week to prepare for it. They came out firing and to be able to shut out a quality team like that is really impressive. I'm just incredibly proud of this team right now."

Junior goalkeeper Alesha Widdall earned her third shutout of the season and second in three games. She had a season-high 11 saves in the game, overcoming 23 shots and 11 corners by the Orange. Widdall now has 16 shutouts in her career.

"I'm just so excited and pumped that everything fell together from this week's practicing," Widdall said. "Our defense put everything out on the line to keep the ball out of the net."

The Minutewomen (5-6) knew to expect a big early push by Syracuse (7-4). The question was whether or not they could compose themselves enough to withstand that push. The result was their second shutout against a Top 10 opponent, with the first coming in 2007.

UMass	2
Syracuse	0

Maxwell Sparr/Collegian

Freshman Hannah Prince attempts to keep the ball away from the offense during the Minutewomen's game against Albany. UMass got its second Top 10 upset on Sunday with a 2-0 win over Syracuse at Garber Field.

Widdall saves 11, dismantles Orange attack

By Michael Wood
Collegian Staff

Massachusetts goalkeeper Alesha Widdall stood in net Sunday, facing Syracuse midfielder Martina Loncarica.

Clinging to a 1-0 lead with just two minutes, 11 seconds left in the game, the Minutewomen had dominated the Orange on offense all day. Regardless, all their hard work could have been erased with one penalty shot, and if the Orange get any momentum, its offense is difficult to stop.

Loncarica bounced up and down a few times to distract the goalkeeper then skipped a shot to the left side of the goal. Widdall dove to her right a split second later and the ball deflected off her blocker pad. Still 1-0.

"It was very nerve-wracking," Widdall said. "I tried to stay composed as much as possible. At this level it's really hard and you basically have to just pick a side and dive. Luckily it was a little off base and I could get to it."

Under enormous pressure from a potent Syracuse offense, Widdall finished with 11 saves, an anomaly in field hockey. Most came on diving or sliding stops, as she earned her 16th shutout of her career.

"Alesha was huge," UMass coach Justine Sowry said. "Alesha, along with the rest of the defenders,

Minutemen defeat Towson

By Dan Gigliotti
Collegian Staff

Massachusetts football coach Kevin Morris said his team needs to avoid making mistakes in order to win on the road against conference opponents.

The Minutemen did not play error-free this weekend, but still managed to claim victory against Towson on Saturday.

UMass (4-1, 2-0 Colonial Athletic Association) overcame three first half turnovers and a seven-point deficit to beat the Tigers 27-14.

Towson (1-4, 0-2 CAA) forced the Minutemen into three fumbles on its first six possessions to take a 14-7 lead early in the second quarter.

Catalyzed by some strong defense, UMass scored 20 unanswered points, including 10 in the second half, en route to its second conference win of the season.

After the game, Morris was pleased with the way his team responded to adversity.

"The character of our team is such that when we get down, we don't get out," Morris said. "We keep battling, fighting and sticking to the plan."

The Minutemen compiled 386 net yards, including 192 on the ground. Tailback John Griffin rushed for 118 yards and a touchdown on 21 carries, while Jonathan Hernandez complemented him with 60 yards on 19 carries and one touchdown.

Griffin extended the UMass lead to 27-14 on a five-yard touchdown run with 14 minutes to play in the game.

"Once I realized that their D was getting a little tired," Griffin said, "that's when I knew I had to pick it up. Me and Jon [Hernandez], one of our mottos is that we never get tired, we always have fresh legs. The minute I see a sign of someone getting tired on the defense, that's when I know I have to go hard."

Quarterback Kyle Havens went 15-for-27 with 194 yards and one touchdown.

UMass	27
Towson	14

Linebackers Tyler Holmes (18 tackles) and Mike Mele (13) both recorded career-highs in tackles as the Minutemen defense held the Tigers scoreless in the final two quarters.

UMass made a goal-line stand in the second quarter, atoning for a special teams turnover, and later forced two Towson turnovers-on-downs in the fourth quarter to seal the win.

Holmes, who had three tackles for loss and a sack, spoke about the effectiveness of his defense, especially in stopping the Tigers on fourth-and-goal.

The Minutemen broke the scoring drought on a one-yard run by Hernandez halfway through the first quarter. The run capped a 12-play, 67-yard drive, UMass' longest of the game, lasting over five minutes.

After a Towson three-and-out on its next drive, the Tigers scored their first touchdown on a UMass turnover. Cornerback Jeremy Gardner forced a turnover, going after Havens on his own 3-yard line. Defensive tackle Marcus Valentine recovered the loose ball and ran it into the end zone to tie the game at seven.

With less than three minutes to play in the opening frame, Towson forced its second turnover of the night. Doug Shaw recovered a muffed punt by returner Shane Viveiros and returned it to the UMass 23-yard line.

After a 1st-and-goal at the 9-yard line, the Tigers ran it three straight times to move the ball down to the one. But on fourth-and-goal, defensive lineman Theo Agnew and Mele stopped Towson tailback Dominique Booker.

UMass took a 17-14 lead just before going into the locker room on a 10-yard pass from Havens to Anthony Nelson with 29 seconds left in the half.

"It's a great win for UMass on the road, against a good Towson football team," Morris said. "It was certainly a battle for four quarters, right down to the end. We're excited to come away with a big victory."

Dan Gigliotti can be reached at dgigliot@student.umass.edu.

Defensive back Mike Lee makes a hit during the Minutemen's first conference win over William & Mary.

Koch and Co. settle for 4th overtime of season vs. Siena

By Steve Levine
Collegian Staff

Throughout this season, the Massachusetts men's soccer team has shown inconsistency, resilience and a strong propensity to tie.

On Saturday, the Minutemen (1-3-5) tied Siena, 2-2, marking UMass' fourth-straight overtime game. Six of UMass' nine games have been decided in double-overtime.

UMass took a 1-0 deficit into the half despite outshooting the Saints, 11-6. Siena's goal came from midfielder Matt Hemsley, who headed a pass over UMass goalkeeper Chris Piekos in the 34th minute.

The Saints (3-5-1) extended their lead eight minutes following the half on a goal from forward Joe Tavernese.

"We put ourselves in a bad situation," UMass coach Sam Koch said. "We created chances, we missed great opportunities early in the game. When you miss those you put yourself in a hole. And we put ourselves in a hole, we got caught sleeping on a couple of plays and they put two in and we're fighting to catch up, and we did. I'm very pleased about that, just not pleased that we put ourselves in that situation to begin with."

The Minutemen opened their scoring in the 69th minute, when forward Bryant Craft scored his team-leading fourth goal on a penalty kick.

UMass midfielder Stuart Amick tied the game less than four minutes later, taking a shot from the left of the box to beat Siena goalkeeper Phil Chabot to the upper left corner. The goal was assisted by midfielder Ben Arikian, who now ranks fourth all-time for UMass in assists with 22.

"I think we played well and we all worked hard on and off the ball and we just have to score more goals and get less scored against us," Arikian said.

Neither team could find much offense in the first overtime period, each registering a shot apiece.

The second overtime period was similar to the first, as neither team could create good scoring opportunities.

The story of the period was the tense interactions between the two teams. Up to that point, both teams committed numerous hard fouls. The game reached its tipping point in the second overtime period when Chabot geared up to punch Bryant Craft following a dead play. A fight then broke out, where Chabot earned a red card and UMass forward Tyler Cleverdon received his second yellow card, which also knocked him out of the game.

Koch preferred not to talk about the fight, instead turning his attention to his team and what he wants to accomplish in conference play.

"There are still things we've got to work on, end of story," Koch said. "We gave up two goals – we can't be doing that in conference play. We scored two goals, which is good, as long as we hold the other team under two we'll be fine. We have to finish our chances better than we did and we got to hold the other team to [fewer] opportunities."

The goaltending situation is more defined now for UMass, as Piekos continues to be the go-to guy for Koch in net. Piekos made his fifth-straight start on Saturday, registering four saves. Siena's Chabot made three.

Koch and the Minutemen now turn their attention to this Friday, when they host Xavier for the first conference game of the season. Despite showing resolve in the contest, Koch knows UMass is capable of winning more games.

"It was a good comeback from down two [goals]," Koch said. "[But] I'm disappointed that we as a whole group didn't do better."

Steve Levine can be reached at slevine@student.umass.edu.

UMass	2
Siena	2

Arikian moves to 4th all-time for Maroon & White assists

By Herb Scribner
Collegian Staff

After earning an assist during the Massachusetts men's soccer team's 2-2 draw with Sienna, midfielder Ben Arikian is now tied for fourth all-time in assists in Maroon and White soccer history.

"I had no idea I was up for that until last assist someone brought it to my attention," Arikian said. "I guess it's cool, but it doesn't mean as much as winning. I'd rather be getting these wins than these assists."

UMass coach Sam Koch had much praise for the captain of his squad.

"I'm not surprised," Koch said. "We need him to keep playing well for us to do well. So I'm happy for him, but we need some wins…He's creating good opportunities for players. He's a good player, no question about it. Can he play better? We're striving to do that every week with everyone."

Down one goal after falling behind by a pair in the second half against the Saints (3-5-1), Arikian provided a praise-worthy assist to Stuart Amick.

Off a long ball sent in by the defense, Arikian gave the ball a light touch, which sent it right to the feet of Amick. Amick pursued the net and scored the goal to complete the UMass (1-3-5) comeback.

Arikian is a proven leader for the Minutemen, which is quite evident from the way he continued to motivate his team following the Sienna match.

"We can't give away early goals," Arikian said. "We've got to make sure we stay focused the whole game; we got a lot of shots off today, [but] we've just got to make them better, put them on target, and get them in the goal."

Arikian's new spot in UMass' record books hasn't gone to the midfielder's head, either.

"I, for one, did a terrible job again finishing like last game," Arikian said of his performance. "Hopefully we turn that around this week and we'll be focusing on that more than anything, because that's been a problem of ours."

Arikian has been a caregiver with the ball since his collegiate career began in 2007, earning his first assist against Northeastern. He would tally five more that season, including a pair against conference-rival Saint Joseph's.

During the 2007 campaign, which included a Minutemen run to the NCAA tournament, Arikian notched one of his assists against Central Connecticut.

The N.Y. native continued his spur of assisting success in the following season, as he totaled one extra assist than the previous campaign. The most noteworthy of his performances was a pair against Saint Louis.

Last year was a bit of a downer for Arikian, as it was for the entire UMass offense. Arikian put more pressure on scoring goals, totaling three goals and four assists during the season.

Already through the preseason, Arikian has surpassed his numbers last season with five, bringing his total to 22 assists. Arikian now sits tied for fourth place with Kurt Manal and Andy Bing, who both played together during the 1984-1986 seasons.

Dave Siljanovski tops the list with 26 total assists. With the conference schedule approaching, Arikian may have the perfect opportunity to gain on those who sit atop him and become an all-time UMass leader.

Herb Scribner can be reached at hscribne@student.umass.edu.

Patrick addresses plans in talk with students

By Sam Butterfield
Collegian Staff

Addressing archaic, deeply entrenched legislation which gets in the way of efficient government would be one of incumbent Governor Deval Patrick's top priorities if he is elected to a second term this November, the Governor told several college reporters in a conference call Monday night.

In the midst of a tight three-way race for the governor's seat against Republican Charlie Baker and Independent Timothy Cahill, Patrick took about 30 minutes to discuss his vision for a second term, as well as fielding questions from the student reporters.

Patrick came onto the line around 8:15 p.m., greeting the student journalists and outlining his plans for the next four years if he is reelected.

"To me, this is an election that is about a choice of values," said Patrick. "This is about whether we move forward, or whether we go back to some old policies and some old ways that frankly, in my opinion, have gotten us into the national economic mess we've been in." The Governor then spoke to what he sees as some of his administration's accomplishments.

"We are first in the nation in our rate of job growth," he said, "we have focused on a few goals that we know that if we get them right, we will achieve those goals."

Patrick next addressed what he sees as a disparity in educational opportunities across the Bay State.

"The kids who are stuck in that [achievement] gap are poor children, children with special needs, who speak English as a second language, and children of color," he said. "It's an educational and an economic issue that we have an achievement gap at all," he continued.

"For [Lieutenant Governor] Tim Murray and I, a second term is about finishing the work that we have started," said the Governor. "It's great that we have a record-breaking rate of job gains," he elaborated, "young people and families are moving back to the Commonwealth, and in health care, 98 percent of our citizens have health care today, but it still costs too much, so cost control is at the top of the agenda for the second term."

After detailing his administration's achievements and plans, Patrick took one question from each reporter on the line, beginning with a writer at the University of Massachusetts Boston, who asked about the Governor's plans for educational financing compared to his Republican opponent Charlie Baker's.

Patrick directed attention to a higher education bond bill he supported, pointing out that the bill would move increased funding to the state's public higher education institutions.

"First of all, the higher educational bond bill is a $2 billion bond bill," he said. "It's the largest bond bill in 30 years, I believe."

Patrick then discussed his plans relative to Baker's.

"Charlie has made comments about what he wants to do," he said, "he's talking about some $2.5 billion in budget cuts that he's going to make, and he won't be specific about where they'll come from, but you better believe they'll come from higher education, so we're either going to move forward or we're going to move backward," he said, echoing the theme of his message yesterday evening.

The next question, which came from a reporter at Tufts

Gov. Deval Patrick outlined his administration's accomplishments and plans in a conference call Monday.

Secretary of Education Arne Duncan addressed student reporters Monday as part of the "Get Schooled" challenge, which encourages students to come up with innovative ways to fund their education.

Duncan talks higher ed accessibility in interview

By Bobby Hitt
Collegian Staff

MTV and Collegeboard.com held a telephone conference Monday, Oct. 4 with U.S. secretary of education Arne Duncan and student journalists from across the country. The conference announced the kick-off of the "Get Schooled College Affordability Challenge," an initiative to improve college affordability.

The past year has seen large cuts in education funding at the state and federal levels due to the ongoing economic crisis. In the Monday teleconference, Duncan challenged state governments to invest in public higher education.

"It's interesting to me," he said, "so often tax payers don't challenge increases in the number of jails or what we spend on prisons, but somehow every dollar spent on education gets challenged," said Duncan.

The federal government has aided colleges such as the University of Massachusetts financially through stimulus money from the American Recovery and Reinvestment Act (ARRA). However, the much-needed aid will stop coming next fiscal year, leaving a large funding gap facing public institutions of higher learning.

"Get Schooled" has challenged students from across the country to come up with creative solutions to making college more affordable using the power of technology. Secretary Duncan pointed to the over two million students who don't apply for financial aid available to them. MTV and Collegeboard.com are partnering with the Obama Administration and the U.S. Department of Education to make it easier for students to understand and access financial aid.

The "Get Schooled: college affordability challenge" awards a prize of $10,000 to the individual or team which comes up with the best way to make the financial aid process simpler using digital tools. Three finalists will be picked and the winner will be decided from a poll available on MTV.com in early 2011.

"You can't have a great city, a great township, a great state, or a great country without great public education and a great system of higher education," said Duncan.

Duncan spoke on the importance of not only making college more accessible, but making sure that students get their degrees in a timely manner to help keep tuition costs limited.

"We are thinking through a number of ideas to really reward those colleges and states that create a culture around college completion," said Duncan. "We had asked as a part of the higher education bill for $2.5 billion for the 'College Access and Completion

What is our footprint?

Ontario prof. discusses climate change at UM

By Ashley Berger
Collegian Staff

Caught between trips to China and South Africa, Professor John Smol of Queen's University in Kingston, Ontario, presented a lecture titled "How Far Does Our Industrial Footprint Reach?" at the University of Massachusetts Monday.

The lecture, which was hosted by the Commonwealth Honors College as a part of the Honors Seminar series, addressed climate change in the most remote parts of the world, such as the Arctic region, and specifically examined global environmental change.

Professor Smol is the co-director of the Paleoecological Environmental Assessment and Research Lab (PEARL) in Kingston, Ontario. He has authored around 400 articles and has authored or edited 19 books. In addition to his work with these works, Smol has received more than 25 research and teaching awards and in 2004 was recognized as Canada's top scientist or engineer. Smol has also earned the 3M National Teaching Fellow award, considered by many to be Canada's highest teaching honor.

Smol opened his lecture by introducing challenges facing environmental research. He described some, but certainly not all, the factors that contribute to the limits placed on environmental research. The first of these, he said, is the "predisturbance condition." Smol described this term as, "How the world was before humans existed and before we invented the technology by which to measure climate and environmental data."

Courtesy Queen's University

Professor John Smol addressed focused on climate change in a Monday lecture at UMass.

Another factor which creates limits in how far research can go is natural variability, or how the environment, atmosphere, and habitats change naturally. Smol further acknowledged the questions that researchers have when studying climate. These questions are centered around how, how much, and when conditions have changed in any given ecosystem, as well as the entire world as a global ecosystem.

Smol's research primarily is focused in Canada, close to the Arctic Circle, and his research is primarily concentrated on the study of lakes and rivers and the history of what lies at their bottom. Smol described his method of studying lakes to the audience: Remove a few meters of sentiment from the bottom of a lake and then flatten it out to figure out what minerals have settled at the bottom and when they settled there.

"Everything that comes into the lake is a part of the lake's history," said Smol. "When we remove sediments, we are removing the history."

There are two major stressors related to human activity, said Smol: Recent climate change and the deposition of persistent organic pollutants and other contaminants. Smol addressed the idea that, essentially, climate chance and destruction has occurred since the time humans discovered fire and began burning carbon dioxide into the atmosphere. However, our records of temperature only date back until the 1700s, so our ability to gauge these effects is likely less than accurate.

"The data that we do have presents problems," said Smol. "There is poor spatial coverage, short time series, and that data is concentrated in urban and densely populated areas. We can assess, though, that within the last quarter-century, the data is completely and significantly different than the previous records in terms of higher temperatures."

Smol explained that the reason he studies the Arctic is because it is especially sensitive to climate change. Once humans heat the Arctic or melt the ice and glaciers found there, they are forever gone. Within the Arctic region, lakes and ponds are the dominant geographical feature, and ice drives the amount of light let into lakes or ponds, affecting the amount of light that is let in to that ecosystem. Smol has found that all Arctic regions show relatively similar data, and all areas are showing threshold changes.

"Threshold changes occur when ponds dry out. Ecosystems that have been in an area for

First alum Benedek to present as part of BDIC anniversary

Tom Benedek, the first graduate of the University of Massachusetts' Bachelor's Degree with Individual Concentration (BDIC) program, will speak Tuesday afternoon in the Student Union Ballroom on what he sees as a shift from a "golden age" in Hollywood screenwriting to the present state of filmmaking.

Benedek, who became the first BDIC alumnus in 1971, is a prominent screenwriter who has penned such works as "Cocoon" and "Free Willy." His talk is titled "From one Golden Age to Another," and will commence at 4 p.m. on Oct. 5.

The BDIC program facilitates interdisciplinary studies for students wishing to work across the University's various schools. Benedek, for his part, concentrated in film when designing his major. The writer has since gone on to work with directors such as Robert Zemeckis, David Brown, Ron Howard, Martin Scorsese and Sydney Pollack, according to a UMass release.

Benedek is a member of the Writers Branch of the Academy of Motion Picture Arts and Sciences and is an adjunct professor of screenwriting at the University of Southern California. He also teaches at the University of Michigan, where he is a James Gindin Visiting Artist. Benedek has also studied at L'Institut de Formation Cinematographique in Paris and is a graduate of the Director's Program at the American Film Institute.

In his presentation, Benedek said he plans to address how he feels technological developments may help to usher in a new "golden age" of cinematic development.

"I hope to paint a picture of the golden age of original screenwriting which emerged in the '70s in Hollywood to the current state which is anything but that - and how current technological and creative phenomena ought to lead to the emergence of another 'golden age,'" he said in the University release. "Simultaneously, I will attempt to sketch my own academic, creative and professional journey - the catalysts to my BDIC in film - how the skill sets of BDIC and UMass continue to aid me in shaping my destiny," he elaborated.

Benedek's lecture will be free and open to all members of the public. It is also being sponsored by career services, the interdepartment film studies program, and the DFFA Film Library at UMass.

The presentation is part of a series of events planned to celebrate the 40-year anniversary of the BDIC program. On Tuesday, Oct. 26, James Hall, the director of the New College at the University of Alabama, will give a talk titled "Student Freedom Versus University Discipline: Higher Education in Black and White" in the Bernie Dallas Room of Goodell Hall at 4 p.m. In addition, representatives of the BDIC program are hosting information sessions detailing the program's strengths every Tuesday at 11 a.m. and Friday at 2 p.m.

The BDIC program is open to students with at least 15 credits and a 2.0 GPA. Students meeting those criteria apply to take a proposal writing class, BDIC 396P, and then start their proposal process.

Campus crime log: Week of Sept. 17 – 26

FRIDAY, SEPTEMBER 17, 2010

At 1:51 a.m., Dillon Sean Doddato was arrested on charges of trespassing. Officers responding to a disturbance call and allegedly found a fight brewing in the Southwest Horseshoe between five individuals, and identified Doddato as having a prior UMPD conviction for trespassing. Doddato was taken into custody, and then transported to the Hampshire County House of Corrections in Northampton after he could not post $1000 bail.

At 10:30 p.m., Skylar A. Ritwo, 20, of 241 Beach 137 St., Belle Harbor, N.Y., was arrested for liquor law violations. Officers were summoned to Coolidge dormitory following a report of an odor of burnt marijuana coming from a room. After entering the room in question and making contact with the two present occupants, the officers found that Ritwo was also in possession of alcohol. Subsequently, Ritwo was arrested on charges of being a minor in possession of liquor.

SATURDAY, SEPTEMBER 18, 2010

At 12:56 a.m., Christopher B. Loud, 20, of 49 Brandywine Dr., Belchertown, Mass., was arrested on charges of disorderly conduct and resisting arrest, and Keegan J. Josias, 19, of 108 Rolling Ridge Rd., Amherst, Mass., was arrested on charges of disorderly conduct and assault and battery. Officers and Amherst firefighters responded to a report of a fight near the intersection of Massachusetts Avenue and Sunset Avenue, where someone had allegedly suffered a concussion. Upon arrival, officers found a large crowd and deployed a K-9 unit to assist. While officers were placing one individual in custody, Loud allegedly seized the arresting officer's arms and attempted to throw him off the suspect. Loud was then taken into custody himself for disorderly conduct and resisting arrest. Josias was also arrested on charges of disorderly conduct and assault and battery for being involved in the original fight.

At 10:39 p.m., Dale A. Terkelsen, 20, of 181 Boulay Circle, Chicopee, Mass., and Spenser J. Hachey, 19, of 33 Fruit Street, Hopkinton, Mass., were arrested on charges of liquor law violations. Officers on patrol in Lot 33 spotted a green Jeep Grand Cherokee with four parties in and around the vehicle. One was allegedly pacing around the rear of the vehicle, while another was drinking from a 40-ounce bottle of beer. The Jeep was found to have alcohol inside, and subsequently, Terkelsen and Hachey were arrested and charged with being minors in possession of alcohol.

SUNDAY, SEPTEMBER 19, 2010

At 11:26 p.m., Jahmal Nathaniel Nelson, 38, of 50 Middle Street, Apt. #1, Florence, Mass. was arrested on charges of OUI – liquor and driving an uninspected vehicle. Officers patrolling Massachusetts Avenue spotted a black Ford Ranger pickup driving erratically, swerving within lanes. A check of the license plate revealed the car had not been inspected, and after the driver performed an illegal turn, officers pulled the vehicle over. The officers could allegedly smell alcohol inside the vehicle, and after failing a breathalyzer test, Nelson was arrested and charged with second offense OUI.

TUESDAY, SEPT. 21

At 10:30 p.m., an officer working plainclothes detail allegedly observed a female loading alcohol into a black Ford Ranger pickup at an off-campus location. The officer followed the suspect and approached her when she got out of her truck near Dickinson dorm. Upon further investigation, the officer discovered that the female was underage. The alcohol was confiscated and the suspect will be summonsed to court.

WEDNESDAY, SEPT. 22

At 1:06 p.m., Isaias Rodrigues, 22, of 19 Pondview Ave., Amherst, Mass., was arrested as the result of a traffic stop. While on patrol, an officer allegedly observed an individual drive past whom he recognized as having an active warrant out for his arrest. Subsequently, he pulled the driver over, and after making a positive identification, the officer took Rodrigues into custody for the warrant. He was taken to the police station for processing, and later transported to Eastern Hampshire District Court in Belchertown.

THURSDAY, SEPT. 23

At 3:20 a.m., Ryan Hughes, 23, of 110 Sheridan Ave., Medford, Mass., was arrested on charges stemming from a domestic violence call. Officers were summoned to Cashin dorm after learning that a resident's former boyfriend, against whom she had filed a restraining order, was in her room. Upon arrival, officers found that the resident had been struck in the face with a television remote, leaving a bruise, and that Hughes had already fled the scene. He was discovered to be hiding in a lounge and upon arrest, officers discovered the antipsychotic drug Seroquel in his backpack, for which he did not have a prescription. Subsequently Hughes, a non-student, was arrested on charges of domestic assault and battery, assault and battery with a dangerous weapon, and possession of a Class E substance.

At 7:30 p.m., an officer responded to a report of larceny at the Recreation Center. Upon arrival, the officer learned that sometime between 6:30 p.m. and 7 p.m., a T-Mobile Sciphone I9---- worth nearly $300 was stolen from a locker.

FRIDAY, SEPT. 24

At 7:58 p.m., Wesley Simpson, 20, of 32 Dean St., Worcester, Mass., and Joseph Pasquerelli, 19, of 88 Oliver Street, Pittsfield, Mass., were both arrested on various charges. An officer on patrol in Lot 22 allegedly observed three individuals removing beer from the back of a car and placing it into a backpack. Upon making contact with two of the individuals, he learned that both were underage and one of them, Simpson, had a warrant out for his arrest. Subsequently, Simpson was arrested for his warrant and Pasquerelli on charges of being a minor in possession of alcohol.

At 9:26 p.m., David M. Woodland, 18, of 10A Locust Lane, Watertown, Mass., and Alex D. Calderon, 19, of 115 Poplar St., Watertown, Mass., were both arrested on charges stemming from liquor law violations. Plainclothes officers on patrol in Lot 33 noticed a brown Dodge Caravan with two males inside, neither of whom appeared to be over the age of 21. Upon closer investigation, they were found to be in possession of three 30-packs of beer. Both were subsequently arrested on charges of being minors in possession of alcohol.

SATURDAY, SEPT. 25

At 4:11 p.m., Nathaniel A. O'Doherty-Popp, 20, of 75 Gardner Street, Hingham, Mass., was arrested on charges of disorderly conduct. Officers received a tip about a fight of 10-12 people near Washington dorm. When officers arrived, one individual was lying injured on the ground with a large laceration and contusion below his left eye. Upon the officers' arrival, O'Doherty-Popp allegedly became abrasive with the emergency personnel on scene, screaming, refusing to cooperate with police and firefighters, and eventually becoming combative with officers. After nearly 30 minutes of this behavior, he was taken into custody and charged with disorderly conduct.

At 8:06 p.m., Jordan M. Rabb, 20, of 95 Country Club Road, Newton, Mass., was arrested on charges of disorderly conduct. As a plainclothes officer traveling down Commonwealth Avenue passed a large group of pedestrians on the sidewalk, a male subject allegedly stepped out of the crowd, pointed at the officer and shouted an obscenity. When the officer tried to make contact, the suspect, Rabb, allegedly approached him with his fists raised and began shouting more obscenities. Believing that Rabb was going to assault him, the officer took him into custody on charges of disorderly conduct.

SUNDAY, SEPT. 26

12:16 : Elijah Burgos, 18, of 283 Parkside Avenue, Apt. 4C, Brooklyn, N.Y., was arrested on charges of disorderly conduct and assault and battery with a dangerous weapon, and Calvin Brownridge, 20, of 57 Rose Terrace, Newark, N.J., was arrested on charges of disorderly conduct. Officers responding to a fight outside of the Student Union allegedly witnessed the accused repeatedly punching a third male, who collapsed, at which time Burgos kicked the victim twice with a shod foot. Both Burgos and Brownridge were then taken into custody by the responding officers.

-Collegian News Staff

The Amherst Police Department arrested Markus Roberson, 23, of Amherst, last weekend on warrant and resisting arrest charges.

APD have another very busy weekend

The Amherst Police Department had another action packed weekend in the Happy Valley spanning the days of Oct 1-3. According to a Monday release from Lieutenant Ronald Young, the APD responded to 260 calls for service over the weekend, in addition to answering 42 disturbance calls.

Officers charged 92 individuals with crimes. The charges ranged from assault, minor in possession of alcohol and other alcohol-related charges, to disorderly conduct and narcotics offenses.

All individuals charged or summoned to court will be arraigned this week in Eastern Hampshire District Court in Belchertown, according to the Oct. 4 release.

The APD have also stepped up alcohol enforcement initiatives in the wake of ongoing vandalism and larceny during the first several weeks of the semester.

"This problem-solving technique is in response to citizens working with assigned sector officers to identify problem areas in town," Young stated in the release.

One notable arrest occurred early Saturday morning, around 12:30 a.m., when officers observed 23-year-old Amherst resident Marcus Roberson on a Pioneer Valley Transit Authority bus traveling on North Pleasant Street. Roberson was wanted on an outstanding breaking and entering warrant, and as he exited the bus, officers attempted to place him under arrest. Roberson allegedly fled, and after what the release describes as a "lengthy foot pursuit," he was apprehended behind several residences on Kellogg Avenue.

Roberson was charged with resisting arrest, in addition to the warrant charges.

UMass ranked among Top 10 safest schools for gay students

In the wake of the highly publicized Tyler Clementi suicide at Rutgers University in New Jersey and a spate of other attention being paid to bullying in schools, the University of Massachusetts has been ranked among the most tolerant schools for gay students by Newsweek.

UMass checked in as the eighth-most gay friendly school on the list. Newsweek commended the University for its diversity and breadth of different students, noting that "you can find any kind of background here, whether you are speaking about ethnicity or religion." The write-up continues to note that "the campus is definitely more liberal and is very accepting to gays and lesbians."

Philadelphia's University of Pennsylvania was No. 1 on the list. The social commentary website Gawker notes that the Ivy League school "actively recruits gay students," furthering that the school produces "future gay-listers."

At second is UC Berkeley, lauded both for its academic prowess and location near what many consider to be the heart of gay culture in the U.S., San Francisco.

Next on the list are New York University, the University of Michigan, American University in Washington, D.C. and Penn State. Following UMass in the Top 10 are Indiana University in Bloomington and another Ivy League institution, Princeton University in New Jersey.

Also on Newsweek's list of safe schools were Stanford University, Columbia University, Pomona College, Brown University, UC Santa Cruz, Swarthmore College, Duke University, Rice University, Harvey Mudd College, Cornell University, University of Southern California, Georgetown University, and the University of Chicago.

Decision Q

COURTESY WIKIMEDIA COMMONS

Governor Deval Patrick, who is running for reelection this November, said in a conference call Monday that he would like to simplify some of the Commonwealth's more archaic policies.

Patrick: clarify dated policies to make government efficient

PATRICK from page 1

University, pertained to student loan reform.

Patrick described how his administration had worked to bolster Massachusetts' credit rating, affording the Commonwealth a greater ability to issue student loans.

"We have been able to balance our budget responsibly and on time here," he said, "and the way we have been able to balance our budget is with a combination of spending cuts, so we now can make the kinds of adjustments to create jobs and issue loans," he said.

"The rating agencies have reappraised our rating at AA."

That question was followed up with a query from a Northeastern student aimed at the state's relatively high rate of tuition for public higher education. Patrick pointed to longstanding legislation which makes it difficult to raise tuition at the state's public schools, but allows instead for student fees to be adjusted more readily, stating that he would like to see a more common sense approach to fixing a cost for public higher education.

"There's a raging debate in higher education about whether you go to the top of what's tolerable in tuition, charging those who can pay the full amount, and then increase financial aid...so that's something public and private schools have been grappling with," the Governor said.

"Another thing that's behind this speaks to more systematic complexities in higher education," he continued, "mandatory fees are higher than tuition, and that has everything to do with fees remaining on the campus and the tuition going back to the center."

In addition, Patrick posited that he feels the state's public offerings aren't exactly a rip-off.

"I will say due respect to Northeastern, but public institutions are a pretty darn good bargain here in Massachusetts," he said.

The Governor next fielded a question about rates and timeframes on the MBTA, before taking one question from the Daily Collegian and a reporter from Bristol Community College. Patrick Routh, the Patrick campaign's deputy press secretary, said this was based on time constraints.

In answering the final question from the two public university reporters, Patrick again harped back to what he called the "almost byzantine" nature "of the way we support public colleges and universities."

As an example, Patrick referenced how his administration factors into collective bargaining negotiations with the state university faculty.

"We are responsible in the administration for setting the parameters for negotiating collective bargaining with the faculty, but the state does not provide the standards necessary for funding those contracts, so you have this weird thing where you're telling the bargaining unit or issuing parameters saying, 'look, this is what the state can afford,' and the universities may or may not transmit those parameters back to the collective bargaining unit [at the school in question]."

The reasons behind this seemingly irrational relation between the state and its schools, according to Patrick, are simply that this is how it has been done.

"Why are we doing that?" he asked rhetorically, "because we always have."

In his concluding remarks, Patrick circled back to his primary motif from throughout the dialogue: that the state's bureaucracy has not served it well, and that he will attempt with a second term to make the state function more cohesively.

"Just saying that the state should raise the level of appropriation for public colleges and universities doesn't really get at some of the other underlying complexities and irrational outcomes those complexities imply," he said. "We need to brave about the big issues facing the Commonwealth; it means getting to real problem solving and past cliches."

Sam Butterfield can be reached at sbutterfield@dailycollegian.com

Secretary Duncan: we must stress completion

DUNCAN from page 1

Fund,' which would really incentivize that good work," Duncan explained. "That did not pass congress unfortunately, but we're going to come back and push that hard."

Duncan wrapped up the conference call by encouraging college students to get involved in the political process to advocate for educational finance reform.

"With elections coming up here in November, I would just encourage every young person to get out there and vote and challenge candidates about what their stance is around education reform, pre-k through 12 funding, and higher education," said Duncan.

The remainder of the questions from the student journalists were fielded by vice president of MTV public affairs Jason Rzepka, and College Board president Gaston Caperton.

"We know how desperately the country needs those college graduates and know how the bar continues to raise," said Rzepka referring to the increasing demand for college graduates in the nation's job market. Jobs that may not have required a degree in the past now require a bachelor's, and some jobs that required college completion some years ago now require even more years of study, explained Rzepka.

"Our hope is that we can really raise the volume on [education reform] and amplify young people's voices in this process, because a lot of times decisions get made apart from that," said Rzepka.

"[The problem with college affordability] is a tough thing. This is not an easy thing. And it's going to take sacrifices from a lot of people," said Caperton. "I'm not talking about people paying more to go to school, but paying more taxes and rebalancing budgets that have not been balanced in a while."

"This is a tough time, and it's going to take a great deal of effort from all of us," said Caperton.

Caperton further discussed the need for educators to work with the federal government to better prepare students for college.

"I think one of the things we cannot underemphasize is the number of students who come to college unprepared," said Caperton.

The federal government has already taken steps to improve the quality and ease with which students receive financial aid. The Pell Grant system was restructured such that for profit loan agencies will no longer be able to offer students financial stipends.

Bobbi Hitt can be reached at chitt@student.umass.edu.

Secretary of Education Arne Duncan emphasized college completion in a teleconference with student reporters Monday.

Prof. Smol says climate change is likely irreversible in Arctic

SMOL from page 1

thousands of years are disappearing and taking the life forms with them."

Modern pollutants also drive the rapid climate change. There are three main ways pollutants are being transported not only to the Arctic, but to the rest of the world. These are through ocean currents, rivers, and the atmosphere. Smol stressed the fact that even though insecticides or any other toxins may be initially sprayed in one area of the world, they inevitably travel and find their way to other remote locations on the planet.

Smol concluded his lecture with three pieces of advice.

"We can reduce the amount of energy that we use. We can replace the carbon based fuels that we use. Finally, we must continue to research different ways to help try and fix the environment. It is changing whether we like it or not, and we must try to slow down these major changes to preserve the stable climate in which we are used to living."

Ashley Berger can be reached at abergeria@student.umass.edu.

"If we don't believe in free expression for people we despise, we don't believe in it at all." -Noam Chomsky

EDITORIAL@DAILYCOLLEGIAN.COM

A time for economic realpolitik

Much has been said over the latest trade imbroglio between the United States and China. The House of Representatives passed a resolution authorizing the leveling of added duties upon Chinese goods and labeled China a "currency manipulator" in response to the undervalued Chinese Renminbi. Despite the fact that the Senate is unlikely to affirm this motion, it is hopefully indicative of a new approach to the greater Sino-American trade issue, and to American trade policy in general.

Dan Stratford

As New York Times columnist Paul Krugman elucidated in one of his most recent articles, the threat of Chinese retaliatory tariffs on American poultry products should be the last thing on the collective mind of our Republic.

The real issue at hand is the dearth of control that the United States has over its own economic destiny, especially with regards to issues of international trade. In the humble opinion of this columnist, this apathy stems from the prevailing dogma of so-called "free trade" that has been so relentlessly hammered into our collective conscience from an early age. There has been no consideration for the international political and economic realities of our time. Despite the rampant economic machinations of foreign powers, ranging from non-enforcement of trade agreements to currency manipulation and subsidization of exports, the defenders of "free trade" continue to espouse its many supposed virtues.

The notion that a laissez-faire international economic model will set the United States free is idealism of the most baleful kind.

These include cheaper products from abroad and the subjugation of allegedly inefficient domestic industries to supposedly more efficient foreign firms, especially manufacturing and service-sector jobs in call centers. What the proponents of unabated free trade do not seem to comprehend is that said system of trade only functions properly when trading partners are completely forthright amongst themselves and possess no desire to engage in economic gamesmanship to better themselves at each other's expense. Invariably this always happens, as our beloved Republic will so lackadaisically surrender some semblance of control over its markets and industries without anticipating the subversive intentions and influences of other powers.

Realistically, nations and large corporations with profit margins the size of GDPs will attempt to get a proverbial leg up in the global economic game. Regardless of abstract theories of free trade, such tribalism and suspicion of other's motives are some of the most basic impulses of man. The notion that a laissez-faire international economic model will set the United States free is idealism of the most baleful kind. It is destined not to better the Republic, but to surreptitiously emaciate its economy and ultimately destroy it. It can be confidently asserted that the nation that cannot produce or feed itself cannot defend itself, and, at the very least, has sold itself into vassalage to its creditors and to those who provide for its material needs.

In politics and economics, ideology should not be allowed to rule the day. To paraphrase Edmund Burke, it is an inextricably intricate matter in which only those of prudent temperament should be allowed to approach on the decision-making level.

Instead, this columnist humbly offers a different approach – a policy governing the American approach to trade that is free from ideological impulses and, instead, is driven by the overarching concern of national interest. As I elaborated in another column, the Republic is, at heart, a grand community, though one in which the dogma of radical individualism has been so methodically infused as to render that community but a shell of its former self. However, the world at large does not share that same sense of community. Instead of relying upon faith in economic dogma, "free trade," and the allegedly supernatural power of markets to lift all proverbial boats, we should retake our collective economic destiny.

This could manifest itself in a myriad of ways, from fairly conventional economic programs such as lowering corporate taxes in the United States to restraining the value of the dollar. However, if our officials truly realized their role as prudential economic managers and not the white knights of free trade, they would begin to consider such things as promoting the growth – or rather, re-generation – of American manufacturing and exporting.

Our officials should be working to help lessen the trade deficit as manufacturing and exporting are some of the only ways to truly create wealth and jobs and prosperity therein. If one wants inspiration for this very American degree of initiative, one should only look at our history – the American economy was very much built by the nurturing and protection of domestic industries, from George Washington's funding of early American manufacturing endeavors to the passage of tariffs on foreign agricultural implements and textiles to aid Northern manufacturers.

The Monroe Doctrine, supposedly designed to purge the Americas of further colonization, was conceived as a way to ensure American access to hemispherical markets and natural resources. Even the Bretton Woods Conference - a gathering in which free trade was supposedly rendered sacrosanct - was designed in part to ensure American economic preeminence after World War II, a world in which thirty-five percent of economic activity was American in origin. In short, we should learn from our own illustrious economic history, and retake control of the rudderless ship that is American economic policy. The very future of our Republic depends upon it.

I survived a Disney movie: harsh criticisms of Disney

If there is a reoccurring theme at the University of Massachusetts it's that alcohol and drugs can ruin your life. Recently, however, I saw a film that suggested I add another item to the list: Disney movies. Despite the movie's assertions, I am living proof that Disney flicks do not ruin your life. Dragging my feet into my Tuesday Thursday Media Criticism class, I exhaled a sigh of relief after my professor announced we would be watching a film.

Naychelle Lucas

With a little more pep in my step I got into my seat and crossed my legs into the perfect movie watching position as the professor turned off the lights and pressed play. The familiar image of Mickey Mouse's ears appeared on the screen, which immediately peaked my interest and made me sit a little straighter. Then the bomb dropped. we would be watching the documentary, "Mickey Mouse Monopoly: Disney, Childhood, and Corporate Power."

I will be the first to admit that some of the earlier Disney movies leave a lot to be desired when it comes to their representations of minorities and women.

My eyes opened wider than Bambi stuck staring into a hunter's headlights. "Could this be," I thought to myself, "a movie criticizing Disney? What wrong-doing could they possibly find in my favorite magical mouse?" For the next 52 minutes, the answer played out in front of me. I was appalled. I couldn't believe these so-called experts and professionals were persecuting my favorite childhood characters. I will be the first to admit that some of the earlier Disney movies leave a lot to be desired when it comes to their representations of minorities and women. However, could "The Little Mermaid" and "Beauty and The Beast" really be considered dangerous? I don't know about you, but the monster that lived under my bed as a child wasn't Ariel.

I voiced my irritation with this to my friends at dinner that night and soon found out that I was not alone. It turns out that most of them had already been subjected to Mickey Mouse Monopoly. From the communications to the women's studies department, the word was quickly getting around at UMass- the innocence that is Disney is not so innocent and should not be trusted. Since sophomore year I've seen the movie on two other occasions here at UMass, but I'm still not convinced. If I see it 100 more times before I graduate, I still won't be convinced.

At seven-years-old, trying to rip me away from watching Bambi was like trying to solve our country's current economic crisis. I would watch Thumper and Bambi slide across the frozen forest pond for hours if my parents let me. Aladdin, Jasmine, Simba, Pocahontas and Belle were as much apart of my childhood as my actual friends.

To this day the instrumental sound of "When You Wish Upon a Star" along with the image of a star shooting behind the backdrop of Cinderella's castle can make me drop what I'm doing and pay my full attention to the TV. And if you start singing "I wanna be a mighty king like no one was before," I dare you to stop me from repeating the song line for line. Like so many people I know, Disney was and is still such a meaningful part of life.

That is why I ask, how could the memory of clutching my plush squeaky Flounder toy during bedtime or getting Minnie's autograph at Magic Kingdom be bad? I'm a well-adjusted 20-year-old woman with healthy and productive relationships in my life. Isn't that proof?

How does watching Aladdin and Jasmine take a magic carpet ride influence little girls into becoming hyper-sexualized subservient victims. We should be evaluating where our values and perceptions of the world come from, but should we be blaming Disney for people's negative views of minorities? That seems a bit little more than ridiculous.

When the film first came out, my younger sister and I took my five-year-old niece to see the newest Disney Movie, "The Princess and The Frog." The movie features Disney's first black princess, Princess Tiana, on her journey to fulfilling her lifelong dream of owning her own restaurant. Sitting in the dark theater watching the movie and my nieces reactions to it, I found myself having a different experience than I have ever had watching a Disney movie.

I felt happy, but I also felt proud. I was ecstatic knowing that my niece would be able to have a role model like Princess Tiana, and I felt extremely proud that I was able to share this experience with her and give to her what Disney gave to me. Disney gave me a motto, Hakuna Matata: it means "no worries [for the rest of your days]." Furthermore, Disney gave me the wisdom to know when you wish upon a star your dreams really do come true.

Community colleges: America's gateway to the future

For decades, community colleges have been one of our nation's best kept secrets. But the word is out. As a result, community colleges across the country are bursting at the seams.

Dr. Jill Biden

The American dream is within reach for millions of individuals from diverse backgrounds whose perseverance and commitment will be celebrated Tuesday when President Obama and I host the first-ever White House Summit on Community Colleges.

I've been an educator for the last 29 years, and I continue to teach full-time at a community college not far from the White House. So the challenge to elevate education is personal to me. Every single day in my classroom, I see the power of education to break down barriers and instill confidence in the diverse individuals that I teach. I also see just how critical the college experience is to putting my students on the path to success.

Getting Americans back to work is the great challenge facing our nation right now, and community colleges are critically important to preparing graduates for those jobs.

I have seen job-training partnerships in community colleges across the country in some of our fastest-growing sectors like green technologies and health-care professions. These partnerships are good for the schools, the businesses, and most important, the students and future workers. That is why President Obama is encouraging employers and labor unions to work in partnership with community colleges to ensure that students are learning skills that will ensure America has the most competitive workforce in the 21st century.

In order to restore America's economic competitiveness and prosperity, the Obama administration has set a goal of once again having the highest proportion of college graduates in the world by the year 2020 - 10 short years away. Community colleges are central to this effort, and the president has specifically called on community colleges to help an additional 5 million Americans earn degrees and certificates in that time. Our challenge is to help these institutions meet the pressing education and job training needs of millions of students working to achieve the American dream. Students just like the ones in my classroom, whose lives are changed by the confidence and opportunity they gain from a quality education.

That's why Tuesday's summit participants include a diverse group of employers, faculty, college presidents, leading philanthropists, and, of course, community college students. Our goal is to shine a spotlight on innovations and partnerships that work. We will share ideas on how to replicate what is working so we can ensure that every motivated student who enrolls at a community college will have the opportunity for a quality education and the potential for a great job.

In order to restore America's economic competitiveness and prosperity, the Obama administration has set a goal of once again having the highest proportion of college graduates in the world by the year 2020 – 10 short years away.

In the coming months, we will announce the first $500 million of a $2 billion, four-year investment in community colleges authorized by Congress and signed into law on March 30. This federal investment will support new state-of-the-art education, training and skills development programs to help out-of-work Americans re-enter the job market with increased knowledge and more marketable skills. The funds will enable community colleges to work with universities, business, government and unions to develop career pathways leading to more college graduates ready for the workforce as our economy recovers. In addition, through the American Recovery and Reinvestment Act, the Obama administration has invested billions of dollars specifically in community colleges.

Since taking office, the Obama administration has made historic investments in financial aid, by tripling investments in tax credits for college expenses, increasing the maximum Pell grant by more than $800, and making the financial aid process easier and faster to navigate.

But let me be clear: we are not just talking about the great impact of community colleges. We are committing unprecedented investments in order to support the important work they are doing. The Obama-Biden administration has directed significant resources and energy to help community colleges and their students reach their full potential.

But we can't do it alone. Private sector companies also need to play a pivotal role in this partnership. Tuesday, we're highlighting institutions like the Gates Foundation, The Aspen Institute, The Joyce Foundation and Lumina, all of which have recently committed new resources and innovative ideas to help prepare our students for a 21st century workforce. I hope others will be inspired to do the same.

In my own teaching and in my travels, I've met countless students who have overcome significant life challenges to get a community college education. Many of them work full-time, have aging parents in need of care and attention, or are parents themselves. Often they contend with difficult economic realities. Yet, they are willing to work as hard as it takes to make life better for themselves and their families. They are students like Janet Ekis, from Monroe Community College in Rochester, N.Y., who wrote to me through www.WhiteHouse.gov/CommunityCollege: "Community college didn't just change my life…it gave me my life."

The White House summit on Tuesday is a step toward giving the respect and recognition community colleges deserve. It is also a call to action to community colleges and their partners to do more than they ever have in their 110-year history. They are uniquely positioned to help millions more people meet their dreams for a better life and to help our nation build a strong economic future. These institutions and the students they serve deserve a chance to succeed and we all have a role to play.

Eisenberg shines as awkward Zuckerberg

By Tappan Parker
Collegian Staff

You have probably heard about "The Social Network," or as many are calling it, "the Facebook movie." But even though it is known as "the Facebook movie," it's not really about Facebook. It is instead the story of how the website came to be and the drama that has surrounded it since its inception.

Imagine an average day in your life. You wake up, go to class, eat and do homework. Somewhere during that time you check Facebook, probably a few times, and mostly out of habit. Now imagine that life without social networking. It's a little hard, isn't it?

"The Social Network" tells a story of betrayal, sex, greed, acceptance and obsession. It is not a true and accurate account of Facebook's history nor does it claim to be. Whether you choose to believe Mark Zuckerberg's take on the story or acclaimed screenwriters Aaron Sorkin and Ben Mezrich's take is up to you.

The movie is more about the characters behind Facebook than the site itself, it being the catalyst that moves the plot of the story forward as the characters interact and create the drama that makes the movie what it is, a modern day Greek tragedy.

Jesse Eisenberg, of "Zombieland" fame, portrays Facebook founder Mark Zuckerberg as an awkward college student turned all-around cool guy. "The Social Network" tells his story, though it is not completely accurate.

Jesse Eisenberg stars as Zuckerberg, the creator of the social network. The movie begins with Zuckerberg and his girlfriend at a bar, talking over drinks. The dialogue is quick and multiple conversations are happening at once between the two, mostly about the exclusivity of clubs at Harvard and how Zuckerberg wants to be in them. The scene ends up portraying Zuckerberg as somewhat socially awkward, which is ironic considering he will soon be the founder of the most important social revolution on the Internet.

A scene between Zuckerberg and his girlfriend ends with his girlfriend breaking up with him, leaving him a little distraught before he finally runs back to his dorm room. He decides to get drunk to console himself and eventually gets the idea to create a website that rates the different girls of Harvard against each other, called FaceMash. This not only blatantly breaks the code of student privacy at Harvard, but also manages to crash the entire Harvard server in a single night.

After he is brought before the Harvard Administrative Review board, he is placed on academic probation. However, he also attracts the attention of the Winklevosses, twins played by Armie Hammer, who have a social networking idea for Harvard. They invite Zuckerberg to join in on this project, who upon hearing about it, takes the idea and spins it into something larger than the Winklevoss twins had ever imagined: The Facebook.

If you have been following the controversy behind Facebook at all, you already know the rest of the plot, which is a back and forth between the two lawsuits against Zuckerberg. This includes Zuckerberg's apparent betrayal of his best friend Eduardo Saverin, played by Andrew Garfield, due to his controversial partnership with Sean Parker, played by Justin Timberlake. Parker is the founder of Napster. The other lawsuit involves the Winklevoss twins, who claim that Zuckerberg stole their idea.

The performances in the movie are outstanding. Eisenberg gives a fascinating performance, portraying Zuckerberg as a socially awkward, obsessive genius. He is put alongside Timberlake, who manages to portray Parker as a playboy, a businessman, and a classic case of paranoia. Garfield's performance as Zuckerberg's best friend Saverin is fantastic as he showcases a true friend who has been hurt, betrayed, and forced into a situation where he has no choice but to take legal action against Zuckerberg.

Director David Fincher, who also directed "Fight Club," spearheads this project and gives the Facebook story a complete dramatization. However, he does not delve into what Facebook really is, only touching on the basic necessities that are critical for telling the stories of Zuckerberg, Parker, Saverin and the Winklevosses. Lawrence Lessig, founder of Creative Commons and a professor at Harvard Law School, said, "But what [the movie] does" show is an understanding of the most important social and economic platform for innovation in our lifetime."

"The Social Network" sets out to tell a story and it does it well. With a highly energetic and script-driven plot, the movie is never boring and it keeps you interested in seeing the interactions between characters. The story is wonderfully written with wit and intelligence throughout.

"The Social Network" is a movie worth telling your friends to see with you. Go take your network out to see it. It's worth your time.

Zapatista movement discussed at reading

By Mike Selden
Collegian Correspondent

Last Wednesday night at Food For Thought Books, author and activist Jeff Conant came to speak about his new book, "A Poetics of Resistance: The Revolutionary Public Relations of the Zapatista Insurgency." For those unversed, the Zapatistas are a revolutionary group in Chiapas, Mexico that has been fighting for their rights to live as first world citizens since 1994 and have declared war against the Mexican state.

Although much has been written about the Zapatista movement, Conant had a unique perspective to write about. Rather than focusing on the history of the movement and the famous communiques of its charismatic and mysterious leader Subcomandante Marcos, the book focuses on the ideology and communication techniques the movement takes advantage of.

Jeff Conant, who makes his home in the San Francisco Bay area, spent three years living among the Zapatistas and did plenty of legwork in order to make his book as true to the message the Zapatistas are trying to convey as possible.

The face that the Zapatistas present to the world is a very deliberate one, with very deliberate symbolism. Subcomandante Marcos himself never takes off his mask, so although he is the "figurehead" of the movement, nobody really knows what he looks like. Marcos himself has said that this is so his message can easily fit in with any oppressed group on the planet. Any minority group that experiences repression and is fighting back can relate to the masked figure. Marcos wants his message of anti-capitalism and respect for indigenous peoples to reach across the globe, so that the problems that are being fought over in Mexico can serve as an example for the rest of the world.

Analyst Naomi Klein described the reasons for Marcos' mask very effectively when she wrote, "Marcos, the quintessential anti-leader, insists that his black mask is a mirror, so that Marcos is gay in San Francisco, black in South Africa, an Asian in Europe, a Chicano in San Ysidro, an anarchist in Spain, a Palestinian in Israel… and, of course, a Zapatista in the mountains." In other words, he is simply us: we are the leader we've been looking for."

The discussion after Conant spoke about his book was intriguing and at times heated, as people argued on what needs to be done in order to help the movement succeed and on what it means for the state of the rest of the world. Some members of the audience were very well versed in the subject, and spoke at length on the toys produced in Marcos' likeness, his communiques to the media, the interviews conducted with other parts of Zapatista leadership, and of course the revolution itself. The question of "what counts as indigenous" sprung up many times during the debate, and seemed to be one of the larger points of contention of the night.

Jeff Conant has written fairly regularly for Alternet, an online activist news service that provides news on injustice in the world and what can be done to change things. He is also a blogger and produces a number of radio shows for the National Radio Project. Conant writes and speaks mainly on activist issues such as poverty, governmental oppression and the poor state of clean worldwide water. He has written one work previous to this, titled "A Community Guide to Environmental Health."

Conant's book is for sale at Food For Thought Books and most other bookstores.

Mike Selden can be reached at mselden@student.umass.edu

Author and activist Jeff Conant read from his new book at Food For Thought Books last Wednesday. The reading was followed by a heated discussion of the Zapatista insurgency.

Amherst Cinema plays classic Chaplin films

By Jeff Mitchell
Collegian Correspondent

The nostalgia-laden Amherst Cinema held the perfect venue for the silent film "The Gold Rush." This film is the second installment in the Charlie Chaplin Festival, which is continuing until Nov. 3. The theater was filled with an aging audience that had an almost youthful exuberance when filing into the seats. The small crowd sat back with enthusiasm as the 85-year-old classic played before them.

The film takes place during the Alaskan Gold Rush in the early 20th century. The story follows Chaplin's character, who finds himself stranded in a cabin with a prospector due to inclement weather. He eventually falls for a young woman and tries to win her at all costs. Unfortunately, obstacles such as gusting winds and rough barmen stand in his path.

While this movie might not be seen as dramatic as "The Kid," which really exemplified Chaplin's physical prowess, it is more lighthearted and displays the more comical side of silent film. This is a nice change of pace and demonstrates the many degrees of Chaplin's work. It also adds to the reason why his work is so popular internationally due to its delivery.

The film was at first a shock to watch due to its static shots, but its simple take quickly became appreciated. The scenes were extremely basic and had no added angles or extreme shots. It takes a lot of pressure off of the audience and allows the viewer to just relax and view a plain story. With the emphasis being on Chaplin's pursuit of the saloon girl, Georgia, this classic tale of a man vying for the love of a woman truly shows how little cinema has changed in the past 85 years.

Being a silent film, one can assume that watching this movie might become very tedious and uninteresting, but the implementation of music takes the place of this silence very well. The occasional narration also substitutes character dialogue. Without the constant conversation of characters, the audience must assume a lot of chatter which calls for a great deal of imagination. This movie shouldn't be viewed as a "silent film," but just viewed as a normal movie that substitutes character conversations with physical actions which can be viewed as a "cinematic ballet."

The humor is definitely not something to be overlooked. The comedy Chaplin incorporates plays with an audience in a way that lets you in on the joke at his expense. The audience was at his mercy as every joke, no matter how subtle, was greeted with uproarious laughter. This display really shows that comedy is defined by a generation and that as we change, so does our sense of humor.

While the cinematography is basic, the story is highly elevated. The plot contains multiple story arcs that span the length of the entire film and intersect one another. While the overall tale itself is relatively simple, the storytelling was multifaceted. The characters are not complex, but they complement each other in a way that creates a dynamic story. These innovative features make the somewhat simple plot a true classic.

The special effects in this film are extremely primitive to an almost comical level. For example, scenes showing a clay-mation Chaplin hanging over a cliff or a man in an "avalanche" who is clearly standing in front of a green screen. These are definitely not worthy of any top CGI accolades, but they display how dated the film is.

The film contains a plethora of cliché scenes that have been used in other movies. These include the boot in the soup, as well as a hungry person viewing another man as a piece of food. It is funny to see the archetypes of these jokes in recent cinema and then to see how they were original in their time.

Silent film should not be overlooked, no matter how hard it is to get into or as foreign as it seems. While our generation might view movies like "The Hangover" as defining films, "The Gold Rush" is a film that has maintained its cinematic quality over the past 85 years and still keeps audiences entertained. If you go in expecting a mind bender like "Inception," you will be disappointed, but if you want a good old fashioned classic that has a simple story, "The Gold Rush" is a film worth seeing. A new Chaplin film can be seen every Sunday at 2 p.m. at the Amherst Cinema.

Jeff Mitchell can be reached at jjmitche@student.umass.edu

Noir film favorite 'Breathless' celebrates 50th anniversary

By Matthew M. Robare
Collegian Staff

When most people think of the phrase "avant-garde film" they imagine a movie without any sort of narrative structure, full of surrealistic imagery that doesn't make any sense, characters who are totally symbolic and speak in cryptic, unconnected metaphors and filmed with a shaky camera or edited out of chronological order. Sometimes, despite having budgets larger than a working class family's home is worth, the films will have some sort of explicit anti-capitalist message. Naturally, these films are French, in black and white and directed by a beret-wearing, chain-smoking decadent.

Those people have never seen "Breathless."

The first film directed by Jean-Luc Godard, "Breathless" was originally released in 1960 and starred Jean-Paul Belmondo as Michel Poiccard, and Jean Seberg as Patricia Franchini. In 2009, it was restored for its 50th anniversary. The restored edition was released in May of this year.

On the surface, it's the story of a small-time criminal, Michel, and his attempts to evade the police after killing one and convince Patricia to come with him to Italy. But it goes much deeper than that. For example, Michel and Patricia were in a brief relationship prior to the events of the film and many of the developments are driven by the previous relationship and their confusion over whether or not they love each other.

Godard's directorial style is heavily evident in the film. There are numerous homages to American films, especially Humphrey Bogart's films noir. Belmondo's character Michel, for example, actively bases his appearance and attitude on Bogart – fedora and trench coat, smoking Lucky Strike cigarettes. Moreover the entire middle third of the film is a real-time scene set in Patricia's apartment, which is a Godard staple.

One of the film's most "avant-garde" features is its use of jump cuts, which was accidental – using traditional "shot-reverse-shot" cinematography, the movie ran over three hours. Using jump cuts allowed Godard to keep "Breathless" under an hour and a half.

Another Godard staple is the use of language. Most of the characters are native French speakers, while Patricia is an American and occasionally has difficulties with her French. Godard is fascinated by language barriers, with Patricia's confusion over French slang occasionally working into a plot point. This fascination would become more pronounced in Godard's later work, such as "Contempt," which involved a French writer and actress, a German-speaking director, an American producer and set in Italy.

The most startling thing about the film (though oddly traditional for the avant-garde) is the blatant sexism. Michel is very misogynistic, threatening to strangle Patricia unless she smiled and stopping a taxi to get out and lift up a woman's skirt before hopping back in. A scene involving Patricia interviewing the novelist Parvulesco, played by "New Wave" director Jean-Pierre Melville, has him saying, "People are only concerned about two things: for men, women and for women, money." Patricia's boss at "The New York Herald-Tribune" does not even pretend that he views her as anything more than someone to sleep with. Michel treats her with as little respect, constantly calling her a coward their confusion over whether or not they love each other.

Travel is another key theme throughout "Breathless," providing a key source of tension between Michel and Patricia. Michel hardly ever stands still – from rubbing his lips or rolling around in a bed to stealing cars and planning his escape to Italy. One of the few true things revealed about his past is that at one point he was an Air France steward. In contrast, Patricia tends to stay still. She rarely drives, she sits down to talk to people, she has a permanent residence and she doesn't want to go to Italy. It's ironic—so many foreigners come to Paris, but the Frenchman hates it and wants to escape.

"Breathless" is still today one of the best films ever made—seeing it will not make you want to puke.

Matt Robare can be reached at mrobare@student.umass.edu

Minutemen fall to comeback against New Brunswick, 4–3

By Stephen Sellner
Collegian Correspondent

(This article was originally published Oct 3 on DailyCollegian.com)

Junior Danny Hobbs' two-goal performance was not enough for the Massachusetts hockey team, as Jeff Lee's overtime goal capped a 4-3 comeback win for New Brunswick in an exhibition game at the Mullins Practice Rink on Saturday.

The Minutemen had their third period two-goal advantage wiped away by New Brunswick's offensive surge, which scored two goals in a 25-second frame. The Reds caught a break when Hunter Tremblay's shot ricocheted off of UMass defenseman Colin Shea's skate into the back of the net for the tying score.

UMass took a 3-1 lead with eight minutes, 24 seconds to play in regulation on Hobbs' electric slap shot, set up by a perfect pass from junior defenseman Michael Marcou on a power play.

"Danny Hobbs can probably shoot the puck as well as anyone, certainly as well as anyone on our team," UMass coach Don Cahoon said. "If we give him good opportunities to deliver the puck to the net, some of those are going to go in."

UMass goalie Paul Dainton made 18 saves, allowing only one goal. His biggest save of the game came at the 9:20 mark in the first period, when New Brunswick's Luke Gallant fired a wrist shot which Dainton stuned with the glove while on his backside. Freshman Jeff Teglia replaced the senior captain after two periods.

Cahoon seemed happy with the effort of backup goalie Teglia, despite the three goals he allowed.

"Those first two we didn't have any chance and he made some good saves," he said. "It's not an easy situation...to throw him into the start of the third period in a tie game. I wanted to see how he responded."

Hobbs kicked off the high-scoring affair just 5:52 into the game, beating Reds' goalie Travis Fullerton after a centering pass from freshman forward Troy Power.

New Brunswick forward Ryan Seymour tied the game at one at the 9:40 mark in the second period, catching the UMass defense in transition.

Freshman Michael Pereira gave the Minutemen a 2-1 advantage in a chaotic rush at net, as the puck lay in front of the crease, ultimately finding the back of the net. The goal came with 10 seconds remaining on a UMass power play.

Early in the contest, UMass appeared to have difficulty finding scoring opportunities on the power play. However the Minutemen capitalized twice on man advantages in the third period. Crisp passing and working along the boards helped free opportunities in front of the net.

Cahoon attributed the late success on the power play to the players feeling more comfortable and "finding seams."

Defensive execution and positioning were a problem late in the game, especially by the inexperienced players.

"The four goals that are up on the board were mostly young peoples' mistakes in given situations," Cahoon said.

The Minutemen are a young team with little game experience, with 13 freshmen, including an additional red-shirt freshman. Cahoon went on to explain the importance of his young players obtaining game experience from the exhibition game.

"Given the number of first-year players... there were many more positive things than negative things," he said.

The Minutemen open the regular season at Minnesota on Friday night.

Stephen Sellner can be reached at ssellner@student.umass.edu.

JEFF BERNSTEIN/ COLLEGIAN

Defender Conor Allen handles the puck during the 4–3 loss to New Brunswick this past week. Allen and the rest of the Maroon and White will look to rebound against Minnesota.

The Minutewomen finished 32nd out of 43 squads on Friday at the Paul Short Invitational while the men's side finished 30th of 42 teams. Next for both sides is the New England Championships.

Both UM sides fail to produce, prepare for NE Championships

By Eric Mansfield
Collegian Staff

The Massachusetts cross-country teams took part in the Paul Short Invitational in Bethlehem, PA on Friday. The Minutemen finished 30th out of 42 teams and the Minutewomen took 32nd in a field of 41.

Daniel Barry crossed the finish line first for the Minutemen with a time of 25 minutes, nine seconds. Following Barry were seniors Andrew Mulvaney and Scott VanderMolen with times of 25:31 and 25:44, respectively.

The remaining two top five finishers for UMass included senior Robert Deegan and freshman Patrick McGowan, who finished with times of 25:49 and 25:51.

In the women's race, Karen Roa was the first Minutewoman to cross the line, finishing with a time of 21:56. Following her was senior Elizabeth Fisk and sophomore Courtney Baldwin with times of 22:41 and 22:49, respectively.

Rounding out the top five for the Minutewomen were senior Gina Perno and junior Claire Pettit, finishing with times of 23:02 and 23:30.

Neither coach was particularly pleased with their respective team's performance.

Men's coach Ken O'Brien said that a top 15 finish would have been realistic but it came out flat.

O'Brien said that the Minutemen have "relative inexperience at a meet of that stature."

While UMass is a senior-laden group, the returning members aren't in the same role as they were last year.

"The returning members weren't front runners," O'Brien said.

"It takes a while for the team to adjust [to their newer and more prominent roles]."

O'Brien explained that with a team that isn't experienced in their new roles, "it's difficult to find rapid improvement" while racing once a week at the most."

Out of the group of five freshman, McGowan seems to have adjusted to college cross country the most. McGowan finished fifth for UMass.

"He's found a way to make it work," O'Brien said.

Women's coach Julie LaFreniere thought this meet showed a "mixed bag" of results for the Minutewomen.

LaFreniere was pleased with Roa's performance, who has been leading the Minutewomen in training most of the season.

"She really showed what she does have," LaFreniere said.

Perno and Baldwin both struggled with breathing issues. It has been an ongoing problem for Baldwin and the humid weather didn't help. Perno, who hadn't been feeling well, put her best foot forward but was eventually diagnosed with a sinus infection.

It's also recently become apparent that senior Lauren Stocker, who twisted her ankle on a trail run in training will not be able to recover. The tentative plan is to redshirt her, making her eligible to compete next year as a graduate student.

The course conditions were soft and wet, which doesn't make for great times and is tougher on the legs of the runners, slowing their recovery time.

"It wasn't from a lack of effort," LaFreniere said."We were not at full strength."

Both teams will travel to Franklin Park in Boston this Saturday for the New England Championships, which will include 40-plus teams from Division I, II and III.

O'Brien is confident the Minutemen "will finish higher than top 15."

This will be a return visit to Franklin Park for LaFreniere and the Minutewomen. On Sept. 11th the Minutewomen finished eighth out of 10 teams in the Boston College Invitational.

"[Friday was] not our best [performance]."LaFreniere said. "[This weekend] they'll be ready."

UMass splits opening weekend against Sacred Heart, Maine

By Robert Hanlon
Collegian Correspondent

The Massachusetts men's club hockey team got off to a hot start with a captivating 8-4 win over Sacred Heart at the Mullins Center, before falling to Maine, 4-3 on Saturday.

The Minutemen demolished the Pioneers with eight goals in the first game. The big offensive showing came in UMass' home and season-opener.

The offense for the Minutemen still showed up and played well against Maine, but a few key weaknesses have been determined from the opening games that kept UMass from escaping the Alfond Arena with their second victory of the season.

"One main issue that our team is having is making sure we do the little things right," UMass coach Mike Atkinson said. "Overall we play hard and we play well but it is the little things that are going to be important. Getting the puck deep, blocking shots and limiting the turnovers are going to be key for future games."

From the first few games, Atkinson said his team has realized that it has gotten off to a good start, but to play to its full potential and be an elite team it needs to focus on correcting all of its mistakes.

Despite a few minor weaknesses the team has a positive outlook on the season. Atkinson said that the team hopes to be nationally competitive this season and has its eyes on the prize, which includes playing in the national tournament held at the end of the season in California.

According to Atkinson no clear leader has emerged at this point in the season. Instead, Atkinson stated that leadership comes from throughout the team.

"Leadership is coming from all angles on our team," Atkinson said. "Players have stepped up and taken on responsibility that they normally would not have."

Thus far through the season, Atkinson has found it great to see his group of players come together and do all they can to make this season a success.

"So far all of our players have showed positives and negatives," Atkinson said. "As a team it is our job to limit the negative and focus on the positives."

The Minutemen will be led by captain and senior defenseman Matt Coughlin, along with assistant captains Christian McCracken and Daniel Arnao.

Last year, UMass finished in first place in the American West division of the Northeast Collegiate Hockey Association with nine wins and two losses. Overall last season, the Minutemen finished with 21 wins, six losses and 3 overtime losses.

UMass will next play against Westfield State at the Mullins Center on Friday and expects to improve on its prior weaknesses to improve on their record.

Robert Hanlon can be reached by email at rhanlon@student.umass.edu.

SUPPORT AND THERAPY GROUP MEETINGS
FALL, 2010

HILLS HOUSE GROUPS

RELAXATION AND STRESS MANAGEMENT
Mondays, 4:30 – 6 p.m.,
beginning in October.
Open to new members each month. Learn and practice a variety of relaxation skills to help deal more effectively with stress.

WOMEN'S THERAPY GROUP FOR GRADUATE STUDENTS
Mondays, 6:30 – 8 p.m.
beginning in October.
Focus on issues such as self-acceptance, self-expression, relationships, family, anxiety and academic demands in this group just for women.

MEN'S THERAPY GROUP FOR GRADUATE STUDENTS
Tuesdays, 5 – 6:30 p.m.
beginning in October.
Closed to new members after first session. Addressing issues including male identity, self-acceptance, isolation and forging more satisfying relationships.

MINDFULNESS-BASED STRESS REDUCTION (MBSR)
Wednesdays, 2 – 3:30 p.m.
beginning Oct. 13.
Closed to new members after first session. Mindfulness is a way of paying attention with intention, in the moment and without judgment. With regular practice, MBSR has the potential to lower stress, anxiety and depression, promote relaxation, improve concentration, raise self-awareness and enhance the immune system.

INTERNATIONAL STUDENTS' SUPPORT GROUP
Wednesdays, 6 – 7:15 p.m.
from Oct. 6 – Dec. 1.
Open to new members throughout the semester. Talk about home, cultural adjustments, language issues and more, with undergraduate and graduate students from all over the world. Meetings take place in the International Programs Office, Hills South.

MAKING CONNECTIONS
Thursdays, 3:30 – 5 p.m.
beginning in October.
Closed to new members after first session. Join undergraduates in exploring topics including self-esteem, relationships and school adjustment.

BERKSHIRE HOUSE GROUPS

LIVING WITH LOSS
Thursdays, 4 – 5:15 p.m.
beginning in October.
Closed to new members after first session. A support group for undergraduate and graduate students dealing with the loss of someone close to them.

MEN, TALKING
Fridays, 3:30 – 5 p.m.
beginning in October.
Open to new members throughout the semester. A small, safe group of undergraduate men committed to building community, supporting each other and discussing issues including romantic relationships, satisfying friendships, academic stress and masculine identity.

Pre-registration is required; call weekdays, 8 a.m. – 5 p.m.
For groups meeting at Hills House, call (413) 545-2337;
for groups at Berkshire House, call (413) 545-0333.

SPORTS@DAILYCOLLEGIAN.COM

Atlantic 10 season opens for Minutemen

Xavier, Temple strong opponents for UMass

Editor's note: With Atlantic 10 play beginning this week, Sports Editor David Brinch and Dayton Sports Editor Jacob Rosen look at the start of the conference schedule from their school's perspective.

Collegiate soccer is very particular in that if two teams are tied at the end of regulation, the game goes into double-overtime to determine a victor.

If double overtime cannot produce a winner, each team receives a point and the game ends in a draw.

The Massachusetts men's soccer team has seen five of its regular season games end in a tie, including three of its last four contests.

David Brinch

While the Minutemen (1-3-5) have yet to begin conference play until later this week, UMass has only one victory, a 2-1 win over Central Florida coming back on Sept. 17.

In conference standings, the Minutemen are in a four-way tie for seventh place in the A-10 with eight points with La Salle, Saint Louis and Temple.

The team has had a difficult start to its season, with two of its three losses coming at the hands of nationally-ranked teams.

The Minutemen fell to then-No. 10 Harvard on Sept. 6 by a score of 3-2 and then lost to then-No.24 Indiana 10 days later, 2-1.

In between these two games, UMass got its first win of the season against the Knights and tied its second opponent, Fairfield.

While UMass coach Sam Koch and the rest of the Minutemen would rather see their record stand at 6-0-1, the team realizes how important conference play is, beginning with Xavier Friday, Oct. 8.

When UMass made the NCAA tournament and the College Cup in 2007, the Minutemen had four losses on their record before A-10 play began. The team then won eight conference games en route to their first-ever College Cup and were the only unseeded team to make the Final Four.

The team that made the College Cup is completely different from the 2009-10 Minutemen. It really isn't fair to compare the two. However, if UMass can go on an A-10 tear like they did three years ago, the team could follow a familiar path.

In order for that to happen, the Minutemen will have to be successful against a number of A-10 opponents they face.

Xavier

It all begins with the Musketeers, who visit Rudd Field next Friday. The team holds a 2-2-3 record and is one spot ahead of the Minutemen with nine points. XU has two wins in its past three games and fell to UMass last season in the A-10 opener, 1-0. Andrew Henshaw scored the lone goal for the Minutemen, as he has one goal so far this year. If UMass can score early against an untested Musketeer team, it should give the Minutemen momentum heading into conference play.

Temple

UMass takes on the Owls in the second game of its three-game road slate on Oct. 22. Before that, the Minutemen play the Rams, a team they lost to 1-0 last season. A year ago, UMass fell to the Owls in double overtime at Rudd, 1-0. Temple holds a 2-5-2 record, while URI is 2-6-1 so far this season. After facing Temple, the Minutemen take on Saint Joseph's, a team they defeated last season 2-0. This three-game road trip could make or break the Minutemen's season. UMass hosts Dayton before hitting the road, a team that UMass lost to in double overtime last season. Two out of three wins on the road and/or one victory and one draw would set UMass up for their biggest A-10 opponent when they return to Rudd.

Fordham

The Rams are 5-4-0 and are tied with Charlotte for the top spot in the A-10 with 15 points so far this season. The Rams ended the Minutemen's five-game unbeaten streak last season with a 1-0 victory over UMass. The Rams head to Amherst on Oct. 29 after taking on George Washington and Richmond on the road. The Rams have won two-straight games, an overtime 1-0 win over Marist and a 1-0 win over Manhattan.

Charlotte

UMass closes out its regular season on the road against the 49ers and Billikens on Nov. 5 and Nov. 7, respectively. The Minutemen did not face the 49ers or Billikens in 2009, but look to end their regular season with two wins on the road in hopes of earning an A-10 tournament birth. The 49ers are tied with the Rams for first place in the A-10 this season, while the Billikens are tied with the Minutemen with eight points.

David Brinch is a collegian columnist and can be

Senior Ben Arikian will be a key player for the Minutemen as they open conference play.

Midfielder Chris Rowses, above, dribbles the ball past a Sienna defender during Saturday's match up. The Minutemen open conference play this Friday against Xavier.

Billikens look to defend A-10 Championship

By Stephen Sellner
Collegian Correspondent

Atlantic 10 conference play begins this week, with all 14 teams optimistic for successful seasons and conference supremacy.

Saint Louis looks to defend its crown against the entire conference. With a conference title up for grabs, each team enters A-10 play with a clean slate, hoping the 2010 season will be one to remember.

Charlotte

One year removed from its berth in the NCAA tournament, the 49ers (5-4) look to improve upon its past success in the upcoming season.

Andres Cuero is the only senior for the 49ers, after losing a productive graduating class from last season. Cuero was tied for second in assists last season when he decided to focus more on setting up teammates than looking for his own offense.

The 49ers were picked to finish second in the conference in a pre-season poll.

Dayton

The Flyers looks to continue its success in conference play after finishing with the top record of eight wins and one loss last season.

With 11 starters returning, the Flyers (4-4-1) are poised for another run at a conference championship.

Coming off their impressive handling of Canisius, the Flyers visit Rhode Island on Friday night to begin their A-10 play.

Goalkeeper Tyler Picard appears to be a playmaker for the Flyers, already recording 4 shutouts in the young 2010 season.

The Atlantic 10 coaches voted Dayton as the third best team in the conference.

Duquesne

The Dukes (5-3-1) are off to a hot start this season, with notable victories over Wright State, Robert Morris, Army, Saint Joseph's and Belmont.

Duquesne proved it could play with the best, as it battled hard with nationally-ranked West Virginia, ending in a scoreless tie.

Posting a record of four wins, four losses and a tie in conference play last season, the Dukes look to improve upon last year's mediocre mark.

Freshmen forward Simon Gomez leads Duquesne's offense with five goals, emerging as the Dukes main offensive threat.

DU, which was the eighth-best team in the conference, welcome A-10 favorite Saint Louis Friday night as their first conference test.

Fordham

The Rams look to claim conference supremacy after their respectable six wins in A-10 play a year ago.

Behind goalkeeper Ryan Mear, the Rams (5-4) hope to join the top-tier of A-10 soccer programs.

Mear earned the honor of United Soccer Leagues Development League Goalkeeper of the Year, with a .66 goals-against average.

Voted as the fifth best team in the conference, Fordham appears to be heading in the right direction.

Wins over Lehigh, Columbia, Hofstra, Marist and Manhattan have the Rams ready to begin conference play against La Salle this Friday.

George Washington

The Colonials (2-7) have struggled to begin the 2010 season.

Embarrassing losses at the hands of Duke, Coastal Carolina and Navy (each by a score of 4-0) have George Washington searching for offensive and defensive production.

Sophomore Seth Rudolf looks to ignite the Colonials offense after being selected to the 2009 Atlantic 10 All-Rookie Team. Rudolf leads the team with four goals and 11 shots on goal.

The Colonials have used a trio of goalies, with junior Jake Davis (five starts) receiving the bulk of the playing time. Senior Eric Hauge (three starts) and sophomore Brendan Lafferty (one start) have contributed as well.

George Washington, voted as the ninth best team in the conference, begins A-10 play at Richmond.

La Salle

The Explorers are looking to erase last season's shortcomings.

After only winning two matches in conference play last year, the Explorers (2-4-2) are looking for better results as they get set to host Fordham this Saturday.

The Explorers got off to a slow start, dropping four of their first six games of the season.

However, they appear to have caught their stride, riding a two-game winning streak that included wins over Saint Joseph's and Temple.

The Atlantic 10 coaches voted La Salle as the No. 12 team in the conference, with only Xavier and Saint Joseph's below them.

Rhode Island

Winless in their last four games, the Rams (2-4-1) look to get back on track as they begin conference play Saturday against powerhouse Dayton.

The Rams are lacking offensive production, having been shutout on five occasions this season.

URI's major scoring threat is senior midfielder Greg Balicki, who only has one goal on 18 shots thus far.

This year's Rams look to replicate the 2009 team that claimed six victories in conference play.

The A-10 coaches favorably voted Rhode Island as the fourth best team in the conference.

Richmond

A seven-game losing streak has the Spiders (1-7-1) searching for answers.

With a 2.55 goals-against average, the Spiders aspire to focus more on the defensive zone, limiting the number of shots on Brock Tomlinson.

Richmond's shortcomings are not solely on defense, as the Spiders have been limited to one goal or less in eight of their nine matches. Sophomore midfielder Houston Oldham leads Richmond with three goals on 13 shots.

A date with GW this Saturday marks the beginning of conference play and the end of a dreadful non-conference schedule.

The Spiders were voted to finish 10th in the A-10 standings.

St. Bonaventure

The Bonnies are riding a two-game winning streak into their opening conference test against Charlotte this Friday.

St. Bonaventure (5-4) look to prove the league's coaches wrong, as they were voted to finish 11th in the Atlantic 10.

Senior Brett Allen leads the Bonnies offense with four goals on 13 shots.

Senior goalkeeper David Flynn comes off his impressive 2009 season when he totaled six shutouts. Flynn has allowed an average of 1.53 goals per contest, contributing to four of the team's victories.

The Bonnies look to surpass last season's mark of five conference wins and become a contender in the A-10.

Saint Joseph's

The good news for the Hawks is they can only improve after last season's winless showing.

The Hawks (1-7) snapped their 24-game losing streak with a 1-0 victory over Iona. Freshman Patrick McGlynn scored the lone goal, while fellow freshman Michael Moulton recorded his first career shutout.

Saint Joseph's, picked by the A-10 coaches to finish last in the conference, kicks off conference play with a visit to Temple on Saturday afternoon.

Saint Louis

The Billikins face the challenge of repeating as conference champions, as they open A-10 play as the favorite to hoist the conference crown.

SLU (2-2-5) will get each opponent's best effort, beginning with Duquesne on Friday night.

Totaling seven wins in conference play a year ago, the Billikins' stiffest competition at a repeat is Charlotte and Dayton, both eager to prove their conference superiority.

SLU returns seven starters, including midfielder Mike Roach and goalkeeper Mark Pais.

Under the leadership of first year head coach Mike McGinty, the Billikins are ready for the challenges that lie ahead in A-10 play.

Temple

The Owls look to establish themselves as a contender in the A-10 after winning four games in conference play last season.

However, losses to La Salle, Drexel and Siena have started the Owls (2-5-2) on the wrong foot.

Goalkeeper Bret Mollion returns to the net for Temple after his 1.04 goals-against average a year ago.

Senior midfielders Jared Harris and Max Kinderwater look to provide an offensive attack to propel the Owls to the top.

Temple, picked to finish seventh in the conference, open its regular-season schedule with struggling Saint Joseph's on Saturday afternoon.

Xavier

The Musketeers round out the A-10 and are picked to finish 13th in the conference standings this season.

With only one win in conference play last year and returning eight starters, the Musketeers (2-2-3) are looking to gain respect for their program. XU matched its two-win season of 2009 with victories over Lipscomb and Alabama A&M.

The Musketeers look for first-year head coach Andy Fleming to bring a winning culture, just as he did previously at Northwestern.

Xavier faces its first conference test of the season on the road against Massachusetts.

Stephen Sellner can be reached at ssellner@student.umass.edu.

A-10 Men's Soccer

Dayton enters season hoping for NCAA bid

Editor's note: With Atlantic 10 play beginning this week, Sports Editor David Brinch and Dayton Sports Editor Jacob Rosen look at the start of the conference schedule from their school's perspective.

Jacob Rosen
Flyer News

The Dayton men's soccer team is in a transition stage, but remains hopeful for the start of Atlantic 10 Conference play this week.

Featuring 18 new players on roster this season, including 16 freshmen, the reigning regular season champions are a very different team from 2009. Holding a 4-4-1 record at the conclusion of the non-conference schedule, the young Flyers are aiming for a repeat story.

After losing three of its first four matches last season, UD won 14 of its next 15 including a 7-1 conference and an A-10 title before finally falling in the tournament championship. That left the team short of the NCAA Tournament, and despite early inconsistencies again, those accomplishments remain Dayton's goal in 2010.

"Regardless of whether you are young or not, we know that we are defending a title, and we want to do everything we can to protect that," head coach Dennis Currier said. "You know, I think the goals we have to reset a lot because we have been very inconsistent, but going into the A-10 ultimately, we want to fight for that title, and do everything we can whether we have to adjust or not later on throughout conference play to reset our goals."

UD certainly earned plenty of early respect, receiving a No. 3 ranking in a pre-season polling of the conference coaches. The Flyers also had the most representatives (four) on the list of "College Players to Watch" in the A-10, as tabulated by the soccer website TopDrawerSoccer.com.

Those awards mean even more because of the recent strength of the conference. Currier said it was impressive how three A-10 teams advanced to the 2009 NCAA Tournament, and he sees the constant improvement continuing this season.

"It's getting stronger every year," he said. "This year, just based on all of the results, is up for grabs. ... We know every game is going to be difficult. The A-10 is such a tough conference to win because the venues are so different, and the travel is tough. You know, for a lot of teams, it's their only chance to get into the NCAA [Tournament], so that's why every game has a little bit more edge to it."

That difficulty shows its fire within the opening weekend when Dayton travels to Rhode Island Friday, Oct. 8, followed by Massachusetts on Sunday, Oct. 10. Both teams have previous NCAA Tournament experience, and placed in the top half of the pre-season rankings.

Junior defender Jack Pearson said he is excited for the start of conference play, but that "there are no excuses and every match is so important" during the A-10 season.

"It's all about results, whether you play badly or really well," he said. "It's whoever wins the game and whoever carries a strong record. It's all about getting in the top six for the A-10 conference tournament."

The start of the 2010 season has been an adjustment overall for Currier, the reigning A-10 Coach of the Year. Practicing patience in order to insure consistency, he said that he has been able to rely upon a crew of stable leaders on the defensive side.

Junior goalkeeper Tyler Picard, senior defender Tommy Watkins and Pearson all received plenty of credit from their coach. Despite a struggling offense (average of 1.0 goal-per-game), the more experienced defense has stepped up to the task of leading the team (opponent average of 1.0 goals per game).

"I feel it's kind of exciting for me to be a leader," Pearson said. "I'm just excited to teach the boys what the A-10 is all about, but they haven't really got much time to learn. They just have got to listen to our talk, listen to our more experienced players and trust us."

Hoping to continue a recent trend of improved play in the conference, Pearson and the team are excited about the start of the A-10 schedule this weekend. Showcasing some of its exciting talent for the future, the Flyers could turn some heads in 2010.

"We have got a lot of good talent," Currier said. "You can see that every time we are playing right now ... and there's really a very bright future. We want it to come quicker than later, and that's what we are trying to do right now to get this to speed up the process."

Baker running mate Tisei visits university

By Bobby Hitt
Collegian Staff

Candidate for lieutenant governor Richard Tisei visited the University of Massachusetts Tuesday Oct. 5 in the Cape Cod Lounge, where he outlined his plans to boost the Mass. economy and maintain high standards for education in the state. Tisei is a veteran of the Mass. state senate since 1985 and the first openly gay person to run for lieutenant governor in the country.

"The state hasn't prioritized enough to make sure that higher education gets the resources that it needs," Tisei said. "We are also looking at the entire state budget and there is a lot of waste, mismanagement and duplication of services."

"We need to fix that so we have funds that can go to the programs that really need it," she continued.

Tisei said that he and Baker would not consider cutting funding of education from the state, pointing to the large cuts that have already been made on education in the past two years.

"What has happened is that in the past two years higher education in Mass. has been cut $140 million, more than any other state except for Alabama," Tisei said. "We will be very careful with the higher education budget, because we understand that, particularly in a tough economy, the state university system needs our support."

Since Tisei's first election in 1985 and subsequent 12 elections to the state senate, he has been a strong proponent for deregulation of small businesses, which can be traced to his own small business endeavor as the owner of a real estate brokerage company, and plans to help small businesses by cutting regulation.

"It's very difficult for small businesses in particular to navigate their way through all the regulations in place right now," Tisei said. "These regulations are strangling innovations and preventing small businesses from hiring new people."

Tisei pledged if elected, he and Baker will implement a freeze on regulation along with reviewing past regulation.

"We also want to revisit the [Mass.] corporate tax rate which one of the highest in the country," Tisei said. "Rather than having different tax rates for different types of businesses we want to try to get the tax rate at 5 percent across the board [for businesses]."

If Tisei is elected, he will be the first openly gay lieutenant governor in U.S. history. Tisei spoke on his role as an openly gay figure in a GOP

See TISEI on page 2

Tisei addresses attendees at the Cape Cod Lounge Tuesday about improving fiscal responsibility in the state government and his and Baker's proposal to deregulate small businesses in Massachusetts.

The Albert Sherman Center is scheduled to be built at the UMass medical school. The center is expected to double research capacity.

$546 million for construction

By Katie Landek and Michelle Williams
Collegian Staff

On Sept. 23, the University of Massachusetts Board of Trustees approved the borrowing of $546 million to fund four new projects, including 1,500 beds and new student housing UMass Amherst, a new academic building for UMass Boston, a marine science building at UMass Dartmouth and a new campus garage for UMass Lowell. There was no project approved for UMass Medical, but construction began on the $330 million Albert Sherman Center, a state-of-the-art biomedical research and academic center.

The projects are part of a five-year cycle of evaluation used by the state to decide what buildings need repairs and what the campuses need.

"Every year, we sit down and evaluate what building need to be repaired and the needs that the students identify along with the available revenue and design a plan to benefit the university and the students," said Ed Blaguszewski, office of news media and relations.

According to Blaguszewski, new housing was identified as a need at UMass because of the chancellor's goal of expanding the campus over the next few years.

"We will continue to grow the campus over the next five years as it is one of the Chancellor's goals to diversify the campus while keeping it primarily Massachusetts residents," Blaguszewski said.

According to Blaguszewski, the project should be completed by the fall of 2013, but he cautions that it is a "rolling plan," and a "living document," so changes could arise. As of yet, they have not decided where they are going to build the 1,500 new beds of housing on campus.

"[The] new 1,500 bed residence hall that we anticipate opening for Fall 2013. The actual location has not been determined, but should be set by early October," said Eddie Hull, director of housing at U Mass, in August.

The addition of the new residence hall creates space to accommodate the influx of out-of state-student UMass officials have stated they are looking to increase undergraduate enrollment by about 15 percent, reaching 22,500 students, over the next 10 years.

Hull estimates the cost to be between $170 million and $190 million. The projects will be paid for by bonds; however some other revenue, such as residence fees, will be used. This was approved by the UMass Building Authority who cited historically low interest rates when approving it.

"Funding is secured by the UMass Building Authority after they make careful projections about how much revenue will be generated and how much the state will give, but most of the money is university money," Blaguszewski said.

Over the course of the past decade, UMass has spent over $2 billion on construction projects, its largest project in history. According to the news release issued by the UMass news office, the university funded 85 percent of the projects and the state funded only 15 percent.

"We view these projects as an ongoing plan and an investment in our future. The Integrated Science Building we opened two years ago generates money from the research done there. The new dorm will generate monies from room and board and revenue from the out-of-state students we can now enroll. It is a thoughtful process and we would like to do more but funding is limited," Blaguszewski said.

Some of the projects that have been undertaken include the Studio Arts Building that opened in 2008, the Integrated Science Building that opened in 2009 and the replacement of the central heating plant, which has reduced the schools carbon foot print.

"We are trying to improve how students are educated and their ability to succeed. These projects are investments in their future," Blaguszewski said.

Katie Landek and Michelle Williams can be reached at klandeck@student.umass.edu and mewilliam@student.umass.edu

Washington goes green
Obama orders solar panels

In a press conference on Tuesday, Energy Secretary Steven Chu announced that solar panels are to be installed on the rooftop of 1600 Pennsylvania Ave.

The solar panels, as well as a solar hot water heater, are set to be in place by spring of 2011.

The announcement was made at a conference with state and local, academic and non-profit representatives. The goal of the meeting was to identify how the Obama administration can improve sustainability efforts.

"Around the world, the White House is a symbol of freedom and democracy," Chu said to those in attendance. "It should also be a symbol of America's commitment to a clean energy future."

Officials in the Department of Energy also highlighted the growth of the green energy industry and the available tax credits for citizens who install solar panels.

The planned panels will directly convert sunlight into electricity and the solar hot water heater will heat water for the White House with what administration officials referred to as a "solar collector." The bidding process to select a company for the installations will begin immediately.

Obama is the third president to look to the sky for answers. In the 1970's, Former President Jimmy Carter spent $30,000 on a solar water-heating system for offices in the West Wing. During George W. Bush's time in office, solar systems were the main source of power for a maintenance building, and part of the main house.

This announcement comes less than a month after global warming activists of 350.org urged the President to install solar panels. The activists earned one of former President Carter's solar panels, which were removed 24 years ago from Unity College in Maine to the capital to pressure the Obama administration to use alternative energy at the White House.

Founder of 350.org Bill McKibben, said in a statement on Tuesday that officials are taking steps in the right direction.

"If it has anything like the effect of the White House garden, it could be a trigger for a wave of solar installments across the country and around the world," said McKibbean.

The cost of installation was not announced for the improvements in the White House, nor how much energy would be saved. It has been estimated by that 25-75 panels will be installed on the rooftop. Administrative officials expect solar panels to convert sunlight into 19,700 kilowatt hours of energy each year.

-Collegian News Staff

President Barack Obama ordered solar panels to be placed on the White House roof. This gesture is alongside the Obama administration's stated commitment to renewable energy.

GOP nominates first gay Lt. Gov. candidate

TISEI from page 1

that has been traditionally against gay marriage.

"[This election] is kind of historic in a sense," Tisei said. "But I kind of view if I do a good job as lieutenant governor I want people to judge me on the content of my character and the work I do.

"I have been elected and re-elected 13 times. I feel very comfortable in my own skin. I feel like the best thing I can do is be a good role model and good example for the community."

Tisei also spoke on the reception he has from the public of the Commonwealth.

"During the campaign [my sexual orientation] has not really become a big issue because people judge me on my entire track record," Tisei said.

Tisei's stated goal if his ticket gets elected is make government more efficient. Tisei claimed that the state does not have as much pressure as a private business or a family does when making and sticking to a budget. Tisei remarked on the lack of competition in Mass. for business, which has led to the exodus of young people right out of college from the state.

"When you watch the Red Sox at Baltimore or Tampa Bay, you see more Red Sox fans than hope town fans in the stands," Tisei said. "All of those people were Mass. residents that decided to move out."

Candidate Tisei pointed to the Pacheco bill passed in 1993, which led to what he believes the prevention of the privatization of public services. Tisei claims that if the bill was repealed and private companies were allowed to perform public services, it would save the state between $250 and $500 million.

In order to reign in beaurocracy, Baker and Tisei plan on eliminating 5,000 state jobs. According to Tisei, these jobs are duplicates of other governmental jobs and are not needed.

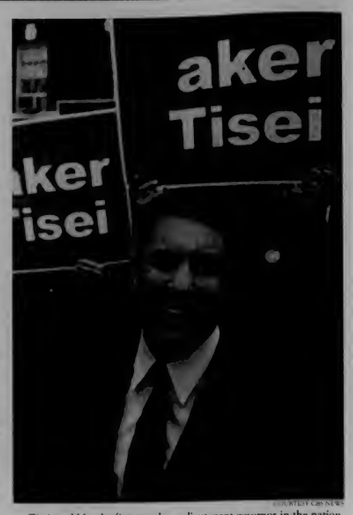
Tisei remarked on an apparent disconnect between Beacon Hill and the people of Mass. embodied by the 310,000 of state residents currently unemployed. Although the Baker and Tisei ticket wants to raise the retirement age from 55 to 65.

Candidate Tisei was the first speaker for the Republican Club this year.

"[Tisei] aligns himself mostly with his running mate's views, and what's important about him is that he is not about party politics, but what is best for the state right now," said Justin Thompson, president of the Republican Club.

Thompson said that Tisei's sexual orientation did not factor into the club's decision to have him as their guest speaker.

Bobby Hitt can be reached at rhitt@student.umass.edu



Tisei could be the first openly gay lieutenant governor in the nation. Here he stands with supporters of his campaign

Democratic rally in city of brotherly love

On Oct. 10, President Barack Obama plans to hold the next, "Moving America Forward," rally in Philadelphia, Pa. The Democratic Party faces stiff challenges in midterm election nationwide, and the president seeks to enliven the liberal base of the Democratic Party and move them to vote in elections.

According to a press release from the DNC, voters have a choice between progress for American families and small businesses or go back to Bush-era policies that the DNC claims caused the recent economic collapse. The public are welcome to the rally and are encouraged to RSVP at https://pa.barackobama.com/PhillyMAF.

In attendance will of course be President Obama and a number of Pennsylvania elected officials and Community leaders. The Philadelphia native band The Roots will be performing for the rally as well.

The event opens at 3 p.m., and the scheduled programming starts an hour later.

The rally will be held at the Robert Fulton elementary school at 60 E. Haines St. in Germantown of Philadelphia.

The first, "Moving America Forward," rally was in Madison, Wis., on Sept. 28. The event drew a large crowd of 26,000 consisting of students and residents from the Madison area and other parts of the country.

According to an article by AP, The University of Wisconsin saw a filled campus with 17,000 crammed onto a mall with another 9,000 attendees in overflow areas.

The president was accompanied by democratic state representatives vying for reelection and musician Ben Harper.

After Sunday's event in Philadelphia two more "Moving America Forward" rallies will be held in Ohio on Oct. 17 and Las Vegas, Nev. on Oct. 22.

-Collegian News Staff

BDIC hosts Benedek 'Cocoon' screenwriter

BY KATIE EVANS
COLLEGIAN STAFF

A University of Massachusetts graduate and longtime professional screenwriter Tom Benedek visited the Student Union Ballroom on Tuesday to discuss screenwriting and his life "From One Golden Age to Another."

Benedek wrote screenplays for many famous films, including "Cocoon," "Free Willy," "Zeus and Roxanne," "The Adventures of Pinocchio," and more.

He has written and edited screenplays for Martin Scorsese, Sydney Pollack, Ron Howard, Robert Zemeckis and others. In addition to eagerly sharing his journey in his lecture, Benedek also visited several screenwriting classes throughout the day, giving tips to interested students trying to get a foot in the Hollywood door.

The auditorium was scattered with students, professors and fans Tuesday, all eager to hear Benedek speak. Attendees were still sifting through the doors into the Student Union until 15 past the hour, when Benedek took the stage. Benedek spoke openly and warmly, as if relaying the story that is his life to a room full of acquaintances.

Benedek graduated from UMass in the winter of 1971 as one of the first students to graduate from the Bachelor's Degree with Independent Concentration program.

This year marks the 40th anniversary of the establishment of the BDIC program, which was founded by director Dan Gordon. Gordon, present throughout Benedek's lectures on campus yesterday and serving as his introducer, played an essential role in bringing Benedek into the program.

Benedek claimed the BDIC program has helped the way he's approached his entire professional career. This personalized program allows students to select their own concentrations of study, some of which have previously included Outdoor Education, Trauma Studies, Neuroscience and myriads more.

While in school, Benedek took photographs for The Daily Collegian. The film fanatic studied journalism and was an English major, writing creatively in his spare time. He also edited news for the five-college public radio and promoted concerts. The writer hails from Southwest's very own Kennedy Tower, residing on the sixth floor his freshman year.

The guest speaker came prepared with a projector behind him, broadcasting images of his own. Black and white photographs of Kennedy Tower, Southwest, the library and even some of Benedek's friends hitchhiking to the Massachusetts Pike shone throughout the auditorium.

As Benedek progressed to some of his more serious art photography, he landed on a photograph of Strom Thurmond, the Senator from South Carolina. Although Thurmond was never said to be in the Ku Klux Klan, a few people dressed in the Klan's infamous white outfits and went onstage to mock the Senator. The black and white photograph Benedek captured of this outrageous event spoke more than one thousand words, leaving the crowd breathless.

Like many UMass students today, Benedek studied abroad his junior year. He went to Paris, where he enrolled in a film school where he wrote, directed and did camera work on a student film which later became his senior thesis.

After graduating, Benedek made student films in New York and while writing away, the well-known screenwriter began working with Steven Spielberg's protégé, Robert Zemeckis. Fresh from producing the flop film "1941."

Zemeckis contacted Benedek six months later for help with an unpublished draft titled "Cocoon." Benedek successfully presented his ideas for the script to a room full of producers and was rewarded for his persistence. In a turn of events, Zemeckis was fired from the film to be replaced by "Happy Days'" Ron Howard. This move was beneficial

SUPPORT AND THERAPY GROUP MEETINGS
FALL, 2010

HILLS HOUSE GROUPS

RELAXATION AND STRESS MANAGEMENT
Mondays, 4:30 – 6 p.m., beginning in October.
Open to new members each month. Learn and practice a variety of relaxation skills to help deal more effectively with stress.

WOMEN'S THERAPY GROUP FOR GRADUATE STUDENTS
Mondays, 6:30 – 8 p.m. beginning in October.
Focus on issues such as self-acceptance, self-expression, relationships, family, anxiety and academic demands in this group just for women.

MEN'S THERAPY GROUP FOR GRADUATE STUDENTS
Tuesdays, 5 – 6:30 p.m. beginning in October.
Closed to new members after first session. Addressing issues including male identity, self-acceptance, isolation and forging more satisfying relationships.

MINDFULNESS-BASED STRESS REDUCTION (MBSR)
Wednesdays, 2 – 3:30 p.m. beginning Oct. 13.
Closed to new members after first session. Mindfulness is a way of paying attention with intention, in the moment and without judgment. With regular practice, MBSR has the potential to lower stress, anxiety and depression, promote relaxation, improve concentration, raise self-awareness and enhance the immune system.

INTERNATIONAL STUDENTS' SUPPORT GROUP
Wednesdays, 6 – 7:15 p.m. from Oct. 6 – Dec. 1.
Open to new members throughout the semester. Talk about home, cultural adjustments, language issues and more, with undergraduate and graduate students from all over the world. Meetings take place in the International Programs Office, Hills South.

MAKING CONNECTIONS
Thursdays, 3:30 – 5 p.m. beginning in October.
Closed to new members after first session. Join undergraduates in exploring topics including self-esteem, relationships and school adjustment.

BERKSHIRE HOUSE GROUPS

LIVING WITH LOSS
Thursdays, 4 – 5:15 p.m. beginning in October.
Closed to new members after first session. A support group for undergraduate and graduate students dealing with the loss of someone close to them.

MEN, TALKING
Fridays, 3:30 – 5 p.m. beginning in October.
Open to new members throughout the semester. A small, safe group of undergraduate men committed to building community, supporting each other and discussing issues including romantic relationships, satisfying friendships, academic stress and masculine identity.

Pre-registration is required; call weekdays, 8 a.m. – 5 p.m. For groups meeting at Hills House, call (413) 545-2337; for groups at Berkshire House, call (413) 545-0333.

Students mock, protest anti-gay rally in Ohio

BY THE LANTERN (OSU)
VIA COLLEGE NEWS NETWORK

Members of the Kansas-based Westboro Baptist Church made a dramatic appearance at OSU Monday morning on their way to the U.S. Supreme Court.

To counter the brief rally by members of Westboro, known for its anti-gay and anti-America sentiments, nearly 100 students gathered on the corner of 11th Avenue and High Street.

Armed with free cookies, rainbow umbrellas and signs proclaiming "Love not Hate" and "God Loves All People," the counter-protesters outnumbered the six adults and two children who represented the Kansas-based church.

Westboro, an independent Baptist church known for protesting at funerals of U.S. soldiers and gay people, was slated to appear in front of the Ohio Union. But the group decided to stage its rally in front of the Moritz Law School instead.

Police denied The Lantern's attempts to speak to the protesters about why they chose to rally at OSU, but a statement on the group's website says OSU students "spend more time pursuing their drunken sins than their academic studies" and that OSU professors teach "the ubiquitous lie that 'it's OK to be gay.'"

The church members displayed colorfully decorated signs while dancing and singing along to what sounded like popular songs, such as the Gorillaz's "Feel Good Inc." and Queen's "Fat Bottomed Girls."

Closer inspection of the signs gave a clearer indication of their messages:

"Pray for More Dead Soldiers."
"Antichrist - Obama."
"Fags Doom Nations."

And the song lyrics were changed from Freddie Mercury's original version of the popular song by Queen to: "Fat-bottomed whore will, by our mighty Lord, go down."

Mercury was gay and died in 1991 of complications from AIDS.

Most of the counter-protesters, separated from the Westboro group by a line of Columbus and OSU police officers, didn't seem fazed by the church group and said they came to mock the church's slogans. The counter-protesters displayed signs with slogans such as "God Hates Trekkies" and "I'm feeling fat and sassy."

OSU employee Jason Johns joked that he agreed with Westboro's statement that OSU students drink too much.

"I'd make it my Facebook status if it weren't so long," he said, laughing.

But Johns said he disagrees with Westboro's message.

"They're just a small group of people who are trying to get their own in the spotlight - by any means necessary," he said. "So they will come out and say stupid s---."

Matt Ripley, a fourth-year in environmental science, held a sign that read "Free Hugs." He tried to get close to the Westboro protesters to offer an embrace, but police told him to leave.

"I'm just out here offering free hugs because I think what the world needs is free hugs," Ripley said.

The counter-protesters were quiet and most chose to speak through their signs rather than chants. The most commonly heard phrases among the group were "Free hugs!" and "Free cookies!" Most in the group were students, but many OSU faculty, alumni and Columbus residents attended the rally.

Columbus and OSU police said the protest was relatively peaceful and they encountered few problems. Columbus Police Commander Terry Moore, who estimated that there were 20 to 30 city police officers there for security, said they had known about the rally for a couple weeks.

"We had no intelligence that suggested there would be any real problems," Moore said. "We did our standard plan for these types of demonstrations, and it went as expected."

The protest, scheduled from 10 to 10:30 a.m., started late and was over around 10:25 a.m. Afterward, the Westboro group quickly hopped into a van as some in the crowd chanted, "Hey hey, ho ho, these homophobes have got to go!"

The rally at OSU was part of Westboro's "1-70 GodSmack Tour: from WBC to DC," a tour which has taken the group from Kansas to Washington, D.C. The group members are headed to the nation's capital to support their leader, Fred Phelps, in the case Snyder v. Phelps, which will be presented Wednesday to the Supreme Court. Albert Snyder, the father of a fallen marine, is suing Phelps, saying Phelps caused him emotional distress after members of the Westboro Baptist Church protested at his son's funeral in 2006. Snyder was awarded nearly $11 million in the suit, but the case was appealed by Phelps and thrown out because of First Amendment rights.

OSU spokesman Jim Lynch wasn't concerned about the rally.

"Our students here at Ohio State know that this is a very inclusive campus that rejects any form of prejudice, exclusion or disrespect," Lynch said. "A brief half-hour visit by (Westboro) will, in no way, sidetrack our university's long-standing values of diversity and inclusion."

EDITORIAL OPINION

WEDNESDAY, OCTOBER 6, 2010

"If we don't believe in free expression for people we despise, we don't believe in it at all." -Noam Chomsky

EDITORIAL@DAILYCOLLEGIAN.COM

The truth is complex

Hannah Grossman

[illegible] is more than [illegible] must be sought after by recognizing that you cannot be the only one who's right.

Truth is hardly graspable between individuals and between groups. On campus we see student organizations coming up for months at promoting their worthy agendas. Throughout the year we hear speakers and attend protests against their lectures. We sign petitions and are berated for doing so by someone else. We are repeatedly fed opposing truths by various groups. But how is it that one group believes so strongly in its truth and an opposing group feels just as passionate about its own?

Just as two people must attempt to surmount the physical encasing of one's immateriality and see the truth within another, groups must try and see the validity in the views of a group with a contending narrative.

Generally classified as impressionistic, we young adults often take most things as truth. But we must strive to recognize the legitimacy in everyone while being critical of what we hear.

A recent story in The Collegian cited a study conducted at the University of Michigan regarding diverse opinions within college classrooms. To restate briefly, the study concluded "Seven percent of campus professionals thought students were respectful of diverse perspectives when they enter college. In contrast, 63 percent of students believed that they entered college with an open mind. [And] as students got older, their optimism for productive, varied discourse decreased." The article suggested that the situation might differ at the University of Massachusetts, where student's interests in diverse opinions increases when those views are raised in the classroom.

As a senior, I have taken numerous classes where the professors have advocated their agendas and refrained from mentioning other views. Seeing how many students barely raised an eyebrow and robotically transferred the teacher's words to paper repulsed me. In classrooms where diversity is lacking it is essential for you to question the truths being told, even if they may be "right."

Here at UMass, we are fed spoonfuls of information daily. Any topic demands being seen from more than one perspective. As you develop your opinions take in the advice of French novelist Gustave Flaubert. "There is no truth. There is only perception."

Don't automatically absorb everything you hear, view it from another angle. If you walk through the Pro Life club's abortion graveyard, also attend a lecture by VOX, the Pro-Choice club. If you attend one of the Maslow Public Affairs Council luncheons, also attend an event hosted by the Student Alliance for Israel. If you sit in the audience for one of the Conversation Democrats speakers, make sure you spend an evening with the College Republicans.

Each of these organizations is run by intelligent and devoted students. While some are more apt to having open dialogue, others are stalwart in solely promoting and defending their respective agendas. Question and challenge them. Take in as much as you can and form your own considerate opinions after seeing an issue from divergent viewpoints.

Just as it is arduous to break through the barriers between groups and view their comparative legitimacy, it is just as difficult to see the truth within individuals. If you are one of those who believes anyone disagreeing with you must be wrong, read ahead and see what I mean by no one being right.

Truth is abstract. Within our world of tangibility there is a tremendous amount of immateriality. And this is within each human being in the form of thought and feeling. Just as it may be arduous to believe in something incorporeal, it is also difficult to understand the intangible segments of other people. Your thoughts and feelings are only perfectly understood by you. No one will ever know this truth within you.

It is universal human inclination to express this immateriality through one, two or three means: speech, action and writing. Yet the disappointment adjoining this attempt lies in the fact that the expression is never exactly what is inside of you.

Each person has had unique experiences that taught them what certain emotions mean. Take anger for example. Because there are over six billion unique experiences that produce this word, this one word has over six billion definitions. No one will ever really know how you feel. Sorry to break it to you.

After looking at this difficult transference of truth on micro and macro scales, examine yourself and the world around you where such clashes exist. This often occurs when contradictory narratives encounter one another. I bet you a gazillion bucks that if you spin a globe under your finger and think of a conflict from the spot you land I would be a gazillionaire.

Knowledge and narrative are derived from the same Proto- Indo- European root, "gno," to know. Contending narratives are formed by different ingestions of knowledge. Oliver Sacks affirms this on the personal level in "The Man who Mistook his Wife for a Hat": "A man needs such a narrative, a continuous inner narrative, to maintain his identity, his self." Everyone has a unique historical narrative and collectively, groups share narratives as well.

Just as two people must attempt to surmount the physical encasing of one's immateriality and see the truth within another, groups must try and see the validity in the views of a group with a contending narrative.

Having strong opinions is important to your identity. Who would want to talk with you if you didn't? I surely wouldn't.

But it is equally important to be open and to recognize that you probably lack the sole right answer. Though it is fun to scream and shout and to think you are the only one who is right, life would be a lot more fun if we stepped out of the confines of our skin and groups and heeded Flaubert's words of truth.

Part of the system

Will Sydor

A few years ago, during my sophomore year of college, I was playing the video game "Halo 2," with a group of white male mostly able friends. I don't really know their sexuality, for they continuously "pushed" the lines of "male intimacy," engaging in acts that, I believe, were to show how gay they weren't.

These physical and sometimes verbal acts existed alongside a loud and violent homophobia and hetero-sexism, exhibited through degrading words and blatant policing of gender roles in every aspect of their lives, or at least the times I spent with them.

For example, we had a friend whose friend was an openly gay man. Because our friend spent time with this openly gay man, we openly questioned his heterosexuality. Sometimes he would walk in on this questioning, an atmosphere that visibly made him not only uncomfortable, but also more stringent on proving that he was, in fact, a heterosexual.

But back to my previous example that also scratches the surface of the toxic atmosphere we created. So we were playing Halo 2. (not to mention its violence and the militaristic colonial-hyper-masculine-ableist messages given to the player), engaging in a multiplayer mini-game in which we tried to kill each other as often as possible. One of my friends shot me and in frustration I called him a, "f—t."

I'm not going to go into the possible internal struggles of the people in the room, those feeling stuffed painfully and deeply into ourselves to continue our pursuit of middle class-masculinity.

Not to go into us, but more so to the previously mentioned openly gay man that was standing right next to me, his body slightly stiffening at my comment, his body leaving a few seconds later. And me, shoving down yet another slightly uncomfortable feeling and continuing on with my day.

Past the almost immediate urge to say, "I wasn't talking about you," or, "but I have so many gay friends," or "it's just a word," lay the truth that in my actions and in that word, I was speaking about every LGBTQ person I've ever known or read about. I was speaking from my gut, in words that bypassed my internal filter, words that betrayed me, showing a fuller picture of me, of my hatred and fear of LGBTQ people.

These are all different parts of me, the "me" lying not at the end of an equation with these identities being the numbers and me the "solution."

It is a fear given to me by the constant message that to be heterosexual was to be normal and to be any other way, was to not be normal; a message solidified by my own actions, my partaking in spreading these messages.

Over the past few years, different experiences and stories and bits of understanding have chipped away at that fear, allowing me to feel more deeply about the LGBTQ struggle, specifically because, while this system of policing and oppression affects LGBTQ people in a way that is unacceptable, a way I'll never understand, my role in that oppressive system denies me a fuller acceptance and understanding of myself. I am less human, and therefore less able to relate to other human beings.

It is also inhuman to participate in oppressing others, in taking part of a system of thinking (and therefore doing) that ultimately leads to the death of thousands on an annual basis through housing, medical, legal, national, religious and other forms of discrimination alongside the constant subtle and overt bigotry assaulting the psyche, quite literally adding insult to injury.

I, like most other people, know that oppression is unacceptable to some extent. The struggle for me has been realizing and coping with the numbness I've developed when it comes to the struggle of non-dominant groups.

The only constant that I've seen so far is the meaning of my pain in relation to dominant identities. The hurts that I've received from masculinity, from being middle class, from being seen as heterosexual for the most part, from being seen as able, etc., are in no way comparable to the constant hurts experienced by those who have to more consciously deal with systems of oppression.

The pain white people experience under racism, having to conform to whiteness (an identity founded on absence, on genocide, on distortion), is terrible and unacceptable, but that pain is not the same as mine. When a white person walks through the world in which textbooks profess the savagery of those who are not white, in which statistics "prove" the criminality of black people, in which the wars we partake in are still described as the civilized vs. the uncivilized essentially, there is little dissonance due to race. They move through a world in which the mirror they see reflects who they think they are: full, complex, worthy human beings. The world isn't like that for me. There's a constant dissonance when I move.

The least I can do is to create that dissonance for heterosexual people. To create spaces in which difference is acknowledged and in that acknowledgement, systems set up to oppress are challenged in a fundamentally altering way, challenging also the systems in me.

Will Sydor is a Collegian columnist. He can be reached at wsydor@student.umass.edu.

Five reasons why Godot never showed up

1) He was implicated in a cash–for–vague–supplications scandal.

2) French transit workers were on strike.

3) He got mixed up with Humbert Humbert.

4) Brendan Behan threw up on the third act.

5) That kind of thing happened to everyone in the days before GPS.

ED/OP

Midterm Madness

Curtis Bloomfield

Politics in today's society is struck with deception and secrecy, with promised results not yet delivered. Can the same be said for President Barack Obama?

On Sept. 30, two individuals who are close to White House Chief of Staff Rahm Emmanuel announced that he would be resigning in the coming days to run for mayor of Chicago. Emmanuel, like some others, are like "rats fleeing a sinking ship" when it comes to the Obama administration.

With the midterm elections coming up Emmanuel has chosen to leave due to the continual loss of Democratic support. With people losing confidence in Obama, things are not looking to good for the first African-American president.

In accordance with the Washington Post-ABC news polls, six out of ten voters do not have faith in Obama's decision making for the country and a good portion are not satisfied with how he is handling the economy.

In the words of famous critic Stanley Crouch, President Obama is not a superhero who can kick a hole through the brick wall put up by Republicans, he cannot turn American into Eden in less than two years.

In addition, Israel National News reports in a poll conducted by the McLaughlin group that when asked if they would vote to re-elect President Obama to a second term, 46 percent said they would vote for another candidate.

In 2008, eight out of 10 Jewish voters picked Obama.

Two years later that number has drastically fallen down to four out of 10. The Obama administration is quickly losing the confidence of the citizens and looks to be in trouble for the coming elections. To make things worse, seven out of 10 registered voters say that they lack confidence in Democratic lawmakers.

May 19, 2010 was a date marked by Obama's Democratic colleagues being rejected by our nation. Four of President Obama's colleagues have lost their races for office. Losing even with the leader of our nation behind you is not a good sign. Democrats are once again in danger of losing their influence in the White House. The way things are looking, President Obama may not even make it to a second term.

In polls for Congressional candidates, 49 percent of voters sided with the GOP with only 45 percent siding with the Democrats. A big part of this loss of support has to do with the condition of our economy. Compared to the year of the recession, the nation is in better shape, but with problems in the housing industry and unemployment only slightly improving, the president's ratings have gone down.

When it comes to decisions affecting our economy, 43 percent of Americans approve of President Obama's approach while 54 percent disapprove.

In 2006 it seemed like Democrats would take over, but as we enter the midterm race in November, Democratic influence has become significantly slimmer.

What I do not understand is why the people of our nation are criticizing our president when our economic woes are due to the previous president, George W. Bush.

Many people believe President Obama placing blame on the Bush administration is not the route that he should take.

I do not think Obama is placing the blame on the Bush administration; he is simply reminding the people that he was put into a very difficult situation and is trying his best to make amends.

In the words of famous critic Stanley Crouch, President Obama is not a superhero who can kick a hole through the brick wall put up by Republicans, he cannot turn American into Eden in less than two years. Americans are asking for the impossible and unreasonable.

According to the President himself, "It is time for all of us to grow up and face the fact that we just might be the people we have been waiting for. If you thought you were electing a superhero, you were wrong." It is true that President Obama has promised change but patience is the key to seeing our nation once again prosper. Crouch also believes that some Democrats may have given up too quickly.

"But whether the change Obama did promise is possible can only be learned if we decide to stay the course and refuse to give in to fatigue and paralytic cynicism. There has never been a better time to fight than now," Crouch states.

With that being said, haven't Americans ever heard the saying times are the hardest when you are closest to you goals? The only way to see change is to carry on through the storm. Besides, it took our economy years to recover from the inflation and first stock market crash, so why should this recession be any different?

Wolfman Conspiracy play Bishop's Lounge

The Wolfman Conspiracy brought their "power–reggae" sound to the Bishop's Lounge in Northampton this past Friday. Also playing that evening was the prog–rock band Timbre Coup.

By Alex Andreosatos
Collegian Correspondent

The scene at Bishop's Lounge this past Friday was surprising: the space was small, and the lights were dim.

Three floors up from the moonlit streets of Northampton, the mood was low-key what kind of band would be filling this modest room?

The Wolfman Conspiracy, a boisterous and flamboyant caravan of power, reveled in the dim light on Friday, Oct. 1.

Starting their set around 11:30 p.m., this group of sharp-dressed people turned a quiet and small room into a loud and small room, packed tightly with people fighting for room to dance.

The cup was filled to the brim on the first night of October.

Taking to the stage like a pack of wolves, The Wolfman Conspiracy had plenty of groove, and this is to be taken literally.

People had to actually try not to dance. From the first song till the encore, the crowd was swept off their feet.

A "power-reggae" band by their own dubbing, the local eight-piece is comparable to other bands with a reggae foundation, except the Wolfmen had their own recipe.

Keyboardist Nick Gingras's weapon of choice is the Hammond organ, but he also used two or three different types of synthesizers, adding a unique edge to their music. Gingras's virtuosic touch on the keys was a huge part of The Wolfman Conspiracy's sound.

Lead vocalist and guitarist Dom Mazzoli's charisma and righteous voice are worthy of recognition. He never failed to chat up the crowd and his heroic island yell is what brings the deeply real and human vibe to their music.

The Wolfman groove is why you dance, but Mazzoli's voice is why you actually listen.

The band had a brilliant and extroverted energy on Friday with an intensely physical performance. But despite this explosive energy, moments of introversion and abstract variation were present as well, as the Wolfmen would often change tempo, allow ing a calm to settle over the din, or a turn would be taken that wasn't expected of this eight-piece steamroller.

Also putting on a stunning performance at 10:30 p.m., before the Wolfmen was Timbre Coup, a four-piece progressive rock band from Albany, N.Y.

Mainly an instrumental band, the soul of Timbre Coup bled through sincerely and incessantly throughout their set. Every minute of their performance was fascinating: beautifully colored twin-guitar harmonies made fleeting appearances like rare animals, bass lines meandered and twisted like snakes and the drums slashed away like a confident guide, cutting the path clear so the rest of the spotted animals could run their dazzling course uninhibited.

The Wolfman Conspiracy and Timbre Coup lit up the dim room at Bishop's Lounge last Friday. At the end of this marathon performance, during which the Wolfmen covered Stevie Wonder, Flight of the Conchords and the Notorious B.I.G., frontman Dom Mazzoli let out final words that summarize The Wolfman Conspiracy.

"We are The Wolfman Conspiracy. We love you. Yes."

That is the creed of the Wolfmen. Seeing a show of theirs is without question recommended.

Garlic Festival brings scent to valley

By Leslie Rosenfeld
Collegian Correspondent

Saturday, Oct. 2 and Sunday Oct. 3 brought great joy to Western Mass., as the 12th Annual North Quabbin Garlic and Arts Festival took place at Forsters Farm.

Many families, students and anyone who loved garlic and the arts came out for this fun-fille, and quirky experience.

The raid cleared, and only sunshine and a brisk breeze swept through Orange, MasAstThis haven of garlic and arts came together for two days tf honor and to highlighto local products, owners and artists.

As you walked in, looking down at the big garlic stamp placed on your hand upon entry, the sweet aroma of food prepared by local chefs and restaurant owners overcame your senses.

Rows upon rows of booths of everything from hand-made wooden instruments, knit glove, and pottery all the way to organically produced foods and health products were enough to excitd any viewer.

All the hom-made scarves, jewelry and hand bags were a hit but some stands took the spotlight.

The pesto stand that displayed six different varieties of pesto ranging from honey down to maple pesto had the festival-goers going back for fourths and fifths.

Another great hit was the pickle stand; "Real Pickles" from Montague, MassA had an assortment of mild and spicy local organic naturally fermented pickles.

Many booths showed works of art in pottery, paintings and beautifully crafted wooden bowls. You could just lose yourself in the midst of these booths, but the aromas and sounds from the other end of the field brought you closer to the stage.

Live music was put on by local artists such a. Steve Crow, Melanie and the Blue Shots and folk-fak favorite Kris Delmhorst.

Along with great live music came booths of deliciously prepared foods from local chefs, farms and restaurants.

Making your way down the aisle, all of the sweet smells of garlic, meats and vegetables had your mouth watering even before the purchase of one of these scrumptious meals.

Grandparents, parents and children waited online, conversing with other patrons talking and bonding over the day of music, crafts and food that put a smile on everyone's face everywhere you looked.

Many people enjoyed the salmon cakes and root vegetable quesadilla made hy Lone Wolfe FarmS.

Each bite had your taste buds jumping and dancing to the rhythm of the music in the background. Another fan-favorite was the Pad Thai made with chicken or tofu for $7. The hefty plateful made up for the somewhat lofty price.

In the midst of live music, food and crafts was a cleared space for all who enjoy the past time of hula-hooping. Men, women and children of all ages dropped their bags and sunglasses to revert back to their younger, care-free days of this fun act.

The festival definitely encompassed the artistic side of local designers and shop owners, however the actual lack of garlic was quite a surprise.

The main event is featured in the title but did not make a big appearance. Some people attending the festivities had noticed this as well and hoped for more garlic-related facet!.

Overall, ths festival brought out a huge, easy-going and relaxeg crowd that really enjoyed the simple details of food, music and garlic.

We can be sure that next year's event will be just as great. If you missed out on this fun adventure, don't worry because on November 20 and 21 North Quabbin Woods will be hosting The Thanksgiving Harvest Festival, which will hopefully also entail food, crafts and lots of fun.

Online radio revolutionizes

By Tappan Parker
Collegian Staff

Imagine you are at lunch with your friends, talking about music.

One of your friends mentions a band they really like and recommends you check them out. You promise to, filing the name of the band into the back of your head for future reference. You may or may not check them out, depending on whether you want to take the effort to find their songs on YouTube and if you like them, actually going ahead and downloading them, probably illegally, to your computer.

It's more than likely you have found yourself in this situation a number of times. It's a bit of a hassle, and worst of all it's unlikely to benefit the artist if you are downloading the music illegally. Let's admit it, college students don't really have the money to buy all the music they want to listen to and it's a problem. But what can we do?

Finally, there are solutions to this problem.

They are in the form of new Internet music players that allow you to legally listen to millions of songs of your choosing with the click of a button and support the artists at the same time. There are currently a few of these players out there, all of which have their own pros and cons.

The best of these services so far is Spotify. It already has over 10 million songs and is growing hy 10,000 more everyday. It also is free. That's right, free, or at least as free as you can get with a music player that allows you to listen to any song you want in its extensive collection and still pay the people making the music. You can even share your playlists with your friends and it runs well, offering a program that is better than iTunes.

But there are a few catches with Spotify. When using the free version you have to deal with advertisements and you can only listen to 20 hours a month.

However, if you choove to pay a monthly subscription, you can get Spotify ad-free in addition to a few other perks, such using it on your iPhone and downloading your playlists locally in case you want to go offline.

Free and paying members of Spotify can play music already on their computer with Spotify. So far, a number of major and minor record labels have signed up with Spotify, including Sony, EMI, Warner Music Group and Universal.

But there is one more piece of bad news. Spotify is currently only availahle in Sweden, Spain, Norway, Finland, France, the Netherlands and the United Kingdom. Spotify is expected to launch in the United States by the end of the year though, so you may be able to try it out by Christmas.

The other player you will want to pay attention to is Rdio, a music service backed by Niklas Zennstrom and Janus Friis, the people behind Skype and Kazaa. Rdio is similar to Spotify in many respects, but three things currently separate them:

One-Rdio only offers a 3-day trial of its services before you have to pay a subscription fee.

Two-Rdio doesn't have as many songs as Spotify and is missing quite a large number of Indie artists.

Three-Rdio is already available in the United States.

There is another competitor in the States: MOG.

MOG currently offers over nine million songs and is almost identical to Rdio and Spotify. MOG has actually been around for almost two years now, but its functionality is not as clean as Spotify's yet. MOG does have a feature that allows users to listen to artists similar to the one they are currently listening to, allowing for a Pandora-esque experience. MOG currently offers a 14-day trial of its music service, a significantly longer period of time than Rdio's.

We7 is another service, fully available in the British Isles and with limited content in other areas. Unlike Spotify, Rdio and MOG, the service is completely free and you do not have to register to use it, but you do have to deal with ad blips at the beginning of each song. Recently they adopted the premium model, allowing users to pay a fee to get rid of ads. They also claim to support the artists through ads better than any music streaming service out there.

All of these music subscription services are available for less than the price of an album per month. These services are much more convenient than current methods of finding music and allow you to take them with you on the go if you own a smart phone. Meanwhile, by using these services you are still supporting the artists. So isn't having access to all this music worth a monthly fee?

Screenwriter speaks of life and work to BDIC

BENEDEK from page 2

the well-known screenwriter began working with Steven Spielberg's protégé, Robert Zemeckis. Fresh from producing the flop film "1941."

Zemeckis contacted Benedek six months later for help with an unpublished draft titled "Cocoon." Benedek successfully presented his ideas for the script to a room full of producers and was rewarded for his persistence. In a turn of events, Zemeckis was fired from the film to be replaced by "Happy Days'" Ron Howard. This move was beneficial to the movie because it allowed Benedek to further explore and develop the characters.

"Cocoon" turned out to be Benedek's breakthrough film, reeling in many job opportunities and bringing continuous success for years to come. He was eventually hired to re-write "Free Willy" due to a bit of good luck. Benedek's re-write was picked out of a large pile of scripts after several writers were fired from the project. Spending countless hours molding what should have been an improbable relationship between a boy and a whale into reality, Benedek was more than discouraged to receive no credit for his work. "When I didn't get the credit I was outraged," admitted Benedek nearly two decades later.

In hindsight, the discredit may have been beneficial to his career, as producers felt bad and spread word of his name. That fact didn't stop Benedek from reflecting that the assistant to the hairdresser was credited, but the Writer's Guild maintains an unwritten rule that only credits up to three script-writers-Benedek, of course, being the fourth. He dwelled upon this misfortunate surmising that he should have hired a lawyer to write his arbitrations.

The screenwriter discussed the Golden Age of film, taking place when he was first starting out. Benedek said that although bad movies happened regularly, many worthy projects came about, such as "Star Wars," "Annie Hall," and "Taxi Driver."

"Today we have the possibility of another Golden Age," stated Benedek. He went on to sum that since we have the available technology, there's no reason why we can't repeat the successful film era.

Benedek feels that success in the screenwriting world is measured with equal parts creative work and marketing. Though he certainly practiced perseverance, Benedek may have also been in the right place at the right time. He acquired his first agent when the top three at William Morris Agency (WMA) left to form Creative Artists Agency (CAA), leaving WMA vulnerable and staff-hungry. Benedek called WMA one week after losing top personnel and was granted an opportunity to share his work.

"If you're walking down the street and you see James Franco, or somebody who knows somebody who knows somebody, having a 30 or 60 second summary of your material (is vital)," claims the success-savvy alum.

Benedek continues on to share a Hollywood axiom originally stated by William Goldman, which is: "Nobody knows anything."

The writer continued Goldman's train of thought, saying, "You don't know where the magic's going to come from."

Post "Free Willy" fame left Benedek branded as a family film writer, a fact which surprised him. Benedek said that he never would have known he'd end up writing family-oriented films. For the next half of a decade, every family film script trying to be developed was sent to Benedek for approval.

Being type-cast as a screenwriter hasn't stopped Benedek from exploring his other talents. The writer created an art project out of old scripts and projects taking up space in his garage that he had no ownership rights to. The art project, titled "Shot by the Writer," consisted of 21 jobs he bronzed and riddled with bullet holes, then took photographs of. As a result, Benedek had a gallery show published in a literary magazine and was interviewed by the L.A. Times and New York Times.

Benedek is currently working in television screenwriting. His most recent project, called "Dr. Knott," is about a man who impersonates a doctor. Eight years ago, Benedek wrote pilots for CBS and is currently trying to reignite that spark. According to Benedek, persistence will get you everywhere. The professional screenwriter, winding down in his lecture, emphasized that "the process is as meaningful as the presentation to anyone else."

Kate Evans can be reached at kvevans@student.umass.edu.

COURTESY DELAWARE MEDIA RELATIONS

Quarterback Trevor Sasek looks to pass downfield against James Madison on Saturday. Sasek led Delaware to its fifth win, throwing for 124 yards and rushing for 40 yards and a score.

Blue Hens win again

By Scott Cournoyer
Collegian Staff

In an early-season conference showdown, it was the performance of the defense and a successful field goal by junior Mike Perry in the final seconds that ultimately secured the victory for the Delaware football team over James Madison on Saturday, 13-10. The Blue Hens (5-0, 2-0 Colonial Athletic Association) remain unbeaten on the season, picking up their second conference win.

CAA Football

Delaware's defense once again stepped up in the second half, shutting out JMU and providing time for the Hens' offense to drive the ball down the field and convert two field goals in the fourth quarter.

Linebacker Dante Cook provided the hammer on his way to a CAA co-Defensive Player of the Week performance, recording eight tackles and a game-changing 84-yard touchdown return after an interception in the second quarter. Delaware has let up only one total touchdown in the second half of games this season.

Up until the start of the second quarter, the game remained scoreless before a rushing touchdown by quarterback Trevor Sasek gave Delaware the lead. The Blue Hens did not see much of injured senior Pat Devlin, who only had two offensive snaps all game. Sasek, winner of this week's CAA Rookie of the Week honor, led the Blue Hens' offense on a 14-play, nearly seven minute fourth quarter-drive that put Perry in position for a late field goal.

JMU responded on the pursuing drive when senior Jamal Sullivan ran for 67 yards on the ground, leading to a one-yard touchdown run by redshirt junior Scott Noble. It was the only touchdown on the day for the Dukes as the offense converted only three first downs for the entire second half.

Tribe survives scare

William & Mary nearly blew an 18-point lead after Villanova scored with just over two minutes left in the game on quarterback Chris Whitney's 47-yard touchdown pass to Norman White.

The Wildcats were unsuccessful on an onside kick attempt after the score and the game went to the Tribe, who survived a two-touchdown, second half performance by Villanova's offense. Whitney came into the contest ranked second in the nation in passing efficiency at 170.6, and threw for 235 yards on the day with a touchdown with two rushing scores.

Quarterback Michael Paulus was 20-for-28 passing with 211 yards, completing a pass for seven different W&M receivers. Tailback Jonathan Grimes ran for 86 yards on 21 carries, scoring three times on the day for the Tribe. Villanova came into the game as a top five nationally ranked defense, giving up an average of only 12 points per game and allowing less than 70 yards on the ground.

Weekly honors

In a battle for the Rhode Island Governor's Cup, quarterback Steve Probst scored three touchdowns to lead the Rams to a 27-24 overtime win against Brown Saturday. Probst picked up his first career CAA Offensive Player of the Week honor along the way, completing 22-of-38 passes as well as rushing for 59 yards and scoring all three touchdowns on the ground.

Richmond defensive back Justin Rogers' performance in a 41-19 clubbing of Coastal Carolina on Saturday earned the senior a Co-Defensive Player of the Week honor. Rogers intercepted a pass and had a 34-yard return for a touchdown with just over a minute left in the game. The senior made plays all over the field, racking five tackles, two interceptions, a forced fumble and a pass breakup.

Scott Cournoyer can be reached at scournoy@student.umass.edu.

Neal leads Colonials to victories

By Jackson Alexander
Collegian Correspondent

Alex Neal of the George Washington women's soccer team has been named the Atlantic 10 Women's Soccer Rookie of the Week for the second time this season.

The freshman scored both goals in a 2-1 victory against Temple, including her second game-winner of the season in the 44th minute, right before halftime. Later in the week, the defender midfielder made contributions in the Colonials' 2-1 victory over Saint Joseph's, helping boost the team's conference record to 2-0.

A-10 Women's Soccer

The perfect start in conference play leaves GW in a three-way tie for first place with juggernauts Dayton and Charlotte.

Neal received her first Rookie of the Week award on Sept. 20 when she led the Colonials to three victories and scored her first collegiate goal against Delaware.

GW began the season playing poorly, as it lost three of its first five matches. Since then, the Colonials, sparked by Neal's play off the bench, have won six games in a row. GW missed the playoffs last season and finished at an unimpressive 7-8-4 clip in the conference.

The Colonials (8-3, 2-0 A-10) face Richmond this week as they look to continue their first winning season since 2003.

Players of the week

Richmond's Becca Wann and Dayton's Colleen Williams were named the A-10 Conference Women's Soccer Co-Players of the Week.

Wann's late game heroics propelled the Spiders to an overtime win against the Hawks. With 17 seconds remaining in the extra period, Wann delivered the golden goal to secure Richmond's first conference victory. The game was sent into overtime thanks to Wann's header in the 87th minute.

Wann notched her third goal of the week in a 1-1 tie with Temple. The freshman has put up gaudy numbers thus far, scoring seven of her team's nine goals. Richmond (4-5-2, 1-0-1 A-10) takes on George Washington this Saturday.

Williams, meanwhile, also scored three goals in wins against Fordham and La Salle last week. The reigning A-10 Rookie of the Year kicked her week off with a goal in the Flyers 4-0 blowout of the Rams. Later in the week, Williams had both goals in a 2-0 victory over the Explorers.

The sophomore from Titusville, N.J. has already been recognized as a Player of the Week three times this year. Williams leads both the Flyers (10-2, 2-0 A-10) and the conference in scoring with 11 goals. Dayton will rely heavily on Williams if they expect to defend their 2009 A-10 crown this season.

URI wins first game

Rhode Island won 1-0 over conference foe Saint Louis on Friday, giving the team their first victory of the season.

Senior forward Adrienne Ruhe Lischke delivered the game-winner in the second half with less than 27 minutes remaining in regulation. After receiving a pass from Alexis Veith, Ruhe Lischke dribbled uncontested into the box and blasted a shot into the top-left side of the net.

Although the Rams (1-8-1, 1-1-0 A-10) have struggled to find the win column this year, they have managed to stay competitive in nearly every game. Six of their eight loses have been by one goal.

Part of URI's struggles can be attributed to a severe lack of scoring. Through their first 10 games, the Rams have only scored seven goals; which puts them second to last in scoring in the A-10, just ahead of the Billikens.

Rhode Island faces a huge challenge Friday when it travels to Dayton to take on the Flyers.

With the non-conference portion of the schedule just about complete, the field hockey teams in the Atlantic 10 are looking forward to engaging in conference play starting this week.

The road to the A-10 Championship, which will take place one month from today, begins this Friday and features a full slate of games on the schedule.

Conference-leading Lock Haven will play its first A-10 game in history, hosting defending conference champion Richmond.

The Lady Eagles (9-4) will rely on their high-powered attack to earn their eighth- consecutive victory, guided by senior Amy Hordendorf and junior Kristi Shepps, who lead the A-10 with 13 goals apiece so far this season.

Second place La Salle will hit the road to take on West Chester, looking for some revenge.
